SPIE

**Volume 13793**

Proceedings of SPIE 0277-786X, V. 13793

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourth International Conference on Machine Vision, Automatic Identification, and Detection (MVAID 2025)*, edited by Ata Jahangir Moshayedi, Bin Chen, Proc. of SPIE 13793, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

## RESEARCH ON MACHINE VISION APPLICATIONS

---

- 13793 02 **The detection method of rail surface defects based on channel fusion** [13793-96]
- 13793 03 **A control method of industrial robot grasping disorderly based on machine vision**  
[13793-36]
- 13793 04 **Research on controlling autonomous walking of humanoid robot based on Linux and ROS  
environment** [13793-49]
- 13793 05 **Research on a YOLOv5-based crack detection system for naval ships** [13793-29]
- 13793 06 **Research on defect detection method of printed fabric based on YOLOv8-BS** [13793-14]
- 13793 07 **A VMD-CBAM-CNN-based acoustic emission recognition method for reed valve leakage in  
reciprocating air compressors** [13793-9]
- 13793 08 **Intelligent crop growth data acquisition and processing system based on K210 and YOLOv5**  
[13793-79]
- 13793 09 **Design and application of pipeline crack detection robot based on YOLOv5 and ROS**  
[13793-44]
- 13793 0A **Research on gesture interaction devices and technologies** [13793-23]
- 13793 0B **Research and implementation of U-NET-ID network for accurate segmentation of optic-disk  
images** [13793-110]
- 13793 0C **Lightweight household object detection algorithm based on GFM-YOLOv8** [13793-37]
- 13793 0D **ICS-YOLOv 10: research on a deep learning-based mycobacterium tuberculosis  
recognition model** [13793-13]
- 13793 0E **Construction method of object-level semantic topological map** [13793-92]
- 13793 0F **Research on phenotypic detection of maize plants using RGB and depth camera fusion**  
[13793-6]
- 13793 0G **Campus risk detection: a study on YOLOv10-las based on the asymptotic feature pyramid  
network** [13793-28]

- 13793 OH **Identification of peach kernel and almond kernel medicinal materials based on near-infrared spectroscopy and 1D-CNN** [13793-24]
- 13793 OI **Diagnosis of ocular tumor diseases based on serum Raman spectroscopy combined with AE-LSTM network** [13793-88]
- 13793 OJ **Rapid spectroscopic detection method for microsamples aimed at efficient screening of biological enzymes** [13793-7]
- 13793 OK **Intelligent machine vision for industrial inspection** [13793-99]
- 13793 OL **A deep visual odometry architecture integrating spatial convolution and selective sequence modeling** [13793-53]
- 13793 OM **Research on trajectory control algorithm based on MPC and LQR** [13793-87]
- 13793 ON **Detection of low signal-to-noise ratio TACAN signal based on improved YOLOv11** [13793-94]
- 13793 OO **Research on laboratory safety risk detection based on MPL-YOLOv10 network** [13793-73]
- 13793 OP **Realization of convergent binocular vision algorithm for guiding robot localization** [13793-16]
- 13793 OQ **An image retrieval method based on feature fusion** [13793-100]
- 13793 OR **Intelligent identification of welding defects in nuclear power pipelines based on deep learning** [13793-8]
- 13793 OS **Lightweight real-time object detection for coal mine underground unmanned vehicles based on improved YOLOv8** [13793-55]
- 13793 OT **The lightweight architecture and anatomical context-based lung nodule detection neural network** [13793-76]
- 13793 OU **Small-diameter pipeline inspection robot with controllable elastic clamping suspension** [13793-95]
- 13793 OV **SAM-guided feature enhancement network for precise gastric pathology segmentation** [13793-70]
- 13793 OW **Research on the accuracy of side mold positioning based on mechanical vision** [13793-5]
- 13793 OX **Deep learning for insect detection and classification: a review** [13793-106]
- 13793 OY **Ultra-long-distance dual-rotation laser detection and AI integrated dynamic monitoring system for farmland environments** [13793-60]

- 13793 0Z **Research on label detection based on OMRON FH series visual sensors** [13793-56]
- 13793 10 **ST-DETR: an improved small object detection algorithm for unmanned aerial vehicles** [13793-75]
- 13793 11 **FAA-YOLO: frequency-augmented attention mechanism for oracle bone inscription detection** [13793-51]
- 13793 12 **Design of a microcontroller-based smart pet feeding system** [13793-40]
- 13793 13 **Multisensor system and method for identification of adverse road conditions based on INS/GNSS and imaging technologies** [13793-10]
- 13793 14 **Research on groove classification detection method and system for robotic stereo vision welding based on ROS** [13793-26]
- 13793 15 **MB-YOLO-based method for determining the fines content in manufactured sand** [13793-63]
- 13793 16 **Recognition of bolt looseness based on ORB and RANSAC** [13793-4]
- 13793 17 **A few-shot object detection framework via feature reweighting for ground-penetrating radar data** [13793-20]
- 13793 18 **Enhancing breast cancer detection with vision transformers and graph neural networks** [13793-62]
- 13793 19 **Identification of key factors for elevator safety based on Bayesian complex network** [13793-80]
- 13793 1A **LACM-enhanced efficientnet: elevating precision and CPU efficiency in agricultural pest and disease recognition** [13793-58]
- 13793 1B **Research on a lightweight traffic sign detection algorithm based on GCL-YOLOv8** [13793-3]
- 13793 1C **Application research on binocular vision systems for unmanned aerial vehicles in underground coal mines** [13793-93]
- 13793 1D **Gait recognition based on multimodal fusion of silhouette and pose heatmap** [13793-33]
- 13793 1E **A robust foreground detection method for local lighting changes via adaptive LBP and Gaussian mixture fusion** [13793-17]
- 13793 1F **Rail surface damage method based on time-domain feature values analysis of vibration signals** [13793-68]
- 13793 1G **Steel plant #1 LF intelligent one-click refining model development and research** [13793-102]

- 13793 1H **Lightweight liver disease image segmentation method based on YOLOv10-S2M** [13793-91]
- 13793 1I **Real-time 3D scene reconstruction of ancient opera stage architectural heritage using a handheld SLAM laser scanner: a case study of the Lixel L2 Pro** [13793-42]
- 13793 1J **Design of multimode intelligent control system for traffic signal lights** [13793-90]
- 13793 1K **Underwater object segmentation using improved DeepLabv3+** [13793-48]
- 13793 1L **Design of multichannel image processing control system based on machine vision** [13793-74]
- 13793 1M **Fault diagnosis of harmonic drive based on efficientnet-b0** [13793-57]
- 13793 1N **Design of intelligent storage cabinet vision system based on machine vision** [13793-108]
- 13793 1O **YOLOv10-SCI: single-chip microcomputer defect detection based on the improved YOLOv10 network** [13793-98]

---

#### IMAGE PROCESSING AND PATTERN RECOGNITION TECHNOLOGIES

---

- 13793 1P **Dual-level locality enhanced transformer for image caption** [13793-109]
- 13793 1Q **Rethinking image watermarking for better embedding** [13793-21]
- 13793 1R **SemAlign: hierarchical semantic alignment for few-shot image recognition** [13793-41]
- 13793 1S **Lightweight cross-domain image super-resolution network based on hybrid attention** [13793-46]
- 13793 1T **EDFIT: enhanced decoder feature interaction transformer for image captioning** [13793-2]
- 13793 1U **Dual-level question-guided image fusion network for visual question answering** [13793-50]
- 13793 1V **A dynamic decomposition-prediction two-stage model for short-term shore power demand forecasting** [13793-77]
- 13793 1W **A review of opinion spam detection based on behavioral features** [13793-32]
- 13793 1X **Research on proactive network security detection algorithm based on machine learning** [13793-19]
- 13793 1Y **Research on security protection model of adversarial network based on reinforcement learning** [13793-54]

- 13793 1Z **Fourier ptychographic microscopy reconstruction with federated affinity fusion network** [13793-104]
- 13793 20 **Macro design method of stiffness gradient structure** [13793-84]
- 13793 21 **Dynamic enzyme action optimizer for feature selection** [13793-22]
- 13793 22 **Parameter-invariant feature learning for radar jamming signal recognition** [13793-71]
- 13793 23 **MPTE: multiperspective triple expansion for robust knowledge grounding in large language models** [13793-69]
- 13793 24 **Lightweight temporal residual modeling for event-based image deblurring** [13793-78]
- 13793 25 **Artificial intelligence in meteorological observation and forecasting: a survey** [13793-61]
- 13793 26 **An interpretable quality prediction method with adaptive hidden representation graph neural networks for compressor blade manufacturing** [13793-27]
- 13793 27 **A depression recognition model based on multifeature fusion** [13793-35]
- 13793 28 **Explainable learning style classification using LIME and ensemble models in the VARK framework** [13793-101]
- 13793 29 **Efficient distributed adaptive transcoding: intelligent dynamic partitioning and virtual reference substream codesign** [13793-83]
- 13793 2A **Efficient 3D Gaussian splatting surface rendering for reflective objects** [13793-59]
- 13793 2B **A lightweight AI-generated image detection algorithm based on an enhanced MobileNetv3** [13793-39]
- 13793 2C **Research on entity recognition integrating span markers and vocabulary enhancement** [13793-81]
- 13793 2D **Causal inference of peptic ulcer based on multitemporal node longitudinal feature evolution: a hybrid machine learning framework integrating mRMR-XGBoost** [13793-72]
