Volume 13599

Proceedings of SPIE 0277-786X, V. 13599

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optomechanical Engineering 2025*, edited by Keith B. Doyle, Brandon D. Chalifoux, Proc. of SPIE 13599, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

METROLOGY AND CHARACTERIZATION

- 13599 02 **Optomechanical gravity gradiometer for remote sensing** [13599-1]
- 13599 03 **Identification of opto-mechanical defects in large stray light baffles using time-of-flight diagnostics** [13599-2]
- 13599 04 **Design and performance of the coherent surface-scattering imaging solid sample station for the advanced photon source upgrade** [13599-3]
- 13599 05 **Mechanical design of the nano-focusing KB optics positioning system for the APS 19-ID beamline** [13599-4]

HARSH ENVIRONMENTS

- 13599 08 **Lap shear analysis and nonlinear finite element analysis of EA9313 AERO epoxy bonding in optomechanical systems for space mirrors** [13599-7]
- 13599 09 **Precision and robustness in harsh environments: development and testing of ruggedized telescopes** [13599-8]
- 13599 0A **Dragonfly mission window assembly design** [13599-9]
- 13599 0B **Optomechanical design of the DragonCam microscopic camera** [13599-10]

LIGHTWEIGHT MIRRORS

- 13599 0C **Design and analysis of large lightweight mirrors for ground and space telescopes: funny things happen at infinity (Invited Paper)** [13599-11]
- 13599 0D **Recent progress towards 3D printed lightweight glass mirrors** [13599-12]
- 13599 0E **Enveloping optical results** [13599-14]

POSTER SESSION

- 13599 OF **Design and implementation of mode-locked external fiber-based resonator for quantum dot semiconductor laser for solid-state quantum systems** [13599-15]
- 13599 OG **Ruggedized optomechanical mounts to achieve a low-cost interferometer** [13599-17]
- 13599 OI **Ultrafast laser welding of fused silica and sapphire** [13599-19]
- 13599 OJ **Tunable ultra-stable composites and laser interference dilatometry** [13599-20]
- 13599 OK **Study on the enhancement of AISi10Mg surface quality using laser-assisted module in diamond turning machining** [13599-21]
- 13599 OM **A compact, cost-effective apparatus for environmental testing of optical component durability** [13599-24]
- 13599 ON **CoLoRS as the new spectroscopic capability for small robotic telescopes: optomechanical design** [13599-26]
- 13599 OO **Problems and solutions in constructing a two-axis gimbal using a large slit diaphragm flexure** [13599-27]
- 13599 OQ **Structural-thermal-optical performance (STOP) analysis of a theoretical Newtonian telescope using the Ansys-Zemax-STAR package** [13599-29]
