Volume 13677

Proceedings of SPIE 0277-786X, V. 13677

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Sensors and Communication Technologies in the 1 GHz to 10 THz Band*, edited by Neil A. Salmon, Wladislaw Michailow, Proc. of SPIE 13677, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- v Conference Committee
- vii Introduction

DEVICES I

- 13677 03 **Investigation of the polarization conversion efficiency of a metasurface-based converter for THz applications** [13677-2]
- 13677 04 **Upconversion-based millimeter-wave imaging via phase-sensitive lock-in camera and GDD map: parallel demodulation of modulated NIR emission** [13677-3]
- 13677 05 **Integrated silicon broadband detectors toward miniaturized terahertz hyperspectral imaging platforms (Invited Paper)** [13677-4]

DEVICES II

- 13677 06 **Focusing radiation using cylindrical multimode waveguides (Invited Paper)** [13677-5]
- 13677 07 **AI-based design method of highly efficient terahertz antennas and antenna arrays** [13677-6]
- 13677 08 **Miniaturized circularly polarized patch antenna based on a non-uniform metasurface for ultra-wideband radar systems** [13677-7]

DEVICES III

- 13677 09 **Fast thermal detectors: migrating from the NIR to the terahertz waves (Invited Paper)** [13677-8]
- 13677 0A **Uncooled pyroelectric α -YBCO detectors in the NIR to the MIR range: performance enhancement induced by calcium doping** [13677-9]
- 13677 0B **Mesoscale lens design impact on sub-wavelength terahertz imaging resolution (Invited Paper)** [13677-10]
- 13677 0C **Terahertz resonance tuning in air-gap-engineered graphene metasurfaces** [13677-11]

APPLICATIONS I

- 13677 0D **Over-the-air calibration techniques for UAV-based antenna diagnostics (Invited Paper, Best Student Paper Award)** [13677-12]

13677 0E **Predicting human skin reflectance using nearby regions' values in multiple linear regression models** [13677-13]

13677 0F **Submarine detection using passive millimetre wave imaging** [13677-22]

APPLICATIONS II

13677 0H **UAS-based microwave and millimeter-wave imaging sensor technologies for various security-related applications (Invited Paper)** [13677-15]

13677 0I **Very low JSR interference detection and estimation using eigenvalue analysis** [13677-16]

13677 0J **Noninvasive sub-terahertz glucose monitoring using communication-inspired eye diagram analysis** [13677-17]

13677 0K **Nondestructive inspection of UHMW-PE-based ballistic composites in the THz frequency range** [13677-18]
