# 2025 17th International Conference on Bioinformatics and Biomedical Technology

## ICBBT 2025

### Table of Contents

|                                   |             |
|-----------------------------------|-------------|
| <b>Preface.....</b>               | <b>viii</b> |
| <b>Conference Committees.....</b> | <b>ix</b>   |

---

#### ➤ **Biomedical Image Processing and Computational Imaging**

|                                                                                   |   |
|-----------------------------------------------------------------------------------|---|
| A Web-Based Video Framework for Objective Finger Chase Assessment in Ataxia ..... | 1 |
| <i>Hong Wang, Peter B. Shull, Jeffrey M. Hausdorff, Penina Ponger</i>             |   |

|                                                                         |   |
|-------------------------------------------------------------------------|---|
| Enhanced Boundary Recovery in EIT with Hierarchical Feature Fusion..... | 6 |
| <i>Hanlan Zhang, Li Ke, Mianxiong Dong, Kaoru Ota, Qiang Du</i>         |   |

|                                                                                                                           |    |
|---------------------------------------------------------------------------------------------------------------------------|----|
| Automated Segmentation and 3D Reconstruction of Brain Nerve Fiber Bundles Based on Polarization-Sensitive OCT Images..... | 11 |
| <i>Wentao Jiang, Bokai Zhao, Lan Sun, Juechen Zhang, Ming Song, Tianzi Jiang</i>                                          |    |

|                                                                                                                             |    |
|-----------------------------------------------------------------------------------------------------------------------------|----|
| Low-dose CT image denoising combining U-Net based on the CBAM attention mechanism with Generative Adversarial Networks..... | 17 |
| <i>Liling Yu, Huaiyu Zheng, Jingyu Guo, Binfeng Xu</i>                                                                      |    |

|                                                                |    |
|----------------------------------------------------------------|----|
| Pig Bone X-ray Dataset for Robotic Deboning Applications ..... | 23 |
| <i>Xiaopeng Wang, Lei Cai</i>                                  |    |

|                                                                                                                                             |    |
|---------------------------------------------------------------------------------------------------------------------------------------------|----|
| Three-Dimensional Reconstruction of the Upper Airway and Simulation Analysis of Airflow Dynamics in OSAHS Patients Based on CT Images ..... | 29 |
| <i>Haoxiang Yang, Xianghong Yang</i>                                                                                                        |    |

|                                                                                         |    |
|-----------------------------------------------------------------------------------------|----|
| Weakly Supervised Nuclei Segmentation With Point Annotations and Noise Robust Loss..... | 35 |
| <i>Minhang Nan, Yangyang Zhang, Jiajia Li, Guoyuan Liang</i>                            |    |

#### ➤ **Biomedical Signal Analysis and Processing**

|                                                                                                             |    |
|-------------------------------------------------------------------------------------------------------------|----|
| Closed-loop Peripheral Nerve Stimulation System for Fatigue Compensation Based on Myoelectric Feedback..... | 40 |
| <i>Wei Huang Chen, Yanjie Xing, Jieting Bao, Danlei Yu, Xiang Gao, Yaoyao Hao, Kedi Xu</i>                  |    |

|                                                                                              |    |
|----------------------------------------------------------------------------------------------|----|
| A Lightweight Hybrid Compressed Convolutional Neural Network for Sleep Apnea Detection ..... | 44 |
| <i>Jiaying Li, Yifan Xu, Hao Liu</i>                                                         |    |

|                                                                                                      |    |
|------------------------------------------------------------------------------------------------------|----|
| Real-time Blood Pressure Fluctuation Monitoring Based on Pulse Transit Time for Tilt Bed.....        | 51 |
| <i>Wei Quan Chen, Yantong Chen, Jia Xu, Jialing Xu, Yanghao Xu, Qiang Fang, Seedahmed S. Mahmoud</i> |    |

|                                                                                                                                                 |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Research on the Complexity of Epilepsy EEG Signals .....                                                                                        | 56  |
| <i>Shenghu Xiu, Ling Han</i>                                                                                                                    |     |
| Research on mental stress recognition based on EEG signals .....                                                                                | 62  |
| <i>Hao Tong, Liye Ren, Jing Xu, Jiaming Sun, Kaiyuan Chen, Xinjie Xu, Guisong Li</i>                                                            |     |
| Assessment of Heat Stress Impact on Greenhouse Workers' Cardiovascular Health Using Photoplethysmography.....                                   | 67  |
| <i>Tiejun Zhao, Akimasa Nakano, Nina Sviridova</i>                                                                                              |     |
| A Wrapper-Based Method for EEG Microstates Template Extraction .....                                                                            | 71  |
| <i>Chunyu Feng, Yupan Shi</i>                                                                                                                   |     |
| Auxiliary Diagnosis of Acute Heart Failure Based on Ballistocardiography and Electronic Health Records .....                                    | 76  |
| <i>Xiying Lin, Shen Feng, Haohong Chen, Wei Jiang, Han Zhang</i>                                                                                |     |
| NeuroBPNet: A Physiological-Informed Deep Learning Framework for Continuous Blood Pressure Estimation Using Multimodal PPG and ECG Signals..... | 81  |
| <i>Yu Xia, Ting Wang, Liqiang Zhang, Chenglong Cai, Zhangqi Feng, Nongyue He</i>                                                                |     |
| Effects of Subject's Motion Status, Finger's Measurement Site, and Variation in Light Wavelength on the Dynamics of Photoplethysmogram .....    | 87  |
| <i>Nina Sviridova, Miriya Namba</i>                                                                                                             |     |
| Mapping Early Brain Maturation: Anatomical Substrates of Cortical Connectivity Shifts in Neonates .....                                         | 92  |
| <i>Deying Li, Yufan Wang, Luqi Cheng, Simon B. Eickhoff, Congying Chu, Lingzhong Fan</i>                                                        |     |
| Predicting Cognitive Function from Functional Near-Infrared Spectroscopy Signals .....                                                          | 100 |
| <i>Lan Zhang, Junwei Wang, Ashwati Vipin, Leow Yi Jin, Adnan Azam Mohammed, Nagaendran Kandiah, Rosa Qi Yue So</i>                              |     |
| <b>➤ Computational Oncology and Cancer Bioinformatics</b>                                                                                       |     |
| Identification of Hub Genes in Ependymoma through Weighted Gene Co-expression Network Analysis .....                                            | 104 |
| <i>Iqra Arshad, Zartasha Mustansar, Touqeer Ahmed</i>                                                                                           |     |
| Identification of Key Gene Modules and Hub Genes of Glioblastoma Using Machine-learning and WGCNA Algorithm .....                               | 109 |
| <i>Yiqin Wang, Xinquan Li, Yuqian Fu</i>                                                                                                        |     |
| Based on Multimodal Radiradiomics PET/MR in Predicting the Staging of Cervical Cancer.....                                                      | 115 |
| <i>Guoxiu Lu, Chang Zhao, Yijia Zhao, Jiezi Xiang, Guoxu Zhang</i>                                                                              |     |
| SMAD4 May Serve as a Candidate Molecular Marker for Immune-based Therapies Across Human Pan-Cancer .....                                        | 123 |
| <i>JinYuan Liu, Yu Lin, Xiaohua Chen, Zhanpeng Huang</i>                                                                                        |     |
| Rank Normalization of PAM50 Gene Expression for Robust Breast Cancer Subtype Classification .....                                               | 130 |
| <i>Shamita Uma Kandan, Osman Abul</i>                                                                                                           |     |
| Application of Heuristic Algorithm Optimized XGBoost in Auxiliary Diagnosis of Lung Cancer .....                                                | 135 |
| <i>Yifeng Dou, Hui Wang</i>                                                                                                                     |     |
| Overexpression of ACSM3 is a potential prognostic biomarker for brain lower grade glioma.....                                                   | 140 |
| <i>Hao Hu, Zijia Zhang, Yongxia Wu, Mingrui Li, Hegui Zhao, Qiyu Wang, Henghua Yuan, Yingqiao Jiang</i>                                         |     |

➤ **Computational Pharmacy and Computer- Aided Drug Design**

|                                                                            |     |
|----------------------------------------------------------------------------|-----|
| Molecular Interactions Of Genistein As A Potential Anti-Endometriosis..... | 146 |
| <i>Yosef D.C. Salan, Iwan D. Putra, Hardyan Sauqi, Eko Suhartono</i>       |     |

|                                                                                                                                              |     |
|----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| GenPTA: Enhancing De Novo and Scaffold-Based Molecular Generation with Attention Refinement Mechanism and Adaptive Positional Encoding ..... | 153 |
| <i>Miao Han, Bo Li, Xiaoqiong Li, Han Zhang, Boyang Li</i>                                                                                   |     |

|                                                                                                    |     |
|----------------------------------------------------------------------------------------------------|-----|
| Machine Learning-Driven Optimization of Quantum Dot Bioconjugates for Biomedical Applications..... | 164 |
| <i>Pangbo Wu</i>                                                                                   |     |

|                                                                                                                     |     |
|---------------------------------------------------------------------------------------------------------------------|-----|
| Concordance-Based Assessment of Drug-Target Affinity Model Generalizability for Natural Products.....               | 169 |
| <i>Alim Gumran, Aruzhan Sabyrbek, Daria Gole, Arman Bolatov, Zhanbolat Nurbayev, Madina Sultanova, Siamac Fazli</i> |     |

|                                                                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| The Mechanism of Yigan Decoction in the Treatment of Hepatitis B: An Integrated Study of Network Pharmacology, Machine Learning, and Molecular Docking ..... | 174 |
| <i>Kairui Zhang, Run Wang, Jiali Hai, Kai Chang</i>                                                                                                          |     |

|                                                                                               |     |
|-----------------------------------------------------------------------------------------------|-----|
| BERT-GRU: A Deep Learning Framework for High-Accuracy Antimicrobial Peptide Recognition ..... | 180 |
| <i>Songbin Zheng, Yi Shi, Guishan Zhang, Chuliang Wei</i>                                     |     |

➤ **Multimodal Bioinformatics Analysis and the Machine Learning Models**

|                                                                                                                                                                     |     |

## ➤ **Neuroinformatics and Brain Network Computing**

Brain Network Changes Following Multi-Sensory Stimulation in Patients with Disorders of Consciousness..... 228  
*Haoran Zhang, Yuying Jiang, Qianqian Ge, Yi Yang, Xueling Chen, Xiaoyu Xia, Jianghong He, Shan Yu*

MDGLN: Multidomain Graph Learning Network for EEG-FNIRS Cognitive Task Recognition ..... 234  
*Tianhao Xia, Yinhua Liu, Keum-Shik Hong*

Decoding Depression Progression via Multi-Site Local Field Potentials: A CNN Framework Integrating Spectral and Connectivity Features ..... 238  
*Chang Wang, Tingting He, Kedi Xu*

Low-Dimensional Temporal Representations of Brain Functional Networks Using a Transformer-Based Autoencoder ..... 242  
*Qi Wang, Bing Liu, Yuqing Sun, Xiaohan Tian, Lin Du, Lingzhong Fan*

Functional Characterization of *GAB2* in Alzheimer's Disease Pathogenesis Using A Zebrafish Model..... 249  
*Zhixin Wu, Donglai Sheng, Yuying Wang, Kangkang Ge, Jiayu Wang, Zian Tang*

The Interplay between Autophagy and Adult Hippocampal Neurogenesis ..... 254  
*Haoyu Chen*

## ➤ **Modeling of Biological Systems and Computational Systems Biology**

A Time-Step-Based Neural Network Framework for Modeling Chaotic Dynamics in Multi-Pendulum and Biological Systems..... 263  
*Vasista Ramachandrani, Sai Hruday Reddy Nara, Geo Lalu, Prashanth Prabhala, Sabrina Yang, Mohit Ramesh Kumar, Aarjav Jain, Pratham Mehta, Hankyu Koo, Jason Damonte, Marx Akl*

A study of coupling effect on blood pressure by fluid-solid interaction analysis at artery bifurcation ..... 273  
*Ziyi Xu, Zhenghao Lin, Zhongli Zhang, Houyong Jiang, Chunguang Liu, Xiafan Xu, Can Wang, Hongyang Zhang, Huiyang Li*

Unraveling Co-heritability of Antibiotic Resistance in Tuberculosis Evolution ..... 279  
*Natasha Prabhu, Nikhil Prabhu*

Analysis of the Impact of Wartime Subsistence Support on the digestive system..... 284  
*Chenggong Zhai, Ping Wang, Jianxiang Li, Xiande Fei, Shan Chen, Ye Tian*

## ➤ **Digital Rehabilitation System and Biomechanics Simulation**

A Digital Upper Limb Rehabilitation System with Markerless Tracking: Design and Preliminary Accuracy Assessment ..... 291  
*Sasiphat Piyavannakul, Wongwit Senavongse*

Research on the Optimization Design Method of Personalized Transtibial Prosthetic Sockets Based on Finite Element Analysis ..... 296  
*Hongchen Ma, Qing Tao, Hao Pei, Zhihao Wang*

The Time Series Dynamic Stability Analysis of Elderly Obstacle-crossing based on the Fréchet Distance Method .. 301  
*Xing GAO, Yingnan MA, Ziyang LYU, Peng LI, Yue YU, Xiaojing YUE*

➤ **Intelligent Biosensing and Microfluidic Chip Technology**

A Thin-Film Approach to Lensless Fluorescence Imaging Based on a Planar Sensor Configuration ..... 306

*Qi Meng, Dechuan Sun, Luke Weston, Anthony Burkitt, David Grayden, Ranjith R. Unnithan, Chris French*

Study on the Bioimpedance and fNIRS Bimodal Method for Frontal Brain Investigation ..... 312

*Zhihong He, Qiang Du, Yunfeng Bai, Li Ke*

Engineering *In Vitro* Neuronal Circuits with 3D-printed Microchannels via Two-Photon Polymerization for Brain-on-a-Chip ..... 317

*Song Wang, Dechuan Sun, Chris French, Alastair Stewart, Sarah Gordon, Ranjith R Unnithan*

A Study of Bioimpedance-Based Functional Cerebral Blood Perfusion Detection Methods ..... 323

*Shuxin Wang, Qiang Du, Yunfeng Bai, Li Ke*

A Multi-Parameter Microphysiological System Sensing Platform for Multi-Organ Model Construction and Multidimensional Real-Time Drug Evaluation ..... 328

*Yuxuan Zhu, Ping Wang, Zhichao Huang, Fan Wu, Shichao Tian, Deming Jiang, Qifei Wang, Yajie Zhang*

Realization of biomedical colorimetric sensing signal detection and processing and visualization system based on smartphone ..... 332

*Weihe Zhan, Qingfubo Geng, Baole Wang, Yian Liu, Zhaoxin Geng*

Label-free Detection Method of Cell Growth based on Bioimpedance ..... 338

*Huidi Shen, Hong Chen, Xuelei Wang, Qiang Du, Li Ke*

➤ **Intelligent Analysis and Visualization of Medical Text**

ToM: A Domain-Aware Tokenization Metric for Medical NLP ..... 343

*Min-Yung Yu, Jae-Chern Yoo*

Visual Analysis of Diagnosis-Intervention Packet Based on CiteSpace in China ..... 349

*Haoling Zhang, Min Luo*
