Volume 13956

Proceedings of SPIE 0277-786X, V. 13956

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *AOPC 2025: Laser Technology and Applications*, edited by Pu Zhou, Proc. of SPIE 13956, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

LASER TECHNOLOGY AND APPLICATIONS

13956 02 **Design and fabrication of liquid crystal optical phased arrays with wide deflection angle** [13956-11]

13956 03 **Maintainability analysis and design study of pulsed Nd:YAG laser ranging systems** [13956-13]

13956 04 **Review and future consideration on airborne ultraviolet warning system** [13956-15]

13956 05 **Research on land use classification of high-resolution remote sensing images based on object GLCM texture features** [13956-16]

13956 06 **Solid-state Ho:YLF gradient-doped double-pass hybrid amplifier based on fiber preamplifier with high energy and high efficiency** [13956-17]

13956 07 **Decoherence characteristics of laser echo light field from Gaussian random rough surface in slant atmosphric turbulence** [13956-18]

13956 08 **Laser stealth dicing technology for carbon nanotubes wafer** [13956-19]

13956 09 **Influence of the collisional energy transfer between potassium and rubidium atoms** [13956-21]

13956 0A **Adaptive underwater laser imaging using a free-running dual-comb** [13956-22]

13956 0B **Efficiency amplification of tapered fiber underwater laser-induced cavitation bubble propulsion: parametric optimization of hydrodynamic interactions** [13956-24]

13956 0C **A wide-field-of-view infrared planar lens with spatially invariant point spread function** [13956-25]

13956 0D **Evaluation of the output properties of a K-Rb dual-wavelength alkali vapor laser** [13956-26]

13956 0E **Development of design and application of flexible infrared stealth devices** [13956-28]

13956 0F **Mid-infrared DFG in reverse-polarization dual-layer lithium niobate thin film** [13956-29]

13956 0G **Research on high-damage-threshold reflective gratings** [13956-30]

13956 0H **Disabling glare and dazzling effects** [13956-32]

13956 0I **Optical system design for distributed semi-active laser seeking** [13956-33]

13956 0J **High-repetition-rate and widely-tunable passively mode-locked VECSEL** [13956-35]

13956 0K **Research on the dynamic characteristics of ultrafast pulse based on EDFL cavity parameter adjustment** [13956-37]

13956 0L **Generation of high-power femtosecond green laser by frequency doubling of an Yb-doped photonic crystal fiber laser** [13956-40]

13956 0M **Theoretical analysis on the effect of Rayleigh-backscattering and system internal reflection on SBS in narrow-linewidth fiber laser** [13956-44]

13956 0N **Numerical simulation study on velocity and pressure field of shock wave induced by nanosecond pulse laser** [13956-48]

13956 0O **Numerical simulation study on temperature and stress field of aluminum alloy irradiated by continuous-nanosecond pulse combined laser** [13956-49]

13956 0P **A full-waveform time identification method based on echo decomposition** [13956-50]

13956 0Q **Research on the optimal scanning frequency selection method of rotating double-prism** [13956-55]

13956 0R **Finite element analysis of laser-induced acoustic characteristics for air-to-water cross-ice communication** [13956-59]

13956 0S **Three-dimensional optical waveguides with continuously varying depths inscribed by femtosecond laser** [13956-60]

13956 0T **Acoustic emission signal monitoring of water-jet guided laser drilling in nickel-based superalloys** [13956-61]
