Volume 13964

Proceedings of SPIE 0277-786X, V. 13964

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *AOPC 2025: Astronomical Technologies and Instrumentation*, edited by Jian Ge, Proc. of SPIE 13964, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ASTRONOMICAL TECHNOLOGIES AND INSTRUMENTATION

- 13964 02 **Overview of the telescope observation management and control system bus** [13964-2]
- 13964 03 **Research on the desired mode motion control method for Fengyun spacecraft for in-orbit operation** [13964-6]
- 13964 04 **Nonlinear tracking single neuron compound control for fine guiding in space telescope fine image stabilization system** [13964-7]
- 13964 05 **Design and preparation of enhanced Ag mirrors for astronomical telescopes** [13964-8]
- 13964 06 **Development and performance evaluation of low-noise CMOS sensor electronics for mission Earth 2.0** [13964-10]
- 13964 07 **Assembly and testing of the eXTP focusing mirror prototype** [13964-11]
- 13964 08 **Photon return maximization experimental platform for laser guide star with sodium vapor cell** [13964-12]
- 13964 09 **Development and laboratory performance of a multimode near-infrared spectrograph for LAMOST** [13964-15]
- 13964 0A **Optical performance perception technology in the embodied intelligence-based optical astronomical telescopes** [13964-17]
- 13964 0B **Design and fabrication of a wideband dichroic coating for the Mephisto survey telescope** [13964-18]
- 13964 0C **Study on thermal stability control of transit telescope and detector on Earth 2.0** [13964-24]
- 13964 0D **Research on film thickness uniformity of large-aperture convex lenses** [13964-25]
- 13964 0E **Numerical simulation and analysis of nulling interferometers for space telescopes** [13964-26]
- 13964 0F **Blind restoration algorithm for adaptive optics images based on successive over-relaxation iteration** [13964-28]
- 13964 0G **A dual-functional calibration source for astronomical spectrograph** [13964-31]

- 13964 OH **Lab high-precision photometry performance verification with a GSENSE 1081 CMOS camera for the space ET mission** [13964-32]
- 13964 OI **Design and key technology research of the vacuum delay line system for long-baseline optical interferometers** [13964-35]
- 13964 OJ **Orbit design and analysis for the Earth 2.0 (ET) space mission** [13964-36]
- 13964 OK **The application progress of intense pulse x/γ-ray detectors in the field of nuclear radiation detection** [13964-38]

MARINE AND POLAR OPTICAL DETECTION TECHNOLOGY

- 13964 OL **Multipoint underwater wireless optical communication based on a wavelength switchable single module RGB laser diode** [13964-1]
- 13964 OM **Research on high-precision laser three-dimensional imaging method for turbid water** [13964-3]
- 13964 ON **Microfluidic phosphate detection technology and analysis of salinity effects** [13964-4]
- 13964 OO **investigation of the minimum detectable limit for weak refractive index gradients in quantitative schlieren methods** [13964-5]
- 13964 OP **A modified transformer-based fault diagnosis method for robotic motor systems** [13964-13]
