# TABLE OF CONTENTS

|                                                                                                                                                   |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Surface Terahertz and Second-Harmonic Generation in Nonlinear Dielectric Crystals via Double Pulse<br>Excitation: Experiments and Modelling ..... | 1  |
| <i>Mathias H. Kristensen, Esben Skovsen, Emilie Hérault, Jean-Louis Coutaz</i>                                                                    |    |
| Cryogenic-Reconfigurable THz Beam Splitter Based on Superconducting Coding Metamaterials .....                                                    | 3  |
| <i>Ling Jiang, Yan Teng</i>                                                                                                                       |    |
| Carrier-Concentration Dependent Polar Transition in Epitaxially Grown Topological Thin Films .....                                                | 4  |
| <i>Eduardo D. Stefanato, Nicolas M. Kawahala, Bianca A. Kawata, Paulo H. O. Rappl, Eduardo Abramof<br/>Felix G. G. Hernandez</i>                  |    |
| Selective Hydrogen Sensing using Metal Hydrides .....                                                                                             | 6  |
| <i>D. B. L. Peeters, J. L. M. van Mechelen</i>                                                                                                    |    |
| Physics-based AI methodology for Material Parameter Extraction from Optical Data .....                                                            | 8  |
| <i>M. Koumans, J. L. M. van Mechelen</i>                                                                                                          |    |
| Combined optical and transport measurements of metal hydride thin films .....                                                                     | 10 |
| <i>D. B. L. Peeters, J. L. M. van Mechelen</i>                                                                                                    |    |
| Enhanced hydrogen sensing using resonant light-matter coupling .....                                                                              | 12 |
| <i>J.M. Scheers, D.B.L. Peeters, J.L.M. van Mechelen</i>                                                                                          |    |
| Sensing Moisture Level of Coffee Beans using Terahertz Technology .....                                                                           | 14 |
| <i>J. L. M. van Mechelen, M. Koumans</i>                                                                                                          |    |
| Cryogenic terahertz scanning noise microscopy: A novel tool for low-temperature nanoscale thermal<br>imaging .....                                | 16 |
| <i>Qianchun Weng</i>                                                                                                                              |    |
| Broadband dual-linear polarized element for reconfigurable reflectarray at Ka-band .....                                                          | 17 |
| <i>Tongxing Huang, Zewei Wu</i>                                                                                                                   |    |
| Terahertz Axicon Lenses .....                                                                                                                     | 19 |
| <i>Abhijeet Shrotri, Suraj Joshi, Lea Vogel, Annamarija Starsaja, Oliver Stübbe, Sascha Preu</i>                                                  |    |
| Delocalized Electrons in a Water Solution .....                                                                                                   | 21 |
| <i>Adrian Buchmann, Claudius Hoberg, Fabio Novelli</i>                                                                                            |    |
| Intense Terahertz Time-Domain Spectroscopy (iTHz-TDS) .....                                                                                       | 22 |
| <i>Fabio Novelli</i>                                                                                                                              |    |
| Thin Liquid Crystal Retarder at 18 THz .....                                                                                                      | 23 |
| <i>Fabio Novelli, Patrick Friebe, Marta L. Murillo Sanchez, J. Michael Klopff, Laura Cattaneo</i>                                                 |    |
| 18-GHz and 180-GHz Dual-Band Signal Detection Using Broad-Band Photodetector for Advanced<br>Fiber Wireless Communication .....                   | 24 |
| <i>Toshimasa Umezawa, Shinya Nakajima, Atsushi Matsumoto, Pham Tien Dat, Kouichi Akahane<br/>Naokatsu Yamamoto</i>                                |    |

|                                                                                                                                 |    |
|---------------------------------------------------------------------------------------------------------------------------------|----|
| Experimental Demonstration of a High-Average Power W-Band Gyro-TWT with a Broadband Internal Mode Converter .....               | 26 |
| <i>Monica Blank, Philipp M. Borchard, Stephen R. Cauffman, Kevin L. Felch</i>                                                   |    |
| A Novel Terahertz Waveguide Directional Coupler Based on Quartz Chip .....                                                      | 28 |
| <i>Dong Liu, Jiang-Qiao Ding, Yu-Min Fan, Sheng-Cai Shi</i>                                                                     |    |
| Generation of Vector Terahertz Field with Multi-Layered Metasurfaces .....                                                      | 30 |
| <i>Yan Zhang</i>                                                                                                                |    |
| Solvent Mediated Regulation of Biomolecular Condensates .....                                                                   | 31 |
| <i>Artur Czajkowski, Abhirami Udayabanu, Manthan Raj, Likhitha Ch. P. Pulibandla, Ellen. M. Adams</i>                           |    |
| Zero-Bias Schottky Diode based THz Detector with Ultra-Wideband Intermediate Frequency Bandwidth .....                          | 33 |
| <i>Rahul Yadav, Fahd Rushd Faridi, Florian Bek, Igor Ilyakov, Gulloo Lal Prajapati, Sascha Preu, Andreas Penirschke</i>         |    |
| Crude Oil Geographical Origins Identification Via THz-TDS and Convolutional Neural Network .....                                | 35 |
| <i>Dehua Li, Fan Yang, Wei Zhou, Huifang Ma</i>                                                                                 |    |
| A Power Synthesis/Distribution Circuit for Over-Mode Operation Multiple Beam TWTs .....                                         | 38 |
| <i>Jingrui Duan, Zhigang Lu, Zechuan Wang, Gaoli Xiang, Yuan Zheng, Zhanliang Wang, Shaomeng Wang, Huarong Gong, Yubin Gong</i> |    |
| A multi-layered model to simulate the effect of skin ridge flattening on terahertz measurements of skin .....                   | 40 |
| <i>Benjamin G. Page, Jacob J. Young, Agrima Agarwal, Joseph Hardwicke, Emma PickwellMacPherson</i>                              |    |
| Terahertz Reflection Measurements to Reveal the Role of Polymer Film Density in Pharmaceutical Coating Dissolution .....        | 42 |
| <i>Mingrui Ma, Marwa Nassar, Jason Teckoe, J. Axel Zeitler</i>                                                                  |    |
| Hyperspectral Terahertz Spatial Light Modulator for Single-pixel Imaging .....                                                  | 44 |
| <i>Wenjing Ma, Zibo Lin, Yiwen Sun, Xudong Liu</i>                                                                              |    |
| Dielectric Characterization of Boron Nitride Nanotubes using Terahertz Time-Domain Spectroscopy .....                           | 46 |
| <i>Min Zhai, Changhong Ke, Bin Xiao, Wenlong He, Alexandre Locquet, D.S. Citrin</i>                                             |    |
| Exploration of High-Potential Liquid Crystal Materials in the MMW Region Using a Downsized Waveguide Test Cell .....            | 49 |
| <i>Toshiaki Nose, Ryota Ito, Michinori Honma</i>                                                                                |    |
| Far Infrared Laser Line Assignments for Isotopic Carbon13 Difluoromethane .....                                                 | 51 |
| <i>Edward J. Danielewicz</i>                                                                                                    |    |
| 3D THz phonon and collective mode dynamics in charge-density-wave materials .....                                               | 53 |
| <i>Chih-Wei Luo, Nguyen Nhat Quyen, China-Nung Kuo, Chin Shan Lue</i>                                                           |    |
| Spatially-resolved local density of optical states in nonlocal metasurfaces measured by THz near-field microscopy .....         | 55 |
| <i>Jie Ji, Wouter Holman, Jaime Gomez Rivas</i>                                                                                 |    |
| Generation of Optical Skyrmions at the Terahertz frequency region based on the DAST-DFG .....                                   | 57 |
| <i>Rina Ito, Shusaku Mikami, Rihito Tamura, Kaito Sato, Wataru Senzaki, Yuto Yoneda, Katsuhiko Miyamoto</i>                     |    |

|                                                                                                                                                                                                                                                                   |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 73 GHz pHEMT Pumped Transconductance RX Mixer with Low Local Oscillator Drive Power .....                                                                                                                                                                         | 59 |
| <i>Edward A. Ball, Sumin David Joseph</i>                                                                                                                                                                                                                         |    |
| Reference-Free Classification of Terahertz Reflection Spectra with Few Selected Frequencies .....                                                                                                                                                                 | 61 |
| <i>Mathias H. Kristensen, Paweł P. Cielecki, Esben Skovsen</i>                                                                                                                                                                                                    |    |
| Structural and Vibrational Spectral Analysis of Anhydrous Acyclovir Polymorphs Using Terahertz Spectroscopy .....                                                                                                                                                 | 63 |
| <i>Qihui Zhao, Yong Du</i>                                                                                                                                                                                                                                        |    |
| Trace Determination of Dimethyl Phthalate Based on Double F-type Multi-frequency Resonant Metamaterial Sensor .....                                                                                                                                               | 65 |
