SPIE

**Volume 13628**

Proceedings of SPIE 0277-786X, V. 13628

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Space Systems Contamination: Prediction, Control, and Performance 2025*, edited by Carlos E. Soares, Bruce A. Matheson, Jillian Stack, Proc. of SPIE 13628, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## ASTRONOMICAL APPLICATIONS

---

- 13628 02 **The effect of low-vacuum environments on particulate contamination near Starshade edge**  
[13628-5]

---

## SPACEFLIGHT PROJECT APPLICATIONS

---

- 13628 03 **Contamination control approach for Exomars RFM mission** [13628-6]  
13628 04 **Evaluation of contamination impact on optical properties of windows assembly** [13628-7]  
13628 05 **Cryogenic reflectance measurements of Vantablack® S-VIS coating** [13628-9]  
13628 06 **Contamination sensitivity and mitigation of space-based time-of-flight mass spectrometer dust instruments** [13628-13]

---

## CONTAMINATION SCIENCE, MODELING, AND ANALYSIS I

---

- 13628 07 **The Dragonfly Mission: contamination transport during entry and descent of Titan (Keynote Paper)** [13628-16]  
13628 08 **Characterisation of contaminant deposit in the space environment** [13628-19]

---

## CONTAMINATION SCIENCE, MODELING, AND ANALYSIS II

---

- 13628 0A **Molecular dynamics simulations of heterogeneous molecular contaminant films** [13628-20]  
13628 0B **Methodology for the estimation of lunar dust contamination effects on spacecraft**  
[13628-21]  
13628 0C **A simulation approach to particulate contamination inside fairings and during the descent phase of the lunar lander** [13628-22]

---

#### CHARACTERIZATION, TESTING, AND MEASUREMENTS I

---

- 13628 OD **In situ evaluation methodology for characterizing deposited molecular contamination morphology to investigate optical degradation effects** [13628-25]
- 13628 OE **Highly sensitive and fully automated method for the quantitative measurement of condensable molecular organic contamination (MOC)** [13628-27]
- 13628 OF **Characterizing moisture levels using a cryogenic quartz crystal microbalance in a vacuum environment** [13628-28]
- 13628 OG **Effect of water vapor on MLI blanket performance in cryogenic systems** [13628-35]

---

#### CHARACTERIZATION, TESTING, AND MEASUREMENTS II

---

- 13628 OH **Advancing particle contamination monitoring in space applications: automated optical microscopy as an alternative approach** [13628-29]
- 13628 OI **Experimental results on enhanced water vapor measurement in vacuum chamber by Twin-TQCM utilizing an electric cooler instead of using liquid nitrogen** [13628-30]
- 13628 OJ **Maintenance strategies for cleanliness critical environments: fast setups, high efficiency, cost-minimised** [13628-31]

---

#### CHARACTERIZATION, TESTING, AND MEASUREMENTS III

---

- 13628 OK **Measurement capability of particle size analysis with glancing light** [13628-33]
- 13628 OL **Real-time surface particulate cleanliness characterization** [13628-34]
- 13628 OM **Accumulated particle size distributions through assemblies, integrations, and tests** [13628-36]
- 13628 ON **The effect of first contact polymer storage on xenon difluoride passivated lithium fluoride on aluminum films** [13628-37]

---

#### CHARACTERIZATION, TESTING, AND MEASUREMENTS IV

---

- 13628 OO **Radiation effects on waveguide coupled photonic crystal nanocavity devices** [13628-38]
- 13628 OP **Photocatalytic decomposition of contaminants evaluated by QCM technique in vacuum** [13628-39]
