Volume 13606

Proceedings of SPIE 0277-786X, V. 13606

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Applications of Machine Learning 2025*, edited by Michael E. Zelinski, Tarek M. Taha, Barath Narayanan, Abdul A. S. Awwal, Khan M. Iftekharuddin, Proc. of SPIE 13606, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

REMOTE SENSING

- 13606 02 **Tracking radiometrically accurate synthetic moving ground vehicles from time-offset satellite image bands** [13606-1]
- 13606 03 **Enhancing explainability in hyperspectral target identification using PEEK-based feature attribution** [13606-2]

OPTICS

- 13606 07 **Extending the depth-of-focus using fuzzy logic and an intensity mask** [13606-7]
- 13606 08 **Waveguide configuration analysis for optical joint transform correlator: optimizing accuracy in photonic convolutional accelerators** [13606-8]
- 13606 09 **Laser-based holography for projecting adversarial perturbations to attack image classifiers** [13606-9]

INDUSTRIAL AND BUSINESS APPLICATIONS

- 13606 0F **Defect-driven quality classification of wooden lamellae using computer vision** [13606-16]
- 13606 0G **Deep-learning-based multisensor fusion for in situ defect prediction in additive manufacturing** [13606-17]
- 13606 0H **Comparative study of machine learning algorithms for the prediction of amorphous Fe-based materials** [13606-18]
- 13606 0I **Leveraging supervised learning for large-scale automated characterization of additively manufactured metals** [13606-19]
- 13606 0J **PIREC: personalized in-session recommendation engine for real-time retrieval of short-term user preferences** [13606-20]
- 13606 0K **Machine learning for business intelligence** [13606-21]

ASTRONOMY, BIG PHYSICS

- 13606 OL **Analysis of convolutional neural networks and vision transformers in direct imaging for high-contrast exoplanet detection** [13606-23]
- 13606 OM **Deep-learning-based domain adaptation for cavity fault prediction at Jefferson Laboratory** [13606-24]

ALGORITHMS + HARDWARE

- 13606 ON **MCMC-LIME: enhancing stability of LIME using Markov chain Monte Carlo approach** [13606-25]
- 13606 OO **Interpretable correlation map (ICM): a derivative of the feature maps to improve visual explainability in convolutional neural networks** [13606-26]
- 13606 OP **The role of noisy data in improving CNN robustness for image classification** [13606-27]
- 13606 OQ **Monocular underwater vision pipeline for 6DoF annotations with inpainting-based image augmentation** [13606-28]
- 13606 OR **Anomaly detection of CAN bus messages on neuromorphic hardware** [13606-30]
- 13606 OS **Hyperspectral neural radiance fields for 3D scene understanding of gas plumes** [13606-4]

POSTER SESSION

- 13606 OT **Deep-learning-based displacement measuring interferometry for noncentered and irregular fringes** [13606-31]
- 13606 OU **An enhanced shoreline detection method using a modified pix2pix cGAN-based SAR data generator** [13606-33]
- 13606 OV **Scalable AI-assisted optical radio environment map estimation for indoor visible-light communication systems (AI-VLCmaps)** [13606-35]
- 13606 OW **Privacy-centric digital surveillance through homomorphic encryption and deep learning** [13606-36]
- 13606 OX **Automatic brachial plexus segmentation to facilitate targeted echo block using convolutional neural networks** [13606-37]
- 13606 OY **SecuFarmArch: AI-driven cybersecurity architecture for smart farming using digital twins and machine learning** [13606-38]
- 13606 OZ **Data efficient meta-atom BSDF via hybrid neural and physical representation** [13606-39]

- 13606 10 **Analyzing transfer-learning techniques for EO/IR seeker ATR systems** [13606-41]
- 13606 11 **Validation and classification of assembly defects in consumer electronic motherboards** [13606-42]
- 13606 12 **Detection and classification of objects in Metis solar corona images using deep learning** [13606-43]
- 13606 13 **Polarimetry-based tumor segmentation for pancreatic cancer using film-covered hematoxylin-and-eosin-stained slides** [13606-44]
- 13606 14 **Mueller matrix polarimetry for fresh ex-vivo cancerous tissue segmentation** [13606-45]
- 13606 15 **Decision boundary instance generation and characterization of infrared image classifiers** [13606-46]
- 13606 16 **Alzheimer's unveiled: harnessing deep neural networks to decode Alzheimer's disease** [13606-47]
- 13606 17 **Hybrid deep learning and transfer learning approaches in solar flare detection** [13606-48]
- 13606 18 **Identifying novel GLS-1 inhibitors with deep transformer models and 3D docking analysis to accelerate cancer drug discovery** [13606-49]
- 13606 19 **AI-driven method for weed detection in soy plants using YOLO instance segmentation model** [13606-50]
- 13606 1A **Harnessing computational models for efficient histone deacetylase6 inhibitor identification** [13606-51]
- 13606 1B **Predictive modeling for hypertension drug discovery using transformer-based models** [13606-52]
- 13606 1C **Data-driven approach to revolutionize mental health diagnostics** [13606-53]
- 13606 1D **Revolutionizing flood mapping: a deep learning approach for accurate image segmentation** [13606-54]
- 13606 1E **Autonomous lookahead for early risk tracking (ALERT): AI-driven predictive simulation for safe and proactive driver intervention** [13606-55]

DIGITAL POSTER SESSION

- 13606 1F **Investigating the performance of deep-segmentation neural network models for shaped charge and fragmentation warhead effectiveness testing** [13606-56]
- 13606 1G **Synthetic-to-real domain bridging for single-view 3D reconstruction of ships for maritime monitoring** [13606-29]
