# TABLE OF CONTENTS

|                                                                                                                                                          |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 3DAnim-Net: A Computing-Intelligence Approach to End-to-End Multi-View 2D-to-3D Animation Reconstruction .....                                           | 1  |
| <i>Xu Yaoyao</i>                                                                                                                                         |    |
| A Multiplayer Gamified Framework for Digital Diabetes Care .....                                                                                         | 8  |
| <i>Jose P, K. Haneesh Kumar, T. Sathwik Kumar Reddy</i>                                                                                                  |    |
| Building a Machine Learning Web Application for Seminal Quality Diagnosis .....                                                                          | 15 |
| <i>Lare Adeola</i>                                                                                                                                       |    |
| Dynamic Privacy Budget Allocation in Federated Learning for Medical Image Analysis: A Comprehensive Review and Framework Proposal .....                  | 22 |
| <i>Gaurav Birajdar, Vaibhav Narawade, Smita Bhanre</i>                                                                                                   |    |
| Autism Spectrum Disorder Detection: A Structured Review on Algorithms and Performance .....                                                              | 26 |
| <i>J. Gladys Nancy, M. Manikandan, S. Karthigai Lakshmi, V. P. Jay Fantin, J. Vetrimanikumar R. Carol Praveen</i>                                        |    |
| Brain Tumor Identification, Classification and Severity Assessment Using a Comparative Analysis of ResNet50, EfficientNetB0, and CNN Architectures ..... | 34 |
| <i>Matan P, M. Gokuldhev, P Velvizhy, V.Thanammal Indu, E Bharath</i>                                                                                    |    |
| Enhanced Printed Circuit Board Defect Detection-Segmentation Model Using Integrated YOLOv8-Hybrid Upscaled U-NET .....                                   | 39 |
| <i>Dharshan V</i>                                                                                                                                        |    |
| Hybrid Deep Learning Framework Integrating EfficientNet-B0 and YOLOv11 for Robust Forest Fire Detection and Classification .....                         | 46 |
| <i>Akshada Borhade</i>                                                                                                                                   |    |
| Quantum Computing for Cyber Threat Detection .....                                                                                                       | 53 |
| <i>Sayyada Hajera Begum, Imaduddin Mohammed, Samia Rahman, Mohammed Omer Waheed Khan</i>                                                                 |    |
| Chaotic Polar Light Optimization with CatBoost for Performance Analysis of Blind Adaptive E-Learners .....                                               | 59 |
| <i>Yuvapriya P, Subramanian P, Surendran R</i>                                                                                                           |    |
| Automatic Abstractive Judgement Summarization using Bart and T5: A Comparative Study .....                                                               | 65 |
| <i>A. Rubini, Golda Dilip</i>                                                                                                                            |    |
| Neuroplasticity-Inspired GANs for Simulating Functional Brain Regeneration and Adaptive Cognitive Recovery .....                                         | 70 |
| <i>Parth Khajgiwale, Soham Agrawal</i>                                                                                                                   |    |
| Hybrid Resume Fitment Scoring with LLMs and AHP .....                                                                                                    | 76 |
| <i>Durga B, J. B. Simha, Shinu Abhi</i>                                                                                                                  |    |
| A Hybrid Unsupervised-Supervised Approach to Underwater Image Segmentation Using K-Means Clustered Masks .....                                           | 82 |
| <i>Geomol George, Stella Mary V, V Pranav Krishna</i>                                                                                                    |    |

|                                                                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Automated Code Generation: A CNN-Based Alternative to Large Language Models Using Multi-Head Mixed Convolution and Depthwise Separable Neural Networks ..... | 89  |
| <i>A. Indhuja, N.S.L. Kumar Kurumeti, Jayant Tyagi, Chirag Mavani, Natrayan L, M. SivaramKrishnan</i>                                                        |     |
| RGB-D Semantic Segmentation of Weather Phenomena with Transformer-Based Fusion .....                                                                         | 96  |
| <i>S. Kalpana, K.V. Kanimozhi</i>                                                                                                                            |     |
| OOA: Osprey Optimization Algorithm for Efficient Task Scheduling in Edge Computing Environments .....                                                        | 101 |
| <i>Santhosh Kumar Medishetti, Adusumilli Naveen, K Prathyusha, Pokala Umasri, Akshaya Sadula S Charan teja</i>                                               |     |
| FOA: A Bio-Inspired Approach for Deadline-Aware and Fault-Tolerant Scheduling in Cloud Computing .....                                                       | 109 |
| <i>Santhosh Kumar Medishetti, Kadapala Anjaiah, Newton Gattu, Sandanagiri Pranishma Deeravath Venkatesh, Vara Divya Kranthi</i>                              |     |
| AAA: Priority-Aware and Latency-Optimized Task Scheduling in Fog Computing .....                                                                             | 118 |
| <i>Vemula Satish, Ashwini Reddy Kandi, Mattepalli Praneeth Kumar, K Anusha, C Veena Santhosh Kumar Medishetti</i>                                            |     |
| Feature Based ANN Model for Sleep Apnea Detection .....                                                                                                      | 126 |
| <i>Hima Vyshnavi A M, Gopika P</i>                                                                                                                           |     |
| Leveraging Generative AI for Automated Data Standardization and Interoperability in Healthcare .....                                                         | 130 |
| <i>Pankaj Kumar</i>                                                                                                                                          |     |
| Edge Computing and IoT for Real-Time Healthcare Data Processing and Integration .....                                                                        | 136 |
| <i>Pankaj Kumar</i>                                                                                                                                          |     |
| Design and Development of an Intelligent Framework for Audio Authenticity Verification in the Digital Era .....                                              | 142 |
| <i>K.V. Priyadharshini, S.S. Dharshini, U. Gobika, R. Harini, S. Bhuvaneshwari</i>                                                                           |     |
| Crop Disease Classification Using Hybrid Deep Learning Model .....                                                                                           | 147 |
| <i>Banda Athmiya Varshini, Duvalla Likitha Gowthami, Jakkam Shalini, Nanda kumar M</i>                                                                       |     |
| Seasonality Pricing Recommendation Engine for Retail: A Price Match System Using Competitor Web Scraping and Optimized Pricing Suggestions .....             | 152 |
| <i>Karthik Govardhanan</i>                                                                                                                                   |     |
| A Multi-Model Deep Learning Framework Integrating DeepLabCut–ResNet50–LSTM and MobileNetV2 for Dual-Condition Health Monitoring in Dairy Cattle .....        | 158 |
| <i>Sudhanshu Rakesh Katarey, Umme Kulsoom A, Sandhya P, Tanneru Meghana, B Ashokkumar Reddy</i>                                                              |     |
| Enhancing Image Descriptions with Context-Aware AI Caption Generators .....                                                                                  | 166 |
| <i>Devender Nayak N, Rambabu M</i>                                                                                                                           |     |
| Integrating U-Net Segmentation and OCR in a MATLAB GUI for Document Digitalization .....                                                                     | 174 |
| <i>Nikhitha M, Niranjana S, Niruban R</i>                                                                                                                    |     |
| Introducing the Hundredth Monkey Effect: An Efficient Metaheuristic for Fast Convergence in the Least Squares Minimization Problem .....                     | 180 |
| <i>Yashar Salami</i>                                                                                                                                         |     |

|                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Introducing Party Competition: An Efficient High-Speed Metaheuristic for Solving the Binary Knapsack Problem .....                          | 185 |
| <i>Yashar Salami</i>                                                                                                                        |     |
| Real-Time Speech Denoising on Edge Devices for Disaster Response .....                                                                      | 191 |
| <i>Abhirup Mandal, Madhumitha Kulandaivel</i>                                                                                               |     |
| Dual-Image Based High-Payload Robust Reversible Image Steganography Using Weighted Matrix and LZW Compression with DNN Classification ..... | 196 |
| <i>Minakshi Sarkar, Souvik Halder, Arya Das, Bidesh Chakraborty, Indrajit Banerjee</i>                                                      |     |
| Lightweight CNN for Robust DeepFake Detection .....                                                                                         | 204 |
| <i>Devesh, Parul Sood, Ashish Kumar, Ankit Singh, Shashank Kumar</i>                                                                        |     |
| Quantum Machine Learning for Bitter Gourd Disease and Nutrient Deficiency Detection .....                                                   | 210 |
| <i>Shawn Jaison S, D. Narmadha, Naveen Sundar</i>                                                                                           |     |
| SHAP-Based Interpretation of Random Forest Model for Early Kidney Failure Detection .....                                                   | 218 |
