# TABLE OF CONTENTS

|                                                                                                                                                       |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Modeling Sheath Voltage Limiters for Lightning-Related Transient Studies .....                                                                        | 1  |
| <i>Alexandros Y. Hadjicostas, Georgios D. Peppas, Ioannis Nikolis, Konstantinos Sidiropoulos</i>                                                      |    |
| <i>Michail Pitsikalis, Panagiotis Raptis, Konstantinos Roumpas, Thomas Tsovilis</i>                                                                   |    |
| Dynamic Fractal Dimension Analysis of Downward Negative Lightning Discharges from High-Speed<br>Video Camera Observations .....                       | 7  |
| <i>Christos Antrias, Alexios Ioannidis, Marcelo M. F. Saba, Diego Rhamon R. Da Silva, Ivan Cruz</i>                                                   |    |
| <i>Tagianne Da Silva, José Claudio de Oliveira e Silva, Konstantinos Amygdaloudis, Ilias Lepentsiotis</i>                                             |    |
| <i>Thomas Tsovilis</i>                                                                                                                                |    |
| Software Development for Comparing TVS Response to Manufacturers' Models .....                                                                        | 13 |
| <i>Niki I. Gkonou, Georgios D. Peppas, Ilias Nikiforidis, Thomas Tsovilis</i>                                                                         |    |
| Gamma Radiation Effect on Performance of Limiting-type Surge Protective Components .....                                                              | 18 |
| <i>Konstantinos M. Gektidis, Ioannis Kaissas, Thomas Tsovilis</i>                                                                                     |    |
| Lightning Performance Assessment of the New $\pm 500$ kV HVDC Overhead Lines of the Italian<br>Transmission Grid based on a Stochastic Approach ..... | 23 |
| <i>Alexios Ioannidis, Zacharias Datsios, Massimo Marzinotto, Francesco Palone, Thomas Tsovilis</i>                                                    |    |
| <i>Roberto Spezie</i>                                                                                                                                 |    |
| Surface dielectric strength of insulating stand-offs of electrically insulated LPS under standard lightning<br>impulse voltages .....                 | 29 |
| <i>Petros P. Tsouris, Pavlos K. Samaras, Pantelis N. Mikropoulos, Thomas E. Tsovilis, Nikolaos D. Kokkinos</i>                                        |    |
| Impact of Soil Modeling on Lightning-Induced Transients in Mixed Overhead–Underground<br>Transmission Lines .....                                     | 35 |
| <i>Jesus E. Guevara Asorza, Theofilos A. Papadopoulos, Jaimis S. L. Colqui, José Pissolato Filho</i>                                                  |    |
| Development of a 3D fractal-based model for simulating positive streamer flashover of a short<br>sphere-ring gap .....                                | 41 |
| <i>Nikolaos C. Karanikiotis, Pantelis N. Mikropoulos, Pavlos K. Samaras, Alexios I. Ioannidis</i>                                                     |    |
| Two-Layer Soil Influence on Lightning-Induced Transients in Overhead Lines .....                                                                      | 46 |
| <i>Jesus E. Guevara Asorza, Theofilos A. Papadopoulos, Walter Luiz Manzi de Azevedo</i>                                                               |    |
| <i>Anderson Ricardo Justo de Araújo, Jaimis S. L. Colqui, José Pissolato Filho</i>                                                                    |    |
| Two-Layer Earth Modeling Approaches for Electromagnetic Transient Analysis of Overhead Lines .....                                                    | 52 |
| <i>Jesus E. Guevara Asorza, Theofilos A. Papadopoulos, Andreas I. Chrysochos, Amauri G. Martins-Britto</i>                                            |    |
| Experimental study of hot spots and perforation of plates used in fuel tanks by lightning .....                                                       | 58 |
| <i>Hélio Eiji Sueta, Luis Eduardo Caires, Miltom Shigihara, Roberto Zilles, Oscar Romão</i>                                                           |    |
| Main Differences Between IEC 62305:2024 and ABNT NBR 5419:2025 .....                                                                                  | 64 |
| <i>Hélio Eiji Sueta, Jobson Modena, José Barbosa Oliveira, Danilo Ferreira de Souza, Roberto Zilles</i>                                               |    |
| Height-dependent Surge Impedance of Slender Tall Structures at Steep Lightning Impulse Currents .....                                                 | 71 |
| <i>Michael Rock, Eduard Shulzhenko, Stefan Jugelt</i>                                                                                                 |    |
| Influence of different Soil Properties on Step Voltages and Body Currents during Lightning Strikes .....                                              | 77 |
| <i>Daniel Beetz</i>                                                                                                                                   |    |

|                                                                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| On the Robustness of the Reconstruction of Return-Stroke Currents from Measurements of the Radiated Magnetic Field .....                                                                              | 83  |
| <i>Riccardo Aramini, Massimo Brignone, Daniele Mestriner, Renato Procopio, Andrea Randazzo<br/>Marcos Rubinstein</i>                                                                                  |     |
| Attractive Space Resolution Examination of HVDC Transmission Lines .....                                                                                                                              | 89  |
| <i>György Kálec, István Kiss, Bálint Németh</i>                                                                                                                                                       |     |
| Performance Evaluation of a Synthetic Ester-Based Insulating Fluid for Power Transformers under Lightning Impulse Stress .....                                                                        | 95  |
| <i>Antonio Fernando Martins Cardoso, Mateus Martins Laranjeira, Matias Pinheiro Torres Fabricius<br/>Bernardo Marques Amaral Silva, José Rui da Rocha Pinto Ferreira, Marcus Vinicius Alves Nunes</i> |     |
| On Effective Areas in Lightning Protection Grounding for PV Power Plants .....                                                                                                                        | 101 |
| <i>Kamila Costa, Michael Rock, Eduard Shulzhenko, Sven Wolfram, Amirhossein Shiri</i>                                                                                                                 |     |
| On the Reconstruction of the Current Attenuation in non TL-type Models by Means of a Regularization Algorithm .....                                                                                   | 108 |
| <i>Riccardo Aramini, Massimo Brignone, Daniele Mestriner, Renato Procopio, Andrea Randazzo<br/>Marcos Rubinstein, Susana Naranjo-Villamil</i>                                                         |     |
| Investigation of Multiple Backflashovers on Double Circuit Transmission Lines using Monte Carlo Method Approach .....                                                                                 | 113 |
| <i>Fernando H. Silveira, Frederico S. Almeida, Laura C. S. Pires, Silverio Visacro</i>                                                                                                                |     |
| Factors affecting lightning induced surges in ship electric networks .....                                                                                                                            | 119 |
| <i>E. P. Nicolopoulou, C. A. Christodoulou, I. F. Gonos</i>                                                                                                                                           |     |
| Coordination of surge protection and operation of thermal protection at metal oxide varistor (MOV) .....                                                                                              | 125 |
| <i>Naoyuki Tsukamoto, Mitsunobu Shiozaki, Masaru Ishii</i>                                                                                                                                            |     |
| A Hybrid Approach for the Lightning Outage Estimation of Overhead Distribution Lines .....                                                                                                            | 129 |
| <i>Alex J. C. Coelho, Daniele Mestriner, Rodolfo A. R. Moura, Fernando A. Assis, Massimo Brignone<br/>Renato Procopio</i>                                                                             |     |
| Efficient Lightning Outage Estimation of Distribution Lines via Machine Learning .....                                                                                                                | 135 |
| <i>Rodolfo A. R. Moura, Daniele Mestriner, Alice La Fata, Renato Procopio, Fernando A. Assis<br/>Amedeo Andreotti</i>                                                                                 |     |
| A Comprehensive Analysis and Modelling of Return Stroke Current Using ATP-EMTP .....                                                                                                                  | 141 |
| <i>Michail Pitsikalis, Konstantinos Koutras, Georgios Peppas, Eleftheria Pyrgioti, Vasilios Androvitsaneas<br/>Ioannis Gonos</i>                                                                      |     |
| Study of Fault-Induced Electrical Surges from HVAC Lines and Their Impact on Buried Pipelines .....                                                                                                   | 147 |
| <i>Teng Zhang, Feng Zhang, Wei Lan, Chengwei Xu, C.A. Charalambous, Wuxi Bi</i>                                                                                                                       |     |
| Effects of Stratified Soil Structures on Indirect Lightning-Induced Overvoltages in HV and MV Overhead Lines .....                                                                                    | 152 |
| <i>François Grange, Sébastien Jounet, Houda Rebhi, Farid Paul Dawalibi</i>                                                                                                                            |     |
| Transient Electromagnetic Field of a Cloud-To-Cloud Discharge by a Hybrid Approach .....                                                                                                              | 156 |
| <i>Erika Stracqualursi, Rodolfo Araneo, Salvatore Celozzi</i>                                                                                                                                         |     |
| Lightning Overvoltages of Transmission Lines: Effect of Tower Modeling vs LEMP Impact .....                                                                                                           | 162 |
| <i>Akifumi Yamanaka, Kazuyuki Ishimoto, Akiyoshi Tatematsu</i>                                                                                                                                        |     |

|                                                                                                                                                |     |
