

PROCEEDINGS OF SPIE

International Conference on Optical Communication, Signal Processing, and Optical Engineering (OCSPOE 2025)

**Mário Fernando Santos Ferreira
Muhammad Zubair Iqbal**
Editors

**4–6 July 2025
Beijing, China**

Organized by
Wuyi University (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13797

Proceedings of SPIE 0277-786X, V. 13797

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Optical Communication, Signal Processing, and Optical Engineering (OCSPOE 2025)*, edited by Mário Fernando Santos Ferreira, Muhammad Zubair Iqbal, Proc. of SPIE 13797, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

GEOSCIENCES AND REMOTE SENSING

13804 02	ERT inversion method and application based on adaptive damping factor [13804-16]
13804 03	Research on geological exploration elements of urban underground space [13804-6]
13804 04	Study on the surface deformation law of buried faults based on the Okada model [13804-46]
13804 05	Geological and hydrogeological risk assessment for tunnel excavation in water-bearing tuff zones: a case study [13804-8]
13804 06	Investigation and application of the transient electromagnetic method for assessing water richness in the goaf of overburden coal seams at the 9104 working face [13804-22]
13804 07	Characteristics of coal seam in-situ stress and its influence on the stability of coalbed methane wellbore in Bijie experimental area, Guizhou [13804-34]
13804 08	Inner Mongolia sub-early warning core data processing system deployment and application analysis [13804-12]
13804 09	Re-recognition of the sedimentary environment of the G1 oil layer in the large area with dense well patterns sedimentary environment recognition in Gao I of Gao1aizi Reservoir in SaZhong development region [13804-11]
13804 0A	Research and exploration on the application of digital twin technology and geographic information technology in the construction of smart campus in universities [13804-29]
13804 0B	Intelligent recognition of civil aviation aircrafts based on improved YOLOv8 model using multisource satellite images [13804-7]
13804 0C	Design and performance evaluation of a downhole oil-water separation and surface low- pressure water injection scheme for well A [13804-48]
13804 0D	Evolution and resurrection process of landslides in Xiluodu Reservoir, Jinsha River revealed by time-series InSAR measurements [13804-3]
13804 0E	Study on seepage law of horizontal well during pumping in low-permeability aquifers [13804-44]
13804 0F	Methods and applications for constructing bridge digital twins using panoramic images [13804-45]

- 13804 OG **Research and application of monitoring and early warning system for major disaster risks in non-coal mines** [13804-32]

CIVIL AND ENVIRONMENTAL ENGINEERING

- 13804 OH **Analysis and research comparison of anti-slide piles under nonlinear strength criteria and traditional specifications** [13804-20]
- 13804 OI **Dynamic response characteristics of airport pavement foundations under aircraft taxiing loads** [13804-58]
- 13804 OJ **Analysis of soil shrinkage characteristics and dry shrinkage deformation mechanism on digital image processing** [13804-28]
- 13804 OK **Application of a building structure whole life cycle operation and maintenance management system based on building information modeling and digital twin** [13804-39]
- 13804 OL **Application of graph techniques, heuristic methods, and obstacle clearance design in airport elevations optimization for airport design** [13804-17]
- 13804 OM **Shrinkage deformation test of soil based on digital image processing** [13804-27]
- 13804 ON **Research on the evaluation method of space-air-ground integrated resilience of grade highway for debris flow disaster** [13804-24]
- 13804 OO **Application of BIM technology in the architectural design phase** [13804-43]
- 13804 OP **Research on spectral water quality monitoring, analysis and recognition system based on PCA-LSSVM** [13804-21]
- 13804 OQ **Research on the characteristics of job-housing separation and wastewater discharge patterns in Xibeiwang Town, Haidian District, Beijing** [13804-30]
- 13804 OR **Study on VOCs emission during profile control and reuse of produced liquid sediment** [13804-60]
- 13804 OS **Study on changes of the water body in the Aral Sea** [13804-10]
- 13804 OT **Research on the correlation mechanism between clean energy consumption and economic growth based on panel threshold effect model** [13804-18]

APPLICATIONS AND TECHNOLOGIES IN ENGINEERING

- 13804 OU **Study on the influence of urea injection and ambient humidity on PN emissions in the new energy vehicle** [13804-59]

- 13804 OV **Analysis and improvement measures for the fracture of closing spring in a ± 500 kv converter station** [13804-33]
- 13804 OW **Optimization of advanced manufacturing and installation processes for the rudder-propeller base of a deep-sea mineral survey vessel** [13804-56]
- 13804 OX **Simulation of groundwater dynamic field for transfer and storage mine water in pore-fissure aquifer** [13804-19]
- 13804 OY **Characteristics and estimation method of maximum tensile stress of sluice floor during construction in the middle and lower reaches of Yangtze River** [13804-25]
- 13804 OZ **Study on efficient welding technology for deep-sea resource exploration vessels** [13804-57]
