

PROCEEDINGS OF SPIE

Third International Conference on New Energy and Optoelectronic Materials (NEOM 2025)

Xin Chen
Editor

21–23 June 2025
Kunming, China

Organized by
University of South China (China)

Co-organized by
East China University of Science and Technology (China)
Advanced Battery Technology Center, Harbin Institute of Technology, Weihai (China)
Thin Films Society (Singapore)
Hunan Provincial Key Laboratory of Emergency Safety Technology and Equipment
for Nuclear Facilities, USC (China)
Dongguan Guanyi Automation Technology Company Limited (China)

Hosted by
PASE—Pashanhu of Scholars and Engineers (China)

Published by
SPIE

Volume 13810

Proceedings of SPIE 0277-786X, V. 13810

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Third International Conference on New Energy and Optoelectronic Materials (NEOM 2025)*, edited by Xin Chen, Proc. of SPIE 13810, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

THIRD INTERNATIONAL CONFERENCE ON NEW ENERGY AND OPTOELECTRONIC MATERIALS (NEOM 2025)

- 13810 02 **Early identification of pyrolysis particle signs in electrical fires caused by different materials**
[13810-12]
- 13810 03 **Ultrasensitive optical sensing via structural symmetry breaking-induced high-Q merging
bound states in the continuum** [13810-20]
- 13810 04 **Determination of carbon content in high-purity terbium using high-frequency induction
combustion-infrared absorption method** [13810-18]
- 13810 05 **Polarization-independent perfect absorbers and optical sensing via Fabry-Pérot quasi-BIC
metasurface** [13810-10]
- 13810 06 **Study on the mechanical properties of lattice metamaterials made from truss-structured
titanium alloys** [13810-4]
- 13810 07 **Methanol fuel level monitoring system based on single chip microcomputer control**
[13810-5]
- 13810 08 **Three-dimensional hydrogen-bond networks in water clusters: low-barrier interlayer proton
transfer mechanisms** [13810-11]
- 13810 09 **Study on the performance of $K(\text{LaEu})_{0.5}\text{F}_4@\text{g-C}_3\text{N}_4$ for visible-light-driven photocatalytic
degradation of tetracycline hydrochloride** [13810-6]
- 13810 0A **Fabrication and characterization of niobium oxynitride thin films for energy and
environmental applications** [13810-2]
- 13810 0B **Heteroepitaxial growth of high-quality (111)-oriented single-crystal diamond on
 $\text{Ir}(111)/\text{Al}_2\text{O}_3(11\text{-}20)$ via bias-enhanced nucleation** [13810-7]
