Volume 13669

Proceedings of SPIE 0277-786X, V. 13669

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Environmental Effects on Light Propagation and Adaptive Systems VIII*, edited by Karin Stein, Szymon Gladysz, Proc. of SPIE 13669, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

COMBATting ATMOSPHERIC TURBULENCE

- 13669 02 **Turbulence compensation in laser weapon systems (Keynote Paper)** [13669-1]
- 13669 03 **Evaluating response calculation methods for thin and volume analog holographic wavefront sensors** [13669-2]

METEOROLOGY ON THE WATER...

- 13669 06 **Exploring local variations in optical turbulence in a coastal environment with mesoscale model simulations and comparison with experimental results** [13669-5]
- 13669 07 **Comparative analysis of optical turbulence measurements, processing methods and their effects on Cn2 estimations in the maritime environment of Den Helder (NL)** [13669-6]
- 13669 08 **Evaluation of near-surface turbulence predictions in a coastal region** [13669-7]
- 13669 09 **Breaking waves: feasibility of optical communication through the sea surface** [13669-8]

... AND TURBULENCE IN THE SKY

- 13669 0A **Outer scale effects on optical scintillation in the transition from focusing to saturation (Invited Paper)** [13669-9]
- 13669 0B **Boundary-layer turbulence characterization using neuromorphic cameras and passive targets in optical ground stations** [13669-10]
- 13669 0C **A novel approach to model optical turbulence for the convective boundary layer at Cabauw (NL)** [13669-11]
- 13669 0D **Experiment and analysis on the characteristics of annular beam propagation in scattering media for target detection** [13669-12]
- 13669 0E **A comparative study of Fried parameter through Kolmogorov and von Karman turbulence via wave optics simulation techniques** [13669-13]

FREE-SPACE OPTICAL COMMUNICATIONS

- 13669 OH **Development of a portable expansion cloud chamber for high-energy laser experiments**
[13669-16]
- 13669 OI **Statistical uncertainty in background radiance measurements with single-photon detectors**
[13669-17]
- 13669 OJ **Remote target and scene recognition from atmospheric turbulence-degraded imagery via deep learning** [13669-18]

FREE-SPACE QUANTUM COMMUNICATION: JOINT SESSION

- 13669 OM **Focal plane irradiance statistics for laser downlink beams** [13669-19]
