# TABLE OF CONTENTS

## **B5.1 TOOLS AND TECHNOLOGY IN SUPPORT OF INTEGRATED APPLICATIONS**

|                                                                                                                                                                              |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| The Potential of Digital Twin Technologies for Enhanced Lunar Operations .....                                                                                               | 1  |
| <i>Kangsan Kim, Jahnavi Dangeti, Akanksha Bhagat</i>                                                                                                                         |    |
| Simulation of High Resolution Satellite Orbits to Maximize Frequency and Quality of Methane<br>Emission Detection Over a Solid Waste Landfill in Rio De Janeiro, Brazil..... | 8  |
| <i>Frederick Ajisafe, Danielle Wood</i>                                                                                                                                      |    |
| S.O.N.I.A (Space Observation and Navigation Intelligence Assistant) .....                                                                                                    | 16 |
| <i>Safarali Safarli, Leman Safarli, Sona Rustam, Nigar Rustam</i>                                                                                                            |    |
| Information Analytics for Space Entities Using 3D Models and Artificial Intelligence.....                                                                                    | 22 |
| <i>Jun Heo, Kruger White</i>                                                                                                                                                 |    |
| Payload-Aware Reinforcement Learning for Mission Planning in 6G LEO Satellite Constellations<br>for Safe UAM and Drone Operations .....                                      | 33 |
| <i>Uihwan Choi, Soojeon Lee, Yoola Hwang</i>                                                                                                                                 |    |
| Energy-Optimized Uav Package Delivery System: Integrating Barometric Sensing and Gps for<br>Reduced Hovering Time and Enhanced Operational Efficiency .....                  | 39 |
| <i>Farrdin Nowshad, Maidul Islam, Md. Shaeak Ibna Salim, Akif Mohiuddin, Abdulla Hil Kafi</i>                                                                                |    |
| TerraNexus: A Paradigm Shift and Digital Nexus Between Terrestrial and Space-Derived Data<br>Systems.....                                                                    | 46 |
| <i>Matthew Purss</i>                                                                                                                                                         |    |

## **B5.2 INTEGRATED APPLICATIONS END-TO-END SOLUTIONS**

|                                                                                                                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| AI-Driven Wildfire Severity and Exposure Mapping: From Satellite Data to Actionable Insights .....                                                                                                                                                         | 58  |
| <i>Alexandre Bandini-Maeder, Cameron Poole, Huy-Thong Phan, Bradley Johnson, Mathis Pohl, John Fisher, Roxane Bandini-Maeder</i>                                                                                                                           |     |
| Commercial Ventures in the European Space Sector: Return Over Investment for Achieving<br>Sustainability Targets.....                                                                                                                                      | 69  |
| <i>Giulia Cambone, Elisabetta Lamboglia, Agnes Mestreau</i>                                                                                                                                                                                                |     |
| Digital Earth Maldives: An Integrated Platform to Support Environmental Decision-Making.....                                                                                                                                                               | 77  |
| <i>Nashwan Matheen</i>                                                                                                                                                                                                                                     |     |
| UEIKAP Project: Final Results, Main Outcomes and Future Advances .....                                                                                                                                                                                     | 83  |
