

PROCEEDINGS OF SPIE

Unconventional Imaging, Sensing, and Adaptive Optics 2025

Jean J. Dolne
Santasri R. Bose-Pillai
Matthew Kalensky
Editors

3–7 August 2025
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 13619

Proceedings of SPIE 0277-786X, V. 13619

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Unconventional Imaging, Sensing, and Adaptive Optics 2025*, edited by Jean J. Dolne, Santasri R. Bose-Pillai, Matthew Kalensky, Proc. of SPIE 13619, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix Conference Committee

UNCONVENTIONAL IMAGING I

- 13619 02 **Peering into the 3D world of rat brain tissue with digital holographic microscopy** [13619-1]
- 13619 03 **Harmonic OCT for real-time retina flattening** [13619-2]

UNCONVENTIONAL SENSING I

- 13619 06 **Motion video from isochrome transit rate** [13619-8]
- 13619 07 **Advancing ocean health monitoring: development of the fluorescence Lidar for ocean research: airborne (FLOR-A) instrument** [13619-10]
- 13619 08 **Red-cyan complementary color laser illumination (C²LI) for perceptually enhanced sensing and imaging of structurally colored samples** [13619-11]
- 13619 09 **Real-time monitoring of lab-scale hydraulic fracturing using fiber-optic distributed acoustic sensing (DAS)** [13619-12]

ATMOSPHERIC TURBULENCE I: JOINT SESSION WITH CONFERENCES 13617 AND 13619

- 13619 0A **An updated assessment of the energy balance method to quantify optical turbulence in the maritime environment** [13619-16]
- 13619 0B **Continued investigation on image blur due to aerosols and correlation to aerosol morphology and optical properties** [13619-17]

ATMOSPHERIC TURBULENCE II: JOINT SESSION WITH CONFERENCES 13617 AND 13619

- 13619 0D **A machine learning approach for predicting soil heat flux** [13619-19]

ATMOSPHERIC TURBULENCE III: JOINT SESSION WITH CONFERENCES 13617 AND 13619

- 13619 OE **Optical turbulence forecast for ground-based astronomy and free-space optical communication (Invited Paper)** [13619-20]
- 13619 OF **Atmospheric profiles calculated from Starfire Atmospheric Monitor (SAM) data** [13619-21]
- 13619 OG **Evaluating optical turbulence profiling performance using wave optics simulations** [13619-88]

ATMOSPHERIC TURBULENCE IV: JOINT SESSION WITH CONFERENCES 13617 AND 13619

- 13619 OH **Method to estimate wavefront error in a ground-LEO optical uplink beam (Invited Paper)** [13619-24]
- 13619 OI **Measurements of optical turbulence in the lower troposphere by means of arrays of in-situ sensors mounted on stationary and moving platforms** [13619-25]
- 13619 OJ **Cn2 profile characterization from wavefront sensing in moderate turbulence** [13619-26]

AERO OPTICS I

- 13619 OK **Design and applications of dual-wavelength digital holography wavefront sensor** [13619-28]
- 13619 OL **Boiling flow parameter estimation from boundary layer data** [13619-29]
- 13619 OM **Density field studies of a supersonic shear layer using non-intrusive optical methods** [13619-30]

AERO OPTICS II

- 13619 ON **Computational investigation of aero-optical discrepancies in a free shear layer (Invited Paper)** [13619-31]
- 13619 OO **Experimental measurements and compensation of optical phase discontinuities** [13619-32]
- 13619 OP **Simultaneous Shack-Hartmann and digital holography measurements of the optical effect of a subsonic compressible shear layer** [13619-33]
- 13619 OQ **Modal vibration modeling of a hemispherical turret in subsonic flow** [13619-34]
- 13619 OR **Tomographic wavefront sensing simulations for wind tunnel measurements** [13619-35]

UNCONVENTIONAL ADAPTIVE OPTICS I

- 13619 OT **Adaptive wavefront control based on scintillation-resistant phase aberration sensing for free-space optical communication applications** [13619-37]
- 13619 OU **Benchtop adaptive-optics testing using a digital-holographic wavefront sensor** [13619-13]

UNCONVENTIONAL SENSING II

- 13619 OV **A new method for wavefront sensing using optical masking interferometry** [13619-41]
- 13619 OW **Phase diversity wavefront sensing in deep turbulence via metasurface optics and noise-tolerant CNN** [13619-42]
- 13619 OX **Digital holography with an engineered reference beam** [13619-44]
- 13619 OY **Dynamic image correction and wavefront sensing with a digital holographic sensor using 4D implicit neural representations** [13619-45]
- 13619 OZ **Four-agent coherent plug & play: physics-constrained deep learning for imaging correction and wavefront sensing in deep turbulence** [13619-46]
- 13619 IO **Deep turbulence sensing with mobile test bed using digital holography** [13619-49]

UNCONVENTIONAL ADAPTIVE OPTICS II

- 13619 I2 **Feedforward control for the MAPS adaptive secondary mirror** [13619-52]
- 13619 I3 **Adaptive Optics Laboratory at LLNL (Invited Paper)** [13619-54]

UNCONVENTIONAL IMAGING II

- 13619 I4 **Design and demonstration of a dual-plane imager** [13619-56]
- 13619 I5 **Efficient multilook coherent imaging with temporally dependent speckle noise** [13619-57]
- 13619 I6 **Increasing imaging resolution through scattering media via in situ characterization of the point-spread function** [13619-59]
- 13619 I7 **Experimental ghost imaging in atmospheric turbulence** [13619-60]

ATMOSPHERIC MODELING AND CHARACTERIZATION I

- 13619 18 **Optimizing branch-point detection using machine learning** [13619-14]
- 13619 19 **Calibration of an atmospheric turbulence simulator** [13619-62]
- 13619 1A **Design and characterization of a tabletop optical turbulence simulator using high-speed spatial light modulators** [13619-63]
- 13619 1B **The influence of circularly polarized light on FMCW LiDAR return signal persistence in fog environments** [13619-66]
- 13619 1C **Branch-point density statistics from wave-optics simulation and real propagation** [13619-89]
- 13619 1D **Benchtop study of bandwidth requirements for tracking in turbulence** [13619-86]
- 13619 1E **Realistic digital holography demonstrator: a STEM outreach tool for teaching optics and lasers** [13619-64]

UNCONVENTIONAL IMAGING III

- 13619 1H **Validating event-based vision sensor characterization methods through simulation** [13619-71]

UNCONVENTIONAL SENSING III

- 13619 1J **Validation of event-based wavefront sensor test bed using wave optics simulations** [13619-75]
- 13619 1K **Imaging mouse whisking using an event camera** [13619-76]
- 13619 1L **Semi-synchronous hybrid detection algorithm for event-based sensing** [13619-78]

UNCONVENTIONAL SENSING IV

- 13619 1M **Post-processing techniques for the reduction of range chatter in 3D holographic imaging with a pilot tone** [13619-81]
- 13619 1N **Edge effects mitigation in phase-diversity wavefront sensing and imaging algorithm** [13619-82]
- 13619 1O **Exploiting phase light modulators for low-SWaP real-time wavefront correction at high-resolution** [13619-83]

ATMOSPHERIC MODELING AND CHARACTERIZATION II

- 13619 1P **Measuring the Tyler frequency with a Shack-Hartmann wavefront sensor** [13619-84]
- 13619 1Q **Characterizing the characterization of laser propagation through the atmosphere using a colinear Shack-Hartmann wavefront sensor** [13619-85]
- 13619 1R **Karhunen-Loève modes of laser arrays** [13619-87]

POSTER SESSION

- 13619 1T **PCA tracking filters for event-based imagers** [13619-93]
- 13619 1U **Jitter sensing and control for multiplane phase retrieval** [13619-94]
- 13619 1V **Phase retrieval using multiplane intermediate-focal coherent diffractive wavefront sensing** [13619-95]
- 13619 1W **Performance comparison of the nonlinear curvature and Shack-Hartmann wavefront sensors in strong turbulence** [13619-96]
- 13619 1X **Comparison of phase-unwrapping methods for adaptive optics wavefront sensing** [13619-97]
- 13619 1Z **Single-shot multiple wavefront sensing in Kolmogorov turbulence** [13619-99]
- 13619 22 **Image reconstruction in digital adaptive optical images using convolutional neural networks** [13619-102]
- 13619 23 **Non-contact video-based photoplethysmography for assessing cardiovascular dynamics** [13619-103]
