Volume 13961

Proceedings of SPIE 0277-786X, V. 13961

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *AOPC 2025: Optical Devices and Integration*, edited by Linjie Zhou, Jin Guo, Proc. of SPIE 13961, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

OPTICAL DEVICES AND INTEGRATION

- 13961 02 **Influence of stepped InGaN barrier layers on the performance of $\text{In}_{0.15}\text{Ga}_{0.85}\text{N}$ quantum well lasers** [13961-1]
- 13961 03 **Silicon photonics multifunction engine for low-cost and miniaturized fiber optic gyroscope** [13961-2]
- 13961 04 **Dynamic noise suppression and high-precision interrogation of large-scale identical weak grating arrays in OFDR systems** [13961-3]
- 13961 05 **Multipoint and high-sensitivity hydrogen leakage sensing technology based on OFDR and FP microcavities** [13961-4]
- 13961 06 **Microwave photonics-based Doppler frequency shift and angle of arrival measurement system with large spurious-free dynamic range** [13961-5]
- 13961 07 **Reconfigurable nonlinear spoof plasmonic waveguide for continuously controlling the amplification and absorption** [13961-6]
- 13961 08 **A comprehensive biometric sensing method based on dual-domain electromagnetic signals from microwave photonic ultra-wideband radar** [13961-9]
- 13961 09 **CLIP-Diff: transfer CLIP to diffusion model for generalizable image denoising** [13961-10]
- 13961 0A **A nondestructive compression testing system for FPC-based coherent optical devices: enabling terahertz-ready production** [13961-12]
- 13961 0B **High-efficiency low-ripple four-switch buck-boost converter for advanced electronic systems** [13961-13]
- 13961 0C **DC magnetic field sensor based on a magnon-microwave photon coupled system** [13961-14]
- 13961 0D **Gain-noise characteristics of hole multiplication InGaAs/InP cascaded multiplication avalanche photodiodes** [13961-16]
- 13961 0E **Broadband asymmetric polarization beam splitter with high-extinction ratio using nanopore subwavelength gratings** [13961-18]
- 13961 0F **Study on an FPGA- and GaN HEMT-based tunable laser source drive system** [13961-19]

- 13961 OG **Relative humidity sensor based on graphene oxide film-coated double tapered structure** [13961-21]
- 13961 OH **Microwave signal detection system based on ferromagnetic materials** [13961-22]
- 13961 OI **Characteristics of AlGaAs in the laser structure of (Al)GaAs/AlGaAs multilayer epitaxy grown by MOCVD** [13961-25]
- 13961 OJ **Research on the design, testing, and application of high-bandwidth flexible printed circuit in high-speed optoelectronic devices** [13961-26]
- 13961 OK **Thin-film lead zirconate titanate microring wavelength selective switch with nonvolatile trimming** [13961-27]
- 13961 OL **Application of a gigabit ethernet acquisition system based on Zynq in DBR lasers** [13961-30]
- 13961 OM **Switchable resolution silicon photonic spectrometer based on multimode waveguide gratings and photonic crystal nanobeam cavities** [13961-31]
- 13961 ON **Microwave photonic radar system for high-resolution and fast detection of small unmanned aerial vehicles based on photon-assisted matched filter** [13961-32]
- 13961 OO **The simulation of EBAPS based on new passivation layer structure** [13961-33]
- 13961 OP **High-speed silicon-based Mach–Zehnder modulator for the 2 μ m wavelength band** [13961-36]
- 13961 OQ **Demonstration of electrical scanning imaging functionality based on liquid crystal programmable devices** [13961-37]
- 13961 OR **High-speed ranging-based encryption scheme for multiple modulation formats achieving up to 20 Gbps transmission** [13961-38]
- 13961 OS **A phase-stabilized actively mode-locked optoelectronic oscillator incorporating an octave filter** [13961-42]
- 13961 OT **Photonic chip-based fiber optic gyroscope transceiver towards high-power application** [13961-43]
- 13961 OU **Transimpedance amplifier-hybrid integrated miniature silicon photonic fiber optic gyroscope module for high-precision inertial navigation** [13961-44]
- 13961 OV **A tolerance allocation method for AOTF spectrometers integrating spectral and spatial optical errors** [13961-45]
- 13961 OW **Space-efficient optical neural networks enhanced by polarization-controlled MZI architectures** [13961-51]
- 13961 OX **Modeling and frequency-domain simulation of electronic components for photonic-electronic codesign** [13961-53]

- 13961 0Y **Phase-noise-insensitive photonic-assisted integrated radar-lidar system using double-sideband modulation** [13961-55]
- 13961 0Z **High-capacity all-optical digital signal storage** [13961-56]
- 13961 10 **Research on high-resolution dynamic groundwater monitoring using gravity gradiometry** [13961-58]
- 13961 11 **Modeling of wavelength-dependent photonic devices in Verilog-A for electronic-photonic co-simulation** [13961-60]
- 13961 12 **A novel satcom-on-the-move scheme by laser diffuse reflection off stationary objects** [13961-62]
- 13961 13 **Parametric macromodeling of passive photonic integrated circuits for opto-electronic co-simulation** [13961-63]
- 13961 14 **Optical bistability control and nonlinear dynamics in active cavity optomechanical systems based on thin film oscillators** [13961-66]
- 13961 15 **Integrated microwave photonic radar for multifunctional applications based on silicon on insulator** [13961-67]
- 13961 16 **Gain regulation of microchannel plate via atomic layer deposition of Al_2O_3 films** [13961-68]
- 13961 17 **Optimization of bulk resistance in high-performance $4\mu\text{m}$ microchannel plates** [13961-69]
- 13961 18 **Research on high-reliability PDH frequency stabilization technology against environmental interference** [13961-70]
- 13961 1A **Remote detection system for NH_3 based on TDLAS** [13961-72]
- 13961 1B **Mitochondrial targeting of fluorescent fusion proteins predicted by AlphaFold3** [13961-75]
- 13961 1C **Research on the failure mechanism and mathematical model of solar-blind ultraviolet detectors with electric vacuum devices under storage state** [13961-76]
