SPIE

Volume 13806

Proceedings of SPIE 0277-786X, V. 13806

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Optoelectronic Information and Computer Engineering (OICE 2025)*, edited by Yang Yue, Yufei Ma, Proc. of SPIE 13806, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

OPTOELECTRONIC MATERIALS AND DEVICES

- 13806 02 **Research on DC-Drift of TFLN modulator** [13806-31]
- 13806 03 **Impact of molecular structure on the properties of charge transfer states and energy disorder in organic solar cells** [13806-25]
- 13806 04 **Research on the heat dissipation of high-power LED lights based on COMSOL simulation technology** [13806-19]
- 13806 05 **A theoretical investigation of TiO₂ nanotube β -betavoltaic battery** [13806-17]

OPTOELECTRONIC SENSING TECHNOLOGY

- 13806 06 **A multitask learning architecture for gas mixture species recognition and concentration inversion based on multiscale transformer** [13806-22]
- 13806 07 **Metasurface sensor based on lattice mode manipulation** [13806-37]
- 13806 08 **Tunable sensitivity from low to high by spring tension in acoustic detection system containing weak grating fiber** [13806-52]
- 13806 09 **Efficient phase error reduction in phase-shifting algorithm with unknown phase-shifts** [13806-30]
- 13806 0A **Experimental analysis of raindrop-induced SNR attenuation in MEMS Lidar** [13806-7]
- 13806 0B **Design and analysis of airport runway pipeline liquid level monitoring system based on optical fiber sensing technology** [13806-6]
- 13806 0C **A lightweight real-time salient object detection algorithm-hardware co-optimization method for STM32 platforms** [13806-5]

OPTICAL COMMUNICATIONS AND NETWORKS

- 13806 0D **Research on period-one photonic microwave scheme for integrated communication and sensing system** [13806-2]

- 13806 OE **Design of a wideband bandpass filter with mixed coupling and source-load coupling**
[13806-36]
- 13806 OF **A compact dual-band bandpass filter for WLAN and 5G bands based on dual-mode resonators** [13806-40]
- 13806 OG **High-performance arbitrary two-order LP modes multiplexing via Gerchberg-Saxton algorithm** [13806-18]
- 13806 OH **Application of lightweight multitechnology integrated wireless communication system in power emergency scenarios** [13806-35]

OPTOELECTRONIC IMAGING AND INFORMATION PROCESSING

- 13806 OI **An effective NIR analysis tool: CNN assisted by novel spectrogram reconstruction technology based on recurrence plot** [13806-4]
- 13806 OJ **Fast space target detection using segmented planar imaging detector for electro-optical reconnaissance** [13806-23]
- 13806 OK **Evaluation of antijamming performance for infrared guidance system based on improved analytic hierarchy process** [13806-49]
- 13806 OL **Traffic sign recognition for complex traffic condition based on YOLOv5** [13806-39]
- 13806 OM **Research on time synchronization technology for deepwater blowout preventer monitoring and imaging equipment** [13806-16]
- 13806 ON **Lightweight ConvTimeNet: a simplified fully convolutional model for multivariate time series classification** [13806-3]
- 13806 OO **Maritime target detection using simulation-based human visual recognition experiments**
[13806-24]
