2025 16th International Conference on Reliability, Maintainability and Safety (ICRMS)

ICRMS 2025

Table of Contents

Message from the General Chair ..... **xxv**
Organizing Committee ..... **xxvi**
Program Committee ..... **xxvii**
Reviewers ..... **xxviii**

Research Progress on Reliability Modeling for Complex Systems

An Extreme-Value Approach for Estimating the Location Parameter of a 3-Parameter Distribution 1
Renyan Jiang (Wenzhou University; Zhejiang Provincial Innovation Center of Laser Intelligent Equipment Technology, China), Yu Cao (Wenzhou University; Zhejiang Provincial Innovation Center of Laser Intelligent Equipment Technology, China), and Xin Wei Fu (Penta Laser Co., Ltd China)

Assessing System Reliability Using Temporal Multilayer Complex Networks 7
Yichen Huang (Shanghai Jiao Tong University, China) and Xin Wang (Shanghai Jiao Tong University, China)

PSA and Its Preliminary Applications in Items Safety Classification and Reliability Allocation for Nuclear Energy Systems 13
Ming Sun (Institute of Nuclear Energy Safety Technology, Hefei Institutes of Physical Science, Chinese Academy of Sciences, China; University of Science and Technology of China, China), Shaoxuan Wang (Institute of Nuclear Energy Safety Technology, Hefei Institutes of Physical Science, Chinese Academy of Sciences, China), Longlong Tao (Institute of Nuclear Energy Safety Technology, Hefei Institutes of Physical Science, Chinese Academy of Sciences, China), and Daochuan Ge (Institute of Nuclear Energy Safety Technology, Hefei Institutes of Physical Science, Chinese Academy of Sciences, China)

Distributed-Collaborative Reliability Optimization Approach for Controlling Radial Deformation of Turbine Bladed-Disk Structures 16
Haifeng Gao (Shanghai University, China), Peng Wang (Shanghai University, China), Bing Xu (Shanghai University, China), and Xiao Han (Aerospace Science and Industry Defense Technology Research Testing Center, China)

Optimization of Resilient Tolerance Allocation Based on Dynamic Process Capability Index 23
Jingxuan Wang (Beihang University School of Reliability and Systems Engineering, China), Jinglu Wei (Beihang University School of Reliability and Systems Engineering, China), Qinglin Zheng (Beihang University School of Reliability and Systems Engineering, China), Ruochong Zhao (Sichuan University), Chao Guo (Aero Engine Academy of China No. 21, Shunxing Road, China), and Wei Dai (Beihang University, China)

Scheduling Optimization for Flexible Manufacturing Systems Based on Human Factor Resilience Evaluation 28
Jinglu Wei (Beihang University, China), Chao Guo (Aero Engine Academy of China, China), Jingxuan Wang (Beihang University, China), Qinglin Zheng (Beihang University, China), Chuxin Peng (Beihang University, China), and Wei Dai (Beihang University, China)

Integrated Mission and Maintenance Optimization for UAV Logistics Under Multi-Payload Modes: A Reinforcement Learning-Assisted Hierarchical Evolutionary Algorithm 34
Ruifeng Xiang (Beihang University, China), Dezhen Yang (Beihang University, China), Xianghong Liu (Beihang University, China), Yue Zhang (Beihang University, China), Yi Ren (Beihang University, China), and Yanjie Song (Beihang University, China)

Research on Reliability Modeling Method of Aviation Equipment Based on D-Vine Copula 39
Zhengbo Zhu (AVIC The First Aircraft Institute Shanxi, China; Nanjing University of Aeronautics and Astronautics Jiangsu, China), Yu Ji (AVIC The First Aircraft Institute, China), and Shuanhang Yan (AVIC The First Aircraft Institute, China)

Research on Quality Assurance and Reliability Evaluation for Complex Systems

Timely Reliability of LEO Satellite Communication Systems Considering Connectivity and Timeliness 46
Changzhen Zhang (Beihang University, China), Jun Yang (Beihang University, China), and Lujie Liu (City University of Hong Kong)

Lightweight Design of Catamaran Yachts Based on Reliability Constraints and Response Surface Method 52
Zehan Ye (Jimei University, China), Qinglin Chen (Jimei University, China), Jiayong Zhuo (Jimei University, China), Yingqiang Cai (Jimei University, China), Zhaoyi Zhu (Jimei University, China), Xiaowen Li (Jimei University, China), Miaojiao Peng (Jimei University, China), Kuan Fan (Jimei University, China), and Yezhi Qin (Jimei University, China)

Research on Flexible Practice Method for General Quality Characteristics Assurance of Airborne Systems 61
Da Li (AVIC AEROSPACE SYSTEM CO., LTD., China), Qihang Jiang (AVIC AEROSPACE SYSTEM CO., LTD., China), and Shengqi Guo (AVIC AEROSPACE SYSTEM CO., LTD., China)

Reliability Simulation Evaluation for System-of-Systems with Communication Networks 66
Chongfeng Li (Beihang University, China), Xing Pan (Beihang University, China), Lingze Liu (Beihang University, China), and Wenjie Xu (Beihang University, China)

Research on Enhancement Strategies for Operational Reliability of Aviation FCS from the STS Perspective 73
Shumao Qiu (China Aero-Polytechnology Establishment, China), Bo Jia (China Aero-Polytechnology Establishment, China), Wensheng Peng (China Aero-Polytechnology Establishment, China), and Shujie Pang (China Aero-Polytechnology Establishment, China)

An Augmented Lagrange-Based Parameter Estimation Method of the Generalized Three-Parameter Weibull Distribution 81
Zhuqing Miao (Beihang University, China), Yudong Wang (Harbin Institute of Technology, China), Tianzi Tian (Beihang University, China), Jun Yang (Beihang University, China), and Jieyu Zhao (KTH Royal Institute of Technology, Sweden)

Reliability Requirement Demonstration for Airborne Equipment Based on Similar Product Flight Test Data 86
Yuxin Cui (Nanjing University of Aeronautics and Astronautics, China), Fan Qi (Nanjing University of Aeronautics and Astronautics, China), Shuai Xu (Nanjing University of Aeronautics and Astronautics, China), Siyuan Wang (Nanjing University of Aeronautics and Astronautics, China), and Zhong Lu (Nanjing University of Aeronautics and Astronautics, China)

Reliability Evaluation of Intelligent Complex Systems with Multi-Source Information

Reliability Evaluation of Hierarchical Systems with Multisource Uncertain Information 92
Yingying Lian (University of Science and Technology Beijing, China), Lechang Yang (University of Science and Technology Beijing, China), and Leyu Zhu (University of Science and Technology Beijing, China)

Reliability Evaluation and Environmental Adaptability of TMR-Based Current Sensors for Smart Grid Applications 98
Guanying Wang (China Electric Power Research Institute Co., Ltd., China), Xianfeng Liang (China Electric Power Research Institute Co., Ltd., China), Yuxin Cheng (China Electric Power Research Institute Co., Ltd., China), Yixue Wang (China Electric Power Research Institute Co., Ltd., China), Hui Huang (China Electric Power Research Institute Co., Ltd., China), Yang Lu (China Electric Power Research Institute Co., Ltd., China), Dengfeng Ju (China Electric Power Research Institute Co., Ltd., China), and Jinghong Guo (China Electric Power Research Institute Co., Ltd., China)

Design Methodology for Non-Operating Reliability of Aero-Engines Targeting Maintenance-Free Alert Time Metrics 104
Youlong Wang (AECC Sichuan Gas Turbine Research Institute, China), Jinghui Wang (AECC Sichuan Gas Turbine Research Institute, China), Chaofan Zhang (AECC Sichuan Gas Turbine Research Institute, China), and Yubo Chang (AECC Sichuan Gas Turbine Research Institute, China)

Synchronous Reliability Analysis of Large Gear Door Multi-Up Lock System Based on Adaptive Deep Neural Network 110
Longlong Zhang (Northwestern Polytechnical University, China), Tingjie Hu (Northwestern Polytechnical University, China), and Zhongchao Sun (Northwestern Polytechnical University, China)

Reliability Modeling and Assessment of Complex Electronic Systems in Spacecraft Based on Multi-Source Data Fusion 116
Yue Yu (Harbin Institute of Technology, China), Cen Chen (Harbin Institute of Technology, China), Weiming Liu (Harbin Institute of Technology, China), Sunan Bi (Harbin Institute of Technology, China), Yuyang Bai (Harbin Institute of Technology, China), and Zhenning Zhou (Harbin Institute of Technology, China)

Reliability Evaluation Based ENEM Considering Cascading Failure and Adaptive Recovery for Intelligent Systems 122
Jiao Li (Aviation Key Laboratory of Science and Technology on Aero Combined Environment, China Aero-Polytechnology Establishment, China), wensheng Peng (Aviation Key Laboratory of Science and Technology on Aero Combined Environment, China Aero-Polytechnology Establishment, China), Zhaoyang Zeng (Aviation Key Laboratory of Science and Technology on Aero Combined Environment, China Aero-Polytechnology, China), Yu Hao (Aviation Key Laboratory of Science and Technology on Aero Combined Environment, China Aero-Polytechnology Establishment, China), Zekun Song (Beihang University, China), and Ming Xu (Aviation Key Laboratory of Science and Technology on Aero Combined Environment, China Aero-Polytechnology Establishment, China)

Graph Driven Unsupervised Transfer Learning for In Flight Aero Engine Thrust Estimation 130
Jiawen hu (University of Electronic Science and Technology of China, China), Mengmeng Liu (Chengdu Hangli (Group) Industrial Company Limited, China), Jianqiu Zhang (University of Electronic Science and Technology of China, China), and Piao Chen (Zhejiang University Haining, China)

A PCA-LSTM Hybrid Model for Self-Locking Nut Degradation Prediction in Rail Transit Systems 137
Lan Chen (Beijing Zongheng Electro-Mechanical Technology Co. Ltd, China), Zhenyu Liu (Beihang University, China), and Jun Yang (Beihang University, China)

Reliability Analysis of Photovoltaic Modules Based on Joint Bayesian Model 143
Chizhi Chris Zhang (Changchun Institute of Optics, Fine Mechanics and Physics, China), Zunxiang Wang (Changchun Institute of Optics, Fine Mechanics and Physics, China), Kong Fah Tee (King Fahd University of Petroleum and Minerals), and Jian Jiang (Changchun Institute of Optics, Fine Mechanics and Physics, China)

System Reliability Modeling and Evaluation for Complex Mission Scenarios

Exploration and Research on System Mission Reliability for Typical Air Combat Scenarios 148
Yi Pan (Shenyang aircraft design and research institute, China), Baoshi Yin (Shenyang aircraft design and research institute, China), Siqi Wang (Shenyang aircraft design and research institute, China), Xiao Liu (Shenyang aircraft design and research institute, China), Guoqiang Zhou (Shenyang aircraft design and research institute, China), and Dong Liu (Shenyang aircraft design and research institute, China)

An MBSE-Based Scenario-Function Framework for Reliability Design of Turboshaft Aero-Engines 153
Cankai Li (Beihang University, China), Hailong Guo (AECC Hunan Aviation Powerplant Research Institute, China), Chunping Hu (AVIC Nanjing Aero Power Co, Ltd, China), Huaju Nie (AECC Hunan Aviation Powerplant Research Institute, China), Guangwei Xia (AECC Hunan Aviation Powerplant Research Institute, China), Zhaojing Wang (Aviation Industry Development Research Center of China, China), and Ying Li (Beihang University, China)

Reliability Evaluation Framework for Aircraft Landing Gear Retraction Structure Based on MBSE 159
Dingbang Fang (Beihang University, China), Jianguo Zhang (Beihang University, China), Xiaoduo Fan (Beihang University, China), and Wenbo Xu (Beihang University, China)

Reliability Modeling and Simulation of Distributed Training Networks 167
Haobo Ma (Beihang University, China), Binshi Wang (Beihang University, China), Rongzhe Li (Beihang University, China), Yuheng Dang (Beihang University, China), Zhaojun Hao (Huawei Technologies Co., Ltd, China), and Xing Pan (Beihang University, China)

Reliability Assessment of the Electric Multiple Unit Component Extreme Censored Life Data Based on Multi-Layer Bayesian Prior 174
Runyu Zhang (Beihang University, China), Jiantai Wang (Beihang University, China), Huasheng Wang (China Academy of Railway Sciences Corporation Limited, China), Qinglong Zhu (China Academy of Railway Sciences Corporation Limited, China), and Xiaobing Ma (Beihang University, China)

Reliability Modeling and Evaluation Method for Unmanned Aerial Vehicle Swarm of Leader-Follower 180
Mingxi Cai (China Electronic Product Reliability and Environment Testing Research Institute, China), Jialing Lin (China Electronic Product Reliability and Environment Testing Research Institute, China), Jianfeng Yang (China Electronic Product Reliability and Environment Testing Research Institute, China), and Chunyang Ji (China Electronic Product Reliability and Environment Testing Research Institute, China)

Phase-Coherent Diversity Entropy for the Fault Diagnosis of Rolling Bearing 185
Xianzhi Wang (Xi'an University of Posts and Telecommunications, China), Yang Zhang (Xi'an University of Posts and Telecommunications, China), and Yongbo Li (Northwestern Polytechnical University, China)

Research on Fault Diagnosis Method for Aero-Engine Rolling Bearings Based on Dynamic Fusion Attention Mechanism and ConvNeXt 191
Zhiqiang Cai (Northwestern Polytechnical University, China), Hongwei Wang (Northwestern Polytechnical University, China), Xuefei Qin (Northwestern Polytechnical University, China), Wenjin Zhu (Northwestern Polytechnical University, China), and Shubin Si (Northwestern Polytechnical University, China)

A Novel Method Based on Fused Physical Model and Adaptive Threshold for Landing Gear Buffer Strut Fault Detection and Prediction 197
Siyu Yang (Beihang University, China), Xiao Wang (Shanghai Aircraft Customer Service Co., Ltd, China), Tian Qiao (Shanghai Aircraft Customer Service Co., Ltd, China), Pengchao Wang (Beihang University, China), and Yujie Cheng (Beihang University, China)

A Physics-Informed Neural Network Combined with Domain Generalization Method for Harmonic Reducers RUL Prediction 204
Huitong Li (Xi'an Jiaotong University, China), Naipeng Li (Xi'an Jiaotong University, China), Yuan Wang (Xi'an Jiaotong University, China), Kai Li (Xi'an Jiaotong University, China), Yaguo Lei (Xi'an Jiaotong University, China), and Junyi Cao (Xi'an Jiaotong University, China)

Physics-Guided Modeling for Fault Detection in Analog Circuits Using ODE-GRU 209
Chuhuan Zhang (Beihang University, China), Weiwei Hu (Beihang University, China), Jiahui Pan (Nanjing University of Aeronautics and Astronautics, China), Haoyan Wu (Beihang University, China), Ran Wang (Beihang University, China), Jingqi Wang (Beihang University, China), and Yuwen Wang (Beihang University, China)

Research on Risk Assessment and Intelligent Perception in Transportation and Safety Systems

A Traffic Assignment Model on Supernetworks Considering Demand Uncertainty 215
Siyue Zhang (Beihang University, China), Yiyong Xiao (Beihang University, China), Xinhao Cui (Beihang University, China), and Bo Li (Beihang University, China)

Analysis and Simulation of Urban Railway Train Operation with Multiple Strategy by Petri Net 222
Zinan Liu (Beijing Jiaotong University, China), Dongdong Liu (Beijing Jiaotong University, China), Zhihan Xiao (Beijing Jiaotong University, China), and Qian Pu (Beijing Jiaotong University, China)

Nighttime Driving Fatigue Detection Based on Improved Zero-DCE 229
Yang Yang (Beihang University, China), Yuchen Yang (Beihang University, China), Shihao Zhu (Beihang University, China), Zekai Shang (Beihang University, China), and Xing Pan (Beihang University, China)

Safety Barrier-Based Risk Prevention and Control Method for Ultra-Deepwater Blowout Accident 235
Renjun Xie (China University of Petroleum (Beijing), China), Xiao Chen (China University of Petroleum(Beijing), China), Laibin Zhang (China University of Petroleum(Beijing), China), Shengnan Wu (China University of Petroleum(Beijing), China), and Gang Tong (China University of Petroleum(Beijing), China)

Pilot Safety Performance Evaluation Based on Quick Access Recorder Data 243
Ziyao Li (Beihang University, China), Xing Pan (Beihang University, China), and Chongfeng Li (Beihang University, China)

Risk Grading Prediction of Helicopter Main Gearbox Planet Gear Based on Learnable Wavelet Transform 249
Pinze Ren (Tsinghua University, China), Ziyang Chang (Tsinghua University, China), Tianzhi Xu Dong (University of Electronic Science and Technology of China, China), Jiacheng Zhu (Beijing Jiaotong University, China), and Dandan Peng (The Hong Kong Polytechnic University, China)

Application of Convolutional Neural Networks with Attention on Bearing Fault Diagnosis 254
Xinzhu Jia (Northwestern Polytechnical University, China), Lujie Shi (AECC Sichuan Gas Turbine Establishment, China), Liang Hong (AECC Sichuan Gas Turbine Establishment, China), and Yankai Wang (Northwestern Polytechnical University, China)

Research on Aerospace Quality Data Analysis and Application Based on Retrieval-Augmented Large Language Models 260
Texian Zhang (Aerospace Science & Industry Defense Technology Research and Test Center, China), Beina Du (Aerospace Science & Industry Defense Technology Research and Test Center, China), and Lina Dong (Aerospace Science & Industry Defense Technology Research and Test Center, China)

Exploration of Gearbox Multi-Step Remaining Useful Life Prediction Based on LLM and PEFT 266
Wenchao Zhan (Beihang University, China), Laifa Tao (Beihang University, China), Zhengduo Zhao (Beihang University, China), Zijian Huang (Beihang University, China), and Zhixuan Lian (Beihang University, China)

A Large Language Model-Based Question Answering System for Unmanned Ground Vehicles Maintenance Knowledge 272
Weiwei Zhang (Beihang University, China), Chao Ji (China North Artificial Intelligence & Innovation Research Institute, China), Qixuan Huang (Beihang University, China), and Laifa Tao (Hangzhou International Innovation Institute, China)

Research on Safety Assessment and Intelligent Control Methods for Complex Systems

Effectiveness Evaluation of Anti-UAV System Based on Transformer 278
Ruyue Li (Beihang University, China), Xiaohong Wang (Beihang University, China), Lizhi Wang (Beihang University, China), Mengfei Yao (Beihang University, China), Yushan Teng (Beihang University, China), and Minze Xu (Beihang University, China)

Temperature Monitoring System for Thermoregulation Disorders 284
Olanrewaju Bola Wojuola (North-West University, South Africa) and Kutlwano Benedict Tigele (North-West University, South Africa)

Potential Failure Mode Analysis Method for Aerospace Electronic Products Under Multi-Source Environmental Impacts 288
Xiao Han (Quality and Reliability Technology Center, Aerospace Science & Industry Defense Technology Research and Test Center, China), Yao Zhu (Quality and Reliability Technology Center, Aerospace Science & Industry Defense Technology Research and Test Center, China), Keming Dong (Quality and Reliability Technology Center, Aerospace Science & Industry Defense Technology Research and Test Center, China), Xiaoyan Li (Quality and Reliability Technology Center, Aerospace Science & Industry Defense Technology Research and Test Center, China), Wenzheng Li (Guizhou Aerospace Linquan Motor CO., LTD, China), and Beina Du (Beihang University, China)

Research on Control of Critical and Important Characteristics in the Manufacturing Process of Civil Aviation Products with PFMEA 294
Xuan Yu (Shanghai Aircraft Manufacturing Co., Ltd., China)

Model-Based Safety Integrated Framework and Analysis Methodology 299
Zhuofan Zhang (Beihang University, China), Langxiao Hu (China academy of lunch vehicle technology, China), Haopu Du (Beihang University, China), and jian Jiao (Beihang University, China)

Safety and Reliability of Product Lines with Fault Tree Analysis and Monte Carlo Simulation 305
Mahdi Dibaei (University of Erlangen-Nürnberg, Germany), Kai-Steffen Hielscher (University of Erlangen-Nürnberg, Germany), and Reinhard German (University of Erlangen–Nurnberg, Germany)

Research on Safety Decision-Making and Robustness in Complex Networks and Intelligent Systems

Dynamics Model for Swarm Disintegration Based on Behavioral Deception 310
Yawen Zhu (National University of Defense Technology, China), Naling Xie (National University of Defense Technology, China), Zhan Xu (National University of Defense Technology, China), and Guanghan Bai (National University of Defense Technology, China)

An Improved Deep Reinforcement Learning-Based Method for Optimal Kill Chain Combination Selection 316
Yuemeng Shi (Beihang University, China), Ning Huang (Beihang University, China), and Lina Sun (Chinese Flight Test Establishment, China)

Robustness Analysis of Urban Bus-Subway Coupled Networks Based on Cascading Model 322
Zhiyong Yin (Chang'an University, China), Ziyang Jin (Chang'an University, China), and Junlong Zhu (Chang'an University, China)

A Method for Dynamic Target Identification Friend-or-Foe for UGV Based on Shared Situation Awareness and Trajectory Prediction 329
Yiming Cao (Beihang University, China; China North Artificial Intelligence & Innovation Research Institute, China), Lin Ma (Beihang University, China), Chao Ji (China North Artificial Intelligence & Innovation Research Institute, China), and Tong Zhou (China North Artificial Intelligence & Innovation Research Institute, China)

Universal Scaling of Cascade-Failure Lifetime in Complex Networks 335
Yongxin Deng (Institute of System Engineering, China Academy of Engineering Physics), Chenyang Bai (Institute of System Engineering, China Academy of Engineering Physics), Linchao Lu (Institute of System Engineering, China Academy of Engineering Physics), Yikun Yang (Institute of System Engineering, China Academy of Engineering Physics), and Zhikai Tang (Institute of System Engineering, China Academy of Engineering Physics)

Knowledge Graph-Based Intelligent Fault Diagnosis for Special Vehicle Diesel Engines: A Review 341
Hanlin Wang (Yangtze Delta Region Academy, Beijing Institute of Technology, China), Fuhong Kuang (China North Engine Research Institute, China), Peng Hou (Yangtze Delta Region Academy, Beijing Institute of Technology Tangshan, China), and Xiaojian Yi (Beijing Institute of Technology, China)

Rolling Bearing Remaining Life Prediction Based on Multi-Feature Extraction and Transformer-BiTCN 347
Mengxuan Zhai (School of Mechatronical Engineering, Beijing Institute of Technology, China), Fuhong Kuang (China NorthEngine Research Institute, China), and Peng Hou (Tangshan Research Institute, Beijing Institute of Technology, China)

Research on Safety Monitoring and Intelligent Optimization for Manufacturing and Transportation Systems

A Safety Analysis Method Based on STPA-FBN for Train Active Perception Systems 353
Xizhi Rui (Beihang University, China), Tingdi Zhao (Beihang University, China), Jiayun Chu (China Academy of Launch Vehicle Technology, China), and Zhenkai Hao (Beihang University, China)

Reliable Field Prediction for Industrial Safety: A GPR-MRF-K Approach to Emergency Response and Risk Assessment 359
Chenglong Hou (Beihang University, China), Jun Yang (Beihang University, China), and YuHao Zha (Beihang University, China)

A Safety Analysis and Risk Assessment Method for USV Formation Navigation Mission 364
Kaixuan Wang (Beihang University, China), Jiayun Chu (China Academy of Launch Vehicle Technology, China), Tingdi Zhao (Beihang University, China), and Yuan Yuan (Beihang University, China)

Benchmark Comparison Data Fusion-Driven Support Resource Demand Modeling and Analysis Method 371
Fan Yang (China Aero-Polytechnology Establishment, China), Zhiyu Jia (China Aero-Polytechnology Establishment, China), and Jingjing He (Beihang University, China)

Adaptive Policy Optimization for Product Infant Failure Risk Control in Manufacturing Processes with Variable Demands 376
Xiao Han (Quality and Reliability Technology Center, Aerospace Science & Industry Defense Technology Research and Test Center, China), Yuqi Cai (Beihang University, China), Anqi Zhang (Quality and Reliability Technology Center, Aerospace Science & Industry Defense Technology Research and Test Center, China), Yao Zhu (Quality and Reliability Technology Center, Aerospace Science & Industry Defense Technology Research and Test Center, China), Yihai He (Beihang University, China), and Rui Shi (Beihang University, China)

Deep Learning-Based Intelligent Fault Diagnosis of Motor Under Information Missing Conditions : A Review 382
Zhenpeng Teng (Beijing Institute of Technology, China), Fuhong Kuang (China North Engine Research Institute Beijing, China), Peng Hou (Tangshan Research Institute Beijing Institute of Technology Tangshan, China), and Xiaojian Yi (Beijing Institute of Technology, China)

Hacking in DSP: Return-Oriented Programming Against CSM 388
Yangmao Luo (Guangdong University of Technology, China), Yongzhen Luo (China Electronic Product Reliability and Environmental Testing Research Institute, China), Liwei Wang (China Electronic Product Reliability and Environmental Testing Research Institute, China), Yinghui Xu (Guangdong University of Technology, China), Zhongkai Huang (China Electronic Product Reliability and Environmental Testing Research Institute, China), and Xiaoming Xiong (Guangdong University of Technology, China)

Research on Performance Modeling and Reliability Optimization of Degrading Systems

Utilizing Degradation Data for Warranty Optimization Based on Inverse Gaussian Process 394
Yujie Liu (Beihang University, China), Yanhong Li (AECC Commercial Aircraft Engine Co., Ltd, China), and Fuqiang Sun (Beihang University, China)

Multimodal Feature Fusion for Lithium Battery Remaining Capacity Prediction 400
Yudong Gao (Beihang University, China), Nuo Zhao (China Institute of Nuclear Industry Strategy, China), and Jian Jiao (Beihang University, China)

Reliability Analysis of Mechanism Functional Degradation Considering Hinge Wear 406
Yajie Han (Chinese Flight Test Establishment, China), Yunduo Chen (Chinese Flight Test Establishment, China), and Bao Lv (Chinese Flight Test Establishment, China)

Modeling and Numerical Analysis of Wear of Aviation Self-Lubricating Bearings 412
Shuo Wang (Shanghai Jiao Tong University, China), Liang Yan (Shanghai Jiao Tong University, China), Shichang Du (Shanghai Jiao Tong University, China), Shanshan Li (National Key Laboratory of Strength and Structural Integrity, Aircraft Strength Research Institute of China, China), and Xianmin Chen (National Key Laboratory of Strength and Structural Integrity, Aircraft Strength Research Institute of China, China)

Research on Radio Frequency Acceleration Life Test of Gallium Nitride Power Amplifier 418
Xiaoyan Li (Aerospace Science & Industry Defense Technology Research and Test Center, China), Wenlong Ye (Institute 55 China Electronics Technology Group Corporation, China), Yao Zhu (Aerospace Science & Industry Defense Technology Research and Test Center, China), Qinglin Lu (Institute 55 China Electronics Technology Group Corporation, China), Dongying Zhang (Institute 15 China Electronics Technology Group Corporation, China), and Beina Du (Beihang University, China)

Research on Health Assessment and Performance Prediction of Degrading Systems

A Performance Margin and Reliability Analysis Method for Fatigue Performance of Welded Thin-Walled Pipe Structures 422
Kui Liang (Institute of System Engineering, China Academy of Engineering Physics, China), Xudong Ren (Institute of System Engineering, China Academy of Engineering Physics, China), and Hao Yin (Institute of System Engineering, China Academy of Engineering Physics, China)

State of Health Estimation for Lithium-ion Batteries via Spatial-Bidirectional Cross-Attention and Top-k Sparse Transformer 428
Haoran Huang (Northwestern Polytechnical University, China), Junge Shen (Northwestern Polytechnical University, China), Haosheng Tan (Northwestern Polytechnical University, China), Xueqian Chen (Northwestern Polytechnical University, China), Zhiwei Chen (Northwestern Polytechnical University, China), and Zhaoyong Mao (Northwestern Polytechnical University, China)

A Multi-Feature Fusion Model for State-of-Health Prediction in Lithium-Ion Batteries 434
Sheng Xie (Beihang University, China), Yizhuo Zhao (Beihang University Beijing, China), Boming Chen (Beihang University Beijing, China), Yining Liu (Beihang University Beijing, China), Zhixuan Wang (Beihang University Beijing, China), and Yunxia Chen (Beihang University Beijing, China)

A Multivariate Wiener Processes with Random Accelerated Effects for Degradation Modeling 440
Xing Zhang (Shanghai University, China), Hui Liu (Shanghai University, China), Guangze Pan (China Electronic Product Reliability and Environmental Testing Research Institute; Guangdong Provincial Key Laboratory of Electronic Information Products Reliability Technology, China), and Qingqing Zhai (Shanghai University, China)

Health-Aware Control and Extended Predictive Maintenance for Stochastically Deteriorating Feedback Control Systems 445
Gong Yufei (Yanshan University, China), Huynh Khac Tuan (Troyes University of technology, France), Langeron Yves (Troyes University of technology, France), and Grall Antoine (Troyes University of technology, France)

A Bayesian Theory-Based Storage Life Assessment Method for Multi-Level Product 448
Shengpeng Zhanga (Beihang University, China), Hao Li (Aerospace Science & Industry Defense Technology Research and Test Center, China), Shuo Huang (Aerospace Science & Industry Defense Technology Research and Test Center, China), Ruyuan Xu (Aerospace Science & Industry Defense Technology Research and Test Center, China), and Jiaming Feng (Aerospace Science & Industry Defense Technology Research and Test Center, China)

Accurate Prediction of Lithium-ion Batteries Lifetime Based on PDE-EHO-XGBoost 457
Yige Li (Beihang University, China), Jun Yang (Beihang University, China), Dunwang Qin (Beihang University, China), and Linlin Wu (Emory University, United States)

Research on Degradation Prediction of Complex Materials and Systems Based on Intelligent Methods

Reverse Algorithm for Mechanical Properties of Thin-Film Material Based on CNN-LSTM Neural Network 463
Zongpei Wu (Beihang University, China), Tingting Huang (Beihang University, China), and Pu Jia (Southwest China Institute of Electronic Technology, China)

Degradation Modeling and Prediction of PCB Coating Wet-Heat Insulation Performance Based on Deep Learning 472
Zhongda Sun (Beihang University, China) and Xiaogang Li (Beihang University, China)

Research on Multi-Chip Modules Device Junction Temperature Prediction Method 478
Jiahao Liu (Harbin Institute of Technology, China), Dongyang Tian (Xiamen University of Technology, China), Lijin Qiu (Harbin Institute of Technology, China), Fangzhou Chen (Science and Technology on Reliability Physics and Application of Electronic Component Laboratory, China Electronic Product Reliability and Environmental Testing Research Institute, China), Zibin Huang (Science and Technology on Reliability Physics and Application of Electronic Component Laboratory, China Electronic Product Reliability and Environmental Testing Research Institute, China), Jinghui Zhang (Harbin Institute of Technology, China), Hongtao Chen (Harbin Institute of Technology, China), Hao Zhao (Science and Technology on Reliability Physics and Application of Electronic Component Laboratory, China Electronic Product Reliability and Environmental Testing Research Institute, China), and Rui Chen (Science and Technology on Reliability Physics and Application of Electronic Component Laboratory, China Electronic Product Reliability and Environmental Testing Research Institute, China)

Degradation Modeling of Compressive Mechanical Properties of Delamination-Defective Composites Considering Heteroscedastic Dispersion 484
Qian Chen (Beihang University, China), Ling Wang (Southwest Institute of Technology and Engineering, China), Han Wang (Beihang University, China), Xiaobing Ma (Beihang University, China), Kewei Ye (Beihang University, China), and Yujie Liu (Beihang University, China)

Degradation Modeling of Composite Interfacial Properties Under Coupled Humidity and Thermal Conditions 489
Xin Peng (Beihang University, China), Ling Wang (Southwest Institute of Technology and Engineering, China), Han Wang (Beihang University, China), Qian Chen (Beihang University, China), Yongbo Zhang (Beihang University, China), and Xiaobing Ma (Beihang University, China)

A Fault Prediction Method for Quadrotor UAVs Integrating Residual Detection and Transformer Models 494
Zhuyin Lan (Beihang University, China), Lin Ma (Beihang University, China), and Fei Su (Beihang University, China)

Research on Lifetime Prediction and Durability of Key Materials and Electronic Devices

Finite Element Analysis of Solder Joint Fatigue Failure in SiP Under Random Vibration Loading 500
Xiangwei Wu (Beihang University, China), Liang Mei (Beihang University, China), Jiaoying Huang (Beihang University, China; Innovation Center for Component Application Verification Technology, China), and Mingzheng Li (Beihang University, China)

Fatigue Life Prediction of 2A14 Aluminum Alloy Based on Equivalent Initial Flaw Size 506
Jintao Liu (Luoyang Ship Material Research Institute, China; National Key Laboratory of Marine Corrosion and Protection, China), Lindong Chai (Beihang, University, Chian; State Key Laboratory of Advanced Forming Technology and Equipment, China), Xinmin Li (Beihang University, China; State Key Laboratory of Advanced Forming Technology and Equipment, China), Yihai He (Beihang University, China; State Key Laboratory of Advanced Forming Technology and Equipment, China), Wei Zhang (Beihang University, China; State Key Laboratory of Advanced Forming Technology and Equipment, China), and Penghui Wang (Beijing Institute of Structure & Environment Engineering, China; Northwestern Polytechnical University, China)

Health Assessment and Trend Prediction via Efficient Multi-Scale Attention Convolutional Auto Encoder and Rotary Position Embedding for Mechanical Equipment 512
Yunlong Wu (Beihang University, China; China North Artificial Intelligence & Innovation Research Institute, China), Chao Ji (China North Artificial Intelligence & Innovation Research Institute, China), Qixuan Huang (Beihang University, China), Bin Li (Beihang University, China), and Laifa Tao (Beihang University, China)

Reliability Modeling of Operational Amplifiers Considering Bidirectional Degradation of Input Offset Voltage 518
Junpeng Gao (Harbin Institute of Technology, China), Zhiwei Zheng (Harbin Institute of Technology, China), Mingyang Wang (Harbin Institute of Technology, China), Cen Chen (Harbin Institute of Technology, China), Xuerong Ye (Harbin Institute of Technology, China), and Guofu Zhai (Harbin Institute of Technology, China)

Durability Testing and Validation of 30CrMnSiA High-Strength Steel in Marine Environment 524
Chonghao Wang (Beihang University, China), Zhaohong Liu (Beihang University, China), Ruiyuan Wang (Beihang University, China), Zhaofeng Dou (Beihang University, China), Haoshan Li (Beihang University, China), and Weifang Zhang (Beihang University, China)

Research on Fault Prediction and Situational Awareness of Complex Systems Based on Intelligent Models

Anomaly Detection Method of Satellite Telemetry Data Based on Improved Weighted SR-LSA 529
Yang Chen (National University of Defense Technology, China), Zhijun Cheng (National University of Defense Technology, China), Zhitao Long (National University of Defense Technology, China), Jiacheng Li (National University of Defense Technology, China), and Yanlin Wang (National University of Defense Technology, China)

A Twice-Corrected Method for Leakage Failure Prediction and Performance Evaluation of Hydraulic System 536
Zheng Hu (Beihang University, China), Xiao Wang (Shanghai Aircraft Customer Service Co., Ltd., China), Tian Qiao (Shanghai Aircraft Customer Service Co., Ltd., China), Gaowei Wang (Beihang University, China), and Yujie Cheng (Beihang University, China)

Intelligent Fault Mode Extraction Method for New Energy Vehicles Based on Large Language Models 543
Yuchen Hu (Beihang University, China), Siru Wang (University of Science and Technology, China), Rui Shi (Beihang University, China), and Yihai He (Beihang University, China)

Probabilistic Prediction for Multi-Equipment Systems Based on Bayesian Spatio-Temporal Graph Attention Network 550
Yizhuo Cai (Shanghai Jiao Tong University, China) and Yanting Li (Shanghai Jiao Tong University, China)

Time-Frequency Feature Fusion Combining Convolutional Neural Networks and Deep Attention Fuzzy Cognitive Maps for Mechanical Component Fault Recognition 556
Dunwang Qin (Beihang University, China), Ziwei Liu (Beijing Institute of Space Launch Technology, China), Jun Yang (Beihang University, China), and Meiqing Wang (University College Dublin, Ireland)

Research on Non-Interruptive Situational Awareness Measurement and Analysis Method Based on Machine Learning 562
Yingyue Zhang (Beihang University, China) and Xing Pan (Beihang University, China)

Research on Intelligent Methods for Product Fault Identification and Health State Prediction

Product Failure Mode Recognition Method Based on Function and Physical Realization Process Decomposition 568
Anqi Zhang (Aerospace Science & Industry Defense Technology Research Test Center, China), Jun Huang (Sichuan Institute of Piezoelectric and Acousto-optic Technology, China), Yao Zhu (Aerospace Science & Industry Defense Technology Research Test Center, China), Lei Zhang (Sichuan Institute of Piezoelectric and Acousto-optic Technology, China), Xinyun Zhang (Aerospace Science & Industry Defense Technology Research Test Center, China), and Sikun Mi (Aerospace Science & Industry Defense Technology Research Test Center, China)

Prediction of Lithium-Ion Battery Health Degradation Across Operating Conditions Based on Gaussian Process Regression with Composite Kernel Function 578
Boming Chen (Beihang University, China), Cong Wang (Beihang University, China), Jiawei Zheng (Beihang University, China), and Yunxia Chen (Beihang University, China)

Attention-Based Graph Convolutional Network for Fault Detection and Diagnosis in Industrial Networks 584
Shiyu Cui (Beihang University, China), Tingting Huang (Beihang University, China), and Shufei Xue (Third Center for Marine Quality and Reliability Research, China)

An Adaptive Health Monitoring Method for Aircraft Hydraulic System Based on Ambient Temperature Compensation Mechanism and Bayesian Updating 590
Yi Chang (Beihang University, China), Xiao Wang (Shanghai Aircraft Customer Service Co., Ltd), Tian Qiao (Shanghai Aircraft Customer Service Co., Ltd., China), and Yujie Cheng (Beihang University, China)

A New Health State Identification Method for Rotating Machinery Based on HHO-RF 597
Rui Bai (Northwestern Polytechnical University, China), Youze Chen (Northwestern Polytechnical University, China), Xinyue Wang (Northwestern Polytechnical University, China), and Yongbo Li (Northwestern Polytechnical University, China)

Intelligent Root Cause Analysis Approach for Quality Accidents Based on Knowledge Graph and Large Language Model 602
Rui Shi (Beihang University, China), Wei Liu (China Shenhua Energy Company Limited, China Energy Investment Corporation, China), Chao Guo (Aero Engine Academy of China, Aero Engine Corporation of China, China), and Yihai He (Beihang University, China)

Research on Intelligent Diagnosis and Dynamic Prognostics in Mechanical and Electrical Systems

Quantitative Failure Mode Definition of Mechanical Systems Based on Meta-Action: A Case Study from a Spindle Box Manufacturing Enterprise 608
Xiaogang Zhang (Nanjing University of Information Science and Technology, China), Shengjie Zhang (Nanjing University of Information Science and Technology, China), Wei Chen (Nanjing University of Information Science and Technology, China), Shuning Yan (Nanjing University of Information Science and Technology, China), and Yulong Li (Yangzhou University, China)

A Contrastive-Learning-Based Adaptive Multimodal Method with a Dynamic Modality Disparity Mitigation Mechanism for Fault Diagnosis of Three-Phase Motors 614
Yuhan Xie (Beijing Jiaotong University, China), Chao Wang (Kunming Vehicle Section, China Railway Kunming Group Co., Ltd., China), Biao Wang (Beijing Jiaotong University, China), Xiaoqing Cheng (Beijing Jiaotong University, China), and Yong Qin (Beijing Jiaotong University, China)

A New Dynamic Adaptive Prognostics Method Based on Comprehensive Model Evaluation Criterion for Remaining Useful Life Prediction of Bearings 620
Yingcheng Niu (Beijing Jiaotong University, China), Chao Wang (Kunming Vehicle Section, China Railway Kunming Group Co., Ltd., China), Biao Wang (Beijing Jiaotong University, China), and Yong Qin (State Key Laboratory of Advanced Rail Autonomous Operation, Beijing Jiaotong University)

Research on Electrical Fault Detection in Railway Relay Circuits Based on SPICE 626
Haoran Zou (Southwest Jiaotong University, China) and Yang Yang (Southwest Jiaotong University, China)

Research on PHM System Modeling Method Based on MBSE 632
Wenbo Xu (Beihang University, China), Jianguo Zhang (Beihang University, China), Xiaoduo Fan (Beihang University, China), Zhaoyang Zeng (Avic China Aero-Polytechnology Establishment, China), and Qingyu Zhu (Avic China Aero-Polytechnology Establishment, China)

Research on Intelligent Diagnosis and Maintenance Support Technologies for Complex Equipment

An NLP-Based Extraction and Display Method for Augmented Maintenance Information 638
Yuchen Bai (Beihang University, China), Wenjin Zhang (Beihang University, China), Qidi Zhou (Beihang University, China), Zicheng Song (Beihang University, China), Yan Zhang (Beihang University, China), Ziyue Guo (Beihang University, China), and Dong Zhou (Beihang University, China)

An Accessible Path Search Method Based on Improved FABRIK for Maintenance Scenarios 644
Zicheng Song (Beihang University, China), Dong Zhou (Beihang University, China), Yuchen Bai (Beihang University, China), Qingtian Yang (Beihang University, China), Qidi Zhou (Beihang University, China), and Ziyue Guo (Beihang University, China)

Multi-Service Condition Load Monitoring Method for Landing Gear Using BP Neural Networks .. 650
Zhaofeng Dou (Beihang University, China), Weifang Zhang (Beihang University, China), Yantao Liu (Beijing Institute of Intensity Environment, China), Chaojie Zhu (Beijing Institute of Intensity Environment, China), Ziru Yang (Beihang University, China), and Yan Zhao (University of Science and Technology, China)

Anomaly Detection in Complex Systems Using a Hybrid Framework 656
Bingxin Yan (National University of Singapore, Singapore), Qiuzhuang Sun (University of Sydney, Australia), Xiaobing Ma (Beihang University, China), and Lijuan Shen (Singapore-ETH Centre, Singapore)

Research on Scheduling Optimization and Equipment Reliability for Intelligent Manufacturing

Optimization of Maintenance Scheduling for High-Speed Cutting Tools Based on Reinforcement Learning 662
Jiaqi Hu (Shanghai Jiao Tong University, China), Jiayi Huang (Shanghai Jiao Tong University, China), Yinhe Xia (Shanghai Jiao Tong University, China), and Siqi Qiu (Shanghai Jiao Tong University, China)

Roller Heat Treatment Workshop Scheduling Using Reinforcement Learning 668
Siyu Tong (Shanghai Jiao Tong University, China), Deng Guo (Shanghai Jiao Tong University, China), and Siqi Qiu (Shanghai Jiao Tong University, China)

Research on Standardization of Measurement and Testing Process of Aviation Equipment Based on Motion Capture 674
Chu Youbing (Shanghai Aircraft Manufacturing Company, China), Cheng Sheng (Shanghai Aircraft Manufacturing Company, China), Chen Mo (Shanghai Aircraft Manufacturing Company, China), Yin Qifan (Shanghai Aircraft Manufacturing Company, China), and Wang Shiyuan (Shanghai Aircraft Manufacturing Company, China)

Multi-Robotic Partial Disassembly Line Balancing Optimization Problem Considering Robotic Efficiency Difference 679
Tianyang Fang (University of Technology Sydney, Australia)

Optimal Scheduling-Maintenance Strategy via Dynamic Processing Time for Serial-Parallel Flow Shop 685
Kai Wu (Beihang University, China), Wei Chen (Beijing Institute of Space Launch Technology, China), and Jun Yang (Beihang University, China)

Research on Maintainability Design and Intelligent Support Strategies for Complex Equipment

Equipment Maintainability Design Verification Based on RAG 691
Senlin Zhu (Army Engineering University, China), Qingqing Song (Army Engineering University, China), Xingxin Li (Army Engineering University, China), Qingqing Hu (Army Engineering University, China), and Ke Li (Army Engineering University, China)

Performance Analysis and Optimization of Flight Test Process Considering Maintenance Efficiency 696
Bangtai Wu (Chinese Flight Test Establishment, China) and Feixing Li (Chinese Flight Test Establishment, China)

Maintenance Strategy Optimization for Aviation Equipment SoS Under Mission Uncertainty 702
Dong Liu (Beihang University, China), Bo Li (Beihang University, China), Xinhao Cui (Beihang University, China), Ziguang Ji (Beihang University, China), Xue Yang (Beihang University, China), Penghao Qi (Beihang University, China), and Yiyong Xiao (Beihang University, China)

Methods for Assessing Reusability in Spacecraft Electronic Equipment and Structures 708
Meng Zhang (Beijing Institute of Spacecraft System Engineering, China), Pengcheng Wang (Beijing Institute of Spacecraft System Engineering, China), Ying Gong (Beijing Institute of Spacecraft System Engineering, China), Haitao Zhao (Beijing Institute of Spacecraft System Engineering, China), and Jingyan Wang (Beijing Institute of Spacecraft System Engineering, China)

Optimizing a Three-Echelon Stochastic Inventory Policy for Shared Electric Bicycle Batteries using Double Deep Reinforcement Learning 714
Jingjing Wang (Qingdao Univeristy of Technology, China), Dandan Song (Qingdao Univeristy of Technology, China), and Xin Yang (Qingdao Univeristy of Technology, China)

Causal Graph Discovery and Analysis of Vibration Performance and Assembly Parameters in Aerospace Engines 721
Tianzi Tian (Beihang University, China), Tongling Ma (Beijing Institute of Power Machinery, China), Bowen Wang (Beijing Institute of Power Machinery, China), and Zhuqing Miao (Beihang University, China)

Construction of the Chinese Knowledge Graph on Electronic Product Failure Mechanisms and Reliability 727
Xin Yue (Beihang University, China) and Chen Ying (Beihang University, China)

Research on Maintainability Design and Predictive Maintenance Based on Intelligent

Performance Analysis for a Degrading System Subject to Non-Periodic Inspection and Maintenance Strategy 733
Mengya Li (University of Science and Technology, China), Aibo Zhang (University of Science and Technology, China), and Xiuli Wu (University of Science and Technology, China)

A Review of Digital Twin Framework and Key Technology Applications for Electronic Equipment 739
Dongqian Shao (Beihang University, China), Bowen Cui (Beihang University, China), Shaokang Fan (Beihang University, China), Yuxiang Lin (Beihang University, China), Yaohui Guo (Beihang University, China), and Ying Chen (Beihang University, China)

Ontology and Meta-Model Based Maintenance Process Modeling 745
Yan Zhang (Beihang University, China), Dong Zhou (Beihang University, China), Ziyue Guo (Beihang University, China), Qidi Zhou (Beihang University, China), Yuchen Bai (Beihang University, China), Yunbo Li (Beihang University, China), and Qingtian Yang (Beihang University, China)

An Interactive Management Approach for Fatigue Life Prognostic and Predictive Maintenance Under Multi-Source Uncertainty 751
Shihan Zhou (Beihang University, China), Yi Chen (Beihang University, China), Runyu Zhang (Beihang University, China), and Yu Zhao (Beihang University, China)

Joint Maintenance and Production Optimization of A Two-Stage System Exposed to Random Shocks by Deep Reinforcement Learning 757
Xiaoyang Meng (Beijing Foreign Studies University, China), Jun Wang (Beijing Foreign Studies University, China), and Yuanyuan Zhou (Beijing Foreign Studies University, China)

A Computer-Aided Design Based Parametric Method for Maintainability Rapid Verification 764
Yunbo Li (Beihang University, China), Dong Zhou (Beihang University, China), Ziyue Guo (Beihang University, China), Qidi Zhou (Beihang University, China), Qingtian Yang (Beihang University, China), and Yan Zhang (Beihang University, China)

Research on Operation and Maintenance Optimization and Knowledge Modeling for Intelligent Decision-Making in Complex Systems

Interdisciplinary Equation of Microservice Response Time via Spatio-Temporal Attention Network 770
Yu Tian (Beihang University, China) and Ruiying Li (Beihang University, China)

Multi-Dimensional Digital Twin Models with Dynamic Updating Scheme for Enhanced Wind Turbine O&M Decision-Making 776
Ying Hu (Beihang University, China), Lin Ma (Beihang University, China), Yingjie Deng (Beihang University, China), and Naichao Wang (Beihang University, China)

Research on Customer Churn Prediction Based on Transformer and CNN Fusion Model 782
Xiaoyang Liu (China Mobile Communications Group Guangdong Co., Ltd., China) and Jingliang Liu (Applied Technology College of Soochow University, China)

Quantification Method of Operating Space Based on Convex Collision and Posture Comfort Analysis 788
Qingtian Yang (Beihang University, China), Dong Zhou (Beihang University, China), Jinlong zhao (China North Vehicle Research Institute, China), Qidi Zhou (Beihang University, China), Zicheng Song (Beihang University, China), Yan Zhang (Beihang University, China), and Yunbo Li (Beihang University, China)

Reliability-Based Optimization of Location and Scale for Metro Maintenance Depots 794
Qian Chen (Shanghai Jiao Tong University, China), Hongyuan Chen (Shanghai Jiao Tong University, China), Yudi Wu (Shanghai Jiao Tong University, China), and Siqi Qiu (Shanghai Jiao Tong University, China)

Research on Ship Maintenance Optimization Based on Simulated Annealing Algorithm 801
Li Cao (Marine Design and Research Institute of China, China), Yue Bao (Marine Design and Research Institute of China, China), and Fangkun Zou (Marine Design and Research Institute of China, China)

Rule-Based Reasoning Opportunistic Maintenance Scheme Generation Technology 805
Xin Jiang (Beihang University, China), Chuan Lv (Beihang University, China), Yu Fan (Chinese Academy of Sciences, China), and Wan Lan (Beihang University, China)

Author Index **811**
