SPIE

Volume 13617

Proceedings of SPIE 0277-786X, V. 13617

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Communication and Propagation through the Atmosphere and Oceans XIV*, edited by Jaime A. Anguita, David T. Wayne, Proc. of SPIE 13617, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Conference Committee

ATMOSPHERIC TURBULENCE I: JOINT SESSION WITH CONFERENCES 13617 AND 13619

- 13617 02 **Red versus Infrared: comparing 900nm and 1550nm Lidar performance in arctic winter conditions** [13617-1]

ATMOSPHERIC TURBULENCE II: JOINT SESSION WITH CONFERENCES 13617 AND 13619

- 13617 03 **Phase screen model of turbulent and turbid media for Gaussian beam propagation** [13617-3]
- 13617 05 **A fractal noise approach to three-dimensional optical turbulence simulation** [13617-5]

ATMOSPHERIC TURBULENCE III: JOINT SESSION WITH CONFERENCES 13617 AND 13619

- 13617 06 **Measuring turbulence height profiles in different environments** [13617-6]
- 13617 07 **Laboratory turbulence generator for evaluating nodal sensors** [13617-35]

ATMOSPHERIC TURBULENCE IV: JOINT SESSION WITH CONFERENCES 13617 AND 13619

- 13617 08 **Digital adaptive optics for event-based cameras** [13617-8]

OPTICAL GROUND STATIONS FOR SATELLITE LASER COMMUNICATIONS

- 13617 09 **Sparse optical test (SpOT) array for pointing and beam profiling of laser communication links (Invited Paper)** [13617-9]
- 13617 0A **Ground optical communication array terminal (GOCArT)** [13617-10]

COMPONENTS AND MITIGATION TECHNIQUES FOR LASER COMMUNICATIONS I

- 13617 0D **An SDA burst-mode waveform optimized receiver** [13617-14]
- 13617 0F **Effect of the Cassegrain Telescope on the scintillation of Mathieu-Gauss beams** [13617-16]

COMPONENTS AND MITIGATION TECHNIQUES FOR LASER COMMUNICATIONS II

- 13617 0G **Impact of servo bandwidth limitations on adaptive optics system performance in non-Kolmogorov turbulence** [13617-48]
- 13617 0H **Atmospheric turbulence mitigation through an integrated photonic circuit receiver** [13617-19]
- 13617 0I **Optical coupling performance using an FSM to mitigate angle-of-arrival fluctuations in a 1km laser link** [13617-20]

TURBULENCE EFFECTS ON SLANT PATHS

- 13617 0J **Dependence of uplink beam wander and scintillation on the transmitter beam waist: analytical model and numerical results for Earth-to-LEO links** [13617-21]
- 13617 0K **Deep reinforcement learning for beam pointing control in ground-to-LEO laser communications under time-varying turbulence** [13617-22]
- 13617 0L **Simulation and performance of partially coherent beams propagating through turbulence over vertical paths** [13617-23]

ADVANCED TOPICS IN OPTICAL PROPAGATION

- 13617 0O **Long range atmospheric laser propagation and filamentation-modulation instabilities** [13617-27]
- 13617 0P **Cross correlation measurement resilience under weak turbulence for characterization of partially coherent beams** [13617-28]
- 13617 0Q **Using the symmetry properties of OAM modes for free space optical communication** [13617-29]

ATMOSPHERIC TURBULENCE: MEASUREMENTS AND DEMONSTRATIONS

- 13617 OR **Evaluation of binary polarization-based signal modulation for laser communications in turbulence** [13617-31]
- 13617 OS **Enhancing free space optical communication with orbital angular momentum: a case study on multichannel multiplexing and signal reliability** [13617-32]
- 13617 OT **Experimental study on the impact of air turbulence on OAM-based optical links employing local demultiplexing** [13617-33]
- 13617 OU **A study of C_n^2 surface layer lapse rate** [13617-7]

ATMOSPHERIC TURBULENCE: MODELING AND SIMULATION

- 13617 OW **Predicting optical turbulence in the free atmosphere by means of a general circulation model** [13617-37]
- 13617 OX **Exploring the effects of non-Kolmogorov turbulence on intensity statistics via wave optics simulations** [13617-38]
- 13617 OY **Exploring the propagation of Gaussian and Laguerre-Gaussian beams in anisotropic atmospheric turbulence: implications for beam ellipticity and turbulence-dependent effects** [13617-39]

POSTER SESSION

- 13617 11 **Electron distribution measurements in plasma-sparks in air via Thomson scattering** [13617-43]
- 13617 12 **An integrated coherent optical combiner** [13617-44]
- 13617 14 **Underwater visible light communication system using acoustic transceiver alignment** [13617-46]

DIGITAL POSTER SESSION

- 13617 15 **Single- and double-hop scintillation index for Gaussian beam in arbitrary oceanic turbulence** [13617-30]
- 13617 16 **Optical turbulence tomography via optimal transport** [13617-40]
