

PROCEEDINGS OF SPIE

International Conference on Precision Engineering and Mechanical Manufacturing (PEMM 2025)

Steven Y. Liang

Editor

30 June – 2 July 2025

Singapore

Organized by

Science and Engineering Institute (Hong Kong, China)

Sponsored by

Inha University (Korea, Republic of)

Georgia Institute of Technology (United States)

Published by

SPIE

Volume 13814

Proceedings of SPIE 0277-786X, V. 13814

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Precision Engineering and Mechanical Manufacturing (PEMM 2025)*, edited by Steven Y. Liang, Proc. of SPIE 13814, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	Conference Committee
vii	Introduction

MATERIAL PERFORMANCE SIMULATION AND MATERIAL PROCESSING TECHNOLOGY

13814 02	Numerical simulation on quasistatic fatigue performance of single-lap Al/Al interference-fit bolted structures installed by electromagnetic force [13814-3]
13814 03	Fatigue properties of Ti-6Al-4V processed by laser metal deposition [13814-11]
13814 04	Research on microstructure and mechanical properties of Ta1/4J33 laser-welded joints [13814-9]
13814 05	Study on vibration wave characteristics of Timoshenko beam subject to mass eccentricity [13814-18]

MECHANICAL EQUIPMENT HEALTH MONITORING AND RELIABILITY ASSESSMENT

13814 06	Large-deformation analysis of a stepped laminated beam using a flexible constraint variational method [13814-5]
13814 07	Hydrodynamic noise study of a nonpiezoelectric acoustic decoy [13814-6]
13814 08	Monitoring internal combustion engine wear from engine oil using linear regression [13814-16]
13814 09	A practical bearing design to support coaxial motions for precision 2-DOF actuators [13814-14]

POWER MECHANICAL SYSTEM DESIGN AND INTELLIGENT MANUFACTURING

13814 0A	Comparison of dimensional accuracy between commercial and professional FDM 3D printers: a comprehensive analysis [13814-12]
13814 0B	Development of a two-degree-of-freedom actuator utilizing compliant bearings [13814-13]
13814 0C	Multiobjective optimal design of planetary gear transmission system based on improved particle swarm optimization algorithm [13814-8]

INTELLIGENT DETECTION MODELS AND MEASUREMENT TECHNOLOGIES BASED ON MACHINE VISION

- 13814 0D **A comparative study of least squares, partial least squares, and ridge regression methods on transit time flowmeter measurement modeling [13814-17]**
- 13814 0E **Study on SLD icing test in icing wind tunnel [13814-2]**
- 13814 0F **A method for determining flame width of underwater solid rocket motor by image processing using Mathematica [13814-10]**
- 13814 0G **Efficient 3D point cloud network model for reconstruction of 3D point cloud, object classification, and part segmentation [13814-15]**
