# TABLE OF CONTENTS

|                                                                                                                                           |    |
|-------------------------------------------------------------------------------------------------------------------------------------------|----|
| Autonomous Mobile Medicine Transporter for Bedridden Patients Using ROS2 Humble and TurtleBot3<br>Burger .....                            | 1  |
| <i>Antony Daison, Charles Varghese, Sayana Sajeev, Simi Yohannan, G.R Gnana King, Reshma P S</i>                                          |    |
| Lightweight Secure Data Sharing Framework for Multi-User Cloud Environments .....                                                         | 6  |
| <i>Smithamol M B</i>                                                                                                                      |    |
| Tracking Age-Related Brain Changes With AI-Enhanced Clustering Across qBOLD Regimes .....                                                 | 14 |
| <i>Arun Raj T, Joseph Suresh Paul</i>                                                                                                     |    |
| MEMS Piezoresistive Pressure Sensor with Coupled Center-Mass and Silicon Square Membrane<br>Annular Groove for Low-Pressure Sensing ..... | 19 |
| <i>Munikrishna Arunkumar, Sumit Kumar Jindal, Vikas Vijayvargiya</i>                                                                      |    |
| Fractional Order Chen System for Securing Medical Images using Hybrid Image Steganography<br>Technique .....                              | 25 |
| <i>K. Meera, N. Selvaganesan</i>                                                                                                          |    |
| Prediction of Heart Failure Using Data Driven Approach .....                                                                              | 31 |
| <i>Daneshwar Prasad Chandra, Anjana K, N. Selvaganesan</i>                                                                                |    |
| A Hardware-Efficient Sparse-Matrix Multiplier for Deep Learning Models Using CSR/CSC .....                                                | 37 |
| <i>Jasmine Rose Bulipe, Nisha Abdul Kareem, Sudhish N George</i>                                                                          |    |
| Reduced Complexity Hyperspectral Image Compression using Low Rank Factorization .....                                                     | 43 |
| <i>Nissu George, Sheeba Rani J</i>                                                                                                        |    |
| High-Performance Energy-Efficient SRAM Architectures: a Study Using Open RAM .....                                                        | 49 |
| <i>Priyanka Sharma, Vaibhav Neema, Vanshaj Chandore, Ravi Sindal</i>                                                                      |    |
| Prompt-based Adversarial Text Generation using Large Language Models .....                                                                | 54 |
| <i>Vinod R, Visakh R, Anita John, Jayamohan Pillai C S</i>                                                                                |    |
| Explainable AI For Phishing Detection: Techniques, Challenges, and Experimental Validation .....                                          | 64 |
| <i>Varsha V G, Dr. Princy Ann Thomas</i>                                                                                                  |    |
| Quantitative MRI-Based Modal-Informed Transformer Network for Brain Age Prediction .....                                                  | 69 |
| <i>Deepu Kurian, Joseph Suresh Paul</i>                                                                                                   |    |
| Instruction-Tuned Small Language Models for Client Feedback Analysis: A Resource-Conscious<br>Deployment Pipeline .....                   | 75 |
| <i>Shivam Singh, Dasaprakash Krishnamurthy, Abhinav Pavithran, Milgy George, Vinod Neelanath</i>                                          |    |
| Emoticon: An Optimized 4-Channel EEG-Based Emotion Detection System .....                                                                 | 83 |
| <i>Zeba Mehaboob A, Airin Basal, Sreeram Manghat, Aswanth M P, Fathima Safa V P</i>                                                       |    |
| Image-Based Ripeness Detection of Cocoa Pods using Machine Learning and Deep Learning .....                                               | 88 |
| <i>Akshay Warriar, Yash Mawalkar, Sharath A, Leena Mary</i>                                                                               |    |
| Side Channel Attack Resilient Single-Ended Secure SRAM Cell for Low-Power IoT Systems .....                                               | 94 |
| <i>Sneha Nagar, Ashish Panchal, Vaibhav Neema</i>                                                                                         |    |

|                                                                                                                                                                                                |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Secure Cluster Formation and Revocation of Certificates Using Machine Learning and Blockchain .....                                                                                            | 101 |
| <i>Ambarish A, Unnikrishnan Sree Kumar, Nisna K., Ali Askar K. M.</i>                                                                                                                          |     |
| Integration of MODBUS-RTU Monitoring with EPICS for Offline Impedance Matching in ICRH<br>Systems .....                                                                                        | 107 |
| <i>Ramesh Joshi, HM Jadav, Manoj Parihar, Kishore Mishra, Dharmendra Rathi, Dharmesh Purohit<br/>Atul Varia, Rana Pratap Yadav, Kumar Rajnish, Raj Singh, Sunil Kumar, Braj Kishore Shukla</i> |     |
| Wearable virtual trackpad using sEMG and IMU for Human-Computer Interaction .....                                                                                                              | 114 |
| <i>Kartik S. Prakash, Devendran S. S., Jyothis S., Nandan V. S., Jerin G. Reji, Nissan Kunju</i>                                                                                               |     |
| Design of Approximate 6:2 Compressor for Approximate Multiplier .....                                                                                                                          | 120 |
| <i>Rachana George, Kondapalli Moulya, Santhos Kumar, Nalesh S, Kala S</i>                                                                                                                      |     |
| Residual Hybrid Attention based Deep Feature Fusion Network for Haze Removal .....                                                                                                             | 126 |
| <i>Anugraha Sam, Jeena R S</i>                                                                                                                                                                 |     |
| Mode of Transport Prediction Using Deep Learning to Improve QoS in 6G Networks .....                                                                                                           | 134 |
| <i>Neethu Sajeev, Debabrata Dalai, B. S. Manoj</i>                                                                                                                                             |     |
| Scalable Anomaly Detection in Cloud Logs with Sparse Transformer .....                                                                                                                         | 141 |
| <i>Anu V.R.</i>                                                                                                                                                                                |     |
| Dust Sensor for Outdoor Air Quality Monitoring in Opencast Coalmines .....                                                                                                                     | 148 |
| <i>Allen Somu, Sandeep Sivan, Muhammed Irshad A, Joseph Mathew, Senju Thomas Panicker</i>                                                                                                      |     |
| Image-based Non-invasive Bridge Crack Detection Model for Edge Devices .....                                                                                                                   | 155 |
| <i>Athul Joe Palliparambil, Kevin Benty, Alan Cherian, Rajeev Rajan</i>                                                                                                                        |     |
| HI-MobileNet: A Lightweight Deep Learning Framework for Automated Diagnosis of Harlequin<br>Ichthyosis .....                                                                                   | 161 |
| <i>Athul Joe Joseph Palliparambil, Anandhu P Shaji, Rajeev Rajan</i>                                                                                                                           |     |
| VulDetPHP: A Machine Learning Framework for Detecting Vulnerabilities in PHP Source Codes .....                                                                                                | 167 |
| <i>Ajvad Haneef K, Jay Bharat Vora, Madhu Kumar S D</i>                                                                                                                                        |     |
| ViT-TSNet: A Hybrid Spatio-Temporal Transformer for Accurate Timestamped Driver Action<br>Recognition .....                                                                                    | 174 |
| <i>Anargha K, Linu Shine</i>                                                                                                                                                                   |     |
| Cloud-Based Ovulation Detection from Collected Saliva Images using Azure-Powered Machine<br>learning model .....                                                                               | 180 |
| <i>Arya U, Venugopal Gopinath</i>                                                                                                                                                              |     |
| Data-Driven Decision Support in Agriculture: AI and IoT for Proactive Plant Health Monitoring .....                                                                                            | 186 |
| <i>Harsh Sinha, Khandelwal Pratham Gopalkumar, Usha Rani Seshasayee</i>                                                                                                                        |     |
| Development of a Depth Imaging-Based Passenger Counting Sensor for Public Transportation .....                                                                                                 | 192 |
