SPIE

Volume 13610

Proceedings of SPIE 0277-786X, V. 13610

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *ODS 2025: Industrial Optical Devices and Systems*, edited by Yuzuru Takashima, Kazuyoshi Yamazaki, Proc. of SPIE 13610, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

REVIVING OPTICAL DATA STORAGE

- 13610 02 **Deep-learning-enhanced single-shot detection of polarization- and phase-encoded signals for holographic data storage (Invited Paper)** [13610-4]

APPLICATION OF MEMS AND PIC SPATIAL LIGHT MODULATORS

- 13610 03 **Pixel-matching optics design and analysis using two Texas Instruments phase light modulators for beam steering in NIR (Invited Paper)** [13610-5]

IMAGE RECONSTRUCTION AND OPTICAL COMPUTING

- 13610 04 **Computational lensless imaging utilizing aggressive design of coded optical systems (Invited Paper)** [13610-8]
- 13610 05 **Cost-effective 3D reconstruction with minimal on-site labor for industrial metaverse applications** [13610-10]
- 13610 06 **Improved backtracking method applicable to optical quantum calculation** [13610-11]

DISPLAY FOR AR AND HUMAN INTERFACE

- 13610 07 **Optical technologies for automotive displays (Invited Paper)** [13610-12]
- 13610 08 **Analysis of pupil aiming illumination scheme for AR waveguide combiner** [13610-15]

INDUSTRIAL SENSING

- 13610 0B **Infrastructure monitoring system on expressway using optical axis control (Invited Paper)** [13610-19]
- 13610 0C **A high-resolution hyperspectral camera with robust single-image calibration for pixel registration and distortion correction** [13610-22]

POSTER SESSION

- 13610 0D **Texas Instruments phase light modulator (TI-PLM) calibration via multi-PSF-based phase retrieval [13610-7]**
- 13610 0E **Phase error correction of MEMS-based spatial phase light modulators by computer generated holograms (CGH) [13610-25]**
- 13610 0F **Diffraction efficiency of MEMS-based phase light modulator designed for visible spectrum used for infrared beam steering applications [13610-26]**
