

PROCEEDINGS OF SPIE

UV, X-Ray, and Gamma-Ray Space Instrumentation for Astronomy XXIV

**Oswald H. Siegmund
Keri Hoadley**
Editors

**5–7 August 2025
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 13625

Proceedings of SPIE 0277-786X, V. 13625

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *UV, X-Ray, and Gamma-Ray Space Instrumentation for Astronomy XXIV*, edited by Oswald H. Siegmund, Keri Hoadley, Proc. of SPIE 13625, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Conference Committee

SPACEBORNE EXPERIMENTS AND MISSIONS I

- 13625 02 **Gamma-ray burst polarimetry with the POLAR and POLAR-2 missions** [13625-1]
- 13625 03 **The high-speed x-ray camera on AXIS: design and performance updates** [13625-2]
- 13625 05 **Signal processing and data acquisition system for the BTO detectors onboard COSI**
[13625-4]

SPACEBORNE EXPERIMENTS AND MISSIONS II

- 13625 08 **Jupiter icy moons explorer ultraviolet spectrograph: results from payload checkouts 1 and 2 and the lunar-Earth gravity assist maneuver** [13625-8]
- 13625 09 **The Polstar UV spectropolarimetry mission** [13625-9]
- 13625 0A **Extreme ultraviolet radiation environments and astrospheres mission (ExtREAM)** [13625-10]
- 13625 0B **Surveying the stellar drivers of exoplanet evolution for the first time with the ESCAPE small explorer mission** [13625-11]

SUBORBITAL AND CUBESAT INSTRUMENTS I

- 13625 0C **The off-plane grating rocket experiment pathfinder (OGRE-P): a pathfinder mission for x-ray technology** [13625-12]
- 13625 0D **Verification of timing measurement and demonstration of pulsar-based navigation with the CubeSat x-ray observatory NinjaSat** [13625-13]
- 13625 0F **The CubeSat solar polarimeter (CUSP): mission overview II** [13625-15]

SUBORBITAL AND CUBESAT INSTRUMENTS II

- 13625 0H **INFUSE II: science and upgrades for the second launch of the far ultraviolet integral field spectrograph** [13625-17]
- 13625 0I **Post-flight calibration and component analysis for OAxFORTIS first light** [13625-18]

13625 OJ **The FLUID sounding rocket: Lyman ultraviolet imaging of nearby galaxies** [13625-19]

13625 OL **The Juniper CubeSat concept: mission overview** [13625-21]

UV AND SOFT X-RAY DETECTION I

13625 OM **Updates on the development of blocking filters using high throughput SiC grids** [13625-22]

13625 ON **Development and validation of novel SiC UV instrumentation for astronomy and planetary applications** [13625-23]

13625 OO **The x-ray camera for the auroral x-ray imager (AXIS)** [13625-24]

13625 OP **Detector developments for UV space missions** [13625-25]

OPTICAL COMPONENTS FOR UV AND X-RAY INSTRUMENTS

13625 OQ **Wide-field ultraviolet integral-field spectroscopy with the UMIS testbed experiment**
[13625-27]

HARD X-RAY AND GAMMA-RAY SPECTROSCOPIC TECHNIQUES I

13625 OU **Characterizing, correcting, and repairing the effects of radiation damage in the COSI germanium cross-strip detectors** [13625-31]

13625 OV **Optimized scintillation configuration for IMPISH hard x-ray detection** [13625-32]

13625 OW **Quantum efficiency measurements of the Speedster-EXD550 hybrid CMOS detectors at the Mn Ka and K β energies** [13625-33]

INSTRUMENT DEVELOPMENT AND TESTING

13625 OY **Enhancing COSI's event reconstruction capabilities with machine learning** [13625-35]

13625 OZ **First-principles response simulation of wide-gap CdTe-DSDs for the FOXSI solar sounding rocket experiment** [13625-36]

13625 IO **Mission design and development of the rocket experiment demonstration of a soft x-ray (REDSoX) polarimeter** [13625-37]

13625 11 **Development and testing of integrated readout electronics for next generation SiSeRO (single electron sensitive read out) devices** [13625-38]

13625 12 **Mechanical design and implementation of the BlackCAT payload** [13625-39]

UV AND SOFT X-RAY DETECTION II

13625 13 **Characterization and testing of a cross-delay line microchannel plate detector for the Aspera SmallSat mission** [13625-41]

13625 14 **The development of a hermetically sealed 100mm ALD MCP cross-strip detector** [13625-42]

HARD X-RAY AND GAMMA-RAY SPECTROSCOPIC TECHNIQUES II

13625 15 **Development of solar flare x-ray polarimeter with micro-pixel CMOS sensors** [13625-43]

13625 16 **INSPIRE: a wide-band x-ray and gamma-ray camera onboard the 65 kg small satellite GRAPHIUM** [13625-44]

13625 17 **Evaluation of activation characteristics and sensitivity of a broadband x-ray, gamma-ray camera on board a small satellite** [13625-45]

POSTER SESSION

13625 19 **Development and performance evaluation of a fully digitalized SOI pixel detector for x-ray astronomy** [13625-47]

13625 1B **Characterization of unexpected anomalies in the Metis UV channel on board Solar Orbiter** [13625-49]

13625 1C **Ground calibration plans for the AXIS high speed camera** [13625-50]

13625 1D **Performance of a 1U size ParaDAXAS, a Bragg reflection polarization spectrometer designed for use onboard CubeSat** [13625-51]

13625 1F **Electron multiplying CCDs for the Pathfinder off-plane grating rocket experiment** [13625-54]

13625 1I **Additive manufacturing of customized microchannel plate detectors for enhanced UV imaging and spectroscopy** [13625-58]

13625 1J **Design, development, and commissioning of a flexible test setup for the AXIS prototype detector** [13625-59]

- 13625 1K **Development of on-chip signal pattern generator aiming for reduction of external wiring of the x-ray SOI pixel detector** [13625-60]
- 13625 1L **Solar x-ray CubeSat for high-resolution spectroscopic polarimetry with x-ray SOI sensor and bent Bragg crystals** [13625-61]
- 13625 1M **The CUTE CubeSat mission: insights into instrument and spacecraft performance evolution over 4(!) years** [13625-62]
- 13625 1N **Cubesat solar polarimeter (CUSP) sensitivity estimation and performance optimization using Geant4** [13625-63]
- 13625 1O **Progress towards imaging with a cross strip anode readout via the GRAPH ROIC** [13625-65]
- 13625 1P **Design of a control and power system supporting a DMD-based spectrograph optimized for operation in space** [13625-66]
- 13625 1Q **Fast, low noise CCD systems for future strategic x-ray missions** [13625-67]
- 13625 1R **Calibration measurements for the BlackCAT CubeSat x-ray coded aperture telescope** [13625-68]
- 13625 1S **Operation of and results from germanium charge coupled devices** [13625-70]
- 13625 1T **Calibration of germanium double-sided strip detectors for the Compton spectrometer and imager (COSI) satellite** [13625-72]
- 13625 1U **Spectral studies of hydrogen absorption cell technology: characterizing FUV absorption bandpass** [13625-74]
- 13625 1V **Development of CCDs for the AXIS astrophysics probe concept** [13625-75]
- 13625 1W **The multiphysics analysis, design, and testing of CUSP, a CubeSat mission for space weather and solar flares x-ray polarimetry** [13625-76]
- 13625 1Y **The integrating miniature piggyback for impulsive solar hard x-rays (IMPISH): a spectrometer for the GRIPS-2 balloon campaign** [13625-78]
- 13625 1Z **The design and performance characteristics of the NRL4 ASIC developed for the COSI small explorer gamma-ray satellite** [13625-79]
- 13625 20 **Status of testing and characterization of a low-noise small-pixel hybrid CMOS detector** [13625-80]
