# TABLE OF CONTENTS

|                                                                                                                                                                                 |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Methods to Improve Random Map Shapes Multi-Scan Chain Failures in Logic Circuits .....                                                                                          | 1  |
| <i>Yaohui Zhou, Song Zhang, Mingcheng Li</i>                                                                                                                                    |    |
| Design of an Enhanced Mode of Ga <sub>2</sub> O <sub>3</sub> Vertical MOSFET with Innovative Al <sub>2</sub> O <sub>3</sub> /NiO/Ga <sub>2</sub> O <sub>3</sub> Structure ..... | 6  |
| <i>Zepeng Ma, Jinle You, Wentong Fei, Xinlei Cheng, Fei Liao</i>                                                                                                                |    |
| High-Sensitivity MEMS Capacitive Microphone Based on Heterogeneous Integration .....                                                                                            | 10 |
| <i>Bing Zhang, Guoqing Yang, Yang Dong, Yanfeng Jiang, Duoduo Gao, Encheng Zhu, Genlan Rong</i><br><i>Ziyang Wang, Kai Yan, Shaoping Li</i>                                     |    |
| A Hybrid PSO-TO Framework for Efficient Photonic Inverse Design .....                                                                                                           | 15 |
| <i>Li Zhang, Tao Chen, Ziming Liu</i>                                                                                                                                           |    |
| A 25Gbps CTLE Design with Negative Capacitance Structure and Adjustable Low-Frequency Gain .....                                                                                | 19 |
| <i>Yisha Xie, Aiyong Guo</i>                                                                                                                                                    |    |
| Case Study: Influence of Topmost Surface of Poly-Si/Oxide/Si MOS Stack on TDDDB Weibull<br>Distribution .....                                                                   | 23 |
| <i>Mengke Huang, Qiang Liu, Yuhang Lai, Ziyuan Liu</i>                                                                                                                          |    |
| Mitigation Strategies for High-Temperature Annealing-Induced Challenges in Deep-Submicron<br>Technology .....                                                                   | 28 |
| <i>Ya-Ling Ma, Song Zhang, Qun Liu, Yaohui Zhou, Min-Cheng Li, Dejin Wang</i>                                                                                                   |    |
| A New Laminated Structure of MIM Capacitor with Low Capacitance Density Based on Semiconductor<br>standard advanced process .....                                               | 32 |
| <i>Xiaowei Chang, Dejin Wang, Xiaofeng Sun, Huihui Wu, Enhao Zhao, Fan Ye, Zhengyu Lin</i>                                                                                      |    |
| A Floating-Ground Logarithmic Mathematical Memristor Model and Its Emulator .....                                                                                               | 37 |
| <i>Xinxin Yuan, Tuo Li, Changhong Wang, Kang Su, Zhonghua Li, Fen Guo, Kejian Zhu, Xin Xi</i>                                                                                   |    |
| Experimental Verification of Contact Resistance Reduction in Monolayer MoTe <sub>2</sub> FETs Enabled by<br>Semimetal Contacts Compared to Metals .....                         | 42 |
| <i>Xi Cheng, Mingzhu Long, Xinming Li, Qingyi Shao, Zefeng Chen</i>                                                                                                             |    |
| Research on Package Structure Design and Reliability of Aerospace Used Image Sensor Chip .....                                                                                  | 48 |
| <i>Shiqi Zheng, Yinglin Zhao, Honghao Wu, Xinchun Li, Shang Jiang, Chengxin Su</i>                                                                                              |    |
| Design Technology of Multi-Channel T/R Modules Based on Silicon-Based Stacked Packaging .....                                                                                   | 53 |
| <i>Yirui Gao, Yu Han, Feng Ji</i>                                                                                                                                               |    |
| Frequency Stability Analysis of h-BN/Graphene Heterostructure-Based Nanoelectromechanical<br>Resonators under Photothermal Effect .....                                         | 59 |
| <i>Yu-Xin Chen, Ke-Ming Hou, Ying Liu</i>                                                                                                                                       |    |
| Enhancement of Sky-Blue Perovskite LED with Tween-20 Additive .....                                                                                                             | 64 |
| <i>Bo Hu, Junjie Si, Zegang Liu</i>                                                                                                                                             |    |
| A 500MHz-5GHz Low Jitter Phase-Locked Loop with Adaptive-Bandwidth Technique .....                                                                                              | 68 |
| <i>Jingwen Li, Shaohui Pan, Huachao Xu</i>                                                                                                                                      |    |

|                                                                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Design of a C-Band Ultra-Wideband Integrated Filtering Patch Antenna Based on Parallel Microstrip Line Filters .....                                                                        | 72  |
| <i>Xinrui Ji</i>                                                                                                                                                                            |     |
| Temperature Precision Compensation for Temperature Measuring Devices Based on Piecewise Fitting - Academic Translation .....                                                                | 77  |
| <i>Hua Zhuo, Lifang Yao, Ting Li, Mei Yang, Jungang Ma, Kun Ma, Yikun Zhao</i>                                                                                                              |     |
| A Calibration Method for Multi-Channel Time-Interleaved ADCs (TIADCs) .....                                                                                                                 | 82  |
| <i>Boyu Zhang</i>                                                                                                                                                                           |     |
| Solution-Processed TIPS-Pentacene Memristors with Improved Resistance switching via PMMA Blending .....                                                                                     | 88  |
| <i>Qi Lei, Yonghua Tu, Yangyang Xie</i>                                                                                                                                                     |     |
| Electrochemically Switchable Multifunctional Device for Multiband Laser and Infrared Stealth .....                                                                                          | 93  |
| <i>Jiahao Hou, Shenghao Jin, Boxiang Wang</i>                                                                                                                                               |     |
| Enhanced Sensitivity of Ultraviolet Photodetectors Based on MoSe <sub>2</sub> via Interfacial Charge Transfer of MoSe <sub>2</sub> /ε-Ga <sub>2</sub> O <sub>3</sub> Heterostructures ..... | 97  |
| <i>Xue Jing</i>                                                                                                                                                                             |     |
| Research Progress on Fullerenes and Their Derivatives in Electron Transport Layers of Tin-Based Perovskite Solar Cells .....                                                                | 101 |
| <i>Ninghai Deng</i>                                                                                                                                                                         |     |
| Degradation Mechanisms of AlGa <sub>N</sub> /Ga <sub>N</sub> High Electron Mobility Transistors Induced by High-Energy Electron Irradiation .....                                           | 106 |
| <i>Xiao Wang, Chong Zhang, Xia Zhu, Feng-Qiu Jiang, Tao Liu, Zhi-Wei Chen, Zhang-Cheng Liu, Yang Li Da-Wei Yan, Li-Hua Bai, Zi-Yang Hu, Jin-Ping Ao</i>                                     |     |
| Oxide Redeposition Mechanism on Silicon Nitride Layers during Si <sub>3</sub> N <sub>4</sub> /SiO <sub>2</sub> Stack Structures Selective Etching Process in 3D DRAM Manufacture .....      | 110 |
| <i>Dingting Han, Libin Jia, Chao Tian, Hongbo Sun</i>                                                                                                                                       |     |
