# TABLE OF CONTENTS

|                                                                                                                                |    |
|--------------------------------------------------------------------------------------------------------------------------------|----|
| Research on the Construction Technology of Real-Time Simulation System for Variable Speed Pumped Storage .....                 | 1  |
| <i>Xiaojian Yao, Dingcai Pan, Zhijiang Liu, Shuyong Li, Zhiwu Xiong, Qiqi Qian, Bo He, Xuehua Lin</i>                          |    |
| Capacity configuration of zero-carbon hydrogen metallurgy system coupled with underground salt cavern hydrogen storage .....   | 7  |
| <i>Qiang Ji, Lin Cheng, Pengfei He</i>                                                                                         |    |
| Energy Storage Configuration Optimization Strategy for Industrial Users Considering Demand Charge Savings .....                | 14 |
| <i>Yiming Cai, Xiangle Zeng, Bin Liu, Zhijian Liang, Zhonghai Wang</i>                                                         |    |
| Smart Planning for EV Charging Infrastructure: A Predictive and Policy-Driven Approach for Urban Electrification .....         | 20 |
| <i>Katherine Yang, Anderson Shao, Zihan Wang</i>                                                                               |    |
| Design and Implementation of a Virtual Power Plant Technical Support System Considering Electricity-Carbon Collaboration ..... | 27 |
| <i>Tian Mao, Shihao Liu, Zhe Cheng, Baorong Zhou, Wenmeng Zhao, Tao Wang</i>                                                   |    |
| A study of carbon emissions tracking in power system networks: Theoretical approach and Analysis .....                         | 32 |
| <i>Yajie Li, Mao Fan, Aliye Rexiti, Kai Li, Lei Ma, Sirui Lu, Hao Lu</i>                                                       |    |
| Economic benefit analysis of the integrated hydrogen energy system park under optimized operation .....                        | 36 |
| <i>Hong Li, Lumin Li, Tao Wang, Rongwu Zhu, Ke Luo</i>                                                                         |    |
| Industrial Load Flexibility Evaluation Based on Subjective and Objective Weighting and Fuzzy Comprehensive Assessment .....    | 40 |
| <i>Yan Li, Jiayu Rong, Zhiwen Liu, Chong Shao, Jialing Qiu, Jinxi Dong</i>                                                     |    |
| Research on Carbon Emission Accounting of Power Transmission and Transformation Projects Based on Life Cycle Approach .....    | 45 |
| <i>Fan Yang, Xiaohui Wang, Yue Tang, Shili Liu, Jianqing Li, Si Shen</i>                                                       |    |
| Research and Application of Electric Installation Technology "I" Type Insulated Sheath .....                                   | 52 |
| <i>Feng Zhao, Ningbo Cai, Bin Liu</i>                                                                                          |    |
| Multi-Scenario prediction of the potential for electric energy substitution in the industrial sector .....                     | 60 |
| <i>Dunhui Chen, Yun Zhao, Yutao Xu, Ziwen Cai, Qihui Feng, Xipeng Liu</i>                                                      |    |
| Research on Data Mining and Analysis of Hydropower Station Monitoring Based on Intelligent System .....                        | 65 |
| <i>Rongdi Li, Defang Zheng</i>                                                                                                 |    |
| Dynamic aggregation based on distributed wind and solar power combination .....                                                | 71 |
| <i>Xiaoping Xiong, Jingfang Jiang</i>                                                                                          |    |
| Economic analysis of integrated wind-power-fire-storage system during operation period .....                                   | 75 |
| <i>Chao Li, Weijie Wang, Ling Ji, Tingfang Tan</i>                                                                             |    |
| Prediction of system strength margin for multi-infeed systems based on federated learning .....                                | 80 |
| <i>Zhihao Chen, Haiqing Cai, Wei Chen, Yun Liu, Zixiang Lin</i>                                                                |    |

|                                                                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Research on anomaly analysis method of power prediction data based on periodic characteristics of wind power generation .....                                | 86  |
| <i>Weinan Feng, Weijie Wang, Ling Ji, Tingfang Tan</i>                                                                                                       |     |
| Multi-objective Optimization for Virtual Power Plant Based on Carbon Flow Tracing .....                                                                      | 92  |
| <i>Shucan Zhou, Hao Yu, Xin Huang, Weijie Wu, Minjia Zheng, Yixin Li, Yu Cai, Xiangyang Su</i>                                                               |     |
| Research on Optimization of Active Distribution Networks Considering Demand Response and Source-Load-Storage Coordination .....                              | 98  |
| <i>Jiayuan Wan, Xuzheng Chai, Wenbo Yao, Shijie Sun</i>                                                                                                      |     |
| A Distributed Wasserstein Distributionally Robust Self-Scheduling Based on ADMM .....                                                                        | 102 |
| <i>Duo Zhao, Hongwu Guo, Zhiding Wu, Yuming Zhou</i>                                                                                                         |     |
| Optimization of chiller energy efficiency prediction and analysis of energy saving effect based on BP neural network .....                                   | 109 |
| <i>Tingyou Zhang, Yingying Hao, Kaijia Zhao, Cheng Qian, Kun Zhang</i>                                                                                       |     |
| Low Voltage Fault Location and Self-Healing Power Transfer Based on Hierarchical Switch Cabinet Configuration .....                                          | 117 |
| <i>Long Xu, Xiao Liu, Yigang Liu, Yonghao Deng, Zhiwei Xie, Penghui Jia</i>                                                                                  |     |
| Optimal Power Flow Prediction with GWO-CNN-XGBOOST Model in New Energy Scenarios .....                                                                       | 121 |
| <i>Fu Yang, Guosong Wang, Qinfeng Ma, Junquan Chen, Qingqing Zhang, Huaying Su</i>                                                                           |     |
| Reserve Planning for Multi-Area Interconnected Power Systems Using Three-Stage Decomposition-Coordination Based Fast Time-Series Production Simulation ..... | 126 |
| <i>Sui Peng, Yanfeng Wang, Feng Li, Yufeng Tang, Wenxuan Pan, Junzhou Wang, Junjie Tang</i>                                                                  |     |
| Double-layer optimal scheduling of industrial parks based on equipment behavior correlation graphs .....                                                     | 133 |
| <i>Weidong Bao, Yang Zhou, Jingbo He, Kaihua Lou, Xiuhua Ding, Ning Bao</i>                                                                                  |     |
| Data-driven decoupling and dimensionality reduction technology for distribution network aggregations .....                                                   | 137 |
| <i>Chunsheng Zhou, Jing Peng, Fujun Qi, Yuxiang Liao, Jinqi Zhang, Wen Wang</i>                                                                              |     |
| Enhancing Short-Term Electricity Load Prediction via CNN-BiGRU and Autoformer Integration .....                                                              | 141 |
| <i>Ruijun Tie, Ming Li, Nanwei Ding, Cong Zhou</i>                                                                                                           |     |
| Research on the Application of Market Power Calculation in the Electricity Market Based on Artificial Intelligence .....                                     | 145 |
| <i>Xiaogang Li, Lin Cheng, Jiaheng Yang, Min Wu</i>                                                                                                          |     |
| Planning method for electric vehicle charging stations and distributed power sources based on improved beetle optimization algorithm .....                   | 153 |
| <i>Yingli Wang, Meng Wen, Qiming Lu, Geng Li</i>                                                                                                             |     |
| Multi-time scale optimization scheduling of distributed intelligent distribution network considering source, load and storage coordination .....             | 159 |
| <i>Zhenbiao Qi, Kun Wang, Yu Tian, Fei Xu, Zhengkai Zhang, Zhi Liu, Yunguang Qin, Xinxing Xu</i>                                                             |     |
| <i>Nengling Tai</i>                                                                                                                                          |     |
| Discussion on the Application of Mobile Energy Storage Technology in Distribution Networks .....                                                             | 167 |
| <i>Jiajin Lin, Jian Sun, Yijian Li, Xuntao Shi, Zhizhao Ou, Xiaobing Xiao, Tianwen Kong</i>                                                                  |     |

|                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------|-----|
| An optimized scheduling model for energy storage system based on improved TCN-LSTM .....                                             | 172 |
| <i>Mingxing Mei, Jian Huang, Liting Zhao, Junshi Chen, Yihan Zhang, Xi Chen</i>                                                      |     |
| Construction of power plant flue gas emission prediction model based on machine learning .....                                       | 176 |
| <i>Xin Xing, Jun Zhu, Lincong Luo, Jie Han, Gaowu Jian</i>                                                                           |     |
| Carbon Peak Prediction in Hebei Province—Based on IPAC-VECM Model .....                                                              | 181 |
| <i>Yan Jiang, Tao Liu, Jing Zhu, Xia Wang, Meng Sun</i>                                                                              |     |
| PSO-based Economy and Reliability-Coordinated Distribution Transformer Capacity Planning .....                                       | 188 |
| <i>Jiayang Liu, Heyi Zhao, Jiaxuan Lu, Haoyu Ci, Haijun Liao, Zhenyu Zhou</i>                                                        |     |
| Analysis of Investment Allocation Model Strategy for Distribution Network .....                                                      | 193 |
| <i>Jie Tang, Wei Feng, Xin Zhao, Le Yang, Qian Wu</i>                                                                                |     |
| Research on the Adjustment Methods for Unsolvable Power Flow Equations .....                                                         | 197 |
| <i>Tao Yi, Yanjie Wang</i>                                                                                                           |     |
| Dynamic Response Characteristics of Photovoltaic Power Station Inverters in Industrial Scenarios .....                               | 201 |
| <i>Li Ding, Libin Liang, Pengfei Zhang</i>                                                                                           |     |
| Strategic Game Theory for Attack-Defense Scenarios and Resource Allocation in Urban Power<br>Network .....                           | 208 |
| <i>Chengze Li, Wenxia Liu</i>                                                                                                        |     |
| Capacity planning of integrated energy system in agricultural park based on greenhouse thermal inertia<br>and load flexibility ..... | 212 |
| <i>Jindong Liu, Peng Zhang, Yingshun Liu, Yang Gao, Zijun Liang, Haitao Li, Mengchao Liu</i>                                         |     |
| Short-term time-series forecasting of smart grid states using unsupervised clustering-assisted LSTM .....                            | 221 |
| <i>Wenjing Qian, Jinghan Zhang, Xiaolei Pan, Wei Wang</i>                                                                            |     |
| A Study on Ultra-Short-Term Photovoltaic Power Forecasting Based on Multi-Scale TCN-Attention<br>Mechanism .....                     | 227 |
| <i>Haifeng Cao, Xianwen Zeng, Guige Gao</i>                                                                                          |     |
| Solar Irradiance Time-Series Forecasting Method Based on Dual-Layer Data Augmentation by<br>Transformer-GAIN Algorithm .....         | 232 |
| <i>Yajie Tang, Zhihao Li, Diyang Gong, Da Lin, Qi Guo</i>                                                                            |     |
| Transmission Network Expansion Planning Considering Integration of Offshore Wind Power .....                                         | 242 |
