**Volume 13957**

Proceedings of SPIE 0277-786X, V. 13957

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *AOPC 2025: Infrared and Terahertz Technology and Applications*, edited by Xue Li, Xin Tang, Proc. of SPIE 13957, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

## INFRARED TECHNOLOGY AND APPLICATIONS

---

- 13957 02 **Modeling and experimental analysis of infrared polarization in coating-substrate coupled systems under complex solar irradiance** [13957-1]
- 13957 03 **Detection technology of moving small infrared target in dynamic background based on improved vibe algorithm** [13957-2]
- 13957 04 **Physics-based infrared fire image simulation for evaluating detection algorithms using VIIRS data** [13957-3]
- 13957 05 **Collaborative detection of infrared targets in the overlapping region of four-aperture fields of view based on the residual local pyramid attention network** [13957-4]
- 13957 06 **Research on ultrawide bandwidth optical coupler for the central wavelength of 1064nm** [13957-6]
- 13957 07 **The study of the stress analysis and application of high-speed flying optical domes** [13957-8]
- 13957 08 **The noise model in dual comb ranging system** [13957-9]
- 13957 09 **Leak detection of C<sub>4</sub>F<sub>7</sub>N mixed gas using infrared imaging based on YOLO11** [13957-10]
- 13957 0A **Perfect absorber from visible to infrared based on phase-change materials** [13957-12]
- 13957 0B **Infrared point target small-sample recognition based on temporal feature transfer: a study on the fusion of simulation and real data** [13957-13]
- 13957 0C **Depth-constrained polarimetric-infrared fusion for 3D nondestructive inspection** [13957-14]
- 13957 0D **Mid- and long-wave infrared imaging simulation based on Unreal Engine** [13957-15]
- 13957 0E **Research on the generation of deep-cold environment target temperature fields based on GAT-transformer network** [13957-16]

- 13957 OF **Simulation of integrated infrared radiation characteristics of hypersonic cruise vehicles**  
[13957-18]
- 13957 OH **Optimization of hydroxyl (Si-OH) content measurement in fused quartz and its performance study under 193nm laser irradiation** [13957-20]
- 13957 OI **An enhanced DSST algorithm integrated gradient structure tensor feature and adaptive update mechanisms** [13957-27]

---

#### TERAHERTZ TECHNOLOGY AND APPLICATIONS

---

- 13957 OJ **Numerical investigation of terahertz wave propagation in XLPE cable insulation for nondestructive defect detection** [13957-5]
- 13957 OK **Receive signal model of frequency diverse array radar in the terahertz band** [13957-7]
- 13957 OL **Terahertz-based communication systems for high-speed plasma penetration** [13957-11]
- 13957 OM **Visualization and nondestructive characterization of adhesive layer curing properties based on terahertz time-domain spectroscopy** [13957-17]
- 13957 ON **Terahertz time-domain reflection signal enhancement technique under oblique incidence**  
[13957-21]
