# TABLE OF CONTENTS

|                                                                                                                                |    |
|--------------------------------------------------------------------------------------------------------------------------------|----|
| Research on Intelligent Ware-housing System Based on Advanced Machine Vision Algorithm .....                                   | 1  |
| <i>Ke Jiang, Xiaoyang Yu, Chengze Hu, Wei Yang, Yanni Li</i>                                                                   |    |
| Analyzing Group Behaviors and Optimizing Interaction Patterns in Vocal Learning Using Graph Neural Networks .....              | 5  |
| <i>Peng Xiang</i>                                                                                                              |    |
| Research on the Application of Generative Artificial Intelligence in the Development of Visual Novel Games .....               | 9  |
| <i>Hao Chen, Huazhen Xu</i>                                                                                                    |    |
| A Model Based on Cross-modal Collaborative Enhancement and Adaptive Fusion for Emotion Recognition in Conversation .....       | 13 |
| <i>Yihao Li, Turdi Tohti, Dongfang Han, Yi Liang, Zicheng Zuo, Yuanyuan Liao, Qingwen Yang</i>                                 |    |
| A Hybrid CNN-BiLSTM Model for Robust Speech Recognition .....                                                                  | 17 |
| <i>Zhenpeng Lai, Jiazheng Song, Xuwei Wu, Zhuorui Zhang, Yilin Li, Yi Lin</i>                                                  |    |
| A Garbage Classification Detection Method Integrating Residual Attention Mechanism and Bidirectional Feature Pyramid .....     | 23 |
| <i>Rengui Mai</i>                                                                                                              |    |
| Application of Adaptive Gaussian Mixture Model in Landscape Plant Community Classification .....                               | 30 |
| <i>Haifeng Li</i>                                                                                                              |    |
| Method For Generating Furniture Material Textures .....                                                                        | 36 |
| <i>Chenwang Lou, Guodong Chen</i>                                                                                              |    |
| Point cloud classification and segmentation network based on sampling optimization and geometric perception .....              | 40 |
| <i>Xiaoyan Zhang, Lin Feng</i>                                                                                                 |    |
| Research on the morphological design of space architecture combining Perceptual Engineering and Artificial Intelligence .....  | 46 |
| <i>Jianhao Yuan, Yu Han</i>                                                                                                    |    |
| Implementation of a RAG-based Knowledge Question Answering System .....                                                        | 50 |
| <i>Yuh-Chung Lin, Keliang Pan, Diakonova Vasilisa, Ta-Wen Kuan, Shunnian Luo, Xiaodong Yu</i>                                  |    |
| Application of computer vision and deep learning in pig recognition .....                                                      | 54 |
| <i>Sha Miao</i>                                                                                                                |    |
| An Autonomous Driving System for Discrete Marker Recognition .....                                                             | 58 |
| <i>Wankun Xue, Chang Liu, Zedai Yang, Pengzhi Chu</i>                                                                          |    |
| Research on brain wave analysis network model and application based on EEG-AttentionNet attention mechanism optimization ..... | 67 |
| <i>Lei Bao, Chenxu Zhang, Zhengfei Wang, Wenzhe Shi, Shuxian Zhang, Ruchen Du, Xinrong Zhu</i>                                 |    |
| Research on Fall Detection and Alert Based on Raspberry Pi .....                                                               | 72 |
| <i>Lixiao Zhang, Yuechun Wang, Tawen Kuan, Wenhui Zhao, Xinrong Zhu</i>                                                        |    |

|                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------|-----|
| A Survey of Multimodal Large Models: Architecture, Technologies, Applications and Suggestions .....                  | 76  |
| <i>Xiaofei Dong, Huiqi Gong, Qianna Wang, Xueqiang Zhang, Dan Zhang, Feng Cao</i>                                    |     |
| Research on Tomato Rot Degree Detection Based on YOLO .....                                                          | 82  |
| <i>Hao Peng, Mideth Abisado</i>                                                                                      |     |
| Intelligent Waste Sorting System Based on YOLO-Enhanced Deep Learning Models .....                                   | 87  |
| <i>Claire Guo, Ivy Zan, Isabel Ye</i>                                                                                |     |
| A study on emotion recognition of autistic children integrating emotional intelligence and behavioral analysis ..... | 91  |
| <i>Yan Huang, Lei Wang, Xinyue Zhang, Wentao Li, Xinrong Zhu</i>                                                     |     |
| Research on Formation Mechanism of Short Video Platform Information Cocoon Based on User Perspective .....           | 96  |
| <i>Siyang Li, Jiamin Gu</i>                                                                                          |     |
| AMPC-SQL: A Large Model Enhancement Scheme for Text-to-SQL Capability Based on Prompt Learning .....                 | 102 |
| <i>Ziyang Zheng, Haipeng Jing, Askar Hamdulla</i>                                                                    |     |
| Knowledge Graph for the Preservation of Mortise and Tenon Joints in Ming-style Table Furnitures .....                | 106 |
| <i>Xingrui Xiang, Xinxiong Liu, Yali Wang, Yingrui Ji, Yan Gan</i>                                                   |     |
| Ancient Town Branding Strategy Based on Big Data Mining of User Reviews: A Case Study of Xitang Ancient Town .....   | 115 |
| <i>Jing Cao, Chaoqun Shen, Fei Wang, Xiang Chen</i>                                                                  |     |
| Research Progress in the Application of Emerging Computer Technologies in Geology .....                              | 119 |
| <i>Haoxin Chen, Leru Sun, Sunan Tian</i>                                                                             |     |
| Strategies for Synthesizing Novel Alzheimer's Disease Therapeutic Molecules Using Artificial Intelligence .....      | 125 |
| <i>Fuling Sun</i>                                                                                                    |     |
| A Span Vector Model to Classify Pragmatic Patterns of Adverbial Collocates across Domains .....                      | 129 |
| <i>Tao Ma</i>                                                                                                        |     |
| Research on Static Security Modeling Methods for Risk Analysis of Power System Cascading Failures .....              | 133 |
| <i>Mingfei Zeng, Hushuang Zeng, Xuexia Quan</i>                                                                      |     |
| Teaching Machine Translation Post-editing in the Context of Language Service Industry .....                          | 137 |
| <i>Yanqi Lu</i>                                                                                                      |     |
| Low-Latency Scheduling Algorithm for Time-Sensitive Networks in Flight Control Simulation Systems .....              | 145 |
| <i>Xiaojia Wu</i>                                                                                                    |     |
| Collaborative Fact-checking via Multi-Agent Debate and Weighted Voting .....                                         | 150 |
| <i>Xi Wang, Yuxiao Fei</i>                                                                                           |     |
| Research on intelligent anti-jamming decision making based on deep reinforcement learning .....                      | 154 |
| <i>Bin Lei, Ziqiao Yuan, Genshen Kai, Zerui Zhang</i>                                                                |     |
| Research on Construction of AI - Creative Design Semantic Model Based on Peircean Semiotics .....                    | 160 |
| <i>Nengli Liu</i>                                                                                                    |     |

|                                                                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Key Elements and Theoretical Logic of Blended Teaching from the Perspective of Total Quality Management: Integration of Computer Technology and Artificial Intelligence ..... | 165 |
| <i>Li Lin, Hashima Binti Hamid</i>                                                                                                                                            |     |
| A knowledge extraction method for grass industry based on cue learning .....                                                                                                  | 169 |
| <i>Li Qi, Jiandong Fang, Yudong Zhao</i>                                                                                                                                      |     |
| AI-Based Optimization of Novel Combined IBD+ND Live Vaccine Dosage .....                                                                                                      | 178 |
| <i>Xinrong Zhu, Lixiao Zhang, Liuqiao Chen, Yan Huang, Ta-Wen Kuan</i>                                                                                                        |     |
| Research on the application of machine learning in dual social model APP .....                                                                                                | 182 |
| <i>Jinyang Shao, Hao Chen, Junjie Tao, Yu Liu, Wei Song</i>                                                                                                                   |     |
| Research on Text Classification for News Editor's Notes based on Machine Learning .....                                                                                       | 187 |
| <i>Hao Zheng, Zhijun Yue, Ruiyan Wang</i>                                                                                                                                     |     |
| Learning Chain-level Meta-features: Generative Meta-learning Method for Few-shot Script Event Prediction .....                                                                | 192 |
| <i>Xingyu Weng, Huizhe Su, Xiangfeng Luo, Jinpeng Li</i>                                                                                                                      |     |
