Volume 13613

Proceedings of SPIE 0277-786X, V. 13613

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Infrared Sensors, Devices, and Applications XV*, edited by Priyalal S. Wijewarnasuriya, Arvind I. D'Souza, Proc. of SPIE 13613, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510691346

ISBN: 9781510691353 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

IR OPTOELECTRONIC DEVICES I

- 13613 02 **Numerical modelling of infrared detectors: state-of-the-art and open problems (Keynote Paper)** [13613-1]
- 13613 03 **Leonardo large area avalanche photo-diode arrays (Invited Paper)** [13613-2]
- 13613 04 **Effect of growth parameters on stoichiometry and electrical properties of amorphous vanadium oxide (VO_x) thin films** [13613-3]

IR OPTOELECTRONIC DEVICES II

- 13613 05 **Simulation model of the performance of a Ga-free T2SL barrier photodetector** [13613-4]
- 13613 08 **Novel trends in optronic imaging** [13613-26]

MODELING OF OPTOELECTRONIC DEVICES I

- 13613 0A **Very long-wave infrared detectors with improved low temperature performance (Invited Paper)** [13613-8]

MODELING OF OPTOELECTRONIC DEVICES II

- 13613 0B **A computational study of radiation damage in HgCdTe (Invited Paper)** [13613-10]
- 13613 0C **First-principles calculations of vacancies related to the Shockley-Read-Hall process in MWIR and LWIR HgCdTe alloys (Invited Paper)** [13613-11]
- 13613 0D **Loss-induced transparency and ITO-based modulator for photonic integrated circuit** [13613-12]
- 13613 0F **Influence of process parameters and characterization of niobium-doped vanadium oxide thin films for microbolometers** [13613-27]

NOVEL DEVICES AND CHARACTERIZATION TECHNIQUES

- 13613 OH **Thermal characterization of lipid and aqueous layers on tear film** [13613-13]
- 13613 OI **TCSEL: a novel high-power laser architecture with enhanced efficiency and beam control for next-generation LiDAR applications** [13613-14]
- 13613 OJ **Optimization of thermomechanical stresses in infrared focal plane arrays: designing a finite-element modeling-based high-throughput multiobjective workflow** [13613-15]
- 13613 OK **Thermal damage characterization based on the laser-matter interaction simulation** [13613-17]
- 13613 OL **Complementary metal-oxide-semiconductor monolithic germanium tin short-wave infrared focal plane array** [13613-21]

DIGITAL POSTER SESSION

- 13613 OP **Spectrum-feature extraction from diffuse reflectance for two-layer topologies of NIR-SWIR absorbing dyes on substrate** [13613-20]
