21st IEEE Biomedical Circuits and Systems (BioCAS)

BioCAS 2025

Table of Contents

Message from the General Chairs ..... **xxvi**
Message from the Technical Program Chairs ..... **xxviii**
Organizing Committee ..... **xxx**
Review Committee Members ..... **xxxii**
Keynotes ..... **xxxiii**
Tutorials ..... **xxxix**
Sponsors ..... **xlvii**

AI and Signal Processing for Healthcare (A2P-B)

Cuffless Blood Pressure Estimation Using Hybrid Deep Learning with Residual CNNs and Multi-Head Attention 1
Abdullah Khawatmi (United Arab Emirates University, United Arab Emirates), Allam Jaya Prakash (United Arab Emirates University, United Arab Emirates), and Mohamed Atef (United Arab Emirates University, United Arab Emirates)

Multimodal Signal Edge-Optimised Deep Learning Model for Real-Time Auditory Attention Classification 6
Allam Jaya Prakash (United Arab Emirates University, UAE), Abdelkader Nasreddin Belkacem (United Arab Emirates University, UAE), Herbert F Jelinek (Khalifa University of Science and Technology, UAE), Ibrahim M Elfadel (Khalifa University, UAE), and Mohamed Atef (United Arab Emirates University, UAE)

TimeGPT-Inspired Temporal Convolutional Networks with Cross-Attention Layers for Glucose Forecasting in Artificial Pancreas 11
Deepjyoti Kalita (National Institute of Technology Rourkela, India), Hrishita Sharma (National Institute of Technology Rourkela, India), and Khalid Baig Mirza (National Institute of Technology Rourkela, India)

Latent-Space Mixup Autoencoder for Long-Tail Respiratory Sound Reconstruction 16
Xiaoran Xu (University of South Florida, USA) and Ravi Sankar (University of South Florida, USA)

Edge-Enabled Portable Classifier for Lung Sounds Using Convolutional Neural Networks 21
Akshat Puneet (International Institute of Information Technology, Hyderabad), Pranav Shankar (International Institute of Information Technology, Hyderabad), Sri rama Rathan Reddy Koluguri (International Institute of Information Technology, Hyderabad), and Abhishek Srivastava (International Institute of Information Technology, Hyderabad)

A Lightweight CNN Framework with Proportional Class-Balanced Sampling and SpecAugment for Multi-Class Respiratory Sound Classification 26
Sing-An Chiu (National Yang Ming Chiao Tung University, Taiwan), Chia Yu Yeh (National Yang Ming Chiao Tung University, Taiwan), and Wai-Chi Fang (National Yang Ming Chiao Tung University, Taiwan)

A Lightweight Classifier for Prostate Cancer Detection 31
Tzu Hao Li (Thayer School of Engineering at Dartmouth College, USA), Ethan Murphy (Thayer School of Engineering at Dartmouth College, USA), Allaire Doussan (Thayer School of Engineering at Dartmouth College, Thayer School of Engineering at Dartmouth College,), Ryan Halter (Thayer School of Engineering at Dartmouth College, USA), and Kofi Odame (Thayer School of Engineering at Dartmouth College, USA)

CTC-Based Apnea Hypopnea Index Estimation Using Single-Channel ECG 36
Iksoo Choi (DGIST, Korea), Hanmil Choi (Sungkyunkwan University, Korea), Jungwook Choi (Hanyang University, Korea), and Wonyong Sung (Seoul National University, Korea)

A Real-Time Keyword Spotting Accelerator Using Depthwise Separable Convolutional Neural Network 41
Yuqun Xue (Nanyang Technological University, Singapore), Wei Soon Ng (Nanyang Technological University, Singapore), Wang Ling Goh (Nanyang Technological University, Singapore), Yuan Gao (Agency for Science, Technology and Research, Singapore), and Sunwoo Lee (Nanyang Technological University, Singapore)

Design of a Real-Time Action Recognition System for Better Human-Computer Interaction 46
Yaoting Yuan (Tsinghua University, China), Mulin Shi (Tsinghua University, China), Lingfeng Wu (Tsinghua University, China), Hanfei Zhang (Ningxinhuiyi Ningbo Technology Co., Ltd, China), Chenyi Guo (Tsinghua University, China), Ji Wu (Tsinghua University, China), and Milin Zhang (Tsinghua University, China)

Fast Read Pre-Mapping Filtering for Short Variations Detection in Gene Sequences Using In-Memory Search Technology 51
Chun-Hsien Ho (National Cheng Kung University, Taiwan), Wei Ting Lu (National Cheng Kung University, Taiwan), Wen-Kai Wang (National Cheng Kung University, Taiwan), Cheng-Yuan Lin (National Cheng Kung University, Taiwan), Chih-Hung Kuo (National Cheng Kung University, Taiwan), and Lih-Yih Chiou (National Cheng Kung University, Taiwan)

Proof-of-Useful-Work Blockchain for Trustworthy Biomedical Hyperdimensional Computing 56
Jinghao Wen (Villanova University, USA), Dongning Ma (Villanova University, USA), Sizhe Zhang (Villanova University, USA), Hasshi Sudler (Internet Think Tank, Inc., USA), and Xun Jiao (Villanova University, USA)

GEMM-Accelerated ECG Classification via Depthwise Separable 1D-CNN 61
Tao Hua (Peking University, China), Lin Lei (Peking University, China), and Xin'An Wang (Peking University, China)

A Memory-Efficient Retrieval Architecture for RAG-Enabled Wearable Medical LLMs-Agents 66
Zhipeng Liao (Westlake University, China), Kunming Shao (The Hong Kong University of Science and Technology, China), Jiangnan Yu (The Hong Kong University of Science and Technology, China), Liang Zhao (South China University of Technology, China), Tim Kwang-Ting Cheng (The Hong Kong University of Science and Technology, China), Chi-Ying Tsui (The Hong Kong University of Science and Technology, China), Jie Yang (Westlake University, China; Zhejiang Engineering Research Center, China), and Mohamad Sawan (Westlake University, China; Zhejiang Engineering Research Center, China)

Artificial Intelligence for Healthcare (B1L-A)

A 23-μJ-Per-Frame Fully-Integrated U-Net-Based TinyML Processor for Real-Time and Autonomous Medical Image Segmentation 71
Zhiye Song (Massachusetts Institute of Technology, United States), Ulkuhan Guler (Massachusetts Institute of Technology, United States), and Anantha Chandrakasan (Massachusetts Institute of Technology, United States)

AS-ASR: A Lightweight Framework for Aphasia-Specific Automatic Speech Recognition 76
Chen Bao (Delft University of Technology, The Netherlands), Chuanbing Huo (Sanford Health, United States), Qinyu Chen (Leiden University, The Netherlands), and Chang Gao (Delft University of Technology, The Netherlands)

SpikeVox: Towards Energy-Efficient Speech Therapy Framework with Spike-Driven Generative Language Models 81
Rachmad Vidya Wicaksana Putra (New York University Abu Dhabi, UAE), Aadithyan Rajesh Nair (Pune University, India), and Muhammad Shafique (New York University Abu Dhabi, UAE)

Low Complexity Optimization of MLP Framework for Real-Time EEG Seizure Monitoring 86
Teena Jangid (S.V. National Institute of Technology, India) and Anand Darji (S. V. National Institute of Technology, India)

Toward Prediction-Driven Time-Adaptive Seizure Management Using a WC-NMM Network 91
Samira Nabavi (York University, Canada) and Hossein Kassiri (York University, Canada)

Biomedical Circuits and Systems (C6L-A)

A Dual-Mode CMOS Microelectrode Array for Chemical and Electrical Neural Recording 96
Jingyi Xu (Southeast University, China), Yingfei Wang (Southeast University, China), Chao Zhao (Southeast University, China), and Hong Liu (Southeast University, China)

A Phase-Locked Hybrid VCO-Based ADC Front-End with High Input Impedance and Improved Linearity for Bio-Potential Readout 101
Liang Wang (Southern University of Science and Technology, China), Junjie Su (Southern University of Science and Technology, China), and Huan Hu (Southern University of Science and Technology, China)

An Adaptive Dual-Mode HBC Transceiver for Medical and Entertainment Applications 106
Amr N Abdelrahman (King Abdullah University of Science and Technology, Saudi Arabia), Abdelhay Ali (King Abdullah University of Science and Technology, Saudi Arabia), Mohamed Ali (Polytechnique Montréal, Canada), Ahmad Hassan (Polytechnique Montréal, Canada), Abdulkadir Celik (King Abdullah University of Science and Technology, Saudi Arabia), and Ahmed M Eltawil (King Abdullah University of Science and Technology, Saudi Arabia)

Advancing Charged Particles Cancer Treatment by Real-Time Measurement on FPGA 111
Arash Amini Bardpareh (Politecnico di Torino, Italy), Eleonora Vacca (Politecnico di Torino, Italy), Corrado De Sio (Politecnico di Torino, Italy), Sarah Azimi (Politecnico di Torino, Italy), Luca Sterpone (Politecnico di Torino, Italy), Elisa Fiorina (Istituto Nazionale di Fisica Nucleare, Italy), Emanuele Maria Data (Istituto Nazionale di Fisica Nucleare, Italy), and Felix Mas Milian (Istituto Nazionale di Fisica Nucleare, Italy)

A Computationally Efficient Approach for Diffuse Correlation Spectroscopy Implemented on a Field Programmable Gate Array 116
Yining Wang (The University of Edinburgh, U.K.), Yiyang Liu (The University of Edinburgh, U.K.), Alistair Gorman (The University of Edinburgh, U.K.), and Robert K Henderson (The University of Edinburgh, U.K.)

An Ultra-Low-Power Dual-Channel Analog Front End for Vagus Nerve Sensing with Chopping-Minimized Gain Mismatch 121
Sylvain Favresse (UCLouvain, Belgium), Pol Maistriaux (UCLouvain, Belgium), Pieter Harpe (Eindhoven University of Technology, The Netherlands), Denis Flandre (UCLouvain, Belgium), and David Bol (UCLouvain, Belgium)

Biomedical Imaging and Spectroscopy (B5PB)

Reduction of Measurement Duration of EIS Through Circular Fitting 126
Norman Pfeiffer (Fraunhofer Institute for Integrated Circuits IIS, Germany), Anna-Elisabeth Gerhardt (Fraunhofer Institute for Integrated Circuits IIS, Germany), Toni Wachter (Fraunhofer Institute for Integrated Circuits IIS, Germany), Joan Bausells (Institute of Microelectronics of Barcelona, Campus UAB, Spain), Abdelhamid Errachid (Université de Lyon, France), and Albert Heuberger (Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany)

Improving Generalizability of Kolmogorov–Arnold Networks via Error-Correcting Output Codes. 131
Youngjoon Lee (KAIST, South Korea), Jinu Gong (Hansung University, South Korea), and Joonhyuk Kang (KAIST, South Korea)

Integrating Point Cloud Generation and Graph Machine Learning to Reduce False Positives in Pulmonary Nodule Detection 135
Sudipta Modak (Department of Electrical and Computer Engineering), Luis Rueda (University of Windsor, Canada), and Esam Abdel-Raheem (Department of Electrical and Computer Engineering)

Enhanced Multiclass Diabetic Retinopathy Classification via Pretrained CNN Architectures and Optimized Hyperparameters 140
Hima Deepthi Vankayalapati (Technical University of Sofia, Bulgaria) and Tasho Tashev (Technical University of Sofia, Bulgaria)

A 28-nm 16-Channel SiP-Based ASIC with AFE, ADC and DSP Integrated for Ultrasound Imaging 145
Chenhui Zhou (Fudan University, China), Xinwei Yu (Xi'an Electronic Engineering Research Institute, China), Tianyu Zhai (Fudan University,China), Fan Ye (Fudan University, China), and Junyan Ren (Fudan University, China)

A 5.9 μJ/Inference Reconfigurable Accelerator for Hybrid SNN-ANN Architectures in Event-Based Image Recognition 150
Congyi Sun (Nanjing University, China), Boqi Jia (Nanjing University, China), Qinyu Chen (Leiden University, Netherlands), Wenqing Song (École Polytechnique Fédérale de Lausanne (EPFL), Switzerland), Jun Qian (Nanjing University, China), Yuxiang Fu (Nanjing University, China), and Li Li (Nanjing University, China)

A Wireless Capsule Endoscopy SoC and Recorder System Supporting 1080p, 12FPS and 720p, 24FPS Image Transmission 155
Huimin Guo (Hong Kong Applied Science and Technology Research Institute (ASTRI), China), Yat Tung Lai (Hong Kong Applied Science and Technology Research Institute (ASTRI), China), and Jianhui Wang (Hong Kong Applied Science and Technology Research Institute (ASTRI), China)

Hardware-Efficient GAP-Combined 1D CNN for Carotid Artery Localization and Diameter Estimation in A-Mode Ultrasound Scanner 160
Dae Il Kim (Kumoh National Institute of Technology, Republic of Korea), Doo Hyeon Ko (Kumoh National Institute of Technology, Republic of Korea; LX Semiconductor Co., Ltd., Republic of Korea), Se-Hwan Yang (Kumoh National Institute of Technology, Republic of Korea), and Ji-Yong Um (Kumoh National Institute of Technology, Republic of Korea)

Magnetic Induction Spectroscopy for Continuous Fetal Monitoring: Challenges and Opportunities 165
Hamidreza Rahimi (KTH Royal Institute of Technology, Sweden), Fedor Baskin (KTH Royal Institute of Technology, Sweden), Amparo Ferrer-Vilanova (KTH Royal Institute of Technology, Sweden), Anna Brammås (Karolinska Institutet, Sweden), Jonas Johnson (Karolinska Institutet, Sweden), María Cuartero (KTH Royal Institute of Technology, Sweden; Universidad Católica San Antonio de Murcia, UCAM HiTech, Spain), Gastón A Crespo (KTH Royal Institute of Technology, Sweden; Universidad Católica San Antonio de Murcia, UCAM HiTech, Spain), Malin Holzmann (Karolinska Institutet, Sweden), and Saul Rodriguez (KTH Royal Institute of Technology, Sweden)

Biopotential Signal Processing (B3L-A)

A Signal Allocation Function for the Real-Time Multi-Channel Neural Signals Compression System 170
Ruihan Zheng (University of Macau, China), Liyang Wang (University of Macau, China), and Sio Hang Pun (University of Macau, China)

Single-Channel EEG Algorithm for OSA Screening via Sleep Staging and Respiratory Event Detection 175
Xueya Gao (Tsinghua University), Chao Zhang (Tsinghua University), Xiaoyan Ma (Ningxinhuiyi Ningbo Technology Co., Ltd.), Jianhong Liao (Capital Medical University), Yunhan Shi (Capital Medical University), Yanru Li (Capital Medical University; Xinjiang Medical University), Demin Han (Capital Medical University; Xinjiang Medical University), and Milin Zhang (Tsinghua University)

Enhancing EEG Signal Quality in Motor Imagery Tasks Using Mixed Reality: A Comparative Study with HoloLens XR 180
Hamza Bouallagui (CY Cergy Paris Université, France), Hamza Chniter (CY Cergy Paris Université, France), Fakhreddine Ghaffari (CY Cergy Paris Université, France), and Olivier Romain (CY Cergy Paris Université, France)

Cognitive Assessment of Metaverse Mental Loads Using Electroencephalography Crucial Events.. 185
Waleed Bin Owais (Khalifa University, UAE), Herbert F Jelinek (Khalifa University, UAE), and Ibrahim M Elfadel (Khalifa University, UAE)

On-Device Fetal ECG Extraction Using NEO-Based Adaptive Predictor for Prenatal Healthcare 190
Daehyeok Park (Korea Advanced Institute of Science and Technology, South Korea), Jaeouk Cho (Korea Advanced Institute of Science and Technology, South Korea), Jaeseong Park (Korea Advanced Institute of Science and Technology, South Korea), Minjae Kim (Korea Advanced Institute of Science and Technology, South Korea), Geunchang Seong (Korea Advanced Institute of Science and Technology, South Korea), and Chul Kim (Korea Advanced Institute of Science and Technology, South Korea)

Biosensor Interface Circuits (B4L-A)

A Current-to-Digital Converter for Current-Based Biosensors Interfaces Based on Current-Mode Continuous-Time Incremental Sigma-Delta Modulation 195
Mohammad Amayreh (Hahn-Schickard, Germany), Suraj Bharadwaj (Hahn-Schickard, Germany), Hansjörg Rietsche (Hahn-Schickard, Germany), and Oliver Amft (Hahn-Schickard, Germany; University of Freiburg, Germany)

On-Chip Attoampere Measuring Circuit for Ultimate Molecular Biosensing 200
Cainã de Oliveira Figares (Politecnico di Milano, Italy), Arianna Adelaide Maurina (Politecnico di Milano, Italy), Evans Atta Asamoah (Politecnico di Milano, Italy), Marta Marchesini (Politecnico di Milano, Italy), Gabriele Candiani (Politecnico di Milano, Italy), Francesco Zanetto (Politecnico di Milano, Italy), Marco Sampietro (Politecnico di Milano, Italy), and Giorgio Ferrari (Politecnico di Milano, Italy)

A Wide Dynamic Range Programmable Gain Controlled Interface for SiPM Biophotonics In-Vivo Sensors 204
Rachel Georgel (Tyndall National Institute, Ireland), Mikhail Gaidukov (Tyndall National Institute, Ireland), Stefan Andersson-Engels (Tyndall National Institute, Ireland), Ray Burke (Tyndall National Institute, Ireland), and Daniel O'Hare (Tyndall National Institute, Ireland)

A Versatile Low-Power ASIC with Dynamic Calibration for Electrical Impedance Tomography 209
Darcy Maguire (Institut für Mikroelektronik Stuttgart, Germany), Zili Yu (Institut für Mikroelektronik Stuttgart, Germany), and Jens Anders (Institut für Mikroelektronik Stuttgart, Germany)

A Low Mismatch and High CMRR Bioimpedance Interface Employing Bidirectional Current Compensation and CMFB Reuse 214
Junhao Wang (Southeast University, China), Risheng Su (Southeast University, China), Longbin Zhu (Southeast University, China), Wenjie Wang (Southeast University, China), Zhijun Zhou (Southeast University, China), and Keping Wang (Tianjin University, China)

Biosignal Processing (B6L-A)

Spatio-Temporal Interaction for Left Ventricle Ejection Fraction Prediction in Echocardiography 219
Gajraj Singh (Sardar Vallabhbhai National Institute of Technology, India; IILM University, India), A D Darji (Sardar Vallabhbhai National Institute of Technology, India), and J. N. Sarvaiya (Sardar Vallabhbhai National Institute of Technology, India)

MedMambaLite: Hardware-Aware Mamba for Medical Image Classification 224
Romina Aalishah (Johns Hopkins University, USA), Mozhgan Navardi (Johns Hopkins University, USA), and Tinoosh Mohsenin (Johns Hopkins University, USA)

Gait-Based Soft Biometric Estimation Using Wearable Inertial Sensing: Comparative Evaluation and Demographic Fairness Analysis 229
Shuo Li (University of Hong Kong, Hong Kong), Mohamed Elgendi (Khalifa University, U.A.E.), Carlo Menon (ETH Zürich, Switzerland), Rosa H M Chan (City University of Hong Kong, Hong Kong), and Edmund Y Lam (University of Hong Kong, Hong Kong)

Development of Intraoral Human Machine Interface Using Tongue PPG Changes to Improve the QOL of Quadriplegic Patients 234
Aoi Kataura (Tohoku University, Japan), Yuqi Duan (Tohoku University, Japan), Akihiro Suzuki (Tohoku University, Japan), Pattaramon Thianmontri (Tohoku University, Japan), Takafumi Fukushima (Tohoku University, Japan), Koji Kiyoyama (Nagasaki Institute of Applied Science, Japan), and Tetsu Tanaka (Tohoku University, Japan)

Real-Time Arterial PPG-Waveform Quality Assessment Using FPGA-Based 1D Depthwise Separable CNN 239
Se-Hwan Yang (Kumoh National Institute of Technology, Republic of Korea), Dae Il Kim (Kumoh National Institute of Technology, Republic of Korea), and Ji-Yong Um (Kumoh National Institute of Technology, Republic of Korea)

Biosignal Recording and Processing (B5P-C)

A Multiplication-Free Neural Spike Detection and Sorting Algorithm Using Mitchell Approximate Nonlinear Energy Operator and ShiftNet Neural Network 244
Yuhao Lu (ShanghaiTech University, China; Lingang Laboratory, China) and Lei Yao (Lingang Laboratory, China)

LMU-EEG: A Legendre Memory Unit Framework for Accurate Seizure Detection from EEG Signals 249
Danial Baharlouei (York University, Canada), Alireza Ahrar (York University, Canada), Maher Assaad (Ajman University, UAE), Mostafa Rahimi Azghadi (James Cook University, Australia), and Amirali Amirsoleimani (York University, Canada)

BrainViT: A Hybrid CNN-Vision Transformer Architecture for Multi-Label Affective State Classification Using EEG 254
Abdelhadi Hireche (United Arab Emirates University, UAE), Abdalla A. R. M. Hamid (United Arab Emirates University, UAE), Noor Faris Ali (American University of Sharjah, U.A.E.), Mohamed Atef (United Arab Emirates University, U.A.E.), Ibrahim M Elfadel (Khalifa University, UAE), Herbert F Jelinek (Khalifa University, U.A.E.), and Abdelkader Nasreddin Belkacem (United Arab Emirates University, U.A.E.)

Noninvasive Multi-Contact Electrode Design for In-Vivo Neural Recording from Worms 259
Sebastian Simmich (Kiel University, Germany), Kamran Naderi Beni (Kiel University, Germany), Zanyar Sajadi (Kiel University, Germany), and Robert Rieger (Kiel University, Germany)

Optimizing Computational Efficiency and Accuracy in AI-Driven Real-Time Spike Sorting in High-Density Neural Recording Systems 264
Christian O. Okreghe (University College London, United Kingdom) and Andreas Demosthenous (University College London, United Kingdom)

HyperFuzzy: Fuzzy-Driven Adaptive Hyperdimensional Learning for Highly Efficient and Accurate Multi-Type Seizure Classification 269
Seyedeh Newsha Estiri (University of Louisiana at Lafayette, USA), Magdy Bayoumi (University of Louisiana at Lafayette, USA), Hisham Daoud (Augusta University, USA), and M. Hassan Najafi (Case Western Reserve University, USA)

Real-Time, Low-Power Purkinje Cell Spike Sorting for Headstage Systems in Freely Moving Mice 274
Kiran Fatima (Lahore University of Management Sciences, Pakistan), Vincenzo Romano (Erasmus University Medical Center, The Netherlands), Christos Strydis (Erasmus University Medical Center, The Netherlands; Delft University of Technology, The Netherlands), and Muhammad Ali Siddiqi (Lahore University of Management Sciences, Pakistan; Erasmus University Medical Center, The Netherlands; Delft University of Technology, The Netherlands)

A 128-Channel Neural Recording SoC with Hybrid Spike and LFP Monitoring for High-Density Brain-Machine Interfaces 279
Haoyang Su (Shanghai Institute of Microsystem and Information Technology, Chinese Academy of Sciences, China), Zhengyu Hu (Central China Normal University, China), Shuntian Cheng (Central China Normal University, China), Xiaofang Zhang (Central China Normal University, China), Wanglian Zhao (Central China Normal University, China), Xi Tian (Central China Normal University, China), Wenwei Yang (TOP-IC Co., Ltd., China), Xiangming Sun (Central China Normal University, China), and Liuyang Sun (Shanghai Institute of Microsystem and Information Technology, Chinese Academy of Sciences, China)

Multiplier-Less TEO-Based Efficient Spike Detection ICs for Implantable Brain-Machine Interfaces 284
Deeksha Deeksha (IIT Bombay, India), Meher Adbol (IIT Bombay, India), Lakshmi Iyer (IIT Bombay, India), and Laxmeesha Somappa (IIT, India)

Real-Time FSA-Based Spike Training Algorithm 289
Emily L Yang (University of Utah, USA), Seyed Mohammad Ali Zeinolabedin (BlackRock Neurotech, USA), Matthieu Couriol (BlackRock Neurotech, USA), and Pierre-Emmanuel Gaillardon (University of Utah, USA)

Does Re-Referencing Matter? Large Laplacian Filter Optimizes Single-Trial P300 BCI Performance 294
Eva Guttmann-Flury (Shanghai Jiao Tong University, China; Westlake University, China), Jian Zhao (Shanghai Jiao Tong University, China), and Mohamad Sawan (Westlake University, China)

A Multi-Frequency Electro-Mechanical Exciter Instrument for Diabetic Neuropathy Assessment.... 299
Mohammad Wattar (Ajman University, U.A.E.), Ali Shanableh (Ajman University, U.A.E.), Basel Semsam (Ajman University, U.A.E.), Ali Alzughair (Ajman University, U.A.E.), Wessam Shehieb (Ajman University, U.A.E.), and Fadi Jaber (Ajman University, U.A.E.)

A Reconfigurable Modular Microelectrode Array Platform for Fast Prototyping of Implantable Closed-Loop Neuromodulation Medical Devices 304
Mustafa Kanchwala (University of Toronto, Canada), Vijithan Mangaleswaran (University of Toronto, Canada; Krembil Brain Institute, Canada), Gerard O'Leary (University of Toronto, Canada; Krembil Brain Institute, Canada), Iouri Khramtsov (University of Toronto, Canada; Krembil Brain Institute, Canada), Rakshith Ramesh (University of Toronto, Canada), Homeira Moradi Chameh (Krembil Brain Institute, Canada), Roman Genov (University of Toronto, Canada), and Taufik A Valiante (Krembil Brain Institute, Canada)

An Energy Efficient Reconfigurable Neural Processor for Adaptive Deep Brain Stimulation in Parkinson's Disease 309
Lakshmi Iyer (IIT Bombay, India), Naman Taneja (IIT Bombay, India), Nivethida Thirugnanasambandam (IIT Bombay, India), and Laxmeesha Somappa (IIT Bombay, India)

Wearable and Ultra-Low-Power Fusion of EMG and A-Mode US for Hand-Wrist Kinematic Tracking.. 314
Giusy Spacone (ETH Zurich, Switzerland), Sebastian Frey (ETH Zurich, Switzerland), Mattia Orlandi (University of Bologna, Italy), Pierangelo Maria Rapa (University of Bologna, Italy), Victor Kartsch (ETH Zurich, Switzerland), Simone Benatti (University of Modena and Reggio Emilia, Italy), Luca Benini (ETH Zurich, Switzerland; University of Bologna, Italy), and Andrea Cossettini (ETH Zurich, Switzerland)

Zero Frequency Filtering Based Portable Vital Signal Monitoring with mmWave FMCW Radars … 319
Rama Rathan Reddy Koluguri (International Institute of Information Technology, India), Akshat Puneet (International Institute of Information Technology, India), and Abhishek Srivastava (International Institute of Information Technology, India)

Grand Challenge (B7L-A)

Grand Challenge on Closed-Loop Neural Decoding for Motor Control of Non-Human Primates ….324
Biyan Zhou (City University of Hong Kong, Hong Kong), Pao Sheng Vincent Sun (City University of Hong Kong, Hong Kong), Jason Yik (Harvard University, USA), Korneel Van den Berghe (Harvard University, USA), Charlotte Frenkel (Delft University of Technology, Netherlands), Vijay Janapa Reddi (Harvard University, USA), and Arindam Basu (City University of Hong Kong, Hong Kong)

Efficient Closed-Loop Neural Decoding for Motor Control of Non-Human Primates with Spiking Neural Networks …… 329
Thomas Summe (University of Notre Dame, United States), Arun George (University of Notre Dame, United States), and Siddharth Joshi (University of Notre Dame, United States)

Event-Based Neural Decoding for Neuroprosthetic Motor Control ……334
Khaleelulla Khan Nazeer (Technische Universität Dresden, Germany), Sirine Arfa (Technische Universität Dresden, Germany), Matthias Jobst (Technische Universität Dresden, Germany; Centre for Tactile Internet with Human-in-the-Loop (CeTI), Germany), Richard George (Technische Universität Dresden, Germany), and Christian Mayr (Technische Universität Dresden, Germany)

Efficient and Robust SNN Decoder Training for Closed-Loop Brain-Machine Interfaces …… 339
Chanwook Hwang (Sungkyunkwan University, South Korea), Chanung Park (Sungkyunkwan University, South Korea), Johnny Rhe (Sungkyunkwan University, South Korea), and Jong Hwan Ko (Sungkyunkwan University, South Korea)

Effective Respiratory Sound Event Detection Using Dynamic Random Stitching and SpecAugment with ResNet-50 and Transformer …… 344
Chia-Yu Yeh (National Yang Ming Chiao Tung University, Taiwan), Sing An Chiu (National Yang Ming Chiao Tung University, Taiwan), and Wai-Chi Fang (National Yang Ming Chiao Tung University, Taiwan)

Implantables and Ingestibles (C1L-A)

A Low-Power Mixed-Signal ASIC for Cardiac Resynchronization Therapy Pacemakers with a Quadripolar Left Ventricle Lead 349
Yuyuan Wang (Xi'an Jiaotong University, China), Hua Jin (Xi'an Jiaotong University, China; Lepu Medical Electronics Technology Co., Ltd., China), Aoran Sun (Xi'an Jiaotong University, China), Feifei Li (Xi'an Jiaotong University, China), Guanglei Zhang (Lepu Medical Electronics Technology Co., Ltd., China), Xiaolong Chen (Lepu Medical Electronics Technology Co., Ltd., China), Jie Zhang (Xi'an Jiaotong University, China), Jiangtao Xu (Xi'an Jiaotong University, China), and Hong Zhang (Xi'an Jiaotong University, China)

A Fully Integrated Implantable pH Sensing SoC Based on ISFET and Wireless Power Transfer Technology 354
Guoao Liu (Beihang University, China), Chen Wang (Beihang University, China), Jing Liang (Beihang University, China), and Yuanqi Hu (Beihang University, China)

Miniaturized Foldable Electrodes with Direct CMOS Integration for Implantable Applications..... 359
Junyan Qian (École Polytechnique Fédérale de Lausanne, Switzerland), Melania Coronese (École Polytechnique Fédérale de Lausanne, Switzerland), Andrea Pafundo (École Polytechnique Fédérale de Lausanne, Switzerland; Politecnico di Milano, Switzerland), Ali Meimandi (École Polytechnique Fédérale de Lausanne, Switzerland), Gian Luca Barbruni (École Polytechnique Fédérale de Lausanne, Switzerland), Marco Carminati (Politecnico di Milano, Italy), and Sandro Carrara (École Polytechnique Fédérale de Lausanne, Switzerland)

A 6.78 MHz Wirelessly Powered Sensing System for the Long-Term Monitoring of the GI Tract 364
Ramzy Rammouz (imec, Belgium), Stefano Stanzione (Holst Centre/imec, The Netherlands), Peter Vis (Holst Centre/imec, The Netherlands), Vasileios Adamopoulos (imec, Belgium), Ivan Dario Castro Miller (imec, Belgium), Carmine Garripoli (Previously at Holst Centre/imec, The Netherlands), and Tom Torfs (imec, Belgium)

An Infrastructure for the Development and Validation of Ingestible Sensors 369
Dimitrios Firfilionis (OnePlanet Research Center, Netherlands), Mehdi Sadri (OnePlanet Research Center, Netherlands), David Young (OnePlanet Research Center, Netherlands), Ahmet Say (OnePlanet Research Center, Netherlands), Simon Everts (OnePlanet Research Center, Netherlands), Mehmet Bilgehan Tosun (OnePlanet Research Center, Netherlands), Ria Sijabat (OnePlanet Research Center, Netherlands), Francesca Leonardi (OnePlanet Research Center, Netherlands), Tobias Teichmann (OnePlanet Research Center, Netherlands), Tom Torfs (imec, Belgium), Aniek Even (OnePlanet Research Center, Netherlands), and Arjan van Heusden (OnePlanet Research Center, Netherlands)

Implantables and Wearables (C5P-B)

A Dual-Mode Electrical Stimulator Integrated with a Hydrogel-Based Wound Healing Patch for Highly-Progammable Drug Delivery 374
Zhe Wei Lin (National Yang Ming Chiao Tung University, Taiwan), Yi Chen Lai (National Yang Ming Chiao Tung University, Taiwan), Li-Chia Tai (National Yang Ming Chiao Tung University, Taiwan), Tsung-Heng Tsai (National Yang Ming Chiao Tung University, Taiwan), Yu-Te Liao (National Yang Ming Chiao Tung University, Taiwan), and Wei-Chen Huang (National Yang Ming Chiao Tung University, Taiwan)

A CMOS Electrical Stimulator Integrated with a Soft, Tissue-Mimicked Electrode as Implanted Electroceuticals 379
Lin Chou (Yang Ming Chiao Tung University, Taiwan), Wan Lou Lei (Yang Ming Chiao Tung University, Taiwan), Pei-I Tsai (Industrial Technology Research Institute, Taiwan), Po-Hsun Chu (Yang Ming Chiao Tung University, Taiwan), Hai-Yin Chen (Yang Ming Chiao Tung University, Taiwan), Kuo-Kuei Huang (Industrial Technology Research Institute, Taiwan), Yu-Pin Chen (Taipei Medical University, Taiwan), Chang-Lin Hu (Industrial Technology Research Institute, Taiwan), Li Hsuan Li (Yang Ming Chiao Tung University, Taiwan), Yu-Te Liao (Yang Ming Chiao Tung University, Taiwan), and Wei-Chen Huang (Yang Ming Chiao Tung University, Taiwan)

A Low-Power High-Precision ECG Acquisition Node for Remote ST-segment Monitoring in Acute Coronary Syndromes 384
Yufei Liu (Fudan University, China), Shaokai Yuan (Fudan University, China), Yongcong Wu (Fudan University, China), Yajie Zhao (Fudan University, China), Mingke Yang (Fudan University, China), and Yajie Qin (Fudan University, China)

Low-Power Integrated Circuit for Bipolar Driving of Piezoelectric Resonant MEMS Scanners with Up to 100 Vpp and Energy Recovery 389
Leon Pohl (OQmented GmbH, Germany), Wjatscheslaw Galjan (OQmented GmbH, Germany), and Andreas Bahr (Technische Universität Dresden, Germany)

Bandwidth Enhancement Technique for Magnetic Dual Resonant Coupling for IMD Data Telemetry… 394
Sukriti Shaw (Purdue University, USA), Gourab Barik (Purdue University, USA), and Shreyas Sen (Purdue University, USA)

A 3D-Stacked Artificial Retinal Chip with Object Detection of Interest and Icon Stimulation (ODIS) for Enhancing the QOL of Visually Impaired Individuals 399
Yuqi Duan (Tohoku University, Japan), Kohei Nakamura (Tohoku University, Japan), Aoi Kataura (Tohoku University, Japan), Akihiro Suzuki (Tohoku University, Japan), Pattaramon Thianmontri (Tohoku University, Japan), Takafumi Fukushima (Tohoku University, Japan), Koji Kiyoyama (Nagasaki Institute of Applied Science, Japan), and Tetsu Tanaka (Tohoku University, Japan)

A 4-Channel VTC Peripheral Nerve Interface with 1.7 NEF and 50mm-Deep 600kbps Time-Encoded Wireless Galvanic Link 404
Ant Lakatos (Boise State University, United States), Morgan Riley (Boise State University, United States), Francis Mokogwu (Boise State University, United States), Mehdi Bandali (Boise State University, United States), and Benjamin C. Johnson (Boise State University, United States)

Ultra-Low Power Millimeter-Sized Subcutaneous EEG Implant with NFC Power Harvesting 409
Caterina Azais Tatistscheff (Imperial College London, United Kingdom), Adrien Rapeaux (Imperial College London, United Kingdom; UK Dementia Research Institute; Mint Neurotechnologies Ltd, United Kingdom), and Timothy G. Constandinou (Imperial College London, United Kingdom; UK Dementia Research Institute; Mint Neurotechnologies Ltd, United Kingdom)

A Two-Electrode Bio-Impedance Readout IC with Current Mismatch Cancellation and 60-Hz CMI Rejection Loop 413
Seyeong Kim (Korea Advanced Institute of Science and Technology, Korea), Hoyoung Gong (Korea Advanced Institute of Science and Technology, Korea), Haidam Choi (Korea Advanced Institute of Science and Technology, Korea), Dong-Hwi Choi (Korea Advanced Institute of Science and Technology, Korea), Song-I Cheon (Korea Advanced Institute of Science and Technology, Korea), and Minkyu Je (Korea Advanced Institute of Science and Technology, Korea)

Low-Complexity Adaptive Denoising Algorithm with Accurate Direction-of-Arrival Tracking for Cochlear Implants 418
Yihang Wang (Hangzhou Dianzi University, China), Liyang Xiang (Zhejiang Key Laboratory of Intelligent Rehabilitation and Translational Neuroelectronics, China), Sui Huang (Zhejiang Key Laboratory of Intelligent Rehabilitation and Translational Neuroelectronics, China), Hongbin Chen (Zhejiang Key Laboratory of Intelligent Rehabilitation and Translational Neuroelectronics, China), Genfu Yang (Hangzhou Dianzi University, China), Guodao Zhang (Hangzhou Dianzi University, China), and Yideng Huang (First Affiliated Hospital of Wenzhou Medical University, China)

UnaryEdge: Time-Domain In-Sensor Neural Processing for Smart Healthcare 423
Chengwei Zhou (Case Western Reserve University, USA), Mehran Moghadam (Case Western Reserve University, USA), Sercan Aygun (University of Louisiana at Lafayette, USA), Hassan Najafi (Case Western Reserve University, USA), and Gourav Datta (Case Western Reserve University, USA)

Modeling and Optimizing Data Reduction Strategies for Wearable Ultrasound System 428
Hari Lalichetti (University of California, USA) and Wantong Li (University of California, USA)

Prediction of Acute Kidney Injury Onset Using Electrocardiograph and Demographic Data Through Reservoir Computer On-Chip 433
Jose Sanchez (Arizona State University, USA), Tushar Gupta (Arizona State University, USA), Vasundhara Damodaran (Arizona State University, USA), Imon Banerjee (Mayo Clinic, USA), and Arindam Sanyal (Arizona State University, USA)

A High Input Impedance AFE IC for Multi-Channel Fetal ECG Detection with Dry Electrode 438
Lisen Zhu (The University of Manchester, United Kingdom), Piotr Dudek (The University of Manchester, United Kingdom), and Jayawan H. B. Wijekoon (The University of Manchester, United Kingdom)

An Analog Front-End with Reconfigurable Biasing for Broadband Noise Optimization of Biosensing 443
Chenyan Zhang (Delft University of Technology, The Netherlands), Anton Montagne (Delft University of Technology, The Netherlands), Dante G Muratore (Delft University of Technology, The Netherlands), and Tiago L Costa (Delft University of Technology, The Netherlands)

A 550nA Quiescent Current Capacitor-Free Time-Domain LDO Powered by Photovoltaic Energy Harvester for ULV Wearable Sensor Nodes 448
Siyuan Xu (Southern University of Science and Technology, China) and Huan Hu (Southern University of Science and Technology, China)

Lab-on-Chips and Biomedical Circuits (C5P-C)

Long-Term Stability Bio-Reconfigurable Differential Impedance Electronic Platform for Virus Diagnostic 453
Arianna Adelaide Maurina (Politecnico di Milano, Italy), Cainã de Oliveira Figares (Politecnico di Milano, Italy), Francesco Damin (SCITEC-CNR, Italy), Chiara Capelli (SCITEC-CNR, Italy), Laura Sola (SCITEC-CNR, Italy), Elena Criscuolo (San Raffaele Hospital, Italy), Nicola Clementi (San Raffaele Hospital, Italy), Giorgio Ferrari (Politecnico di Milano, Italy), and Marco Sampietro (Politecnico di Milano, Italy)

Toward Secure Digital Microfluidic Biochips: Optical and Hash-Based Runtime Safeguards 457
Navajit Singh Baban (New York University Abu Dhabi, UAE), Prithwish Basu Roy (New York University, USA), Pauline John (New York University Abu Dhabi, UAE), Rajendran Soundararajan (New York University Abu Dhabi, UAE), Azhar Zam (New York University Abu Dhabi, UAE), Sukanta Bhattacharjee (Indian Institute of Technology Guwahati, India), Yong-Ak Song (New York University Abu Dhabi, UAE), Krishnendu Chakrabarty (Arizona State University, USA), and Ramesh Karri (New York University, USA)

Miniaturised Lab-on-Chip Platform for Monitoring Chemical Oscillations via CMOS ISFET Arrays 462
Lei Kuang (Centre for Bio-Inspired Technology, Department of Electrical and Electronic Engineering; Imperial College London, UK), Junming Zeng (Centre for Bio-Inspired Technology, Department of Electrical and Electronic Engineering), Martyn Boutelle (Imperial College London, UK), and Pantelis Georgiou (Centre for Bio-Inspired Technology, Department of Electrical and Electronic Engineering)

High-Voltage Tens Nanosecond Pulse System for Immune Activation in Pancreatic Cancer Treatment: From Design to In Vitro Evaluation 467
Wen Dang (Queen Mary University of London, United Kingdom), Yasir Alfadhl (Queen Mary University of London, United Kingdom), Fatima S A Alzaabi (Queen Mary University of London, United Kingdom), and Xiaodong Chen (Queen Mary University of London, United Kingdom)

Scalable Maze-Based Wireless Powering Platform with Optimized Resonator Configurations for Small Animal Neurostimulation 472
Saeideh Pahlavan (Institute of Microelectronics of Seville (IMSE-CNM); University of Tehran), Shahin Jafarabadi-Ashtiani (University of Tehran), S. Abdollah Mirbozorgi (University of Alabama at Birmingham), Mostafa Shooshtari (Institute of Microelectronics of Seville (IMSE-CNM)), Teresa Serrano-Gotarredona (Institute of Microelectronics of Seville (IMSE-CNM)), and Bernabé Linares-Barranco (Institute of Microelectronics of Seville (IMSE-CNM))

An Energy Harvesting System with Voltage-Compensated MPPT, Achieving 94.26% End-to-End Efficiency and Rapid Response 477
Yiyao Xiang (Zhejiang University, China) and Mingsheng Xu (Zhejiang University, China)

A Unipolar IGZO TFT-Based 9.23 μW Operational Amplifier Achieving 73.7 dB Loop Gain and 554.6 kHz Bandwidth 482
Zhenhan Wang (Aalto University, Finland) and Kwantae Kim (Aalto University, Finland)

A Fully Integrated 4 MHz Bandwidth Current-Mode Delta-Sigma Modulator for Solid-State Nanopore Readout 487
Suraj Bharadwaj (Hahn-Schickard, Germany), Mohammad Amayreh (Hahn-Schickard, Germany), Hansjörg Rietsche (Hahn-Schickard, Germany), and Oliver Amft (Hahn-Schickard, Germany; University of Freiburg, Germany)

A Power-Efficient Adaptively-Biased Class-AB OTA with Improved Gain, Slew Rate, and Reduced Systematic Mismatch 492
Mohammad Mehdi Beheshti (K. N. Toosi University of Technology, Iran), Yarallah Koolivand (K. N. Toosi University of Technology, Iran; University of Southern Denmark, Denmark), Yasser Rezaeiyan (University of Southern Denmark, Denmark), and Milad Zamani (University of Southern Denmark, Denmark)

A 92.1-dB SNDR Noise-Shaping SAR ADC with Improved Mismatch Error Shaping and Energy-Efficient Reconfigurable Comparator 497
Qingyang Li (Xi'an Jiaotong University, China), Chenglong Ma (Xi'an Jiaotong University, China), Hongxu Chen (Xi'an Jiaotong University, China), Youze Xin (Xi'an Jiaotong University, China), Bing Zhang (Xi'an Jiaotong University, China), Yiyun Xie (Xi'an Jiaotong University, China), Pengfei Hu (Xi'an Jiaotong University, China), Han Wang (Xi'an Jiaotong University, China), Zhuoqi Guo (Xi'an Jiaotong University, China), Zhongming Xue (Xi'an Jiaotong University, China), and Li Geng (Xi'an Jiaotong University, China)

3.3V Sub-nA Voltage Gap Readout Circuit for Memristive Biosensing in Silicon Nanowire 502
Dmitrii Semenov (Brno University of Technology, Czech Republic; Bio/CMOS Interfaces Laboratory (BCI), Ecole Polytechnique Federale de Lausanne (EPFL), Switzerland), Kapil Bhardwaj (Tampere University, Finland), Gian Luca Barbruni (Ecole Polytechnique Federale de Lausanne (EPFL), Switzerland), Roman Sotner (Brno University of Technology, Czech Republic), Sandro Carrara (Ecole Polytechnique Federale de Lausanne (EPFL), Switzerland), and Pavel Horsky (Brno University of Technology, Czech Republic)

A Low Power High Resolution 2nd Order Current Mode Noise-Shaping SAR ADC with Scaled-Duty Cycle for Biomedical Applications 507
Nidhi Dixit (Indian Institute of Technology, India), Satyam Yadav (Indian Institute of Technology, India; VerveSemi Microelectronics Pvt. Ltd., India), Pratap Narayan Singh (VerveSemi Microelectronics Pvt. Ltd., India), and Bishnu Prasad Das (Indian Institute of Technology, India)

VCO-CARE: VCO-Based Calibration-Free Analog Readout for Electrodermal Activity Sensing 512
Leidy Mabel Alvero-Gonzalez (ams OSRAM, Spain), Matias Miguez (Universidad Católica del Uruguay, Uruguay), Eric Gutierrez (UC3M, Spain), Juan Sapriza (Embedded Systems Laboratory (ESL), Switzerland), Susana Patón (UC3M, Spain), David Atienza (Embedded Systems Laboratory (ESL), Switzerland), and José Miranda (UPM, Spain)

A 2.4 GHz 820 μW Low-Jitter Ring-DCO-Based Digital Injection-Locked PLL for Biosensing Applications 517
Zhen Li (Northwestern Polytechnical University, China), Haijin Zhang (Northwestern Polytechnical University, China), Fan Yang (Northwestern Polytechnical University, China), Xiaodong Zhao (Northwestern Polytechnical University, China), Yuanyuan Cui (Northwestern Polytechnical University, China), and Xunying Zhang (Northwestern Polytechnical University, China)

Development of Bulging Actuators, Surface Curvature Sensors and a Hand Mannequin for Extravasation Monitoring and System Validation 522
Malavika Vijayan (Indian Institute of Science, India), Rachana G N (Indian Institute of Science, India), Pooja Jonnalagadda (Indian Institute of Science, India), Saroj K Patnaik (Armed Force Medical College, India), and Abhijit Biswas (Indian Institute of Science, India)

A Programmable Multi-Mode Transceiver for Distributed Neuro-Signal Monitoring 527
Yusong Wu (Tsinghua University, China), Zhuojun Yu (Tsinghua University, China), Xiliang Liu (Ningxinhuiyi Ningbo Technology Co., Ltd., China), Minqian Zheng (Tsinghua University, China), Hongbo Wu (Tsinghua University, China), Sheng Zhou (Tsinghua University, China), and Milin Zhang (Tsinghua University, China)

Live Demos (A2P-C)

Live Demonstration: Low-Power Integrated Circuit for Bipolar Driving of Piezoelectric Resonant MEMS Scanners with Up to 100 Vpp and Energy Recovery 532
Leon Pohl (OQmented GmbH, Germany), Wjatscheslaw Galjan (OQmented GmbH, Germany), and Andreas Bahr (Technische Universität Dresden, Germany)

Live Demonstration: A Portable Electrochemical-Impedance-Spectral-Based System for Multi-Bio-Marker Detection of Bacterial Metabolites 533
Xiaoying Sun (Zhejiang University, China), Xinwen Zhang (Zhejiang University, China), Jiaxue Ye (Zhejiang University, China), Jiaqi Dong (Zhejiang University, China), Bo Zhao (Zhejiang University, China), Yuan Wang (Zhejiang University, China), Shuli Deng (Zhejiang University, China), and Yuxuan Luo (Zhejiang University, China)

Live Demonstration: An On-Chip Autocorrelation SPAD Array for Real-Time Diffuse Correlation Spectroscopy and Photoplethysmography 534
Yining Wang (The University of Edinburgh, U.K.), Alistair Gorman (The University of Edinburgh, U.K.), Ahmet T Erdogan (The University of Edinburgh, U.K.), and Robert K Henderson (The University of Edinburgh, U.K.)

Live Demonstration: LaparoSense for Tactile Sensing in Minimally Invasive Surgery 535
Wael Othman (New York University Abu Dhabi, UAE; New York University, USA) and Mohammad A. Qasaimeh (New York University Abu Dhabi, United Arab Emirates; New York University, USA; NYU-KAIST Global Innovation and Research Institute, USA)

Live Demonstration: 3D-Printed Wearable Weight and Walk Monitoring System (3DW3M) 536
Essey Habteslassie (Khalifa University, UAE), Minghao Liao (UESTC, China), and Ibrahim M Elfadel (Khalifa University, UAE)

Live Demonstration: Fingerspelling Recognition in Quantized Neural Networks with Emulated Memristors for 2D/3D Camera Applications 537
Yoshinari Wada (Hokkaido University, Japan), Rei Kusunose (Hokkaido University, Japan), Ryoma Shinto (Hokkaido University, Japan), Ayane Matsuzaki (Hokkaido University, Japan), Seiji Adachi (Hokkaido University, Japan), Kota Ando (Hokkaido University, Japan), Tetsuya Asai (Hokkaido University, Japan), and Takao Marukame (Hokkaido University, Japan)

Live Demonstration: A Battery-Free Wearable for Temperature Monitoring and Body Positioning Based on RF/Photovoltaic Dual-Mode Energy-Harvesting Chip 538
Qijing Xiao (Zhejiang University, China), Changgui Yang (Zhejiang University, China), Chuanlong Zhu (Microaiot, China), Yunshan Zhang (Zhejiang University, China), Mingjun Zhen (Zhejiang University, China), Weixiao Wang (Zhejiang University, China), Xin Hu (Zhejiang University, China), Yuxuan Luo (Zhejiang University, China), and Bo Zhao (Zhejiang University, China)

Live Demonstration: Wearable Edge-AI Meets Real-Time Saccadic Eye Movement Classification ... 539
Sebastian Frey (ETH Zürich, Switzerland), Victor Kartsch (ETH Zürich, Switzerland), Andrea Bernardi (University of Bologna, Italy), Luca Benini (ETH Zürich, Switzerland; University of Bologna, Italy), and Andrea Cossettini (ETH Zürich, Switzerland)

Live Demonstration: A 433MHz Low-Power Wireless Occupancy Sensor Based on Dynamic BER-Detection Technique 540
Zhichao Yan (Zhejiang University, China), Wenjie Yang (Zhejiang University, China), Lei Zhang (Zhejiang University, China), Zhihuan Zhang (Zhejiang University, China), Changgui Yang (Zhejiang University, China), Yuxuan Luo (Zhejiang University, China), and Bo Zhao (Zhejiang University, China)

Live Demonstration: A Wireless Remotely-Controlled Rat Cyborg Based on a 65nm CMOS BMI Chip Featuring 4.5V Neuromodulation 541
Tianying Fang (Zhejiang University, China), Wei Chin Lin (Zhejiang University, China), Yikai Xu (Zhejiang University, China), Junhong Sun (Zhejiang University, China), Zhiyu Wang (Zhejiang University, China), Changgui Yang (Zhejiang University, China), Yunshan Zhang (Zhejiang University, China), Haoze Xu (Zhejiang University, China), Chaonan Yu (Zhejiang University, China), Kedi Xu (Zhejiang University, China), Gang Pan (Zhejiang University, China), and Bo Zhao (Zhejiang University, China)

Neuromorphic and Edge Computing (C5P-D)

Design and FPGA Implementation of a Light-Weight Gait Decoding Algorithm 542
Junxiang Zhao (Tsinghua University, China), Yahao Song (Tsinghua University, China), Tianyi Liu (Tsinghua University, China), Xiaoyan Ma (Ningxinhuiyi Ningbo Technology Co., Ltd., China), Ying Fang (Chinese Institute for Brain Research, China), and Milin Zhang (Tsinghua University, China)

An Energetic Analysis of a Sufficient Synchronization Criterion Applied to FitzHugh-Nagumo Oscillator Networks 547
Jonas Röhrig (Ruhr University Bochum, Germany), Robin Lautenbacher (Christian-Albrechts-University Kiel, Germany), Karlheinz Ochs (Ruhr University Bochum, Germany), and Ralf Köhl (Christian-Albrechts-University Kiel, Germany)

Neuromorphic Classification of Geophone Signals with Legendre Memory Units 552
Avi Hazan (Open University of Israel, Israel; Ben-Gurion University, Israel), Shlomo Greenberg (Ben Gurion University, Israel; Sami Shamoon College of Engineering, Israel), and Elishai Ezra Tsur (Open University of Israel, Israel)

A Spiking Convolutional Neural Network Algorithm Based on Piecewise-Linear Complementary Leaky Integrate-and-Fire (PCLIF) Neurons and Hybrid Surrogate Gradient Training 557
Zong-Zhe Wu (National Tsing Hua University, Taiwan), Yi-Wen Chuang (National Tsing Hua University, Taiwan), and Kea-Tiong Tang (National Tsing Hua University, Taiwan)

Efficient FPGA Implementation of Spiking Neural Networks with Integrated Axonal Delays 562
Yuankang Zhao (Forschungszentrum Jülich, Germany; RWTH Aachen, Germany), Younes Bouhadjar (Forschungszentrum Jülich, Germany), and Emre Neftci (Forschungszentrum Jülich,Germany; RWTH Aachen, Germany)

Spatial and Temporal Reservoir Computing with Biologically Modeled Neurons 567
Duna Wattad (Technion - Israel Institute of Technology, Israel), Valariia Kravchik (Technion - Israel Institute of Technology, Israel), Rishona Daniels (Technion - Israel Institute of Technology, Israel), Ramez Daniel (Technion - Israel Institute of Technology, Israel), and Shahar Kvatinsky (Technion - Israel Institute of Technology, Israel)

Human Activity Recognition Using On-Body Memristive ESN Computing 572
Darshitha Dinesh (Digital University Kerala, India), Akhila Remanan (Digital University Kerala, India), and Alex James (Digital University Kerala, India)

Biologically Inspired EEG Encoding Using Spiking Neuron Models: Comparative Study of LIF, Izhikevich, and AdEx 576
Vasanthi R (Indian Institute of Information Technology, India), Asha V (Indian Institute of Information Technology, India), and Binsu J Kailath (Indian Institute of Information Technology, India)

A Near-Memory Computing Architecture for Real-Time Surface Electromyography Feature Extraction on FPGA 581
Adil Rehman (Khalifa University, U.A.E.), Hani Saleh (Khalifa University, U.A.E.), Ahsan Khandoker (Khalifa University, U.A.E.), Mahmoud Al-Qutayri (Khalifa University, U.A.E.), and Baker Mohammad (Khalifa University, U.A.E.)

Hybrid Hardware-Software Co-Design for Breast Cancer Detection Using SVM 586
Mohd Saqib Ansari (Aligarh Muslim University, India), Afroz Fatima (Aligarh Muslim University, India), Nausheen Ansari (Aligarh Muslim University, India), Mohd Hasan (Aligarh Muslim University, India), Fawwaz Hazzazi (Prince Sattam Bin Abdulaziz University, Saudi Arabia), and Omar Farooq (Aligarh Muslim University, India)

An FPGA Accelerator for Sequence-to-Graph Alignment with Affine Gap Penalties 591
Jheng-Syun Huang (National Taiwan University, Taiwan), Tsung-Wei Lin (National Taiwan University, Taiwan), and Yi-Chang Lu (National Taiwan University, Taiwan)

An FPGA Protein-to-Genome Aligner with Early Linking and Backtracking Prediction Schemes 596
Ke-Fan Lin (National Taiwan University, Taiwan), Po Ju Shih (National Taiwan University, Taiwan), and Yi-Chang Lu (National Taiwan University, Taiwan)

Enabling On-Device Medical AI Assistants via Input-Driven Saliency Adaptation 601
Uttej Kallakuri (Johns Hopkins Whiting School of Engineering, United States), Edward Humes (Johns Hopkins Whiting School of Engineering, United States), Rithvik Jonna (Johns Hopkins Whiting School of Engineering, United States), Xiaomin Lin (Johns Hopkins Whiting School of Engineering, United States), and Tinoosh Mohsenin (Johns Hopkins Whiting School of Engineering, United States)

Event-Driven Processing of EEG Using LIF-Based Flagging for Efficient Seizure Detection 606
Corentin Piozin (Aarhus University, Denmark), Darío Fernández Khatiboun (Aarhus University, Denmark), and Farshad Moradi (Aarhus University, Denmark)

Neuromorphic Sleep Stage Classification Using Time-Domain ISI Features and SNNs 611
Mudigonda Vibhavgopal Lakshmi Narasimha (Indian Institute of Information Technology, Design and Manufacturing, India), V Asha (Indian Institute of Information Technology, Design and Manufacturing, India), R Vasanthi (Indian Institute of Information Technology, Design and Manufacturing, India), and Binsu J Kailath (Indian Institute of Information Technology, Design and Manufacturing, India)

Adaptive Spatial Hysteresis for Neuromorphic Winner-Take-All ISFET Clusters 616
Tanmay Lad (Imperial College London, United Kingdom), Prateek Tripathi (Imperial College London, United Kingdom), and Pantelis Georgiou (Imperial College London, United Kingdom)

Neuromorphic Circuits and Systems (C3L-A)

An Efficient Fixed-Point Spiking Neural Network Training Architecture with Reconfigurable Processing Elements and Dynamic Clocks 621
Zhenhui Dai (Peking University, China), Lun Li (Peking University, China), Cheng Zhao (Peking University, China), Tingting Zhong (Peking University, China), Yi Zhong (Peking University, China), Yingying Cui (Peking University, China), Yuan Wang (Peking University, China), Dunshan Yu (Peking University, China), and Xiaoxin Cui (Peking University, China)

A Lightweight Spiking Neural Network for Severity-Based Accurate ECG Arrhythmia Detection .. 626
Changze Yu (Southern University of Science and Technology, China; Shenzhen Institutes of Advanced Technology, China), Xianliang Lin (Shenzhen University, China), Yongkui Yang (Chinese Academy of Sciences, China), Zheng Wang (Shenzhen Institutes of Advanced Technology, China), and Wang Ling Goh (Nanyang Technological University, Singapore)

Utilizing the Silent-State in Spiking Neurons: A Modified Rulkov Model 631
Farnaz Khani (Carleton University, Canada), Yosef Khakipoor (Carleton University, Canada), and Arash Ahmadi (Carleton University, Canada)

Finger Force Decoding from Motor Units Activity on Neuromorphic Hardware 636
Farah Baracat (University of Zürich and ETH Zürich, Switzerland), Giacomo Indiveri (University of Zürich and ETH Zürich, Switzerland), and Elisa Donati (University of Zürich and ETH Zürich, Switzerland)

A 1.72 μW-and-950 μm² Per Channel Spike Sorting Processor with eDRAM-RRAM-SRAM Hybrid Memory Scheme 641
Hao Jiang (Fudan University, China), Zexing Chen (Fudan University, China), Jiapei Zheng (Fudan University, China), Chen Mu (Fudan University, China), Liyu Lin (Fudan University, China), Qi Liu (Fudan University, China), and Chixiao Chen (Fudan University, China)

Power Management for Biomedical Devices (C4L-A)

A Fully-Integrated Body-Coupled Power and Data Receiver with Full-Body Single-TX Multi-RX Coverage 646
Jian Dong (Fudan University, China), Yitian Qiu (Fudan University, China), Guanghui Zhao (Fudan University, China), Song Zhang (Fudan University, China), Yajie Qin (Fudan University, China), Davide Vurro (Institute of Materials for Electronics and Magnetism (IMEM), Italy), Giuseppe Tarabella (Institute of Materials for Electronics and Magnetism (IMEM), Italy), and Xiongchuan Huang (Fudan University, China)

A Photovoltaic Energy-Harvesting Chip Quickly Adapting to Environmental Changes of Wearables 651
Jiaqing Li (Zhejiang University, China), Yili Shen (Zhejiang University, China), Zhiyu Wang (Zhejiang University, China), Weixiao Wang (Zhejiang University, China), Yuxuan Luo (Zhejiang University, China), and Bo Zhao (Zhejiang University, China; Zhejiang Technology Innovation Center of CMOS IC Manufacturing Process and Design, China)

A Study of Half-Wave Power Rectifier Used in Implantable Biomedical Applications 656
Shirin Pezeshkpour (Amirkabir University of Technology, Iran) and Mohammad Mahdi Ahmadi (Amirkabir University of Technology, Iran)

Ultra-Low Quiescent Current, Unipolar TFT-Based Low Dropout Regulator on Flexible Substrate for Biomedical Implants 661
Dipesh C Monga (Aalto University; VTT Technical Research Centre of Finland, Finland) and Kari A Halonen (Aalto University)

A Wirelessly Powered Sensing Implant with 1.2uW VCDL-Based Analog Front-End 666
Iman Habibagahi (University of California, United States), Roshan P Mathews (University of California, United States), Hamid Jafari Sharemi (University of California, United States), Jacob A Alderete (University of California, United States), and Aydin Babakhani (University of California, United States)

Special Session: Brain Computer Interface (B5P-D)

An Energy-Efficient Hybrid Brain-Computer Interface System for Real-Time Robotic Arm Control 671
Jie Lu (Fudan University, China), Guanghan Yu (Fudan University, China), Li Gong (Fudan University, China), Shuai Zheng (Fudan University, China), Peng-Peng Wang (Fudan University, China), Jinxiang Deng (Fudan University, China; Jihua Laboratory, China;), Lirong Zheng (Fudan University, China), and Zhuo Zou (Fudan University, China)

An Adaptive COOK Demodulator for the Nearfield Wireless Communication of Brain Computer Interface 676
Chenyang Li (Shanghai Jiao Tong University, China), Lixing Yan (Shanghai Jiao Tong University, China), Yunfang Zhang (Shanghai Jiao Tong University, China), and Yang Zhao (Shanghai Jiao Tong University, China)

Low-Density EEG Based Auditory Spatial Attention Decoding Through a Cross-Hemisphere Attention Mechanism 681
Yurong He (Shanghai Jiao Tong University, China), Huaying Wu (Shanghai Jiao Tong University, China), and Yang Zhao (Shanghai Jiao Tong University, China)

An Emotion Detection Method with Multimodal Data Alignment Approach and Lightweight Spectral-Spatial Attention Mechanism 686
Xiao Liu (University of Electronic Science and Technology of China, China), Jiahao Liu (University of Electronic Science and Technology of China, China), Xu Wang (University of Electronic Science and Technology of China, China), Chaozheng Guo (University of Electronic Science and Technology of China, China), and Jun Zhou (University of Electronic Science and Technology of China, China)
