SPIE

Volume 13598

Proceedings of SPIE 0277-786X, V. 13598

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *New Concepts in Solar and Thermal Radiation Conversion VI*, edited by Peter Bermel, Jeremy N. Munday, Proc. of SPIE 13598, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PHOTOVOLTAICS I

13598 02 **Nanovoid-driven light management in emerging c-Si solar technologies** [13598-1]

PHOTOVOLTAICS II

13598 03 **Temperature-dependent evolution of photoluminescence** [13598-6]

RADIATIVE COOLING

13598 04 **Adapting radiative thermoregulation textiles to warming cities** [13598-7]

13598 05 **Light-enhanced salt water evaporation and cooling with a white ceramic wick: areal and edge effects from the wick** [13598-9]

13598 06 **First order calculations of the relative thermal footprint of adaptive and traditional radiative coolers** [13598-11]

THERMOPHOTOVOLTAICS

13598 07 **Quantifying the performance of optical emitters in thermophotovoltaics with single- and dual-junction cells** [13598-17]

POSTER SESSION

13598 08 **Femtosecond laser processing of metal-oxide nanostructures for flexible photo-electrochemical cell** [13598-21]
