PROCEEDINGS OF SPIE

Fourth International Conference on New Materials, Machinery, and Vehicle Engineering (NMMVE 2025)

Jinyang Xu
J. Paulo Davim
Editors

11–13 July 2025
Changsha, China

Organized by
Hunan University (China)

Sponsored by
Northeastern University (China)

Published by
SPIE

Volume 13953

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 13953

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Fourth International Conference on New Materials, Machinery, and Vehicle Engineering (NMMVE 2025)*, edited by Jinyang Xu, J. Paulo Davim, Proc. of SPIE 13953, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xiii *Conference Committee*

Part One

ADVANCED MATERIALS AND ENERGY SYSTEMS

13953 02 **Characterization of micro-nano structure of paper materials** [13953-4]

13953 03 **Defect-induced alumina-coated Li-rich Mn-based material for high-performance Li-ion batteries** [13953-149]

13953 04 **Qualitative analysis of the main components of tobacco-used water-based adhesive** [13953-222]

13953 05 **Synergistic integration of bio-based insulation and machine learning for energy-efficient and low-carbon structural systems** [13953-32]

13953 06 **Anisotropy of different sand mold materials based on microdroplet injection technology** [13953-76]

13953 07 **Study on the modification of epoxy resin adhesive with calcium carbonate** [13953-71]

13953 08 **Analysis of thermal runaway behavior of sodium-ion batteries triggered by surface heating** [13953-51]

13953 09 **A review of battery aging analysis and state of health estimation based on EIS** [13953-77]

13953 0A **Analysis on the thermal runaway mechanism of ternary lithium-ion battery during nail penetration test** [13953-44]

13953 0B **Electrochemical energy storage of metal oxide composite electrodes for asymmetric capacitor with high performance** [13953-194]

13953 0C **The multi-color all-optical switching on a single plasmonic photonics nanostructure** [13953-230]

13953 0D **Thermal compressive deformation behavior and constitutive model of 2219 aluminum alloys** [13953-56]

13953 0E **Study on the influence of stitching patterns on the three-point tensile properties of CFRP laminates** [13953-58]

13953 0F **Investigation of oxide-based double perovskites material Ba_2TiPbO_6 for photocatalytic applications** [13953-198]

13953 0G **Research on tensile properties of sewn BFRP reinforced composites** [13953-94]

13953 0H **Effect of aging on the impact performance of CFRP round tubes** [13953-49]

13953 0I **Research on three-point bending performance of stitched BFRP composite laminates** [13953-92]

13953 0J **Catalytic performance of Fe-Zr-B amorphous alloy on degradation of simulated wastewater** [13953-234]

13953 0K **Application research of silk fibroin materials based on electrospinning technology in small-diameter artificial blood vessels** [13953-154]

13953 0L **Endurance research of granite manufactured sand concrete** [13953-66]

13953 0M **Enhanced anti-icing properties in trimethylolpropane triglycidyl ether-based materials** [13953-212]

13953 0N **Highly green cellulose-feather keratin and ionic liquid-based composite films with superior mechanical properties** [13953-199]

13953 0O **The promotion of polyphenol moiety for high-performance antioxidant proton exchange membrane on fuel cells** [13953-180]

13953 0P **Research on 3D printing of mullite nanowhisker reinforced epoxy resin composites** [13953-3]

13953 0Q **Improved DC and RF performance AlGaN/GaN HEMTs with suppressed short-channel effect** [13953-167]

13953 0R **A mechanochromic silica hydrogel for stretching and bending sensing applications** [13953-95]

13953 0S **Research on the system framework of coastal ships with few crew** [13953-100]

13953 0T **Research on surface crack propagation of Ti-6Al-4V based on infrared thermography and thermodynamic simulation** [13953-126]

13953 0U **Investigation on the crashworthiness of Al/CFRP hybrid channel-section columns with kirigami** [13953-162]

13953 0V **Effect of two pretreatment processes on corrosion resistance of chemical conversion coating on 2024 aluminum alloy** [13953-55]

AUTOMATION, CONTROL AND ROBOTICS

13953 0W **Research on trajectory planning of the mechanical arm of the anchor rod robot** [13953-137]

13953 0X **Prescribed performance sliding mode control of electro-hydraulic position servo system based on FTDS** [13953-164]

13953 0Y **Finite element and physics-informed neural network fusion for elasticity mechanics solving techniques** [13953-186]

13953 0Z **Cross-machine fault diagnosis based on reinforcement transfer network under few labeled samples** [13953-68]

13953 10 **Adaptive recognition and AR-guided assembly for aviation cable connectors** [13953-50]

13953 11 **Rolling bearing fault diagnosis method based on parameter-optimized variational mode decomposition** [13953-13]

13953 12 **Probing an autonomous decision-making production mechanism of the digital twin shop-floor based on the industrial large model** [13953-114]

13953 13 **Recognition of open-set appearance quality of resistance spot welding based on triplet loss** [13953-33]

13953 14 **Obstacle avoidance planning for body-in-white spot welding robot based on deep reinforcement learning** [13953-43]

13953 15 **Wear prediction of harmonic gears using a data-driven method based on stacking approach** [13953-184]

13953 16 **Research and application of UAV flight control system based on 6-DOF parallel platform** [13953-25]

13953 17 **Active disturbance rejection control of water hydraulic digital flow valve with an independent metering pilot valve** [13953-54]

13953 18 **Research on time-series-aware data cleansing method for sliding bearings under variable operating conditions** [13953-47]

13953 19 **Helical gear fatigue life prediction via ensemble methods: BagNet and GradBoostNet** [13953-179]

13953 1A **Fault diagnosis of hydraulic directional control valve based on model-assisted CNN-BiTCN-Crossattention** [13953-117]

13953 1B **Fault diagnosis of hydraulic system based on multi-sensor information fusion and VMD-SABO-KELM** [13953-239]

13953 1C **Research on stress optimization control technology of interference fit for armature assembly of electro-hydraulic servo valve** [13953-31]

13953 1D **Tool vibration measurement method for milling process based on machine vision** [13953-111]

13953 1E **A modified transformer-based fault diagnosis method for robotic motor systems** [13953-235]

13953 1F **Design and application of quick-change explosion-proof inspection fire-extinguishing robot** [13953-153]

13953 1G **Intelligent quality inspection of armrest stitching technology** [13953-166]

13953 1H **Autonomous circling tracking control of loitering munitions against moving targets** [13953-140]

13953 1I **Design and application of intelligent robot for explosion-proof inspection and fire-extinguishing** [13953-225]

13953 1J **Intelligent detection for surface defects in malleable cast iron** [13953-109]

13953 1K **Machine learning-driven framework for tool wear prediction and optimization in machinability of SiCp/Al metal matrix composite materials** [13953-146]

13953 1L **Research on structural vibration control based on magnetorheological elastomer isolators under complex excitations** [13953-226]

13953 1M **Performance of Bhattacharyya distance-based K-nearest neighbor in filament extrusion state monitoring of fused filament fabrication** [13953-170]

MECHANICAL SYSTEMS AND MANUFACTURING

13953 1N **Optimization of titanium alloy piston performance through finite element analysis and multi-objective optimization** [13953-138]

13953 1O **Research on design and performance test of motor test-bed** [13953-141]

13953 1P **Modeling and finite element analysis of scabbling machine for operational tunnel treatment** [13953-81]

13953 1Q **Analysis of collisions and vibrations of on-board hydrogen storage systems** [13953-135]

13953 1R **Design and analysis of fatigue testing machine for high torque rotary compensator** [13953-108]

13953 1S **Analysis and treatment of high vibration of low-pressure heater drain pump bearings** [13953-218]

13953 1T **Study on the vibration calculation method of unidirectional flow and solid coupling in three-way current carrying pipeline** [13953-122]

13953 1U **Investigation and analysis of the thermal characterization of the saddle-column in precision horizontal machining center** [13953-11]

13953 1V **Research on in situ monitoring method for the surface condition of planetary mixer blades** [13953-101]

13953 1W **Investigation of cutting force in TC18 titanium alloy through longitudinal-torsional ultrasonic vibration milling** [13953-168]

13953 1X **Design and research on a laminated floating valve piezoelectric pump** [13953-223]

13953 1Y **Heat generation and convective heat transfer in thermal simulations of a precision horizontal machining center** [13953-88]

13953 1Z **Design of bimetal cylinder heads via additive manufacturing: bonding mechanism and performance evaluation of GH4169/cast iron bimetal** [13953-61]

13953 20 **Effect of friction characteristics on the vibration response of a coupled landing gear-wheel brake structure** [13953-35]

Part Two

13953 21 **Research on the influence of printing forming process parameters on the forming accuracy of different types of sand molds** [13953-190]

13953 22 **Nonlinear dynamics analysis of a rectangular plate carrying a manipulator with arbitrary installation position and azimuth** [13953-112]

13953 23 **Analysis of the friction-induced damping effect of a ball screw tuned mass damper inerter** [13953-39]

13953 24 **Integrated electro-hydraulic valve actuator design and simulation analysis** [13953-145]

13953 25 **Design and kinematic simulation of an adjustable crank swing mechanism for high-frequency sliding bearing testing machines** [13953-41]

13953 26 **Optimized design of communication and algorithms for a rotating machinery vibration flexible acquisition system** [13953-196]

13953 27 **Friction-induced structure-fluid coupled vibration model for an aircraft brake system** [13953-237]

13953 28 **Parametric study of friction-induced structure-fluid coupled vibration for an aircraft brake system** [13953-236]

13953 29 **Modeling of bolted connection structures considering non-Gaussian surface morphology features and non-uniform contact pressure distribution at the interface** [13953-129]

13953 2A **Research and application of check valve device for emergency connection of drilling tools in petroleum drilling** [13953-155]

13953 2B **Analysis and treatment of the abnormal contact problem of the lower reactor internals in the reactor pressure vessel** [13953-217]

13953 2C **Numerical simulation of a novel cold plate for IGBT heat dissipation in passenger vehicles** [13953-36]

13953 2D **Development of parametric design system for hinge beam of the cubic press** [13953-6]

13953 2E **Simulation research on laser directed energy deposition process for large-scale TA15 components** [13953-79]

13953 2F **Analysis and improvement of trimming issues for silver plating layer of C-type sealing ring in reactor pressure vessel** [13953-214]

13953 2G **Structural design and topology optimization of lightweight composite launch units and their integration impact analysis on general-purpose mobile platforms** [13953-151]

13953 2H **Design and test of large aperture scanning** [13953-188]

13953 2I **Troubleshooting of vibration instability under low-load conditions for unit with planetary gear reducer** [13953-210]

13953 2J **Low-frequency vibration reduction optimization for acoustic metamaterials via path-aligned layout design** [13953-185]

13953 2K **Research on the influence of hopper structure parameters on the dispersion of moulding powder** [13953-182]

13953 2L **Three-dimensional modeling and simulation of mobile tobacco filament nitrogen filling and sealing machine** [13953-29]

13953 2M **Study on the influence of surface texture parameters and operation conditions on the lubrication performance of bearing** [13953-152]

13953 2N **Study on reliability impact of high-temperature molten salt pump using analytic hierarchy process and fuzzy comprehensive evaluation method** [13953-10]

13953 2O **Study on influencing factors and comprehensive treatment strategy of abnormal load of feed-water pump port in a power plant** [13953-46]

13953 2P **The influence of boundary constraint conditions on the modal frequency of local resonant metamaterials** [13953-197]

13953 2Q **Topology optimization of porous structure** [13953-84]

13953 2R **Optimization of longitudinal biaxial flow threshing and separation device based on CFD-DEM simulation** [13953-160]

13953 2S **Optimization design of condensate pump flow passage based on Kriging model and multi-objective genetic algorithm** [13953-142]

13953 2T **Study on local buckling performance and design of cold-formed lipped channel flexural members with web stiffened holes** [13953-118]

13953 2U **Material properties of cold-formed thin-walled steel at high temperatures** [13953-113]

13953 2V **Design method for local buckling performance and bearing capacity of axial compression member of web stiffening hole crimped channel steel** [13953-123]

13953 2W **Research on distortional buckling behavior and design methods of cold-formed lipped channel steel flexural members with web stiffener holes** [13953-119]

13953 2X **Study on fire resistance design method for flexural members of LQ550 cold-formed thin-walled lipped channels** [13953-121]

13953 2Y **Study on the distorted buckling capacity of axial compression members made of web stiffening holes rolled edge channels** [13953-130]

13953 2Z **The effect of weakened segment width on the hysteretic performance of X-shaped metallic dampers** [13953-177]

13953 30 **Study on compaction characteristics of phyllite composite improved soil** [13953-90]

13953 31 **Vibration and contact characteristics analysis of the aero-engine blade with crack during the unsteady state** [13953-240]

13953 32 **Numerical simulation of crack propagation from a hole in high-performance concrete under triaxial compression** [13953-116]

13953 33 **The mechanism of the acoustic radiation force on a free elastic cylinder in a bounded viscous fluid** [13953-23]

13953 34 **Numerical prediction of particle motion trajectory under the action of acoustic radiation force** [13953-59]

13953 35 **Structural mechanics analysis of double-layer frequency-selective surfaces with kirigami structures** [13953-227]

13953 36 **Application of assembled energy-saving hydraulic system** [13953-48]

13953 37 **Analysis of arc-extinguishing performance of C_4F_7N/CO_2 gas mixtures in multi-chamber systems under impulse current conditions** [13953-45]

13953 38 **Research on multi-point adaptive loading technology for high aspect ratio wings** [13953-134]

13953 39 **Analysis model for optimal design of double-layer composite armor** [13953-171]

13953 3A **Crashworthiness investigation of high slenderness ratio cabin columns with lightening holes** [13953-86]

13953 3B **Study on heat transfer characteristics of plate-fin liquid-cooled channel cold plate** [13953-60]

13953 3C **Experimental research on a transcritical CO_2 high-temperature heat pump based on a lunar base** [13953-97]

VEHICLE AND TRANSPORTATION SYSTEMS

13953 3D **Optimization of traffic vehicle detection algorithms in complex urban tunnel environments** [13953-132]

13953 3E **An improved multiobjective genetic algorithm for ship sub-assembly welding path planning** [13953-231]

13953 3F **A practical control method for autonomous truck platooning considering uncertainty of 5G-V2X information** [13953-144]

13953 3G **Data-driven adaptive region partitioning for accurate satellite antenna thermal deformation prediction** [13953-189]

13953 3H **Path planning of 5G unmanned vehicles based on improved A* algorithm** [13953-221]

13953 3I **Optimization of landing gear control strategy and structure** [13953-174]

13953 3J **Multiphysics-coupled correction and closed-loop control for 2D deformation of aerospace titanium alloys** [13953-136]

13953 3K **AI-enabled multiagent path planning for intelligent transportation systems: a field geometry coupling and topological decision-making integrated framework** [13953-158]

13953 3L **Power analysis and prediction of auxiliary machines for underwater vehicles based on LSTM** [13953-173]

13953 3M **Design and simulation of a reconfigurable low-altitude flying car** [13953-24]

13953 3N **Research on air conditioning noise mode prediction based on scaled conjugate gradient method** [13953-211]

13953 3O **Thermal design simulation of lunar scientific payload** [13953-163]

13953 3P **Exploring the application of AI in aerospace MBSE** [13953-99]

13953 3Q **A component-based approach to cross-domain vehicle design for target interception** [13953-57]

13953 3R **Research on design and application of cloud platform for spacecraft testing tasks** [13953-98]

13953 3S **Mechanism and countermeasures of molecular contamination in slip rings of Spacecraft under vacuum environment** [13953-157]

13953 3T **Study on the influence of component layout in transport aircraft fuel tanks on potential ignition source locations induced by lightning current** [13953-91]

13953 3U **Research on water rocket simulation modeling based on OpenRocket** [13953-2]

13953 3V **Research on Taylor-Couette flow and heat transfer characteristics between smooth surface stator and rotor in high-speed aviation motor** [13953-139]

13953 3W **Research on novel operational modes for crew-reduced operations of coastal intelligent ships** [13953-1]
