Volume 13612

Proceedings of SPIE 0277-786X, V. 13612

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Infrared Remote Sensing and Instrumentation XXXIII*, edited by Marija Strojnik, Jörn Helbert, Proc. of SPIE 13612, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510691322

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

OPTICAL ENGINEERING PLENARY

- 13612 02 **The many challenges of planetary remote sensing (and why it's totally worth it!) (Plenary Paper)** [13612-500]

EXPLORATION IN THE FUTURE

- 13612 03 **In situ chemical sensing methods and air quality monitoring in the atmospheric boundary layer using small uncrewed aerial systems (Invited Paper)** [13612-2]
- 13612 04 **Research on key technologies of quantum image enhancement data processor** [13612-3]

TECHNOLOGIES OF THE FUTURE

- 13612 05 **A novel method for the analysis of polygon mirror-based laser scanners (Invited Paper)** [13612-4]
- 13612 06 **Cryogenic gas cell for infrared space instrumentation** [13612-5]
- 13612 07 **Opto-mechanical properties of monocrystalline germanium** [13612-6]
- 13612 08 **BRDF and point source transmittance (PST) measurements: review** [13612-7]
- 13612 09 **Measuring BRDF small-angle scattering: new concepts using both power spectrum and nondiffraction beams** [13612-20]

SELECT TECHNOLOGIES

- 13612 0A **Integration of vibration sensing in time transfer infrastructure (Invited Paper)** [13612-8]
- 13612 0B **Compact MEMS-based Fabry-Perot interferometers for space applications (Invited Paper)** [13612-9]

SOLAR SYSTEM EXPLORATION

- 13612 0C **UV to IR spaceborne spectroscopic exploration of planets with European lead missions: achievements, results, future programs, and scientific goals (Invited Paper)** [13612-12]
- 13612 0D **The instrumentation suite at the Planetary Laboratories department (PLL) of the Institute of Space Research - DLR** [13612-13]
- 13612 0E **The Sample Analysis Laboratory (SAL) at the German Aerospace Center (DLR) Berlin: a cutting-edge laboratory for extraterrestrial material analysis** [13612-14]
- 13612 0F **Measuring emissivity in the field and the lab with an emulator of the VERITAS Venus Emissivity Mapper (VEM)** [13612-15]
- 13612 0G **The Venus Emissivity Mapper (VEM): instrument science performance requirements derived from VERITAS and EnVision** [13612-16]

POSTER SESSION

- 13612 0H **Research on the key technology of quantum Chinese medicine imaging analyzer based on hyperspectral imaging** [13612-18]
- 13612 0I **VIS-NIR spectral characterization of mistletoe leaves by diffuse reflectance spectroscopy** [13612-19]
- 12612 0J **Nontraditional oxide glass gain media derived from containerless processing techniques** [13612-21]
- 13612 0K **Dynamic phase-shift modulation in a Mach-Zehnder interferometer using Risley prisms** [13612-22]
- 13612 0L **Signal-to-noise ratio measurement in a Mach-Zehnder interferometer using Risley prisms and lock-in detection** [13612-23]
- 13612 0M **Temporal phase unwrapping algorithm based on composite fringe patterns for 3D measurement object with surface discontinuities** [13612-25]
