

PROCEEDINGS OF SPIE

Techniques and Instrumentation for Detection of Exoplanets XII

Garreth J. Ruane
Maxwell A. Millar-Blanchaer
Editors

4–8 August 2025
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 13627

Proceedings of SPIE 0277-786X, V. 13627

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Techniques and Instrumentation for Detection of Exoplanets XII*, edited by Garreth J. Ruane, Maxwell A. Millar-Blanchaer, Proc. of SPIE 13627, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

TRANSITING PLANETS

- 13627 02 **Transit photometry with ShaneAO** [13627-1]
- 13627 03 **The multitelescope hot Jupiter survey (MiTHOS) small explorer mission concept** [13627-3]
- 13627 04 **Exoplanet search and characterization with the proposed POET Canadian space mission** [13627-4]

GROUND-BASED IMAGERS (SCALES)

- 13627 05 **High-contrast exoplanet imaging at Keck Observatory with SCALES and next generation adaptive optics** [13627-5]
- 13627 07 **Increasing science yield with a twilight observing program with the SCALES instrument at Keck** [13627-7]

ADAPTIVE OPTICS

- 13627 0A **Attenuation of tonal disturbances on the Keck 10-meter telescope** [13627-10]
- 13627 0B **Simultaneous control of the segmented primary mirror and adaptive optics system with a Shack-Hartmann wavefront sensor** [13627-11]
- 13627 0C **Developments on LLNL's high contrast testbed and Lick/ShaneAO** [13627-12]

WAVEFRONT SENSING

- 13627 0D **Single-shot focal plane wavefront sensing with the spatially-clipped self-coherent camera** [13627-13]
- 13627 0F **PEEPSS: photonic-enabled exoplanet spectroscopic sensor for the Habitable Worlds Observatory** [13627-16]
- 13627 0G **Analyzing the Zernike wavefront sensor closed-loop segment co-phasing performance on Keck so far** [13627-17]

INTERFEROMETRY

- 13627 OH **Enabling dual-star interferometry at the CHARA array: high-contrast systems** [13627-18]
- 13627 OI **Searching for planets in close-in gaps using SCExAO/AO3k and kernel phase interferometry** [13627-19]
- 13627 OJ **The search for protoplanets with aperture masking (SPAM) survey: new constraints on the protoplanet population and technical achievements of aperture masking** [13627-20]
- 13627 OK **First demonstration of kernel phase interferometry on JWST/MIRI: prospects for future planet searches around post main sequence stars** [13627-21]
- 13627 OL **Wavefront error recovery and companion identification with the James Webb Space Telescope** [13627-22]

NULLING I

- 13627 ON **Experimental progress in single-mode cross-aperture nulling** [13627-24]
- 13627 OO **Developing photonic components for nulling applications** [13627-25]

NULLING II

- 13627 OP **Testbed design and high-contrast demonstration with the AstroPIC integrated photonic coronagraph** [13627-26]

POST-PROCESSING AND DATA ANALYSIS

- 13627 OQ **Machine learning revolution for exoplanet direct imaging detection: transformer architectures** [13627-33]
- 13627 OR **Coronagraph image postprocessing comparison under wavefront drift** [13627-34]

PICTURE-D

- 13627 OT **The PICTURE-D exoplanetary imaging balloon mission: pre-flight laboratory coronagraph demonstration** [13627-36]

HABITABLE WORLDS OBSERVATORY YIELDS

- 13627 0V **Connecting polarization aberrations to exoplanet yield calculations for HWO** [13627-40]
- 13627 0X **The effects of scheduling constraints on exoplanet imaging science yield** [13627-42]

DEFORMABLE MIRRORS AND SPATIAL LIGHT MODULATORS

- 13627 0Y **Use of a liquid crystal display panel as a phase-only spatial light modulator for high order wavefront control** [13627-45]
- 13627 0Z **The programmable liquid-crystal active coronagraphic imager for the 4-m DAG telescope (PLACID) instrument: installation and commissioning update** [13627-46]

CORONAGRAPH TESTBEDS AND DEMONSTRATIONS I

- 13627 12 **Multistar wavefront control: vacuum laboratory demonstrations of exoplanet imaging in multistar systems for space missions** [13627-48]
- 13627 13 **Model validation and tolerancing of scalar vortex masks in the High Contrast Imaging Testbed (HCIT) facility** [13627-49]

CORONAGRAPH TESTBEDS AND DEMONSTRATIONS II

- 13627 16 **Modal estimation of high-order wavefront drifts on coronagraphic testbeds for high-contrast direct imaging of exoplanets** [13627-52]
- 13627 17 **Beyond the matrix: Jacobian-free wavefront sensing and control with the fast linearized coronagraph optimizer** [13627-53]
- 13627 18 **Progress toward a demonstration of high contrast imaging at ultraviolet wavelengths** [13627-54]

CORONAGRAPH TECHNOLOGIES I

- 13627 19 **Feasibility study of a forked grating scalar vortex coronagraph for the Habitable Worlds Observatory** [13627-61]
- 13627 1A **Apodized vortex coronagraph for the Habitable Worlds Observatory** [13627-56]
- 13627 1B **Phase apodized vortex coronagraphs for arbitrary apertures: a case study for the Habitable Worlds Observatory** [13627-57]

CORONAGRAPH TECHNOLOGIES II

13627 1E **Black silicon characterization for coronagraphs** [13627-55]

POSTER SESSION

13627 1F **An initial assessment of the Hanle Echelle spectrograph for exoplanet atmosphere studies** [13627-2]

13627 1G **Convolutional neural network low-order wavefront control for PICTURE-D** [13627-37]

13627 1H **A multiobject approach for studying exoplanet atmospheres using high-resolution spectrographs** [13627-63]

13627 1I **Addressing wavelength-correlated systematics in exoplanet transmission spectroscopy: a 2D Gaussian process approach** [13627-64]

13627 1J **Crank-rocker optical fiber mode scrambler prototype for the GMT-Consortium Large Earth Finder (G-CLEF)** [13627-65]

13627 1K **Laboratory testing and characterization of a hybrid fast/slow readout mode for the H2RG detectors in SCALES** [13627-67]

13627 1L **SCALES-DRP: a data reduction pipeline for an upcoming Keck thermal infrared spectrograph** [13627-68]

13627 1M **Testing and characterization of monochromator for SCALES calibration unit** [13627-69]

13627 1O **MIRAC-5 on the MMT with MAPS: annular groove phase mask N-band coronagraphic upgrade** [13627-72]

13627 1P **VIPER: a high-resolution multimode fiber-fed VIPA spectrograph concept for characterizing exoplanet atmospheric escape** [13627-73]

13627 1R **Jupyter simulations using NGS intensity with PyWFS for REDWOODS** [13627-75]

13627 1T **Open-source Python library for customizable AWG design and simulation in astronomy** [13627-77]

13627 1U **SNR estimation for studying exoplanet transits with astrophotonic spectrographs** [13627-78]

13627 1V **Exploring the capabilities of astrophotonics for the precise alignment of segmented telescopes** [13627-80]

13627 1W **Modeling and simulated optimization of the AstroPIC photonic coronagraph** [13627-82]

- 13627 1X **Experimental validation of photonic lantern imaging and wavefront sensing performance** [13627-84]
- 13627 1Y **A novel asynchronous integrating latching (NAIL) deformable mirror controller** [13627-85]
- 13627 1Z **NAIL: controlling MEMS deformable mirrors in the pico-Coulomb regime** [13627-86]
- 13627 21 **Progress in developing PICTURE-D polarimeter: a polarimeter for characterizing debris disk properties** [13627-88]
- 13627 22 **End-to-end polarization aberrations simulation for the Decadal Survey Testbed (DST-2)** [13627-92]
- 13627 24 **The Space Coronagraph Optical Bench (SCoOB): 6. demonstration of Lyot low order wavefront control combined with high order wavefront control using a vortex coronagraph** [13627-94]
- 13627 25 **The Space Coronagraph Optical Bench (SCoOB): 7. design, fabrication, and first light for a self-coherent camera** [13627-95]
- 13627 26 **The Space Coronagraph Optical Bench (SCoOB): 8. end-to-end numerical modeling of the testbed to estimate the contrast limits** [13627-96]
- 13627 27 **The Santa Cruz Extreme AO Lab (SEAL) 2.0: a reflective, multiwavelength rebuild** [13627-97]
- 13627 28 **Coherent differential imaging for the Habitable Worlds Observatory** [13627-98]
- 13627 29 **Polarization aberration modeling of internal occulter for coronagraphs** [13627-99]
- 13627 2A **A free-standing shaped-pupil coronagraph-mask for a segmented telescope pupil for exoplanet science** [13627-100]
- 13627 2B **A new era in exoplanet characterization with the Habitable Worlds Observatory: improving parameters for better mission yields** [13627-101]
- 13627 2C **Demonstrating real time wavefront sensing and control with space processors** [13627-102]
- 13627 2D **Accelerating high-order wavefront sensing and control algorithms with FPGAs** [13627-103]
- 13627 2E **Concept, implementation, and on-sky commissioning of the AO polarimetric module on MagAO-X** [13627-104]
- 13627 2G **Development of an on-chip double Bracewell nulling interferometer in the near-infrared for the CHARA array** [13627-107]
