

Computing in Civil Engineering 2024

Artificial Intelligence, Automation and
Robotics, and Human-Centered
Innovations

Selected Papers from the ASCE International Conference on
Computing in Civil Engineering 2024

Pittsburgh, Pennsylvania, USA
28-31 July 2024

Volume 1 of 2

ISBN: 979-8-3313-1570-2

Contents

AI in Building Energy Management

Are Transformers Effective for Time Series Anomaly Detection? A Case Study in Building Energy Management.....	1
Yueyan Gu, Xuan Wang, and Farrokh Jazizadeh	
CityTFT: A Temporal Fusion Transformer-Based Twin Model for Urban Building Energy Modeling	12
Ting-Yu Dai, Dev Niyogi, and Zoltan Nagy	
A Markov Decision Process-Based Method to Generate Strategies for Automated Updating of Building Energy Models.....	22
Zhichen Wang, Mario Bergés, and Burcu Akinci	
Automated Thermal Anomaly Detection through Deep Learning-Based Semantic Segmentation of Building Envelope Images	33
Shayan Mirzabeigi, Mohamad Razkenari, and Paul Crovella	

Application of Generative Models

Constrained Diffusion Model for Interoperable Floor Plan Generation.....	43
Haolan Zhang and Ruichuan Zhang	
A Review of Synthetic Data Generation Methods for Machine Learning Models in Construction	52
SeyedeZahra Golazad, Abbas Mohammadi, and Abbas Rashidi	
An Approach for Domain-Informed Generative Architectural Design.....	66
Keundeok Park and Semiha Ergan	
Evaluating GAN Architecture for Generating Images of Defective Façades.....	77
Beyza Kiper, Nilay Dey, Aditya Azad, and Semiha Ergan	
Generative Model-Based Data Augmentation Approach for Supporting Maintenance Decision-Making	87
Qiyang Chen and Nora El-Gohary	

Application of Language Models

Standard-Driven Chinese Knowledge Extraction in Highway Domains Using Machine Learning and NLP Approach.....	96
Ching W. Loh, Xiao-Bing Zhang, Jia-Rui Lin, and Zhen-Zhong Hu	

Prompt-Based Virtual Assistant Framework for Construction Working Method Specifications.....	107
Chuanni He, Min Liu, and Weilin He	
Large Language Model-Based Data-Driven Framework for Digital Transformation in the Construction Industry	116
Ruiyang Ma, Geoffrey Qiping Shen, Peiliang Lou, and Ming Wang	
Leveraging Large Language Models to Assist Bridge Element Visual Inspections	127
Onur Kaan Topçu, Chenxi Yuan, and H. Felix Lee	
AEC-Bench: A Multidisciplinary Multilevel Chinese Evaluation Benchmark for Large Language Models in AEC	137
Chen Liang, Shen Yan, Qianyu Guo, Jiawei Sun, Fei Cheng, Zhengjie Liu, Weifang Xiao, Meng Wang, Haofen Wang, and Xianzhong Zhao	
<i>Bridge Structural Health Monitoring</i>	
Computer Vision-Based Defect Detection and Evaluation for Automatic Inspection and Condition Rating of Concrete Bridges.....	147
Zhe Sun, Junbo Li, Guangming Wang, and Zhansheng Liu	
Impact Analysis of Spatiotemporal Data Processing Parameters on Bridge Deformation Detection	157
Zhe Sun, Pinyao Liu, Xiaolin Meng, Yan Bao, and Liangliang Hu	
A Digital Twin-Based Framework for Intelligent Operation and Maintenance of Urban Bridges.....	167
Zhe Sun, Shengyao Liu, Zhansheng Liu, Guangming Wang, and Tianlei Wang	
Human-in-the-Loop Process Modeling Using Formal Methods for Spatiotemporal Data-Based Crack Detection of Concrete Structures.....	177
Zhe Sun, Sihan Zhao, Yan Bao, Xiaolin Meng, and Dongliang Zhang	
<i>Computer Vision-Based Operations</i>	
Establishing a Computer Vision-Based Object Detection Data Set for Prefabricated Construction Quality Monitoring	187
Yanggongjie Xiao and Hung-Lin Chi	
Vision-Based Module Positioning and Alignment Approach in Modular Integrated Construction	197
Ruiqi Jiang and Xiao Li	

Integrating Deep Learning and Real-Time GNSS Localization for GIS-Based Traffic Sign Management207
Yifeng Sun, Haomiao Zhao, Chi Chiu Lam, Mun On Wong, Haoyang Liang, and Kun Pang Kou

Text-Enhanced Label-Efficient Automated Bridge Defect Semantic Segmentation from Inspection Images219
Shengyi Wang and Nora El-Gohary

Automated Image Segmentation for Detecting Defects in Brick Wall Surfaces224
Yuxiang Huang and Nora El-Gohary

Integrating Image Enhancement, Classification, and Segmentation for Supporting Automated Underwater Infrastructure Inspection and Maintenance229
Saeed Talamkhani and Kaijian Liu

Data-Driven Construction Management

Dynamic Allocation of Unionized Skilled Trades in Multi-Project Reactive Scheduling Context: Uber-Inspired Application Framework239
Xiaoteng Ge, Ali Bayesteh, Ming Lu, and Yasser Mohamed

Enhancing Construction Equipment Activity Recognition through Hybrid CNN-Based Data Fusion248
Abbas Mohammadi, Seyedezahra Golazad, and Abbas Rashidi

Understanding Laser Pointer-Guided Spatial Instruction in Collaboration with Construction Robots260
Chaeun Lee, Sungboon Yoon, Moonseo Park, and Changbum R. Ahn

Data-Driven Infrastructure Operations

Few-Shot Learning for Key Information Extraction from Bridge Inspection Reports266
Wen Xiong, Yuchen Wang, Yanjie Zhu, and C. S. Cai

Spatial-Temporal Estimation of Settlement in Foundation Work Based on Deep Learning279
Chen Yang, Chen Wang, and Jian-Sheng Fan

Analysis of Roadside Features on Rural Road Departure Crashes and Their Severity: A Computer Vision Approach288
Abhishek K. Subedi, Abbas Rashidi, and Nikola Markovic

Deep Learning-Based Surface Defect Detection: Three-Class Segmentation297
Donghoon Ji, Yelda Turkan, and Paolo Calvi

Identification and Geolocation of Pavement Marking Issues Based on Artificial Intelligence and Mobile Phone305
Biao Kuang, Jianli Chen, and Yuqing Hu

Scenario-Adaptive Building Defect Inspection by Active Learning.....315
Yining Wen, Kaiwen Chen, and Jingwei Bao

Data-Driven Methods for Built Environment

AI-Based Formula Discovery for Civil Engineering324
Pei-Yao Chen, Chen Wang, Ran Ding, and Jian-Sheng Fan

Improving Vocal Communication on Construction Sites Using a Fourier-CNN Hybrid Denoising Approach333
Zhenyu Peng and Hung-Lin Chi

Investigating the Role of Personal Factors in Shaping Responses to Active Shooter Incidents Using Machine Learning341
Ruying Liu, Burçin Becerik-Gerber, and Gale M. Lucas

Employing Graph Neural Networks for Construction Drawing Content Recognition351
Andrea Carrara, Stavros Nousias, and André Borrmann

Read the Room: Inferring Social Context through Dyadic Interaction Recognition in Cyber-Physical-Social Infrastructure Systems361
Cheyu Lin, John Martins, and Katherine A. Flanigan

GNN-Based Predictive Modeling of Human Preferences in the Built Environment371
Maral Doctorarastoo, Katherine A. Flanigan, Mario Bergés, and Christopher McComb

Environmental Quality Predictive Modeling

Predictive Learning for Air Pollution at Construction Sites Using Multimodal Data381
Ruichuan Zhang, Bin Chen, and Jenna Krall

Deep Learning and Meteorological Data for Indoor Environmental Quality Prediction.....390
Min Jae Lee and Ruichuan Zhang

Toward Generalized CO₂ Prediction Modeling in Educational Buildings.....399
Mostafa Meimand and Farrokh Jazizadeh

**Monitoring Traffic-Related Air Pollution (TRAP) through Calibrated
Low-Cost Sensors.....409**
Ying-Ru Liu, Ta-Chih Hsiao, Po-Kai Chang, and Albert Y. Chen

Intelligent Transportation

**An Empirical Analysis of Secure Federated Learning for Autonomous
Vehicle Applications417**
Md. Jueal Mia and M. Hadi Amini

**Fine-Grained FHWA-13 Vehicle Classification: A Two-Stage Vision-Based
Approach Integrating Semantic and Geometric Features with
Verification Scheme427**
Linjun Lu and Fei Dai

**Optimizing Urban Charging Infrastructure for Electric Vehicles:
A Data-Driven Approach to Boost Adoption and Reduce Costs.....437**
Hongyu Hu and Dong Zhao

Performance Evaluation of Real-Time Object Detection for Electric Scooters.....447
Dong Chen, Arman Hosseini, Arik Smith, Amir Farzin Nikkhah,
Arsalan Heydarian, Omid Shoghli, and Bradford Campbell

ML in Construction Management

**Integrating Sensor-Empowered Federated Learning and Smart
Contracts for Automatic Flood Risk Management.....456**
Gongfan Chen, Abdullah Alsharif, and Edward Jaselskis

**Using Data Mining Algorithms to Identify Critical Patterns among
Various Performance Indicators of Bundled Projects
Delivered under the Construction Manager/General
Contractor (CM/GC) Project Delivery Method.....466**
Ghiwa Assaf and Rayan H. Assaad

**Dynamic Work Package Sizing and Scheduling for Construction
Projects under Uncertainties476**
Nianmin Zhang and Xiao Li

**Predicting Project Contingency in the Construction Industry
Using Machine Learning Algorithms.....486**
Ghadi Charbel, Rayan H. Assaad, John Lyssikatos, and Fadi Karaa

Specialist LLMs

Cause Discovery from Defect Complaint Texts Using Retrieval Augmented Generation by Chaining a Large Language Model with a Knowledge Graph.....	496
Kahyun Jeon, Ghang Lee, Yonghan Kim, and Jiyoung Lim	
GPT4-Vision Multimodal Model-Powered Query-Answering Chatbot for Bridge PDF Drawings.....	505
Meta Soy and Jiansong Zhang	
Incorporating Domain Knowledge Repository into Large Language Models for Question Answering of Construction Laws and Regulations in China.....	514
Shenghua Zhou, Hongyu Wang, Xiaohan Cheng, Dezhi Li, Zhengyi Chen, Ran Wei, and S. Thomas Ng	
Generative Pre-Trained Transformers (GPT)-Based Automated Building Regulatory Information Transformation.....	522
Fan Yang, Jiansong Zhang, and Long K. Duong	

Visual Scene Inference

An Active Learning Pipeline Powered by Image Synthetization and Retrieval Techniques: A Novel Training Approach for Construction-Centric DNNs.....	532
A. Tohidifar and D. Kim	
Prediction of Visual Quality of Streetscape Images Using Computer Vision	539
Meesung Lee and Sungjoo Hwang	
Open Vocabulary Multimodal Model (OVMM)-Based Zero-Shot Method for Obtaining Broader Semantic Information from Construction Site Images	544
Haotian Li and Llewellyn Tang	

Drone Operations and Applications

Establishing Safe Human-Drone Communication for General Construction Workers	555
Zixian Zhu, Idris Jeelani, and Masoud Gheisari	
Decoding AI Valuation in Drone Controls	563
Bowen Sun, Jiahao Wu, Hengxu You, and Jing Du	

Dynamic Importance Weights in Reinforcement Learning with ChatGPT for Drone Swarms in Search and Rescue.....573
Jiahao Wu, Bowen Sun, and Jing Du

Quantitative Assessment of Drone Presence on Worker Safety in Construction Environments.....583
Wei Han, Liqun Xu, Fei Dai, Wei-Yin Loh, Liangzhu Wang, and Zhenhua Zhu

Interplay of Drones, Construction Tasks, and Worker Stress in Future Construction Environment.....593
Woei-Chyi Chang, Shiva Pooladvand, Behzad Esmaeili, and Sogand Hasanzadeh

Remote Operations

Neurofunctional Insights into Haptic and Visual Feedback Delays in Robot Teleoperation603
Tianyu Zhou, Yang Ye, Qi Zhu, William Vann, and Jing Du

Towards Autonomous Robotics in Lunar Surface Construction: Integrating Inverse Reinforcement Learning and Human-Environment Interaction.....613
Minguk Kim and Youngjib Ham

Teleoperation Performance and Operator Behaviors under Time-Delayed and Low-Quality Display in Lunar Construction.....621
Miran Seo, Samraat Gupta, and Youngjib Ham

A Gaze-Controlled Robotic Framework for Remote Site Inspection631
Juan Carlos Cruz Rivera, Xiaoyun Liang, Ibukun Awolusi, Ao Du, and Jiannan Cai

An Ontology-Based Framework for Controlling Robotic Excavator Using Goal-Oriented Natural Language.....640
Zirui Hong and Hubo Cai

Online Dynamic Object Detection on Construction Sites Using SLAM and Occupancy Grid650
Yilong Chen, YeSeul Kim, Andrew Yarovoi, Seongyong Kim, and Yong K. Cho

Robot Perception

Robotic Navigation and Obstacle Avoidance System for Advancing Attic Insulation.....660
Tianyu Ren and Houtan Jebelli

Developing an Advanced Perception System for Robotic Attic Insulation Using Large Vision-Language Models and LiDAR.....669
Tianyu Ren and Houtan Jebelli

Adaptive Robot Perception in Construction Environments Using 4D BIM679
Mani Amani and Reza Akhavian

Robotic Masonry Arch Construction Considering Object Recognition and Human-Robot Interaction.....688
Vahid Koliyae, XiangXu Lin, Rui Liu, and Jong Hoon Kim

Robotic Construction

Multi-Robot Team Composition Optimization: Modeling Robotic Construction Tasks as Cooperative Board Games697
Zaolin Pan, Yantao Yu, and Bo Xiao

Developing Process Models for Semi-Autonomous Construction Robot Assessment.....706
Ziyi Wang and Robert Leicht

3D Scene Reconstruction Using Robotics and LiDAR Sensor.....715
Vincent J. L. Gan

Rethinking Building Design for an Era of Mass Robotization: A Robot-Minded Space Planning Analysis Enabled by IFC-Represented RoboAvatar.....723
Junjie Chen, Weisheng Lu, and Hengzhi Liu

A Unified Workflow for Enhanced Efficiency in 3D Concrete Printing Using a 6DoF Robotic Arm.....733
Jorge Rojas and Sogand Hasanzadeh

Exploring Classification Features of On-Site Construction Robots.....743
Fangxiao Li and Robert M. Leicht

Intelligent “Wingman”: Enhancing Visual Awareness in Robotic Construction Processes.....753
Jia Xu, Manish Dixit, and Xi Wang

Occlusion-Aware Object Detection for Worker Monitoring Using a Reinforcement Learning Approach with a Mobile Robot763
Jinsik Park, Seongwoo Kim, Moonseo Park, and Changbum R. Ahn

Robotic Mapping

Developing a Quadruped Robot-Based 3D and Panoramic Thermal Mapping System: Moving towards Smart and Automated Building Thermal Inspection Using LiDAR-Based Digital Twins and Sensor Fusion Technologies774
Xi Hu and Rayan H. Assaad

Developing BIM-Based Construction Quality Inspection of Indoor Building Structures Using Mobile Ground Robotics and LiDAR.....784
Ying Lo, Yun Cao, Xingyang Zhou, Cheng Zhang, Hyungjoon Seo, and Min Chen

Activity-Based Space Selective Path Planning for UAVs by Leveraging 4D BIM for Trajectory Optimization793
Parth Bhadaniya and Masoud Gheisari

LiDAR-Based Traversability Estimation for Ground Robots on Construction Sites Using Self-Supervised Learning.....803
Jinhee Yu, Swayamjit Saha, Monika Jayakumar, Mikias Gugssa, Jingdao Chen, and Jun Wang

Automatic Robotic Map Generation by Integrating BIM and Project Schedule for Construction Robots' On-Site Navigation813
Odugu Obiora, Muhammad Tahir Khan, and Chao Wang

Robotic Operations

Hierarchical Construction Task Decomposition and Robot Imitation Learning in an Immersive Virtual Reality Environment.....823
Hongrui Yu, Xingqiao Zhu, Vineet R. Kamat, and Carol C. Menassa

Adaptive Intelligence for Robot Navigation Efficiency with a Deep Reinforcement Learning-Based Cyber-Physical System.....831
Xiayu Zhao, Tianyu Ren, and Houtan Jebelli

Automatic Construction Exoskeleton Gait Data Generation Using Variational Autoencoders and Optimized Features for Human-Centric Exoskeleton Power Control.....841
Maryam Soleymani, Mahdi Bonyani, and Chao Wang

Machine Learning-Based Optimization for Modular Robotic Systems in Construction: A Review851
Jiafei Liu, Yuan Ping, Yujing Wang, and Xiayu Zhao

Human-Machine Interfaces

Developing an Intelligent Wearable Haptic IoT-Enabled Sensing Device Integrated with Biosensors and Augmented Reality to Improve Human-Building Interaction in Smart Cities	861
Mohsen Mohammadi, Ghiwa Assaf, Rayan H. Assaad, Aichih (Jasmine) Chang, and Gilles Albeaino	
Towards a Conceptual Model to Measure the Influence of AR-HMDs on Workers' Perception in Construction Environments	872
Jeremy Withers and Tanyel Bulbul	
Wearable Technologies in Construction: Balancing Benefits, Privacy, and Security Concerns for Systematic Integration.....	881
Wei Zhou, Behzad Esmaeili, and Sogand Hasanzadeh	
Voice-Assisted AI Chatbot for Construction: Speech-to-Text Deep Learning Transformer Trained with Synthetic Data Sets	891
Yoonhwa Jung and Mani Golparvar-Fard	
Cognitive Impact of Augmented Reality in Teleoperation Environments	900
Mingi An, Moonseo Park, and Changbum R. Ahn	

Human-Robot Collaboration

Revolutionizing Human-Robot Collaboration in Construction: An Empirical Inquiry into the Role of Advanced Multi-Finger Haptic Feedback within Immersive Environments	906
Shayan Shayesteh and Houtan Jebelli	
ChatGPT-Based Multimodal Virtual Reality Interface to Support Collaborative Human-Robot Construction Work	916
Somin Park, Carol C. Menassa, and Vineet R. Kamat	
A Mutual-Cognitive Human-Robot Collaboration Framework to Improve Ergonomics in Industrialized Construction.....	924
Yonglin Fu and Weisheng Lu	
Grounding Large Language Models in Robot Control: Facilitating Human-Robot Collaboration in Construction	933
Xiayu Zhao and Houtan Jebelli	
Semantic: An Advanced Human-Robot Collaboration System Based on FastSAM.....	942
Hengxu You, Fang Xu, Yang Ye, and Jing Du	

Aligning Safe Construction Robot Actions with Human Preferences	952
Mao Tian and Zhengbo Zou	
Gaze-Enhanced and LLM-Enabled System for Intuitive Human-Robot Collaboration	962
Xiaoyun Liang, Juan Cruz Rivera, Jiannan Cai, and Shuai Li	
Haptic Augmentation System for Soft Object Manipulation in Construction Robot Teleoperation	972
Thanakon Uthai, Tianyu Zhou, Yang Ye, Hengxu You, and Jing Du	
Scenario-Based Human-Robot Collaboration (HRC) Framework for Construction Safety Risk Management	982
Peng Lin, Ningshuang Zeng, Qiming Li, and Konrad Nübel	
Balancing Workload Assignments: A Parametric Approach to Standardizing Human-Robot Tasks in Industrialized Construction	992
Aladdin Alwisy and Behnam M. Tehrani	

Human-Technology Interaction

Deciphering AI Decision-Making: A Generalizable Framework of Human-AI Misalignment	997
Jing Du, Yang Ye, Hengxu You, Jiahao Wu, and Bowen Sun	
Impact of Four-Legged Robot Proxemics on Risk Perception and Situational Awareness among Construction Individuals	1008
Gilles Albeaino, Idris Jeelani, Masoud Gheisari, and Raja R. A. Issa	
Preventing Waste of Bridge Inspection Time and Resources through LLM-Augmented Bridge Inspection Observation Behavior Analysis	1017
Pengkun Liu, Yide Liu, Zheyi Li, and Pingbo Tang	
Identification of Challenges and Benefits of Different Human-Technology Interaction Modalities for Human-Centered Development of Technology for the Construction Industry	1028
Srijeet Halder and Kereshmeh Afsari	

Human-Building Interaction

A Framework for Investigating Smart Building and Occupant Behavior through Eye-Tracking Technology	1038
Jinmog Han and Yunjeong Mo	

Enhancing Human-Building Interaction by Integrating Wearable Physiological Sensors, Augmented Reality, and Smart IoT-Enabled Sensing Devices to Improve User Indoor Environment Experience1047
Mohsen Mohammadi, Ghiwa Assaf, Rayan H. Assaad, and Gilles Albeaino

LLM-Based Building Energy Management Assistants1058
Tianzhi He and Farrokh Jazizadeh

Towards a Real-Time Occupant Behavior Monitoring System: A Preliminary Study on Integrating BIM, IoT Sensors, and BAS1069
Jihoon Chung, Dennis Shelden, and Bob Karlicek

Inferring Human Dynamics

Advancing Occupancy Prediction Using Machine Learning Techniques: Insights from the American Time Use Survey1079
Sorena Vosoughkhosravi and Amirhosein Jafari

Feasibility Study of Assessing Pedestrian Discomfort Using Behavioral Data1089
Siyeon Kim and Sungjoo Hwang

Synthetic Data Simulation to Assess the Effects of Modelling Assumptions in Thermal Comfort Data Analysis and Inference1094
Matteo Favero and Andrew Sonta

Deep Learning Model for Discomfort Glare Detection Based on Occupants' Facial Analysis1104
Mohit Gupta, Sneha Jain, Jan Wienold, Sarah Billington, and Marilyne Andersen
