PROCEEDINGS OF SPIE

Second International Conference on Image Processing, Intelligent Control, and Computer Engineering (IPICE 2025)

Fuqiang Liu
Nguyen Huu Trung
Editors

25–27 July 2025
Zhengzhou, China

Organized by
Henan University (China)

Sponsored by
Dalian University (China)
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13942

Proceedings of SPIE 0277-786X, V. 13942

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Second International Conference on Image Processing, Intelligent Control, and Computer Engineering (IPICE 2025)*, edited by Fuqiang Liu, Nguyen Huu Trung, Proc. of SPIE 13942, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi *Conference Committee*

IMAGE PROCESSING AND COMPUTER VISION

13942 02 **Fire smoke detection method based on YOLOv8-SE** [13942-21]

13942 03 **Cotton disease detection model based on improved YOLOv8** [13942-108]

13942 04 **Integration of image processing algorithms and deep learning frameworks for archery target scoring** [13942-180]

13942 05 **Algorithm improvement based on YOLOv10 for pneumonia x-ray analysis** [13942-151]

13942 06 **Adaptive resampling dual-path semantically guided diffusion for Thangka image inpainting** [13942-89]

13942 07 **Research on wild animal detection algorithm based on improved YOLOv10** [13942-171]

13942 08 **A method for generating star map simulation data based on CGAN network** [13942-183]

13942 09 **LiT-fusion: lightweight transformer for infrared-visible image fusion** [13942-111]

13942 0A **Underwater object detection algorithm based on improved YOLOv5** [13942-125]

13942 0B **Gaze estimation network with two-branch feature fusion** [13942-79]

13942 0C **A dual-branch uncertainty-guided segmentation framework for multiorgan CT images** [13942-59]

13942 0D **PetroFusion: a complementary multimodal fusion framework for 3D object detection in complex oilfield environments** [13942-9]

13942 0E **Design of a laboratory abnormal behavior recognition at management system based on multistrategy improved YOLOv7** [13942-184]

13942 0F **ESSMFA-YOLOv8s: small traffic sign detection method based on SMFA and SAHI data optimization** [13942-124]

13942 0G **Research on print advertising image recognition and content generation based on deep learning algorithms** [13942-174]

13942 0H **Research on pigment substance recognition method based on multifusion features** [13942-165]

13942 0I **A dual-network self-optimizing threshold method for web images** [13942-63]

13942 0J **Enhancing CLIPCap with dual visual encoders and feature fusion strategies for image captioning** [13942-173]

13942 0K **YOLOv5 optimizing intelligent vision system detection research** [13942-73]

13942 0L **Recognition of feature points of multitype weld seam based on pattern recognition** [13942-147]

13942 0M **Multiframe joint dual-modal object detection algorithm based on UAV** [13942-182]

13942 0N **Domain-generalized face anti-spoofing via feature fusion** [13942-37]

13942 0O **Application research of partial differential equation combined with wavelet analysis in image edge detection** [13942-84]

13942 0P **Research on small target detection algorithm for UAVs based on improving YOLOv8** [13942-161]

13942 0Q **Enhancing angle prediction in aerial images based on YOLO OBB architectures** [13942-62]

13942 0R **Multimodal deep learning models based on adaptive attention mechanism for prediction and classification of Alzheimer's disease** [13942-15]

13942 0S **DualFocus starblocks: channel-position attentional optimization for skin lesion categorization** [13942-78]

13942 0T **Lightweight fire and smoke detection algorithm based on YOLOv8n** [13942-60]

13942 0U **Deep-learning-based food recognition algorithm for refrigerators** [13942-54]

13942 0V **Flame and smoke detection algorithm based on improved YOLOv8** [13942-7]

13942 0W **FS-DETR: fast and accurate object detection in sonar images** [13942-31]

13942 0X **A low-power key update mechanism for wireless star-topology IoT systems** [13942-101]

13942 0Y **Underwater image enhancement method based on region-based airlight estimation and color enhancement** [13942-57]

13942 0Z **Osteoporosis x-ray image segmentation method based on BT-U-Net model** [13942-132]

13942 10 **Research of breast tumor classification using ultrasound image based on deep learning** [13942-140]

13942 11 **BOMU-net: a boundary-optimized multimodule network for cervical nucleus segmentation** [13942-25]

13942 12 **Medical image segmentation application via the DP-MSPCNN model** [13942-97]

13942 13 **DBMamba: a dual-branch network with spatial and frequency mamba for semantic segmentation of remote sensing images** [13942-58]

13942 14 **The train visual localization method based on triplet loss network** [13942-13]

13942 15 **Wheat spike recognition and counting method based on deep learning and image recognition** [13942-137]

13942 16 **Defect identification in electrical equipment of infrared images by integrating visual features and adaptive temperature difference thresholds** [13942-29]

INTELLIGENT CONTROL AND ROBOTICS

13942 17 **Research on the control strategy of the automatic gluing system for insulating glass** [13942-16]

13942 18 **Meta-learning-based autonomous maneuvering for multitype UAVs** [13942-24]

13942 19 **Effect of gait control on motion performance of arc-legged hexapod robot on rugged terrain** [13942-19]

13942 1A **Optimized path planning for flooring robots in substations using FRACPnet** [13942-181]

13942 1B **High pole lamp glare suppression technology based on U-Net and PID controller** [13942-71]

13942 1C **Hydrodynamic model optimization and control for autonomous ship berthing at unberthing based on deep reinforcement learning** [13942-186]

13942 1D **Visual servoing and path planning for mobile flange assembly** [13942-18]

13942 1E **Trajectory optimization of IRB5510 spray painting robot** [13942-49]

13942 1F **Fuzzy PID-controlled trajectory tracking of ROV under oblique ocean currents** [13942-152]

13942 1G **Adaptive VSLAM by fusing point, line, and plane features** [13942-134]

13942 1H **Autonomous campus surveillance robot for human anomaly detection in dynamic environments** [13942-76]

13942 1I **Dynamic motion planning for mobile robots using multimodal sensing and safe corridor constraints** [13942-154]

13942 1J **LiDAR-aware reinforcement learning for robust navigation in dynamic and uncertain environments** [13942-102]

13942 1K **A method for detecting illegal behaviors of personnel in underground coal mines based on the improved YOLOv8s** [13942-138]

13942 1L **Dual-critic reinforcement learning with adaptive control barrier functions for dynamic obstacle avoidance** [13942-92]

13942 1M **Hardware design and implementation of symmetric nonlinear function based on look-up table** [13942-86]

13942 1N **The key technologies and operational models of unmanned systems for air-ground collaboration** [13942-95]

13942 1O **Research on active flow control of underwater vehicle wake characteristics using deep reinforcement learning** [13942-2]

13942 1P **Research on depression EEG recognition based on DGCNN-transformer** [13942-41]

13942 1Q **Motor fault diagnosis based on ALA-FedDC federated learning** [13942-69]

13942 1R **Significant wave height estimation method using X-band radar** [13942-12]

13942 1S **GPU-based parallel processing approach for local blur detection** [13942-5]

13942 1T **A multigranularity deep recommendation model based on graph matching** [13942-119]

13942 1U **Research on ultra-short-term photovoltaic power forecasting based on GRU-GLA** [13942-141]

13942 1V **AMM-YOLOv8: lightweight pine wilt disease detection network** [13942-28]

13942 1W **An end-to-end real-time campus violence detection algorithm based on improved YOLOv11** [13942-82]

13942 1X **Vehicle and pedestrian detection algorithm in dense traffic scenario** [13942-145]

13942 1Y **Research on key technologies of network security situation awareness based on machine learning models** [13942-139]

13942 1Z **Adversarial machine learning in cybersecurity: detecting malicious content generated by AI** [13942-123]

13942 20 **Graph theory-based point pattern matching algorithm** [13942-157]

13942 21 **SAC-based path planning for amphibious UAVs: a maximum entropy deep reinforcement learning approach** [13942-68]

13942 22 **Two-degree-of-freedom object detection and tracking gimbal based on YOLO11** [13942-166]

13942 23 **Modeling and simulation for networked operation based on multiagent** [13942-35]

13942 24 **Two-end smoke detection system based on cloud-fog collaboration** [13942-163]

13942 25 **Robust path tracking control for autonomous vehicles under parameter uncertainties and network-induced delays** [13942-43]

13942 26 **Optimization of the AWA-PIDNet for surface defect detection in piston pins** [13942-22]

INTELLIGENT DATA ANALYTICS AND MULTIMODAL SENSING

13942 27 **Research on CNN_LSTM_transformer intrusion detection model based on CGAN-SMOTE preprocessing** [13942-53]

13942 28 **Unsupervised anomaly detection for critical components in industrial manufacturing via multistage clustering** [13942-88]

13942 29 **Learning to align across frames: a prompt-aware framework for video action recognition** [13942-87]

13942 2A **Research on the application of agent technology in engineering drawing data management for pumped storage power stations** [13942-20]

13942 2B **Predicting early mild cognitive impairment utilizing transformer-based multiscale attention with across-space and time mechanism** [13942-17]

13942 2C **Video anomaly detection for generalization and semantic understanding method evolution and future directions** [13942-112]

13942 2D **Deformation monitoring of urban viaducts in Wuhan using integrated ascending-descending ESBAS-inSAR technology** [13942-144]

13942 2E **An efficient data annotation algorithm based on rough set theory** [13942-70]

13942 2F **Next location prediction based on user preference and spatial-temporal features** [13942-170]

13942 2G **Research and application of cloud service-based evaluation of radar maintenance equipment support capacity** [13942-116]

13942 2H **Measurement and serviceability assessment of a high-rise viewing tower under construction** [13942-105]

13942 2I **A heart disease sound classification algorithm based on deep learning** [13942-104]

13942 2J **Facial feature analysis and posture recognition in unknown environments and its application in classrooms** [13942-72]

13942 2K **Stacked BiLSTM with multiscale attention residual learning in repackaged Android malware detection** [13942-77]

13942 2L **Improved display method of BIM model in large-scale linear engineering scene** [13942-50]

13942 2M **Lightweight vehicle object detection algorithm based on improved YOLOv5s** [13942-66]

13942 2N **BrainFusion: a multifocus image fusion method based on memory-guided transformer simulating brain visual processing** [13942-109]

13942 2O **AHDB-LDP: adaptive hash and dynamic budget for efficient local differential privacy** [13942-176]

13942 2P **Student classroom behavior detection based on deep learning** [13942-177]

13942 2Q **Prediction of highway traffic flow based on multilevel spatio-temporal graph convolutional network** [13942-39]

13942 2R **A light plane calibration method for handheld** [13942-128]

13942 2S **Underwater image enhancement framework based on color correction and multitask fusion** [13942-26]

13942 2T **PBRA-YOLO: an enhanced model for tool detection in cargo spacecraft cabins** [13942-114]

13942 2U **A dual-stage pruning method for energy-efficient spiking neural networks** [13942-167]

13942 2V **Light field mesoscopic phase reconstruction using the light intensity transport equation** [13942-142]

13942 2W **Gb-U2Net: image segmentation network for the auxiliary diagnosis of acute cholecystitis** [13942-67]

13942 2X **Improved multiscale Retinex low-light image enhancement based on wavelet transform** [13942-52]

13942 2Y **DCM-MSGC: a multiscale gated channel attention denoiser for confocal microscopy images** [13942-11]

13942 2Z **An attention-gated fusion network with multihead context modeling for automated flow cytometry gating** [13942-27]

13942 30 **WMSC-NET: a WALVE-CONV multiscale network for image forgery detection** [13942-172]
