

PROCEEDINGS OF SPIE

UV/Optical/IR Space Telescopes and Instruments: Innovative Technologies and Concepts XII

**Jonathan W. Arenberg
H. Philip Stahl**
Editors

**3–5 August 2025
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 13623

Proceedings of SPIE 0277-786X, V. 13623

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *UV/Optical/IR Space Telescopes and Instruments: Innovative Technologies and Concepts XII*, edited by Jonathan W. Arenberg, H. Philip Stahl, Proc. of SPIE 13623, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

HABITABLE WORLDS OBSERVATORY (HWO) OVERVIEW

- 13623 02 **Technology roadmapping and maturation planning to enable UV-Vis astrophysics with the Habitable Worlds Observatory** [13623-4]

HWO D19 STUDY

- 13623 03 **Progress on STABLE: development of technologies for ultra-stable systems** [13623-6]
- 13623 04 **Ultrastability evaluation of pathfinder architecture for Habitable Worlds Observatory** [13623-7]
- 13623 05 **ULTRA-CT: status report** [13623-8]

HWO ULTRA-STABLE THERMAL

- 13623 06 **Environmental shielding and thermal stability of primary mirror for Habitable Worlds Observatory** [13623-9]
- 13623 07 **Precision thermal control testbed** [13623-10]

HWO COATING TECHNOLOGY

- 13623 08 **Variable-angle, spectroscopic ellipsometry study based on determining the effect of first contact polymer on XeF₂-passivated MgF₂ on Al** [13623-19]

HWO CORONAGRAPH AND STRAYLIGHT

- 13623 09 **AstroPIC II: overview of technology development for a near-infrared photonic integrated coronagraph for the Habitable Worlds Observatory** [13623-15]
- 13623 0A **Foundations of modeling micrometeoroid induced damage and its stray-light contributions for HWO** [13623-17]
- 13623 0B **Flowdown of the HWO error budget to mirror specifications constraining diffuse narrow angle scatter** [13623-16]

ROMAN SPACE TELESCOPE

- 13623 0C **Optical performance of Roman optical telescope assembly** [13623-20]
- 13623 0D **Phase retrieval in TVAC testing for the Roman Space Telescope Wide Field Instrument**
[13623-22]
- 13623 0E **Fine alignment and wavefront maintenance of a three-mirror anastigmat using full-field phase retrieval with algorithmic differentiation** [13623-23]

MISSION CONCEPTS: UV/VIS

- 13623 0F **Pathway towards the faintest gas emission detection: myth, obstacles, and breakthroughs**
[13623-28]
- 13623 0G **BavariaE: the Earth's atmosphere and exosphere explored by a minisat in the UV-VIS spectral region** [13623-31]
- 13623 0H **Theon: a proposal to the M8 launch slot of ESA's Voyage 2050 program, for the spectroscopic exploration of the UV and VIS universe** [13623-32]

MISSION CONCEPTS: FAR-IR

- 13623 0I **High spectral resolution spectroscopy with PRIMA** [13623-34]
- 13623 0J **The use of physical optics and machine learning in modelling the QUBIC beam pattern**
[13623-36]
- 13623 0K **First demonstration of four-mirror piezoelectric compact delay line for space interferometry**
[13623-37]

INSTRUMENTS: IMAGERS

- 13623 0L **Near ultraviolet sensitivity in a modified backside illuminated CMOS sensor** [13623-41]
- 13623 0M **Analysis of the differential distortions in multiconjugate adaptive optics-assisted astronomical instruments: the MAVIS perspective** [13623-43]

HWO INSTRUMENTS: MULTI-OBJECT SPECTROSCOPY

- 13623 ON **Ultraviolet contrast performance of the next generation micro-shutter arrays in development to enable multiobject spectroscopy on the Habitable Worlds Observatory** [13623-45]
- 13623 OO **Next-generation microshutter arrays for Habitable World Observatory** [13623-46]

HWO INSTRUMENTS: GRATINGS

- 13623 OP **Toward blazed UV gratings for the Habitable Worlds Observatory and beyond** [13623-49]

INSTRUMENTS: SPECTROMETERS

- 13623 OQ **SOLSPEC-NG: a compact UV spectrometer for high-precision solar spectral irradiance monitoring on a CubeSat platform** [13623-52]
- 13623 OR **UV integral field unit simulation tools for the upcoming Habitable Worlds Observatory** [13623-53]
- 13623 OS **Development and potential of new micro-mirror devices optimized for astronomy** [13623-54]
- 13623 OT **A kilometer-range laser hyperspectral imager for lunar exploration and science** [13623-55]

POSTER SESSION

- 13623 OU **Finite element analysis of the filter strip assembly qualification test for the EnVisS camera** [13623-42]
- 13623 OV **Efficient, broadband, and compact high-resolution photonic spectrographs at $R \sim 30,000$ realized through cascading** [13623-56]
- 13623 OW **Towards space-qualification of astrophotonic devices in the optical/IR** [13623-57]

DIGITAL POSTER SESSION

- 13623 OX **UVOIR to far-IR mirror technology development: year 3 status** [13623-58]
