2025 IEEE 45th International Conference on Distributed Computing Systems Workshops (ICDCSW)

ICDCSW 2025

Table of Contents

Message from the General Chairs ..... **xxii**
Reviewers ..... **xxiii**

Poster Papers

Quantum Federated Aggregation using Joint Fidelity-and-Entropy Computation 1
Seok Bin Son (Korea University, Republic of Korea) and Soohyun Park (Sookmyung Women's University, Republic of Korea)

Efficient Fine-Tuning of Large Models under 4GB VRAM with Power-Saving Strategies 7
Dong Dong (Tsinghua University, China), Mingshu Zhai (Tsinghua University, China), Hui Zeng (Xidian University, China), Chengzhang Wu (Tsinghua University, China), and Jidong Zhai (Tsinghua University, China)

Fundamentals of Caching Layered Data Objects 13
Agrim Bari (The University of Texas at Austin, USA), Gustavo de Veciana (The University of Texas at Austin, USA), and George Kesidis (The Pennsylvania State University, USA)

ACC: Ensuring Eventual Consistency across Diverse Data Stores in End-Cloud Collaboration 19
Wenbo Zhao (Xidian University, China), Longhai Li (Xidian University, China), Hui Li (Xidian University, China; Shanghai Yunxi Technology, China), Mingtao Chen (Alibaba Corporation, China), Mingsong Xie (Xidian University, China), Yuheng Chang (Xidian University, China), and Jiangtao Cui (Xidian University, China)

FedColab: Federated Collaborative Learning for Teacher-Student Knowledge Distillation 25
Wenhao Li (University of Glasgow, UK), Christos Anagnostopoulos (University of Glasgow, UK), and Kevin Bryson (University of Glasgow, UK)

Adaptive Region-Aware Video Encoding for Real-Time Cloud-Edge Collaborative Object Detection 32
Bingyun Yang (Nanjing University, China), Jingyi Ning (Nanjing University, China), Wenhui Zhou (Nanjing University, China), Chuyu Wang (Nanjing University, China), Lei Xie (Nanjing University, China), Zhenjie Lin (China Southern Power Grid Digital Platform Technology Company, China), and Liming Wang (China Southern Power Grid Digital Platform Technology Company, China)

Convergence Behaviors and Variabilities of Loss Functions in Quantum GANs and GANs 38
Md Abdur Rahman (University of West Florida, USA), Alfredo Cuzzocrea (University of Calabria, Italy; University of Paris City, France), and Hossain Shahriar (University of West Florida, USA)

EMO: Edge Model Overlays to Scale Model Size in Federated Learning 44
Di Wu (University of St Andrews, UK), Weibo He (Zhejiang University of Technology, China), Wanglei Feng (Zhejiang University of Technology, China), Zhenyu Wen (Zhejiang University of Technology, China; University of Science and Technology of China, China), Bin Qian (Zhejiang University, China), and Blesson Varghese (University of St Andrews, UK)

Federated Learning for Privacy-Preserving Anomaly Detection in Electronic Health Record Access Control 50
Javier Martínez Llamas (KU Leuven, Belgium), Paolo Marcheschi (Fondazione G. Monasterio, Italy), Stefano Dalmiani (Fondazione G. Monasterio, Italy), Davy Preuveneers (KU Leuven, Belgium), and Wouter Joosen (KU Leuven, Belgium)

A Federated Few-Shot Learning Siamese Network Framework with Data Label Imbalance 56
Tahani Aladwani (University of Glasgow, UK), Maria Pantazi-Kypraiou (University of Thessaly, Greece), George Rafael Goudroumanis (University of Thessaly, Greece), George Floros (University of Thessaly, Greece), and Christos Anagnostopoulos (University of Glasgow, UK)

Gradient Bandit Experts for Node Selection in Edge Computing 63
Saleh Abdullah Alfahad (University of Glasgow, UK), Shameem A Puthiya Parambath (University of Glasgow, UK), and Christos Anagnostopoulos (University of Glasgow, UK)

Federated Quantum Generative Adversarial Network for Intrusion Detection 69
Franco Cirillo (University of Salerno, Italy) and Christian Esposito (University of Salerno, Italy)

Detection of Stealthy Attack Vectors in Networked Industrial Control Systems using Machine Learning 75
Lazaros Lazarou (University of Cyprus, Cyprus), Costas Pashiourtides (University of Cyprus, Cyprus), and Angelos K. Marnerides (University of Cyprus, Cyprus)

Unified Parallel Semantic Log Parsing Based on Causal Graph Construction for Attack Attribution 81
Zhuoran Tan (University of Glasgow, UK), Christos Anagnostopoulos (University of Glasgow, UK), Shameem P. Parambath (University of Glasgow, UK), Ke Xiao (University of Glasgow, UK), and Jeremy Singer (University of Glasgow, UK)

Resilient Inference for Personalized Federated Learning in Edge Computing Environments 87
Ke Xiao (University of Glasgow, UK), Qiyuan Wang (University of Glasgow, UK), Christos Anagnostopoulos (University of Glasgow, UK), and Kevin Bryson (University of Glasgow, UK)

Traffic Embedding: Improving the Transferability of Deep Learning Model in Anomaly Detection 93
Yifei Zhang (Carleton University, Canada), Chung-Horng Lung (Carleton University, Canada), and Zhe Zhang (Nanjing University of Posts and Telecommunications, China)

Causal VAE-DM: Trustworthy Generative Modeling for Image Modification Based on Causal Graphs 99
Zhaoan Ye (University of Glasgow, UK), Dezong Zhao (University of Glasgow, UK), Li Zhang (University of London, UK), Wenjing Zhao (University of Glasgow, UK), David Flynn (University of Glasgow, UK), and Chongfeng Wei (University of Glasgow, UK)

EFaaS: Energy-Efficient Function Orchestration in Serverless Edge Computing 105
Chen Chen (University of Cambridge, UK), Peiyuan Guan (University of Oslo, Norway), Luning Li (University of Cambridge, UK), Pedro Juan Rivera Torres (University of Salamanca, Spain), Roman Kolcun (University of Cambridge, UK), and Richard Mortier (University of Cambridge, UK)

A Fast-Converging Decentralized Approach to the Weighted Minimum Vertex Cover Problem 111
Matteo Mordacchini (National Research Council of Italy, Italy), Emanuele Carlini (National Research Council of Italy, Italy), and Patrizio Dazzi (University of Pisa, Italy)

GeNet: A Multimodal LLM-Based Co-Pilot for Network Topology and Configuration 117
Beni Ifland (Ben Gurion University of the Negev), Rubin Krief (Ben Gurion University of the Negev), Aviram Zilberman (Ben Gurion University of the Negev), Elad Duani (Ben Gurion University of the Negev), Miro Ohana (Ben Gurion University of the Negev), Andres Murillo (Fujitsu), Ofir Manor (Fujitsu), Ortal Lavi (Fujitsu), Kenji Hikichi (Fujitsu), Asaf Shabtai (Ben Gurion University of the Negev), Yuval Elovici (Ben Gurion University of the Negev), and Rami Puzis (Ben Gurion University of the Negev)

Efficient Cloud-Edge Fault Diagnosis in High-Speed Trains Leveraging Dynamic Neural Inference 123
Yunpu Wu (Xihua University, China), Paul Allen (University of Huddersfield, UK), Gareth Tucker (University of Huddersfield, UK), Lai Wei (Southwest Jiaotong University, China), and Xia Lei (Xihua University, China)

HybridServe: Efficient Serving of Large AI Models with Confidence-Based Cascade Routing 129
Leyang Xue (The University of Edinburgh), Yao Fu (The University of Edinburgh), Luo Mai (The University of Edinburgh), and Mahesh K. Marina (The University of Edinburgh)

TUBO: A Tailored ML Framework for Reliable Network Traffic Forecasting 135
Zhihang Yuan (The University of Edinburgh), Leyang Xue (The University of Edinburgh), Waleed Ahsan (The University of Edinburgh), and Mahesh K. Marina (The University of Edinburgh)

LogWF: Anomaly Detection for Distributed Systems Based on Log Workflow Mining 141
Teng Li (Xidian University; Nanyang Technological University), Shengkai Zhang (Xidian University; State Key Laboratory of Integrated Services Networks (ISN)), Yebo Feng (Nanyang Technological University), Jiahua Xu (University College London), Yaxuan Xie (Xidian University), Wei Qiao (Xidian University), and Jianfeng Ma (Xidian University; State Key Laboratory of Integrated Services Networks (ISN))

Adaptive Multiple Workflow Scheduling in Cloud with Execution Uncertainty 147
Panagiotis Oikonomou (University of Thessaly, Greece), Nikos Tziritas (University of Thessaly, Greece), Mustafa Al-Bado (Dell Technologies, Ireland), Thanasis Loukopoulos (University of Thessaly, Greece), Georgios Theodoropoulos (Southern Univ. of Science and Technology, China), and Kostas Kolomvatsos (University of Thessaly, Greece)

A Modularized and Greedy Strategy-Based Framework for Enhanced DV-Hop Model 153
Zhou Zhou (Changsha University, China), Han Shen (Xi'an Technological University, China), and Mohammad Shojafar (University of Surrey, U.K.)

P4mCast: Accelerating and Scaling Fault-Tolerant Atomic Multicast in Multi-Cloud Environment 159
Bochra Boughzala (University of Groningen, The Netherlands), Boris Koldehofe (Technische Universität Ilmenau, Germany), and Alexander Lazovik (University of Groningen, The Netherlands)

Time-Varying Functional Connectivity for Scalable Observability in Microservice Architectures 165
Giles Winchester (University of Sussex, UK), George Parisis (University of Sussex, UK), and Luc Berthouze (University of Sussex, UK)

Web of Things Framework for Remote Health Monitoring of Older Adults 171
Banani Anuraj (University of Applied Sciences and Arts Western Switzerland HES-SO, Switzerland; KU Leuven, Belgium; The Sense Innovation and Research Center, Switzerland), Kirill Dorofeev (Siemens AG, Germany), Jean-Marie Aerts (KU Leuven, Belgium), and Jean-Paul Calbimonte (University of Applied Sciences and Arts Western Switzerland HES-SO, Switzerland; The Sense Innovation and Research Center, Switzerland)

Towards Efficient Straggler Management in Distributed Deep Learning Training 177
Suraiya Tairin (University of Virginia, VA), Haiying Shen (University of Virginia, VA), and Anand Iyer (Georgia Institute of Technology, GA)

Analysis and Tuning of Knowledge Distillation for Efficient Collaborative Learning 183
Norah Alballa (KAUST), Ahmed M. Abdelmoniem (Queen Mary University of London), and Marco Canini (KAUST)

Industry Event Papers

Incremental Learning Detection of Distributed Financially Motivated Attacks in Energy Markets 189
Ghadeer O. Alsharif (University of Glasgow, UK), Christos Anagnostopoulos (University of Glasgow, UK), and Angelos K. Marnerides (University of Cyprus, Cyprus)

Distributed Quantum Bit-Phase-Flip Error Correction Based on CSS Codes and GHZ States 195
Shahram Babaie (University at Buffalo, USA) and Chunming Qiao (University at Buffalo, USA)

TS-V2X: Trust-Based Safety V2X Middleware for Adaptive Situation Awareness in Autonomous Driving 201
Jimin Ryu (Sookmyung Women's University, Korea), Subi Kim (Sookmyung Women's University, Korea), Jieun Kang (Sookmyung Women's University, Korea), and Yong Ik Yoon (Sookmyung Women's University, Korea)

Leveraging Federated Learning for Decentralized Semi-Supervised Task-Informed Representation Learning on Sequential Data 207
Maximilian Forstenhäusler (University of Glasgow, Scotland), Christos Anagnostopoulos (University of Glasgow, Scotland), Shameem Parambath (University of Glasgow, Scotland), Daniel Külzer (BMW Group, Germany), and Natascha Weber (BMW Group, Germany)

Snowpark: Performant, Secure, User-Friendly Data Engineering and AI/ML Next to Your Data 213
Brandon Baker (Snowflake, Inc), Elliott Brossard (Snowflake, Inc), Chenwei Xie (Snowflake, Inc), Zihao Ye (Snowflake, Inc), Deen Liu (Snowflake, Inc), Yijun Xie (Snowflake, Inc), Arthur Zwiegincew (Snowflake, Inc), Nitya Kumar Sharma (Snowflake, Inc), Gaurav Jain (Snowflake, Inc), Eugene Retunsky (Snowflake, Inc), Mike Halcrow (Snowflake, Inc), Derek Denny-Brown (Snowflake, Inc), Istvan Cseri (Snowflake, Inc), Tyler Akidau (Snowflake, Inc), and Yuxiong He (Snowflake, Inc)

Optimizing Telco Networks with Foundation Models: A Scalable Approach for Tabular Data 219
Franck Le (Thomas J. Watson Research Center, USA), Keith Grueneberg (Thomas J. Watson Research Center, USA), Erich Nahum (Thomas J. Watson Research Center, USA), Douglas Freimuth (Thomas J. Watson Research Center, USA), and Vadim Sheinin (Thomas J. Watson Research Center, USA)

D-MGN: A Distributed Mesh Graph Neural Network for Scalable Engineering Simulation 225
Fu Lin (Tongji University, China), Jiasheng Shi (Tongji University, China), Weixiong Rao (Tongji University, China), Jiachuan Wang (Hong Kong University of Science and Technology, China), Lei Chen (Hong Kong University of Science and Technology, China), Chunyan Zhu (Yanfeng International Automotive Technology Co., Ltd., China), Haihua Wang (Yanfeng International Automotive Technology Co., Ltd., China), and Suo Xie (Yanfeng International Seating System Co., Ltd., China)

Distributed Log-Driven Anomaly Detection System Based on Evolving Decision Making 231
Zhuoran Tan (University of Glasgow, UK), Qiyuan Wang (University of Glasgow, UK), Christos Anagnostopoulos (University of Glasgow, UK), Shameem P. Parambath (University of Glasgow, UK), Jeremy Singer (University of Glasgow, UK), and Sam Temple (JUMPSEC Ltd, UK)

Performance of Confidential Computing GPUs 237
Antonio Martínez Ibarra (University of Murcia), Julian James Stephen (IBM Research), Aurora González Vidal (University of Murcia), K. R. Jayaram (IBM Research), and Antonio Fernando Skarmeta Gómez (University of Murcia)

GUIDE - GNN Based Unified Incident Detection for Microservices Application Deployments 243
Anurag Dutt (Stony Brook University), Doseok Jang (Observe, Inc.), Joao Nadkarni (Observe, Inc.), Kai Su (Observe, Inc.), and Anshul Gandhi (Stony Brook University)

Unearthing Silent Data: Back to Basics in Process Design 249
Jae Sook Cheong (University of Bayreuth, Germany) and Junseong Bang (Ymatics Corp., South Korea)

Artificial Intelligence and Radar-Enhanced Audio-Visual Speech Recognition for the Next Generation of Communication Technologies 255
Nour Ghadban (University of Glasgow, UK), Hira Hammed (University of Glasgow, UK), Elem Miranda (University of Glasgow, UK), Mostafa Elsayed (University of Glasgow, UK), Qammer H. Abbasi (University of Glasgow, UK), Muhammad Ali Imran (University of Glasgow, UK), Julien Reboud (University of Glasgow, UK), Jonathan Cooper (University of Glasgow, UK), and Julien Le Kernec (University of Glasgow, UK)

AutoFairML: An Automated Middleware for Fairness Auditing in Real-World AI Pipelines 261
Dimitrios Tomaras (Athens University of Economics and Business), Vana Kalogeraki (Athens University of Economics and Business), Christos Varytimidis (Workable), Evangelos Anagnostopoulos (Workable), Rahul Nair (IBM Research Europe), Elizabeth M. Daly (IBM Research Europe), Jakub Marecek (Czech Technical University), and Dimitrios Gunopulos (National and Kapodistrian University of Athens)

Efficient and Safe Planner for Automated Driving on Ramps Considering Unsatisfication 267
Qinghao Li (University of Liverpool, United Kingdom), Zhen Tian (University of Glasgow, United Kingdom), Xiaodan Wang (Cardiff University, United Kingdom), Jinming Yang (University of Glasgow, United Kingdom), and Zhihao Lin (University of Glasgow, United Kingdom)

Adaptive Field Effect Planner for Safe Interactive Autonomous Driving on Curved Roads 273
Qinghao Li (University of Liverpool, United Kingdom), Zhen Tian (University of Glasgow, United Kingdom), Xiaodan Wang (Cardiff University, United Kingdom), Jinming Yang (University of Glasgow, United Kingdom), and Zhihao Lin (University of Glasgow, United Kingdom)

Multi-Agent Monte Carlo Tree Search for Safe Decision Making at Unsignalized Intersections..... 279
Zhihao Lin (University of Glasgow, United Kingdom), Jianglin Lan (University of Glasgow, United Kingdom), Christos Anagnostopoulos (University of Glasgow, United Kingdom), Zhen Tian (University of Glasgow, United Kingdom), and David Flynn (University of Glasgow, United Kingdom)

Bringing Serverless Functions Closer To Citizen Science Mobile Applications 285
Aleksander Slominski (IBM Research, USA), Pedro Garcia Lopez (Universitat Rovira i Virgili, Spain), and Daniel Alejandro Coll Tejeda (Universitat Rovira i Virgili, Spain)

Optimized Data Transfer Strategies for Forward Command Centres in Distributed Wildfire Management 291
Mustafa Al-Bado (Dell Technologies, Ireland), Michal Sworzeniowski (Dell Technologies, Ireland), Thuy Truong (Dell Technologies, Ireland), Deirbhile Healy (Dell Technologies, Ireland), Panagiotis Oikonomou (University of Thessaly, Greece), and Konstantinos Kolomvatsos (University of Thessaly, Greece)

Scheduling Inference Workloads in the Computing Continuum with Reinforcement Learning 297
Gabriele Castellano (Huawei Technologies, France), Juan-José Nieto (Telefonica Research, Spain), Antonino Angi (Politecnico di Torino, Italy), Francisco Alvarez Terribas (Telefonica Research, Spain), Jordi Luque (Telefonica Research, Spain), Ferrán Diego Andilla (Telefonica Research, Spain), Alessio Sacco (Politecnico di Torino, Italy), Flavio Esposito (Saint Louis University, USA), and Fulvio Risso (Politecnico di Torino, Italy)

Name-Based Quality for Name-Based Networks 303
Ryo Yanagida (University of Glasgow), Jeremy Singer (University of Glasgow), Paul Harvey (University of Glasgow), Leon Wong (Rakuten Mobile, Inc.), and Colin Perkins (University of Glasgow)

Edge-First Language Model Inference: Models, Metrics, and Tradeoffs 309
SiYoung Jang (Nokia Bell Labs, United Kingdom) and Roberto Morabito (EURECOM, France)

Correctness Proof for a Ring-Learning-with-Errors Multi-Authority Ciphertext-Policy Attribute-Based Encryption Scheme 315
Jack Loughridge Loughridge (Cardiff Metropolitan University, United Kingdom), Charuka Herath (Loughborough University London, United Kingdom), Yogachandran Rahulamathavan (Loughborough University London, United Kingdom), Chaminda Hewage (Cardiff Metropolitan University, United Kingdom), Imtiaz Khan (Cardiff Metropolitan University, United Kingdom), Lewis Kemp (Airbus, United Kingdom), Simon Bourne (Airbus, United Kingdom), and Ali Shahaab (Cardiff Metropolitan University, United Kingdom)

Reconfiguration of Applications in Cloud-Edge Multi-Clusters 321
Marta Patiño-Martínez (Universidad Politécnica de Madrid, Spain), Ainhoa Azqueta-Alzúaz (Universidad Politécnica de Madrid, Spain), and Aitor Agirre (IKERLAN, Spain)

Demonstration Papers

Tokenator: A Blockchain-Based Platform for Monetizing Wearable Device Data 327
Polina Bobrova (Politecnico di Milano, Italy), Artem Karapetian (HSE University, Russia), Pavel Glebov (HSE University, Russia), Viktor Frolov-Bukanov (HSE University, Russia), and Yury Yanovich (HSE University, Russia)

FIONA: Detecting Outliers in Attributes of Relational Datasets with Categorical Values 333
Thanos Tsiamis (Utrecht University, The Netherlands) and Abdulhakim A. Qahtan (Utrecht University, The Netherlands)

SAGkit: A Python SAG Toolkit for Response Time Analysis of Hybrid-Triggered Jobs 339
Ruide Cao (SUSTech; The Hong Kong University of Science and Technology (Guangzhou)), Zhuyun Qi (Tsinghua University; Peng Cheng Laboratory), Qinyang He (Nankai University), Chenxi Ling (SUSTech; Peng Cheng Laboratory), Yi Wang (SUSTech; Peng Cheng Laboratory), and Guoming Tang (The Hong Kong University of Science and Technology (Guangzhou))

Integrating Cvartel with Hyperledger Fabric for Enhanced Biometric Authentication 345
Grigory Ivanov (IDEAS Research Center, Russia), Yash Madhwal (Skolkovo Institute of Science and Technology, Russia), Renat Gubaev (IDEAS Research Center, Russia), Nikita Loshkarev (IDEAS Research Center, Russia), Yury Yanovich (Skolkovo Institute of Science and Technology; HSE University, Russia), and Alexander Belenov (IDEAS Research Center; Moscow Institute of Physics and Technology, Russia)

WaterLLMarks: In-Data User Tracing for Distributed LLMaaS Environments 351
Léo Lavaur (University of Luxembourg, Luxembourg) and Jérôme François (University of Luxembourg, Luxembourg)

Demo: Decentralized Product Lifecycle Management using Blockchain and Digital Twins 357
Ranjit Kannappan (Orange Innovation, France; Institut Polytechnique de Paris, France), Julien Hatin (Orange Innovation, France), Emmanuel Bertin (Orange Innovation, France; Institut Polytechnique de Paris, France), and Noel Crespi (Institut Polytechnique de Paris, France)

Doctoral Consortium

Improving Healthcare AI-Support Systems for Skin Lesion Diagnosis with tinyML 362
Tess Watt (Heriot-Watt University, UK)

Optimization of Knowledge Distillation in Heterogeneous Federated Problems 364
Wenhao Li (University of Glasgow, UK), Christos Anagnostopoulos (University of Glasgow, UK), and Kevin Bryson (University of Glasgow, UK)

Digital Currency and Blockchain 366
Uwe A. Kuehn (Technical University Berlin, Germany)

Bridging Mobility and Federated Learning: Toward Dynamic Client Orchestration in Distributed Edge Systems 370
Qiyuan Wang (University of Glasgow) and Christos Anagnostopoulos (University of Glasgow)

Distributed Temporal Graph Learning with Provenance for APT Detection in Supply Chains 372
Zhuoran Tan (University of Glasgow, UK), Christos Anagnostopoulos (University of Glasgow, UK), and Jeremy Singer (University of Glasgow, UK)

CRS-FL: A Novel Framework for Communication Efficient, Reliable, and Scalable Decentralized Federated Learning 375
Vahideh Hayyolalam (Koc University, Türkiye) and Öznur Özkasap (Koc University, Türkiye)

Multi-Modal Personalized Federated Learning for Human Intent Prediction 379
Maximilian Forstenhäusler (University of Glasgow, Scotland; BMW Group, Germany) and Christos Anagnostopoulos (University of Glasgow, Scotland)

Towards Sustainable Synchronization of Digital Twins in Next-Generation IoT Networks 383
Yasith R. Wanigarathna (University of Helsinki, Finland), Roberto Morabito (EURECOM, France), and Sasu Tarkoma (University of Helsinki, Finland)

A Robust Byzantine-Resilient Framework for Federated Learning 387
Ke Xiao (University of Glasgow, UK) and Christos Anagnostopoulos (University of Glasgow, UK)

An Energy-Aware Priority-Based AI-Enabled Offloading Framework in Edge-to-Cloud Continuum 389
Jaber Pournazari (Edinburgh Napier University, UK), Ahmed Al-Dubai (Edinburgh Napier University, UK), and Xiaodong Liu (Edinburgh Napier University, UK)

Tutorials

Integrating Knowledge Graphs and Large Language Models for Advancing Scientific Research 393
Zaiqiao Meng (University of Glasgow), Jiaoyan Chen (The University of Manchester), Xiang Zhuang (Zhejiang University), and Qiang Zhang (Zhejiang University)

Trustworthiness and Consensus in Distributed and Connected Autonomous Systems 397
Lei Zhang (University of Glasgow, United Kingdom)

Redefining Telecommunications: Data Engineering and Blockchain for B5G/6G Networks 399
Madhusanka Liyanage (University College Dublin, Ireland) and Engin Zeydan (Centre Technologic de Telecomunicacions de Catalunya, Spain)

Serverless Orchestration on Edge-Cloud Continuum: From Small Functions to Large Language Models 403
Reza Farahani (University of Klagenfurt, Austria) and Radu Prodan (University of Innsbruck, Austria)

Federated Learning and Network Security: Foundations, Potential, and Resilience 404
Yann Busnel (Institut Mines-Télécom, France) and Léo Lavaur (University of Luxembourg, Luxembourg)

AI-Native Joint Communication and Computation in 6G Networks and Beyond 408
Aydin Sezgin (Ruhr University Bochum, Germany), Hayssam Dahrouj (University of Sharjah, United Arab Emirates), and Robert-Jeron Reifert (Ruhr University Bochum, Germany)

Distributed Multi-Agent AI Systems: Scalability, Challenges, and Applications 412
Eduarda T. C. Chagas (Federal University of Minas Gerais, Brazil), Frederico G. Guimarães (Federal University of Minas Gerais, Brazil), Amir Houmansadr (University of Massachussets, USA), and Heitor S. Ramos (Federal University of Minas Gerais, Brazil)

Network Simulation Bridge: Bridging Distributed Applications with Network Simulation Platforms 416
Harikrishna Kuttivelil (University of California, Santa Cruz, USA), Lakshmi Krishnaswamy (University of California, Santa Cruz, USA), Nayan Bhatia (University of California, Santa Cruz, USA), and Katia Obraczka (University of California, Santa Cruz, USA)

Workshops

1st Workshop on Distributed Computing Systems for Smart Logistics (DCSSL)

CluE: Cluster, Sample & Eliminate - Bayesian Block Elimination for Pure-Exploration with Non-Binary Rewards and Limited Budget 420
Shameem A Puthiya Parambath (University of Glasgow, UK), Wenhao Li (University of Glasgow, UK), Christos Anagnostopoulos (University of Glasgow, UK), and Dimitris Korobilis (University of Glasgow, UK)

Machine Learning-Driven Optimization of Loading and Unloading Processes in Urban Logistics... 428
Stefanos Sotiriou (University of Thessaly, Greece), Athanasios Lois (University of Thessaly, Greece), Apostolis Xenakis (University of Thessaly, Greece), George Floros (University of Thessaly, Greece), and Athanasios Ziliaskopoulos (University of Thessaly, Greece)

Google's VRP Free Algorithm Evaluation Study and its Use in Small and Medium Transportation Problems 432
Antonios Balikos (University of Thessaly, Greece), Athanasios Pantopoulos (University of Thessaly, Greece), Athanasios Lois (University of Thessaly, Greece), Apostolis Xenakis (University of Thessaly, Greece), George Floros (University of Thessaly, Greece), Kostas Kolomvatsos (Department of Informatics and Telecommunications, Greece), and Athanasios Ziliaskopoulos (University of Thessaly, Greece)

Enhancing Kubernetes Resilience through Anomaly Detection and Prediction 439
Vyron Georgios Anemogiannis (University of Athens, Greece), Charalampos Andreou (University of Athens, Greece), Kakia Panagidi (University of Athens, Greece), Kostandinos Myrtollari (University of Athens, Greece), and Stathes Hadjiefthymiades (University of Athens, Greece)

1st Workshop on High Performance and Energy Efficient Architectures for 3D Chiplets (HiPER-3D)

A System-Level Aware Power Delivery Network Generator for Multiprocessor Systems 448
Maria Pantazi-Kypraiou (University of Thessaly, Greece), Olympia Axelou (University of Thessaly, Greece), George Floros (University of Thessaly, Greece), George Stamoulis (University of Thessaly, Greece), and Anuj Pathania (University of Amsterdam, The Netherlands)

Design Space Exploration Based on Q-Learning for 2D Bin-Packing Problems 454
Maria Pantazi-Kypraiou (University of Thessaly, Greece), George Rafael Goudroumanis (University of Thessaly, Greece), Tahani Aladwani (University of Glasgow, UK), Athanasios Tziouvaras (University of Thessaly, Greece), George Stamoulis (University of Thessaly, Greece), and Christos Anagnostopoulos (University of Glasgow, UK)

Matrix Exponential-Based Thermal Simulation for Distributed Computing Infrastructures 459
Pavlos Stoikos (University of Thessaly, Greece), Athanasios Tziouvaras (University of Thessaly, Greece), George Floros (University of Thessaly, Greece), and Christos Anagnostopoulos (University of Glasgow, UK)

TCAD Simulation of Radiation Effects in 3D-Stacked Semiconductor Devices 464
Pelopidas Tsoumanis (University of Thessaly, Greece), Georgios-Ioannis Paliaroutis (University of Thessaly, Greece), and George Stamoulis (University of Thessaly, Greece)

Decentralized Deep Learning for Lithographic Hotspot Detection in IC Design 469
Tahani Aladwani (University of Glasgow, UK), Maria Pantazi-Kypraiou (University of Thessaly, Greece), George Rafael Goudroumanis (University of Thessaly, Greece), Olympia Axelou (University of Thessaly, Greece), George Floros (University of Thessaly, Greece), and Christos Anagnostopoulos (University of Glasgow, UK)

Towards EMIR Mitigation: Efficient Wire Sizing for VLSI Power Grids Based on L-BFGS Algorithm 474
Olympia Axelou (University of Thessaly, Greece), Tahani Aladwani (University of Glasgow, UK), George Floros (University of Thessaly, Greece), and Christos Anagnostopoulos (University of Glasgow, UK)

5th International Workshop on Distributed Infrastructure for Common Good (DICG)

Preliminary Findings on Establishing a Privately Governed Data Ecosystem for MLOps Data Sharing 480
Konstantin Malysh (Lund University, Sweden), Per Runeson (Lund University, Sweden), and Johan Linåker (RISE; Lund University, Sweden)

180 Days After EIP-4844: Will Blob Sharing Solve Dilemma for Small Rollups? 487
Suhyeon Lee (Korea University)

Institutional Blockchains as Sustainable Commons: The Case of SwissLedger 493
Lorenzo Barisone (Lugano Living Lab, Switzerland; Università della Svizzera Italiana, Switzerland) and Robert Bregy (Lugano Living Lab, Switzerland)

A Unified Incentive Framework for Analysing Fees and Rewards in Distributed Ledgers 500
Luigi Vigneri (IOTA Foundation, Germany), Darcy Camargo (IOTA Foundation, Germany), Olivia Saa (IOTA Foundation, Germany), and Andrew Cullen (IOTA Foundation, Germany)

Where Should I Deploy My Contracts? A Practical Experience Report 507
Catalina Lazar (Alexandru Ioan Cuza University, Romania), Gabriela Secrieru (Alexandru Ioan Cuza University, Romania), and Emanuel Onica (Alexandru Ioan Cuza University, Romania)

Towards Decentralized Governance of Scarce Resources: Water as Proving Ground 514
Sahil Tikale (Nokia Bell Labs, USA), Avishek Banerjee (Nokia Bell Labs, USA, USA), Fadoua Khmaissia (Nokia Bell Labs, USA), and Nirupama Ravi (Nokia Bell Labs, USA)

1st Workshop on Hot Topics in Distributed Machine Learning (HotDiML)

Byzantine-Resilient Federated Learning: Evaluating MPC Approaches 521
Yasin Abdullah (ELTE Eotvos Lorand University, Hungary), Mohammed B. Alshawki (ELTE Eotvos Lorand University, Hungary), Peter Ligeti (ELTE Eotvos Lorand University, Hungary), Wissem Soussi (University of Zurich, Switzerland), and Burkhard Stiller (University of Zurich, Switzerland)

Online Decentralized Federated Multi-Task Learning with Trustworthiness in Cyber-Physical Systems 529
Olusola Odeyomi (North Carolina Agricultural and Technical State University, USA), Sofiat Olaosebikan (University of Glasgow, UK), Ajibuwa Opeyemi (North Carolina Agricultural and Technical State University, USA), and Oluwadoyinsola Ige (North Carolina Agricultural and Technical State University, USA)

Enhancing Federated Graph Learning with Adaptive Differential Privacy 536
Sotirios Messinis (National Technical University of Athens, Greece), Nicholas E. Protonotarios (Academy of Athens, Greece), Ioannis Rallis (National Technical University of Athens, Greece), Dimitris Kalogeras (National Technical University of Athens, Greece), and Nikolaos Doulamis (National Technical University of Athens, Greece)

Idle No More: Boosting Distributed Pipeline Training via FluidPipe 543
Mohammed Aljahdali (KAUST, Saudi Arabia) and Marco Canini (KAUST, Saudi Arabia)

A Federated Learning Approach with Spiking Neurons and Clustering for Smart Meter Data 551
Ubaid Ahmed (Mirpur University of Science and Technology, Pakistan), Ahsan Raza Khan (University of Glasgow, United Kingdom), Rao Naveed Bin Rais (Ajman University, UAE), Anzar Mahmood (Mirpur University of Science and Technology, Pakistan), Sajjad Hussain (University of Glasgow, United Kingdom), and Ahmed Zoha (University of Glasgow, United Kingdom)

2nd Workshop on Engineering Techniques for Distributed Computing Continuum Systems (EDCCS)

COUNTER: Cluster GCN Based Energy Efficient Resource Management for Sustainable Cloud Computing Environments 558
Han Wang (Queen Mary University of London, United Kingdom), Sukhpal Singh Gill (Queen Mary University of London, United Kingdom), and Steve Uhlig (Queen Mary University of London, United Kingdom)

Svayam: A Self-Adaptive Extensible CEP Framework for the Cloud-Edge Continuum 564
Olaf Markus Link (University of Potsdam, Germany) and Sukanya Bhowmik (University of Potsdam, Germany)

Simplifying HPC and ML Application Deployment across the Computing Continuum 570
Jack Brassil (Princeton University, USA)

LLM-Powered Smart Spaces with Multi-Agent User-Centric Adaptation 576
Alaa Saleh (University of Oulu, Finland), Mazen Hassaan (University of Oulu, Finland), Qiyang Zhang (Peking University, China), Sasu Tarkoma (University of Helsinki, Finland), Susanna Pirttikangas (University of Oulu, Finland), and Lauri Lovén (University of Oulu, Finland)

Towards a Fine-Grained Performance Profiling of Microservice Architectures in the Distributed Computing Continuum 582
Manuel Otero (Universidad de Sevilla, Spain), Sergio Laso (Universidad de Extremadura, Spain), Jose María García (Universidad de Sevilla, Spain), Javier Berrocal (Universidad de Extremadura, Spain), and Pablo Fernández (Universidad de Sevilla, Spain)

Radon: A Programming Model and Platform for Computing Continuum Systems 588
Luca De Martini (Politecnico di Milano), Dario d'Abate (Politecnico di Milano), Alessandro Margara (Politecnico di Milano), and Gianpaolo Cugola (Politecnico di Milano)

FlowUnits: Extending Dataflow for the Edge-to-Cloud Computing Continuum 594
Fabio Chini (Politecnico di Milano, Italy), Luca De Martini (Politecnico di Milano, Italy), Alessandro Margara (Politecnico di Milano, Italy), and Gianpaolo Cugola (Politecnico di Milano, Italy)

Spatiotemporal-Aware Edge Resource Allocation via Prediction-Decision Co-Optimization 600
Shiyu He (Central China Normal University, China), Qibo Li (Central China Normal University, China), Zhiwen Li (Central China Normal University, China), and Yuqi Zhao (Central China Normal University, China)

Distributed Generative AI for Wireless (DGAIW)

A Knowledge-Driven Graph Network for Traffic Flow Prediction 606
Chenxu Li (Beijing University of Posts and Telecommunications, China), Guanlei Zhang (Beijing University of Posts and Telecommunications, China), Yansong Liu (Shandong Management University, China), Mengjun Yin (Technical Research Department Inspur Communications Technology Co., China), and Wenjing Li (Beijing University of Posts and Telecommunications, China, Beijing)

Generative Diffusion Model-Enabled Deep Reinforcement Learning for Resource Allocation in Aerial Base Station Networks 612
Jizhao Lu (State Grid Henan Information & Telecommunication Company (Data Center), China), Huaide Liu (Beijing University of Posts and Telecommunications, China), Yikun Zhao (Beijing University of Posts and Telecommunications, China), Yongjie Li (State Grid Henan Information & Telecommunication Company (Data Center), China), Luqi Li (State Grid Henan Information & Telecommunication Company (Data Center), China), Zhiqiang Zhu (State Grid Henan Information & Telecommunication Company (Data Center), China), and Fanqin Zhou (Beijing University of Posts and Telecommunications, China)

Game-Based Power Allocation in Wireless Networked Control Systems 618
Zhikai Chen (Beijing University of Posts and Telecommunications, China), Lei Feng (Beijing University of Posts and Telecommunications, China), Zhixiang Yang (Beijing University of Posts and Telecommunications, China), Xuesong Qiu (Beijing University of Posts and Telecommunications, China), and Sheng Hong (Beihang University, China)

Deep Reinforcement Learning-Based Distributed Control of UAV Swarms 624
Hao Zheng (Beijing University of Posts and Telecommunications, China), Yu Zhou (Beijing University of Posts and Telecommunications, China), Jun Yun (State Grid Beijing Electric Power Company, China), Ming Jin (State Grid Beijing Electric Power Company, China), Di Pang (State Grid Beijing Electric Power Company, China), and Xu Dong (State Grid Beijing Electric Power Company, China)

Downlink Resource Allocation in Cell-Free Heterogeneous Network: Many-to-Many Matching and Power Allocation 630
Rukai Zhong (Beijing University of Posts and Telecommunications, China), Jinli Zhang (Beijing University of Posts and Telecommunications, China), Mengjun Yin (Technical Research Department Inspur Communications Technology Co., China), and Fanqin Zhou (Beijing University of Posts and Telecommunications, China)

Hybrid Semantic/Bit Transmission for Unmanned Aerial Vehicles 636
Jiakai Hao (State Grid Beijing Electric Power Company, China), Huaide Liu (Beijing University of Posts and Telecommunications, China), Ming jin (Beijing University of Posts and Telecommunications, China), Haoyang Bai (Beijing University of Posts and Telecommunications, China), and Zheng Dong (Beijing University of Posts and Telecommunications, China)

4th International Workshop on Autonomous Network Management Systems (ANMS 2025)

On the Effectiveness of Task Off-Loading in Edge Based Federated Learning Environment 641
Sumiko Miyata (Institute of Science Tokyo, Japan), Takamichi Miyata (Chiba Institute of Technology, Japan), Irfanullah Khan (The University of Glasgow, UK), and Paul Harvey (The University of Glasgow, UK)

The xApp Store: A Framework for xApp Onboarding and Deployment in O-RAN 647
Philip Rodgers (University of Glasgow, UK) and Paul Harvey (University of Glasgow, UK)

Automatic Generation of Digital Twins for Network Testing 653
Shenjia Ding (University of Glasgow, UK), David Flynn (University of Glasgow, UK), and Paul Harvey (University of Glasgow, UK)

Distributing Quality of Service (QoS) Policies in Name-Based Networks 659
Ryo Yanagida (University of Glasgow), Jeremy Singer (University of Glasgow), Paul Harvey (University of Glasgow), Leon Wong (Rakuten Mobile, Inc.), and Colin Perkins (University of Glasgow)

1st International Workshop on Federated Learning for Wireless Edge Artificial Intelligence (FedEdgeAI)

Benchmarking Mutual Information-Based Loss Functions in Federated Learning 665
S Sarang (BITS Pilani, India), Harsh D. Chothani (BITS Pilani, India), Qilei Li (Queen Mary University of London, United Kingdom), Ahmed M. Abdelmoniem (Queen Mary University of London, United Kingdom), and Arnab K. Paul (BITS Pilani, India)

Decentralized Intelligence: A Digital Twin-Assisted Hierarchical Federated Deep Reinforcement Learning Framework for Resource Optimization 671
Ahmad Arsalan (COMSATS University, Pakistan; University of Central Punjab, Pakistan), Wai Fong Tam (Queen Mary University of London, United Kingdom), Tariq Umer (COMSATS University, Pakistan), Rana Asif Rehman (National University of Computer and Emerging Sciences, Pakistan), and Ahmed M. Abdelmoniem (Queen Mary University of London, United Kingdom)

FedHDC-IDS: A Hyperdimensional Computing Based Network Intrusion Detection Systems for IoT Networks 677
Othmane Belarbi (Cardiff University, United Kingdom), Yogha Restu Pramadi (Cardiff University, United Kingdom), Omer Rana (Cardiff University, United Kingdom), Yuhua Li (Cardiff University, United Kingdom), Aftab Khan (Toshiba Europe Ltd., United Kingdom), and Theodoros Spyridopoulos (Cardiff University, United Kingdom)

A Multi-Criteria Selection of IoT Devices for Federated Learning with Non-IID Data 683
Hajar El Hammouti (Mohammed VI Polytechnic University (UM6P), Morocco), Mustafa Kishk (Maynooth University, Ireland), and Ahmed Elzanaty (Surrey University, UK)

Workshop on Federated and Privacy Preserving AI in Biomedical Applications (FPPAI)

Federated Deep Reinforcement Learning for Privacy-Preserving Robotic-Assisted Surgery 689
Sana Hafeez (University of Glasgow, UK), Sundas Rafat Mulkana (University of Glasgow, UK), Muhammad Ali Imran (University of Glasgow, UK), and Michele Sevegnani (University of Glasgow, UK)

Differentially Private Gradient Based Parameters Framework for Video Recognition 700
Idris Zakariyya (University of Glasgow, UK), Fani Deligianni (University of Glasgow, UK), and Kaushik Bhargav Sivangi (University of Glasgow, UK)

FedGraph: Probing-Based Personalized Federated Learning for Human Activity Recognition with Multimodal Physiological Signals 706
Pai Chet Ng (Singapore Institute of Technology), Arash Rasti-Meymandi (University of Toronto), S. Mohammad Sheikholeslami (University of Toronto), and Konstantinos N. Plataniotis (University of Toronto)

Federated Learning for Web Technologies Workshop (FL4WEB)

MSPSL: An Efficient Multi-Server Parallel Split Learning 717
Xiaofeng Lu (Beijing University of Post and Telecommunications, Cina), Yinhui Li (Beijing University of Post and Telecommunications, Cina), and Pietro Lio (University of Cambridge, UK)

FPML: Heterogenous Federated Learning Based on Deep Mutual Learning 725
Yong Li (Changchun University of Technology, China), Hao Chen (Changchun University of Technology, China), Han Gao (Changchun University of Technology, China), Yiming Wang (Changchun University of Technology, China), and Yongxin Jiang (Non-commissioned Officer School of Army Academy of Armored Forces, China)

A Federated Learning Framework for Wind Power Forecasting 731
Faiza Loukil (University Savoie Mont Blanc, France), Youssef El-Kouch (University Savoie Mont Blanc, France), Hervé Verjus (University Savoie Mont Blanc, France), and Flavien Vernier (University Savoie Mont Blanc, France)

Improving Class-Level Fairness Under Non-IID Data Distributions in Federated Learning 740
Sarhad Arisdakessian (Polytechnique Montréal, Canada), Omar Abdel Wahab (Polytechnique Montréal, Canada), Osama Wehbi (Polytechnique Montréal, Canada), Azzam Mourad (Khalifa University, UAE), and Hadi Otrok (Khalifa University, UAE)

An Adversarial Approach for Urban Anomaly Detection Across Completion Spatiotemporal Data 748
Xinghong Jiang (Jiangxi Normal University, China), Yong Ma (Jiangxi Normal University, China), Changhao Jin (Jiangxi Normal University, China), Jiang Luo (Jiangxi Normal University, China), Yunni Xia (Chongqing University, China), and Yongzhao Zhang (University of Electronic Science and Technology of China, China)

FedBGS: A Blockchain Approach to Segment Gossip Learning in Decentralized Systems 760
Fabio Turazza (University of Modena and Reggio Emilia, Italy), Marcello Pietri (University of Modena and Reggio Emilia, Italy), Marco Picone (University of Modena and Reggio Emilia, Italy), and Marco Mamei (University of Modena and Reggio Emilia, Italy)

Benchmarking Federated Learning Under Realistic Non-IID Conditions: A Structured Partitioning Approach using ImageNet 771
Tatjana Legler (University of Kaiserslautern-Landau (RPTU), Germany; German Research Center for Artificial Intelligence (DFKI), Germany), Vinit Hegiste (University of Kaiserslautern-Landau (RPTU), Germany), and Martin Ruskowski (University of Kaiserslautern-Landau (RPTU), Germany; German Research Center for Artificial Intelligence (DFKI), Germany)

Trade-Off Between Communication Rounds and Local Rounds in Federated Learning 780
Vinit Hegiste (RPTU Kaiserslautern-Landau, Germany), Tatjana Legler (RPTU Kaiserslautern-Landau, Germany), and Martin Ruskowski (German Research Center for Artificial Intelligence (DFKI), Germany)

Partial Federated Primal Dual Optimization for Network Based Android Malware Detection 789
Mohammad Mashreghi (University of Tehran, Iran) and Mohammad Hossein Badiei (University of Tehran, Iran)

AgentFL: AI-Orchestrated Agents for Federated Learning 797
Viraaji Mothukuri (Kennesaw State University, USA) and Reza M. Parizi (Kennesaw State University, USA)

Security, Privacy and Resilience in Converged Networked Systems Workshop (SPARCNets)

Time-to-Lie: Identifying Industrial Control System Honeypots using the Internet Control Message Protocol 806
Jacob J. Williams (University of Bristol, United Kingdom), Matthew Edwards (University of Bristol, United Kingdom), and Joseph Gardiner (University of Bristol, United Kingdom)

LLM-Driven Data Augmentation with Contrastive Learning to Address Mobile Phishing Attacks: A Persuasion-Theory Approach 813
Ho Sung Shim (Korea University Business School, South Korea), Hyoungjun Park (Korea University Business School, South Korea), Kyuhan Lee (Korea University Business School, South Korea), and David Kim (Texas Christian University, USA)

Author Index **821**
