Volume 13614

Proceedings of SPIE 0277-786X, V. 13614

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *CubeSats, SmallSats, and Hosted Payloads for Remote Sensing IX*, edited by Sachidananda R. Babu, Thomas S. Pagano, Jeffery J. Puschell, Proc. of SPIE 13614, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

FLYING OR PLANNED EARTH FLIGHT INSTRUMENTS AND MISSIONS

- 13614 03 **TROPICS observations of atmospheric vertical structure: performance assessments and comparisons with ATMS** [13614-6]
- 13614 04 **Broadband thermal infrared spectrometry for the polar radiant energy in the Far-InfraRed Experiment (PREFIRE) (Invited Paper)** [13614-3]

FUTURE EARTH INSTRUMENTS AND MISSION CONCEPTS

- 13614 07 **Plasma irregularities at the equator mission concept: a VLEO CubeSat investigation of ionospheric irregularities** [13614-9]

BEYOND EARTH MEASUREMENTS AND MISSIONS

- 13614 08 **Beyond lunar ice cube: next generation 12U orbiting lunar water explorer** [13614-10]
- 13614 09 **Midinfrared hyperspectral imaging for Moon and beyond** [13614-11]

ENABLING TECHNOLOGIES

- 13614 0A **ACMES: the next generation of multispectral Earth observations from a small satellite platform** [13614-14]
- 13614 0B **Distributed space-based sensors using optically enabled CubeSats** [13614-15]
- 13614 0C **Optical design of EO/IR off-axis reflective system for remote sensing CubeSat** [13614-17]

POSTER SESSION

13614 0D **A freeform optical design of a 12U CubeSat for Earth observation** [13614-18]

DIGITAL POSTER SESSION

13614 0E **The variable voltage ion protection experiment (VVIPRE) remote airglow sensor performance (Invited Paper)** [13614-4]
