List of submissions

Full papers

0051 Ground vehicle detection metrics and terramechanical characterization derived from a distributed acoustic sensing system deployed on an Arctic ice road.....	2
0270 Performance assessment of an off-road vehicle across different terrains.....	8
0375 A general model to approximate the slippage curve for applications from analysis of the tire and soil contributions to longitudinal slippage.....	16
0954 Enhancing combined slip manoeuvres in high centre-of-mass off-road vehicles using a semi-active suspension system..	23
1868 Modeling and simulation of autonomous vehicular systems at ERDC - III Verification and validation of M&S for autonomous vehicles	29
2264 Mobility testing on frost susceptible soils at field capacity	35
2469 TERRA-V toolchain: virtual validation and optimization of autonomous vehicles in unpaved terrain.....	40
2824 Local path planning on rough terrain for unmanned ground vehicle by reinforcement learning considering search reward.....	46
2908 Drawbar pull experiment and analysis of grousered-track unit on sandy terrain.....	52
3559 Modeling light detection and ranging (LiDAR) response in snowy environments.....	58
4122 DEM analysis of effect of interparticle forces on sand-outflow behavior from hopper under low-gravity environment	69
4217 A computationally efficient plug-in for high-fidelity off-road vehicle dynamics studies on deformable terrains	75
4335 Extended brush model for use with gravelly terrain.....	86
4342 Cornering performance of rigid wheel in granular media using coarse-scale DEM models.....	93
4368 Improving the expanding/contracting speed of a push-rolling rover on loose surfaces with steep slopes.....	101
4417 The status of soil physical, mechanical, and chemical properties two years after deforestation in a military training area	106
4558 In-situ soil-property estimation and Bayesian mapping with a simulated compact track loader.....	115
4579 Analysis of passenger tire-salted pavement interaction: a traction perspective.....	131
4755 Relationship between seasonal terrain properties and vehicle rut depths	139
5493 Effects of electronic control systems on autonomous vehicle performance in granular terrain.....	147
5658 Winter route planning algorithm.....	152
6001 Modeling and simulation of autonomous vehicular systems at ERDC - II Soft soil model support in vehicle dynamics	161
6010 Validation of mechanistic DEM calibration	166
6540 KRC bevameter development and mobility data collection	170
6650 Reliability of gravity offload for lunar rover wheel performance.....	175
6775 Modeling and simulation of autonomous vehicular systems at ERDC - I Software integration laboratory: development and applications.....	183
6905 Investigating data collection and processing strategies for UAV-based terrain models in vehicle dynamics simulation.....	188
6965 Correlation between optical reflectance and load-bearing capacity of soils.....	196
7125 A data-driven parameter identification method of characterization of wheel-regolith interaction for lunar surface vehicles.....	203
7222 A simulation framework for autonomous lunar construction work.....	212
7265 Evaluation of a new friction measurement device on Arctic terrain	223
7559 Dynamic contact patch estimation from 3D contact patch measurements inside a moving tyre under combined slip conditions	232
8140 Numerical modeling of plate sinkage and in situ bevameter shear testing using FEM and the density-dependent norsand critical state constitutive soil model	238
8342 Effect of snow subduction on vehicle mobility	254
8352 Assessing the strength of river sediments for vehicle fording.....	258
8964 Application of LSTM networks to prediction of a wheel traveling phenomena	270
8969 Survey of LiDAR effects for autonomous driving simulations	278
9165 Simulation of the relationship between the decreased bearing capacity while imparting vibration to ground and vibration frequency in the discrete element method	286
9563 Physical testing and digital twin simulations for prediction of ride quality of light utility vehicle.....	292
9668 Innovating mobility: a student competition in wheel and track design.....	299

Abstract-only

0280 Real-time ground segmentation and terrain topography mapping using point clouds.....	305
0398 Contact dynamics slope stability.....	305
0442 Lessons learned from global UGV and autonomous systems.....	305
0583 Dynamic off-road route planning: integrating terrain passability and weather for optimal mobility.....	305
0733 Impact of operational environment on mobility in unmanned mode of wheeled UGVs.....	306
0938 AI-based terrain passability modeling.....	306
1056 Optimizing vehicle navigation over terrain.....	306
1171 Effect of stress distribution model in wheel traveling analysis using the extended terramechanics model.....	307
1536 Automated system for determining military road and terrain passability based on terrain, meteorological and hydrological conditions.....	307
1960 Efficient modelling of the effect of tire deformation during contact with obstacles.....	307
2154 Simulation of dynamic behavior in armored vehicles using modified off-road vehicles for civil protection applications.....	308
2458 Obtaining first order tyre parameters with insitu testing.....	308
3375 Real-time simulation of flexible tracks for accurate vehicle-terrain interaction.....	308
3985 One AI driver for multi-mission ground operations.....	309
4111 Off-road autonomy using Koopman theory.....	309
4416 Prediction of soil rut depth and tire traction forces using Bekker and DEM-FEM techniques.....	309
4970 L-band microwave radiometry for non-contact moisture measurement of field trafficability.....	310
6198 Vehicle impact analysis using remote datasets.....	310
6366 Simulation-based optimization of a tracked vehicle suspension system.....	310
6752 Foundational software architectures: the cornerstone of off-road autonomy and multi-mission UGV performance.....	311
7256 Data assimilation analysis of footpad impact behavior of lander on soft ground.....	311
7470 Constraint-based terramechanics simulation for realtime and faster simulation.....	311
7475 Validation of experimental terramechanics modelling approaches through physical testing.....	312
7714 The role of the evanescent slow wave in non-contact moisture measurement of field trafficability.....	312
9257 Acoustic winter terrain classification for offroad autonomous vehicles.....	312
9360 Optical velocity and slip estimation for off-road UGV control.....	312
