Volume 13594

Proceedings of SPIE 0277-786X, V. 13594

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Modeling and Performance Predictions XV*, edited by Mark A. Kahan, Catherine Merrill, Proc. of SPIE 13594, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SPACE-BORNE AND GROUND-BASED SENSORS/TELESCOPES

- 13594 02 **Performance and modelling of a deployed diffractive optical element for space-based LiDAR** [13594-2]
- 13594 03 **Performance prediction of 1d lobster eye x-ray optics for astronomical observations** [13594-3]
- 13594 04 **Navigating standards related to optics** [13594-4]
- 13594 05 **Methods for determining the blackbody radiation and photon rate for an infrared telescopes** [13594-36]

OPTO-MECHANICAL

- 13594 07 **Optomechanical tolerancing of drop-in optical systems** [13594-8]
- 13594 08 **Simulating the effects of physical shocks on optical performance with Ansys LS-DYNA and Zemax OpticStudio** [13594-9]
- 13594 09 **High sensitivity, high bandwidth photonic integrated optomechanical accelerometer: a numerical approach** [13594-10]

STRAY LIGHT

- 13594 0A **Sunshades and out-of-field stray light performance for well-baffled systems** [13594-11]
- 13594 0B **Contamination-tolerant antireflection coating designs** [13594-12]

SOURCES AND DETECTORS

- 13594 0C **Emulating single fluorophores with fluorescent beads** [13594-15]

FILTERS

- 13594 OE **Enhancing imaging performance with hybrid ND and IR-cut filter technology for daytime and nighttime applications** [13594-18]

FABRICATION

- 13594 OG **A diffusion model enhanced source optimization for fab productivity** [13594-20]
- 13594 OH **A general discussion on synthetic scene generation methodologies for EO simulation from an AI perspective** [13594-35]

POSTER SESSION

- 13594 OI **Evaluating transmission parameters in coexisting on-off keying and 400G coherent optical systems** [13594-22]
- 13594 OJ **Optical design of LWIR and MWIR camera system for gas detection** [13594-23]
- 13594 OK **Optimization and performance prediction of strip-loaded waveguides and power splitters on an SOI platform** [13594-25]
- 13594 OM **Inverse design of non-periodic circular cavities for efficient spin-photon interfacing by genetic algorithm** [13594-29]
- 13594 OO **Design of a 33:67 beam splitter via inverse optimization on a symmetric SOI platform** [13594-31]
- 13594 OP **Experimental and numerical study on alignment requirements for the generation of OAM light beams with holographic beam shaping and spiral phase plates** [13594-32]
- 13594 OQ **Design of compact, efficient, and low crosstalk elliptical-shaped waveguide crossings** [13594-34]

DIGITAL POSTER SESSION

- 13594 OR **Ray-tracing modeling of coherent free-space optical links** [13594-21]
- 13594 OS **Geometry optimization of bimorph deformable mirror control elements for increasing compensation aberration capability** [13594-33]
