# TABLE OF CONTENTS

|                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| DS4ML: Visual Supporting Data Synthesis for Machine Learning Models Training .....                                                                | 1   |
| <i>Yuanzhe Jin</i>                                                                                                                                |     |
| Search Engine Augmented Chinese Named Entity Recognition for Big Data Content Security .....                                                      | 9   |
| <i>Qinghua Mao, Jiatong Li, Kui Meng, Yuanyuan Sun, Pengjiao Wang, Jianhua Li, Xi Lin</i>                                                         |     |
| DGUM: A Dynamic Graph Update Mechanism for Video Summarization .....                                                                              | 17  |
| <i>Qi Wang, Ziji Ma, Zhiwen Jiang, Zhongwei Liu</i>                                                                                               |     |
| Reward-Shaped PPO for Economic and Degradation-Aware Battery Control in Microgrids .....                                                          | 24  |
| <i>Fatima, Ryuto Shimizu, WaiShiang Cheah, Ryohei Banno, Xun Shao</i>                                                                             |     |
| Quantum Software: From Engineering to Interaction .....                                                                                           | 32  |
| <i>Mina Alipour</i>                                                                                                                               |     |
| Sensor-Aware Feature Pruning for Cost-Effective Hand Gesture Recognition in Multi-IMU Wearable Systems .....                                      | 40  |
| <i>Paniti Achararit, Pawaree Nonthasaen</i>                                                                                                       |     |
| Infrared Small Target Image Segmentation with Super-Resolution Tasks .....                                                                        | 44  |
| <i>Ziji Ma, Zhongwei Liu, Zhiru Gu</i>                                                                                                            |     |
| Design and Implementation of an Internet of Things-Based Automatic Pesticide Spraying System for Hydroponic Lettuce Cultivation .....             | 50  |
| <i>Indra Hermawan, Ayu Rosyida Zain, Iik Muhamad Malik Matin, Dimas Cahya Dinata<br/>Muhammad Arifandi Prasetyo</i>                               |     |
| Proactive Concurrency Tuning for Inference Serving in Serverless Platform .....                                                                   | 58  |
| <i>Thanda Shwe, Bilkisu Larai Muhammad-Bello, Masayoshi Aritsugi</i>                                                                              |     |
| Joint Beam Selection and Power Allocation for Cell-Free Integrated Sensing and Communication Networks: An Optimal Transport Theory Approach ..... | 68  |
| <i>Yufeng Zheng, Lixin Li, Wensheng Lin, Wei Liang, Qinghe Du, Zhu Han</i>                                                                        |     |
| Fair Resource Allocation in C-V2X Networks: A Reinforcement Learning Approach for Perception Message Dissemination .....                          | 75  |
| <i>Xin Xu, Jingxiang Hao, Yifeng Xiao, Qiang Xue, Enshu Wang, Bingyi Liu</i>                                                                      |     |
| Enabling Autonomous AGV Navigation: Path Planning via Multi-Constrained MARL .....                                                                | 82  |
| <i>Mengwei Li, Zongqi Ge, Weizhen Han, Qiang Xue, Enshu Wang, Bingyi Liu</i>                                                                      |     |
| Efficient Multi-modal Semantic Communication for Transmitting Point Cloud and Image Information in V2X .....                                      | 90  |
| <i>Junyu Zhang, Rui Xu, Gaolei Li, Chengcheng Zhao, Jun Wu, Jianhua Li</i>                                                                        |     |
| Swin-SemantIC: A Transformer-Driven Enhancement Scheme for Semantic Interference Cancellation .....                                               | 96  |
| <i>Yizheng Huang, Wensheng Lin, Lixin Li, Zhu Han</i>                                                                                             |     |
| Similarity-Based Microbial Identification Using MS Data: An Experimental Evaluation .....                                                         | 102 |
| <i>Yuki Toyosaka, Kohei Asano, Kai Cheng</i>                                                                                                      |     |

|                                                                                                                                              |     |
|----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Trajectory Optimization of UAV Communications Based on MADDQN Particle Filter Assisted Localization and IMM Kalman Filter Prediction .....   | 110 |
| <i>Ying Ma, Long Chen, Wen Qiu, Wei Zhao, Zhi Liu</i>                                                                                        |     |
| AtoNet: An Adaptive Distributed Algorithm for Dynamic Topology Management in Decentralized IoT Networks .....                                | 116 |
| <i>Luigi Mastromauro, Muslum Ozgur Ozmen, Michel Kinsy</i>                                                                                   |     |
| Correlated Dropout-Aware Client Selection Framework for Efficient Decentralized Federated Learning Systems .....                             | 124 |
| <i>Wenhao Yan, Qi Li, Tad Gonsalves</i>                                                                                                      |     |
| A Big Sports Data Analytics Solution for Redefining Basketball Player Roles .....                                                            | 132 |
| <i>Kaiden R. Bereznycky, Carson K. Leung, Itay Nudel, Om A. Sevak, Eyal Zingerman</i>                                                        |     |
| A Big Data Analytics Solution to Mine Frequent Patterns and Detect Anomalies from 311 City Service Requests .....                            | 140 |
| <i>Meixuan Chen, Carson K. Leung, Chin Wei Mak, Shashika D. Maldeniya, Ye Naing Oo</i>                                                       |     |
| Image Representation Based Malware Detection Using Transfer Learning .....                                                                   | 148 |
| <i>Iik Muhamad Malik Matin, Indra Hermawan, Susana Dwi Yulianti, Ihsan Alamal Ahmad, Naurah Zahra Azizah</i>                                 |     |
| Cloud-Edge Computational Offloading Techniques and Verification Methods: A Survey .....                                                      | 155 |
| <i>Mahyar T. Moghaddam, Joakim Leed</i>                                                                                                      |     |
| A Scalable Constant Color Optimization Algorithm for Image Restoration .....                                                                 | 163 |
| <i>Yanting Li, Kai Cheng</i>                                                                                                                 |     |
| Self-adaptive Multi-Access Edge Architectures: A Robotics Case .....                                                                         | 169 |
| <i>Mahyar T. Moghaddam, Joakim V. Leed, Anders Q. Frandsen</i>                                                                               |     |
| Semantic Fusion Agent for Multimodal TCM Diagnosis and Cross-Domain RAG Integration .....                                                    | 177 |
| <i>Adili Abudukeranmu, Chunyu Tu, Zeyang Cui, Shijian Li, Runhe Huang</i>                                                                    |     |
| OpenEYES: Leveraging LLM and Graph Neural Networks for Deep Ransomware Detection .....                                                       | 185 |
| <i>Yufan Zhang, Yating Gao, Wei Hu, Gaolei Li, Jianhua Li</i>                                                                                |     |
| A RIS-Aided OTFS Communication System with Fractional Doppler Shift Suppression for V2X .....                                                | 193 |
| <i>Ke Mei, Caijuan Chen, Wenhao Yan, Chaofeng Zhang, Jia Hou</i>                                                                             |     |
| Multi-Scale Quantized Joint Source-Channel Coding for Energy-Efficient Federated Semantic Communication in Heterogeneous Edge Networks ..... | 199 |
| <i>Ke Wang, Lixin Li, Wensheng Lin, Lin Li, Kexin Zhang, Zhu Han</i>                                                                         |     |
| WordTree: Hierarchical Word Cloud via Treemap Layout .....                                                                                   | 205 |
| <i>Yuanzhe Jin</i>                                                                                                                           |     |
| Omnichannel Retail Analytics: A Scalable Big Data Architecture Using Data Vault 2.0 and Apache Spark for Retail Intelligence .....           | 211 |
| <i>Uttam Kumar, Durga Krishnamoorthy, Ram Ghadiyaram</i>                                                                                     |     |
| AI-Driven Smoke Opacity Detection for Marine Vessel Exhaust Monitoring .....                                                                 | 217 |
| <i>Ho-Wen Chen, Chien-Yuan Chen, Yen-Hsun Chuang</i>                                                                                         |     |

|                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------|-----|
| Optimizing Input Resolution for Efficient AI-Powered Renal Stone Detection in Resource-Constrained Environments .....       | 220 |
| <i>Paniti Achararit, Pawaree Nonthasaen, Sutheera Kungwanchai, Suthee Treewatanawong</i>                                    |     |
| Truthful Double Auction Design with Approximate VCG, Folk-Theoretic Penalties, and Multi-Agent Reinforcement Learning ..... | 224 |
| <i>Ryuto Shimizu, Xun Shao</i>                                                                                              |     |
| Adaptive Elite DPSO for Cold-Start-Constrained Edge Recommendation .....                                                    | 226 |
| <i>Zexian Zhao, Shanxian Lin, Ancai Zhang, Tian Song, Yuichi Nagata, Haichuan Yang</i>                                      |     |
| Covert Communication Based on Index Modulation for STBC-assisted STAR-RIS System .....                                      | 234 |
| <i>Xue Han, Pingping Shang, Caijuan Chen, Wenhao Yan, Chaofeng Zhang, Jia Hou</i>                                           |     |
