# 2025 IEEE 36th International Symposium on Software Reliability Engineering (ISSRE) **ISSRE 2025**

## Table of Contents

Message from General Chairs .....	xiii
Message from Program Chairs .....	xiv
Organizing Committee .....	xv
Program Committee .....	xvii
Program Board .....	xx
Steering Committee .....	xxi
Advisory Committee .....	xxii
Keynotes .....	xxiii
Sponsors .....	xxvi

## Best Research Paper Candidates

Too Many Cooks: Assessing the Need for Multi-Source Data in Microservice Failure Diagnosis.....	1
<i>Shenglin Zhang (Nankai University), Xiaoyu Feng (Nankai University), Runzhou Wang (Nankai University), Minghua Ma (Microsoft), Wenwei Gu (Nankai University), Yongqian Sun (Nankai University), Zedong Jia (Nankai University), Jinrui Sun (Nankai University), and Dan Pei (Tsinghua University)</i>	
SyzOrch: An Orchestration Framework for Resource-Aware and Composable Kernel Fuzzing .....	13
<i>Lukai Xu (National University of Defense Technology, China), Baosheng Wang (National University of Defense Technology, China), Bo Yu (National University of Defense Technology, China), Boyu Chang (Zhejiang University, China), Binbin Zhao (Zhejiang University, China), Shouling Ji (Zhejiang University, China), Danjun Liu (National University of Defense Technology, China), Lei Zhou (National University of Defense Technology, China), Qiang Yang (National University of Defense Technology, China), and Yaojia Yang (National University of Defense Technology, China)</i>	
Understanding Recommendation System Robustness Against Silent Data Corruption: An Empirical Study .....	25
<i>Dongning Ma (Villanova University), Xun Jiao (Villanova University; Meta), Fred Lin (Meta), Daniel Moore (Meta), and Sriram Sankar (Meta)</i>	

## LLMs for Logs and Chatbots

DVSTdetector: Dual-View Spatio-Temporal Representation Learning for Intrusion Detection in Industrial Control System .....	37
<i>Xuemin Zhang (Wuhan University of Technology, China), Qianrong Zheng (Wuhan University of Technology, China), Rui Hao (Wuhan University of Technology, China), Zhe Xia (Wuhan University of Technology, China), Junwei Zhou (Wuhan University of Technology, China), and Jianwen Xiang (Wuhan University of Technology, China)</i>	
AetherLog: Log-Based Root Cause Analysis by Integrating Large Language Models with Knowledge Graphs .....	49
<i>Tianyu Cui (Nankai University, China), Ruowei Fu (Nankai University, China), Changchang Liu (Nankai University, China), Yuhe Ji (Nankai University, China), Wenwei Gu (Nankai University, China), Shenglin Zhang (Nankai University, China; Haihe Laboratory of Information Technology Application Innovation (HL-IT), China), Yongqian Sun (Nankai University, China; Tianjin Key Laboratory of Software Experience and Human Computer Interaction, China), and Dan Pei (Tsinghua University, China)</i>	
CSLParser: A Collaborative Framework Using Small and Large Language Models for Log Parsing... 61	
<i>Weijie Hong (Peking University, China), Yifan Wu (Peking University, China), Lingzhe Zhang (Peking University, China), Chiming Duan (Peking University, China), Pei Xiao (Peking University, China), Minghua He (Peking University, China), Xixuan Yang (Peking University, China), and Ying Li (Peking University, China)</i>	
Towards the Assessment of Task-Based Chatbots: From the TOFU-R Snapshot to the BRASATO Curated Dataset .....	73
<i>Elena Masserini (University of Milano-Bicocca, Italy), Diego Clerissi (University of Milano-Bicocca, Italy), Daniela Micucci (University of Milano-Bicocca, Italy), Joao R. Campos (University of Coimbra, Portugal), and Leonardo Mariani (University of Milano-Bicocca, Italy)</i>	

## Vulnerability Detection and Security

ISGraphVD: Precise Vulnerability Detection for IoT Supply Chains Based on Identifier Sensitive Graph .....	83
<i>Yingli Zhang (Lanzhou University), Xin Liu (Lanzhou University), Ziang Liu (Lanzhou University), Song Li (Zhejiang University), Nan Li (Lanzhou University), Weina Niu (University of Electronic Science and Technology of China), Rui Zhou (Lanzhou University), and Qingguo Zhou (Lanzhou University)</i>	
LLM Assisted Dual-View Awareness Framework for Smart Contract Vulnerability Detection .....	95
<i>Jianrong Wang ( Tianjin University, China; Tianjin Renai College, China), Yuru Yue (Tianjin University, China), Dengcheng Hu (Tianjin University, China), Qi Li (Tianjin University, China), Jinghui Li (Tianjin Renai College, China), and Wenyu Zhu (Tianjin Renai College, China)</i>	
Detection of Cross-Channel Invocation Risks in Hyperledger Fabric .....	107
<i>Luca Olivieri (Ca' Foscari University of Venice, Italy)</i>	

ShadowGuard: Cryptographic Shadow Stack Protection with XOR Obfuscation and HMAC Integrity.. 119

*Sirine Ilahi (University of Passau, Germany), Adebayo Omotosho (University of Gloucestershire, United Kingdom), and Christian Hammer (University of Passau, Germany)*

## Fuzzing and Testing

Fuzzing for Detecting Access Policy Violations in REST APIs ..... 130

*Andrea Arcuri (Kristiania University of Applied Sciences Oslo Metropolitan University, Norway), Ömur Sahin (Kristiania University of Applied Sciences, Norway), and Man Zhang (Beihang University, China)*

LOFT: An LLM-Enhanced Multi-Objective Search Framework for Fault Injection Testing of Autonomous Driving Systems ..... 142

*Guangdong You (University of Science and Technology of China, China), Shuncheng Tang (University of Science and Technology of China, China), Jixiang Zhou (University of Science and Technology of China, China), Hezhen Liu (Meituan, China), Junfang Jiang (Meituan, China), Yan-Fu Li (Tsinghua University, China), and Yinxing Xue (Institute of AI for Industries, China)*

MDPMorph: An MDP-Based Metamorphic Testing Framework for Deep Reinforcement Learning Agents ..... 154

*Jiapeng Li (Beihang University, China), Zheng Zheng (Beihang University, China), Yuning Xing (University of Auckland, New Zealand), Daixu Ren (Beihang University, China), Steven Cho (University of Auckland, New Zealand), and Valerio Terragni (University of Auckland, New Zealand)*

No Vibe Without Comprehension: Measuring Code Understanding in Modern Coding Workflows Using Neurophysiological Signals ..... 167

*Ricardo Saraiva (University of Coimbra, Portugal), João Durães (University of Coimbra, Portugal), Paulo de Carvalho (University of Coimbra, Portugal), Henrique Madeira (University of Coimbra, Portugal), and Haytham Hijazi (Palestine Ahliya University, Palestine)*

## Testing and Verification

Condition Sequence Coverage Criterion and Automatic Test Case Generation for Testing-Based Formal Verification ..... 179

*Ai Liu (Nanjing University of Aeronautics and Astronautics, China), Yang Liu (Nanjing University of Aeronautics and Astronautics, China), Lei Rao (Southwest Petroleum University, China), Shaoying Liu (East China Normal University, China), Zhibin Yang (Nanjing University of Aeronautics and Astronautics, China), and Zhiqiu Huang (Nanjing University of Aeronautics and Astronautics, China)*

XAMT: Cross-Framework API Matching for Testing Deep Learning Libraries .....	191
<i>Bin Duan (The University of Queensland, Australia), Ruican Dong (The University of Queensland, Australia), Naipeng Dong (The University of Queensland, Australia), Dan Dongseong Kim (The University of Queensland, Australia), and Guowei Yang (The University of Queensland, Australia)</i>	
What Challenges Do Developers Face When Using Verification-Aware Programming Languages? .....	203
<i>Francisco Oliveira (University of Porto, Portugal), Alexandra Mendes (University of Porto, Portugal), and Carolina Carreira (Carnegie Mellon University, University of Lisbon, Portugal)</i>	
Robustness Assessment of the Open vSwitch Kernel Module .....	215
<i>José Flauzino (Federal University of Paraná, Brazil), Marco Vieira (University of North Carolina at Charlotte, USA), and Elias P Duarte (Federal University of Paraná, Brazil)</i>	

## AI for Software Engineering

Breaking Task Isolation: Enhancing Code Review Automation with Mixture-of-Experts Large Language Models .....	227
<i>Jiayue Tang (Laboratory of Precise Computing, Institute of Software, China; University of Chinese Academy of Sciences, China), Li Yang (University of Chinese Academy of Sciences, China; Sinosoft Co., Ltd., China), Lei Yu (Laboratory of Precise Computing, Institute of Software, China; University of Chinese Academy of Sciences, China), Junyi Lu (Laboratory of Precise Computing, Institute of Software, China; University of Chinese Academy of Sciences, China), Zhirong Huang (Laboratory of Precise Computing, Institute of Software, China; University of Chinese Academy of Sciences, China), Fengjun Zhang (Laboratory of Precise Computing, Institute of Software, China), and Chun Zuo (Sinosoft Co., Ltd., China)</i>	
Code Generation of Smart Contracts with LLMs: A Case Study on Hyperledger Fabric .....	239
<i>Luca Olivieri (Ca' Foscari University of Venice, Italy), David Beste (CISPA Helmholtz Center for Information Security, Germany), Luca Negrini (Ca' Foscari University of Venice, Italy), Lea Schönherr (CISPA Helmholtz Center for Information Security, Germany), Antonio Emanuele Cinà (University of Genoa, Italy), and Pietro Ferrara (Ca' Foscari University of Venice, Italy)</i>	
Human-Written vs. AI-Generated Code: A Large-Scale Study of Defects, Vulnerabilities, and Complexity .....	252
<i>Domenico Cotroneo (University of Naples Federico II, Italy), Cristina Improta (University of Naples Federico II, Italy), and Pietro Liguori (University of Naples Federico II, Italy)</i>	
Beyond Functional Correctness: An Empirical Evaluation of Large Language Models for Text-to-Code Generation .....	264
<i>Rodrigo Pato Nogueira (University of Coimbra, Portugal; University of North Carolina, USA), Marco Vieira (University of North Carolina, USA), and João R. Campos (University of Coimbra, Portugal)</i>	

## Large Language Models

A Cascaded Pipeline for Self-Directed, Model-Agnostic Unit Test Generation via LLMs .....	276
<i>Chao Ni (Zhejiang University, China), Xiaoya Wang (Douyin Co., Ltd., China), Xin Yin (Zhejiang University, China), Liushan Chen (Douyin Co., Ltd., China), and Guojun Ma (Douyin Co., Ltd., China)</i>	
AUVANA: An Efficient and Automatic Approach to Variable Rename Refactoring via Large Pre-Trained Language Model .....	288
<i>Shiqi Cheng (Chinese Academy of Sciences, China), Chenjie Shen (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Li Yang (Chinese Academy of Sciences, China), Lei Yu (Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Fengjun Zhang (University of Chinese Academy of Sciences, China), and Chun Zuo (Chinese Academy of Sciences, China; Sinosoft Co.,Ltd., China)</i>	
Enhancing Reliability Assurance for DNN Against Numerical Defect with Large Language Models .....	300
<i>Jinyu LIU (Beihang University, China), Jun AI (Beihang University, China), Haoran SU (Beihang University, China), and Tao SHI (Beihang University, China)</i>	
ASASQL: Active Data Synthesis and Annotation for Efficient Natural Language SQL Generation in Cloud Systems .....	311
<i>Ruiqin Zheng (Sun Yat-sen University, China), Zhiyuan Wu (Huawei, China), Shengbing Shi (Huawei, China), Qiang Bai (Huawei, China), Hao Li (Huawei, China), Hui Yu (Huawei, China), and Weigang Wu (Sun Yat-sen University, China)</i>	

## Microservices and Cloud

Integrating GraphSAGE and Mamba for Self-Supervised Spatio-Temporal Fault Detection in Microservice Systems .....	323
<i>Shenglin Zhang (Nankai University; Haihe Laboratory of Information Technology Application Innovation), Yingke Li (Nankai University), Jianjin Tang (Nankai University), Chenyu Zhao (Nankai University), Wenwei Gu (Nankai University), Yongqian Sun (Nankai University; Tianjin Key Laboratory of Software Experience and Human Computer Interaction), and Dan Pei (Tsinghua University)</i>	
DeST: An Unsupervised Decoupled Spatio-Temporal Framework for Microservice Incident Management .....	335
<i>Xiaohui Nie (Chinese Academy of Sciences; University of Chinese Academy of Sciences), Hang Cui (Chinese Academy of Sciences; University of the Chinese Academy of Sciences), Changhua Pei (Chinese Academy of Sciences; University of Chinese Academy of Sciences), Haotian Si (Chinese Academy of Sciences; University of the Chinese Academy of Sciences), Ke Xiang (Chinese Academy of Sciences; University of the Chinese Academy of Sciences), Jingjing Li (Chinese Academy of Sciences), Yanbiao Li (Chinese Academy of Sciences; University of Chinese Academy of Sciences), Gaogang Xie (Chinese Academy of Sciences), and Dan Pei (Tsinghua University)</i>	

ClusterRCA: An End-to-End Approach for Network Fault Localization and Classification for HPC System .....	347
<i>Yongqian Sun (Nankai University), Xijie Pan (Nankai University), Xiao Xiong (Nankai University), Lei Tao (Nankai University), Jiaju Wang (Nankai University), Shenglin Zhang (Nankai University; Haihe Laboratory of Information Technology Application Innovation), Yuan Yuan (National University of Defense Technology), Yuqi Li (National University of Defense Technology), and Kunlin Jian (National University of Defense Technology)</i>	
An Empirical Study of Production Incidents in Generative AI Cloud Services .....	359
<i>Haoran Yan (Huazhong University of Science and Technology, China), Yinfang Chen (University of Illinois Urbana-Champaign, USA), Minghua Ma (Microsoft, USA), Ming Wen (Huazhong University of Science and Technology, China), Shan Lu (Microsoft, USA), Shenglin Zhang (Nankai University, China), Tianyin Xu (University of Illinois Urbana-Champaign, USA), Rujia Wang (Microsoft, USA), Chetan Bansal (Microsoft, USA), Saravan Rajmohan (Microsoft, USA), Qingwei Lin (Microsoft, USA), and Dongmei Zhang (Microsoft, USA)</i>	

## Performance and Reliability

Unleashing the Efficiency of Rust: An Empirical Study of Performance Bugs in Rust Projects.....	371
<i>Chenhao Cui (Fudan University, China) and Hui Xu (Fudan University, China)</i>	
bBench: A Comprehensive Performance Benchmark for Blockchain Applications .....	382
<i>Fernando Richter Vidal (University of Coimbra, Portugal), Naghmeh Ivaki (University of Coimbra, Portugal), and Nuno Laranjeiro (University of Coimbra, Portugal)</i>	
Prepared for the Unknown: Adapting AIOps Capacity Forecasting Models to Data Changes .....	394
<i>Lorena Poenaru-Olaru (Delft University of Technology, The Netherlands), Wouter van 't Hof (ING Netherlands, The Netherlands), Adrian Stańdo (ING Hubs Poland, Poland), Arkadiusz P. Trawiński (ING Hubs Poland, Poland), Eileen Kapel (ING Netherlands, The Netherlands), Jan S. Rellermeyer (Leibniz University Hannover, Germany), Luis Cruz (Delft University of Technology, The Netherlands), and Arie van Deursen (Delft University of Technology, The Netherlands)</i>	
Exploiting the Availability-Continuity Trade-off in Imperfect Retraining of Machine Learning Systems .....	406
<i>Zhengji Wang (University of Tsukuba, Japan) and Fumio Machida (University of Tsukuba, Japan)</i>	

## Data Engineering

Automatic Data Repair without Format Specifications .....	418
<i>Zijian Luo (University of Sydney, Australia), Lukas Kirschner (Saarland University, Germany), Ezekiel Soremekun (Singapore University of Technology and Design, Singapore), and Rahul Gopinath (University of Sydney, Australia)</i>	

Reliable Version Merging Based on Deep Semantic and Logical Understanding of Critical Context .....	430
<i>Mengdan Fan (Key Lab of High Confidence Software Technologies (PKU),China; School of Computer Science, China), Wei Zhang (Key Lab of High Confidence Software Technologies (PKU),China; School of Computer Science, China), Haiyan Zhao (Key Lab of High Confidence Software Technologies (PKU),China; School of Computer Science, China), and Zhi Jin (Key Lab of High Confidence Software Technologies (PKU),China; School of Computer Science, China)</i>	
Detection and Analysis of Poisoned Image in Container Registry .....	440
<i>Siyuan Pang (Institute of Information Engineering, China; University of Chinese Academy of Sciences, China), Yongshan Wang (Institute of Information Engineering, China; University of Chinese Academy of Sciences, China), Yepeng Yao (Institute of Information Engineering, China; University of Chinese Academy of Sciences, China), Zhengwei Jiang (Institute of Information Engineering, China; University of Chinese Academy of Sciences, China), Zijing Fan (Institute of Information Engineering, China; University of Chinese Academy of Sciences, China), and Baoxu Liu (Institute of Information Engineering, China; University of Chinese Academy of Sciences, China)</i>	

## Security and Privacy

MalPRE: Malware Protocol Reverse Engineering through Code Slicing and Agentic Workflow .....	452
<i>Yuyao Huang (Key Laboratory of Cyberspace Security, Ministry of Education, China), Fei Kang (Key Laboratory of Cyberspace Security, Ministry of Education, China), Hui Shu (Key Laboratory of Cyberspace Security, Ministry of Education, China), and Guoyu Huo (Key Laboratory of Cyberspace Security, Ministry of Education, China)</i>	
Enhancing Privacy and Robustness in Federated Learning with Local Data Distribution Invariance and Byzantine-Resilient Aggregation .....	466
<i>Bakary Dolo (Sfax University, Tunisia), Faiza Loukil (University Savoie Mont Blanc, France), Khouloud Boukadi (Mir@cl Laboratory, Tunisia), and Kavé Salamatian (University Savoie Mont Blanc, France)</i>	
Exploring the Generalizability of Software Vulnerability Classes via Replication and Synthesis .....	478
<i>Mohammad Jamil Ahmad (West Virginia University, USA) and Katerina Goseva-Popstojanova (West Virginia University, USA)</i>	

## Fault Injection and Dependability

DLAFI: Software-Based Fault Injection for Permanent Faults in Deep Learning Accelerators .....	490
<i>SeyedMani Sadati (The University of British Columbia, Canada), Abraham Chan (The University of British Columbia, Canada), Udit Kumar Agarwal (The University of British Columbia, Canada), and Karthik Pattabiraman (The University of British Columbia, Canada)</i>	

Detecting Dependability Failures in Healthcare Scenarios via Digital Shadows .....	502
<i>Bruno Guindani (Politecnico di Milano, Italy), Matteo Camilli (Politecnico di Milano, Italy), Livia Lestingi (Politecnico di Milano, Italy), and Marcello Maria Bersani (Politecnico di Milano, Italy)</i>	
Effective, Efficient, and Environmentally Friendly Out-of-Model-Scope Detection Methodology .....	514
<i>Zhenyu Yang (Polytechnique Montréal, Canada), Ettore Merlo (Polytechnique Montréal, Canada), Clément Benesse (Observatory of Public Sector Innovation, France), and Lina Marsso (Polytechnique Montréal, Canada)</i>	

## Software Engineering Practice

Refactoring ≠ Bug-Inducing: Improving Defect Prediction with Code Change Tactics Analysis .....	527
<i>Feifei Niu (Nanjing University, China), Junqian Shao (Nanjing University, China), Christoph Mayr-Dorn (Johannes Kepler University, Austria), Liguang Huang (Southern Methodist University, USA), Wesley K.G. Assunção (North Carolina State University, USA), Chuanyi Li (Nanjing University, China), Jidong Ge (Nanjing University, China), and Alexander Egyed (Johannes Kepler University, Austria)</i>	
SimFuzz: Conflict-Aware Parallel Fuzzing via Incremental Path Similarity Clustering .....	539
<i>Xuan Meng (National University of Defense Technology), Danjun Liu (National University of Defense Technology), Xu Zhou (National University of Defense Technology), Peihong Lin (National University of Defense Technology), Chenyifan Liu (National University of Defense Technology), Lei Zhou (National University of Defense Technology), Wei Xie (National University of Defense Technology), Baosheng Wang (National University of Defense Technology), and Peng Wang (Qi An Xin Technology Research Institute)</i>	
ZeroLog: Zero-Label Generalizable Cross-System Log-Based Anomaly Detection .....	550
<i>Xinlong Zhao (Peking University, China), Tong Jia (Peking University, China), Minghua He (Peking University, China), Ying Li (Peking University, China), and Gang Huang (Peking University, China)</i>	
<b>Author Index</b> .....	<b>563</b>
