Volume 13962

Proceedings of SPIE 0277-786X, V. 13962

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *AOPC 2025: Micro-Nano Optics*, edited by Min Qiu, Proc. of SPIE 13962, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

MICRO-NANO OPTICS

- 13962 02 **Orientated integrated cellulose nanocrystal microstructures by using nematics long-range alignment on sandwich-patterned polydimethylsiloxane microstructure** [13962-3]
- 13962 03 **Deep learning-driven multidistance imaging metasurface** [13962-4]
- 13962 04 **Computational mid-infrared spectrometer based on all-dielectric metasurfaces** [13962-6]
- 13962 05 **Miniaturized long wave infrared spectrometer with polarization-dependent plasmonic metasurfaces** [13962-7]
- 13962 06 **Design method of pixelated multiwavelength diffractive optical element for vector light field 3D display** [13962-9]
- 13962 07 **Interference effect of area array CCD irradiated by short-pulse nanosecond laser** [13962-13]
- 13962 08 **Absorption spectra and resonance Raman spectra of tetrafluorenofulvalene** [13962-14]
- 13962 09 **Study of laser pulse duration on laser-induced damage in fused silica** [13962-15]
- 13962 0A **The correlation between atmospheric temperature in Tibet and sunspot activity from 1978 to 2018** [13962-20]
- 13962 0B **Sensitivity enhancement of surface plasmon resonance sensors with hyperbolic metamaterials and transition metal dichalcogenides hybrid nanostructure** [13962-21]
- 13962 0C **Application of mid-infrared spectroscopy in discriminating different categories of saffron** [13962-22]
- 13962 0D **Design and fabrication of 80-nm-period gold transmission grating with high diffraction efficiency** [13962-23]
- 13962 0E **Development status and research trends of mid-infrared quantum cascade lasers** [13962-24]
- 13962 0F **Fabrication of high-step-coverage HfO₂ thin films via atomic layer deposition** [13962-25]
- 13962 0G **Design and optimization of grating chip for compact magneto-optical trap** [13962-26]

- 13962 OH **Fano resonance of dielectric linear trimer for polarization-direction sensing** [13962-27]
- 13962 OI **Subcycle attosecond transient absorption structures of helium dressed by an elliptically polarized laser field** [13962-28]
- 13962 OJ **Research and prospect of intelligent monitoring system for road and bridge safety based on multisource data fusion** [13962-29]
- 13962 OK **A Mach-Zehnder interferometric curvature and temperature sensor based on grapefruit-type photonic crystal fiber** [13962-30]
- 13962 OL **Intelligent recognition of vibration events based on fiber Bragg grating arrays and improved YOLOV8 model** [13962-33]
- 13962 OM **High-gain aperiodic convolution coding for distributed Raman temperature sensing** [13962-34]
- 13962 ON **Ultra-thin diameter high-sensitivity hydrophone based on helical optical fiber** [13962-37]
- 13962 OO **Fault diagnosis of belt conveyor idlers based on distributed fiber Bragg grating array vibration sensing** [13962-38]
- 13962 OP **A fiber optic sensor integrating Fabry-Pérot interferometry and anti-resonance effect for dual-parameter measurement of air pressure and temperature** [13962-39]
- 13962 OQ **Impact damage monitoring of composite tank using phase-shifted fiber Bragg grating based acousto-ultrasonic system** [13962-42]
- 13962 OR **High-sensitivity sensor based on fiber Bragg grating for fuel level measurement** [13962-44]
- 13962 OS **Distributed optical fiber sensing of BOTDA based on double sideband** [13962-47]
- 13962 OT **A wired/wireless integrated fiber optic sensing teaching system based on virtual-physical address mapping** [13962-48]
- 13962 OU **Systematic characterization of background phase noise in hybrid WDM-TDM FBG sensing arrays: commonalities, differences, and Rayleigh scattering effects** [13962-49]
- 13962 OX **A fiber-optic frequency division multiplexing sensing method under sawtooth frequency modulation** [13962-55]
- 13962 OY **High-precision multitaper FFT phase demodulation algorithm for solid-state Fabry-Pérot temperature monitoring system** [13962-56]
- 13962 OZ **Enhancing oil-gas-water three-phase flow detection using a GRIN lens-Integrated fiber optic probe** [13962-57]

- 13962 10 **Research on the application of optical fiber sensing technology in online monitoring of wind turbine blades** [13962-59]
- 13962 11 **A high-sensitivity fiber Fabry–Pérot sensor for low-frequency vibration** [13962-60]
- 13962 12 **Precision analysis of a dual-coil fiber optic gyroscope with high dynamic performance** [13962-62]
- 13962 13 **Fiber optic photoacoustic-based bio-tissue imaging transducer** [13962-63]
- 13962 14 **FBG based absolute horizontal position monitoring of the tunnel linings** [13962-64]
- 13962 15 **Frequency correction for FMCW laser-interferometric micro-displacement measurement** [13962-65]
- 13962 16 **A Doppler shift compensation algorithm based on FMCW laser interferometry** [13962-66]
