

PROCEEDINGS OF SPIE

# ***AOPC 2025: Optical Spectroscopy and Imaging; and Atmospheric and Environmental Optics***

**Zongyin Yang**  
*Editor*

**24–27 June 2025**  
**Beijing, China**

*Sponsored and Organized by*  
Chinese Society for Optical Engineering (CSOE) (China)

*Technical Cosponsor*  
SPIE

*Published by*  
SPIE

**Volume 13959**

Proceedings of SPIE 0277-786X, V. 13959

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *AOPC 2025: Optical Spectroscopy and Imaging and Atmospheric and Environmental Optics*, edited by Zongyin Yang, Proc. of SPIE 13959, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## OPTICAL SPECTROSCOPY AND APPLICATIONS

---

- 13959 02 **Illumination-adaptive and diffusion-enhanced UAV multispectral BRDF modeling for large-scale areas** [13959-1]
- 13959 03 **Inversion of vibrational and rotational temperatures of OH in non-local thermodynamic equilibrium conditions** [13959-5]
- 13959 04 **Variable-focus lens integrated with rotating grating for high-precision spectral detection** [13959-6]
- 13959 05 **Application status for rapid and nondestructive detection of illicit drugs based on infrared spectroscopy** [13959-8]
- 13959 06 **Study on bruise severity classification of loquat based on hyperspectral imaging** [13959-9]
- 13959 07 **A hyperspectral 3D collaborative imaging method based on Hadamard undersampling encoding-decoding characteristics** [13959-10]
- 13959 08 **Verification of the change of material surface potential under ionic-wind-enhanced Raman spectroscopy** [13959-12]
- 13959 09 **Broadband mid-wave infrared MEMS tunable Fabry-Pérot filter chip** [13959-13]
- 13959 0A **Characterization of the rejection ratio in a semiconductor laser-based Thomson scattering spectrometer** [13959-17]
- 13959 0B **Mechanistic study on selective lithium extraction from oilfield brine using a TOP-sodium phosphotungstate system** [13959-20]
- 13959 0C **Research on the characteristic fingerprint spectrum of *Gastrodia* using infrared spectroscopy and its association with the place of origin** [13959-25]
- 13959 0D **Analysis of hydrogen concentration in air with target-enhanced laser-induced breakdown spectroscopy using zinc target** [13959-26]
- 13959 0E **Review of the application of deep learning and spectral analysis technology in food property detection** [13959-29]

- 13959 OF **Evaluation on ultraviolet spectral radiation for body and exhaust plume of hypersonic targets in booster phase** [13959-34]
- 13959 OG **Microanalysis of elemental composition of ethnic ornament with target-enhanced orthogonal double-pulse laser-induced breakdown spectroscopy** [13959-37]
- 13959 OH **Micro confocal Raman spectroscopy combined with chemometrics method for fast identification of biotoxins** [13959-38]
- 13959 OI **Current development status of standoff detection of chemical contamination technology based on quantum cascade lasers** [13959-39]
- 13959 OJ **Microsphere-coupled superhydrophobic/hydrophilic circular ring patterned substrate for high-sensitivity SERS detection** [13959-41]
- 13959 OK **An error assessment method for abundance inversion addressing spectral variability** [13959-42]
- 13959 OL **Quantitative analysis and component identification in mixed fluorescence spectra using random forest and genetic algorithm** [13959-43]
- 13959 OM **Detection of H<sub>2</sub>O<sub>2</sub> contained in opaque PTFE medium by Raman spectroscopy** [13959-44]
- 13959 OO **Research of the enhancement factor of resonance Raman scattering in cytochrome c** [13959-49]
- 13959 OP **A grating-free fluorescence detection system in visible range** [13959-50]
- 13959 OQ **Research on heterogeneous noise suppression and peak parameter inversion in Raman spectroscopy under a three-stage synergistic framework** [13959-51]
- 13959 OR **Research on polarization optimization for quantitative analysis of K element in paddy field soil by laser-induced breakdown spectroscopy** [13959-52]
- 13959 OS **IR-786-based multispectral fluorescence imaging for brown adipose tissue in vivo** [13959-54]
- 13959 OT **All-optical interferometric weak acoustic signal detection system based on cantilever diaphragm** [13959-56]
- 13959 OU **Feature wavelength selection for nighttime camouflage target recognition using multidimensional spectral imaging** [13959-57]
- 13959 OV **Lightweight semantic segmentation network based on ConvNeXt and transformer for medical hyperspectral cell images** [13959-58]

#### ATMOSPHERIC AND ENVIRONMENTAL OPTICS

---

- 13959 0W **Light scattering matrices for cosmic dust particles for remote sensing data interpretation**  
[13959-2]
- 13959 0X **Cascaded MDPSK-PAM dimming scheme for polar coded visible light communication**  
[13959-3]
- 13959 0Y **Russian observation site of global aerosol-cloud-precipitation observation network (GAONet) in Tomsk** [13959-4]
- 13959 0Z **Radially polarized vector coherent array laser beams in non-Kolmogorov medium**  
[13959-7]
- 13959 10 **Research on high-speed visible light detection system data transmission and processing methods based on optical module interfaces** [13959-11]
- 13959 11 **Wind field and extinction coefficient coordination detection by a scanning Doppler LiDAR**  
[13959-14]
