# TABLE OF CONTENTS

|                                                                                                                                     |    |
|-------------------------------------------------------------------------------------------------------------------------------------|----|
| Research on Simulation of Shielding Effectiveness in DCS in Complex Electromagnetic Environments .....                              | 1  |
| <i>Shuxue Li, Shuai Dong, Wenda Jia, Zongyang Wang, Daozhong Zhang, Yanzhao Xie</i>                                                 |    |
| Series Fault Arc Detection Method for Low-Voltage Electrical Circuits Based on MobileNetV2-WOA .....                                | 8  |
| <i>Shuo Xu, Zhong Xu, Yu Zhang, Jin Mei Chen, Di Wu</i>                                                                             |    |
| Multi-Scenario Hierarchical Capacity Optimization Method for Electricity-Hydrogen Coupling System .....                             | 14 |
| <i>Yichen He, Lingguo Kong, Zhenyu Shi, Jiaqi Wu</i>                                                                                |    |
| Topology and Control of AC/DC Parallel Type MTDC System Based on DR and DR-MMC for<br>Offshore Wind Power Integration .....         | 20 |
| <i>Mingze Gang, Lingfei Xiong, Siqi Chen, Yaling Bai, Qichen Chen, Linzhen Fan</i>                                                  |    |
| Linear Motor Control Based on Twin Delayed Deep Deterministic Policy Gradient Algorithm .....                                       | 26 |
| <i>Qinhong Lei, Wenhui Chen, Jia Peng, Xiuxue Peng, Yunfei Rao</i>                                                                  |    |
| A Clever Output Method for Synchronous Machine with Power Angle Swing Relative to Converter<br>Station .....                        | 32 |
| <i>Wencheng Zhang, Yilang Jiang, Libo Zhang, Lining Su, Dan Huang</i>                                                               |    |
| Dynamic Detection of Rebar Diameter and Protective Layer Thickness Based on Voltage Gradient .....                                  | 37 |
| <i>Yipeng Wu, Xuming Feng, Runquan Wu</i>                                                                                           |    |
| Study on the Development Trend of Electric Vehicle Charging Load and Charging Behavior Simulation<br>in Sichuan Province .....      | 43 |
| <i>Yuqi Han, Xinting Yang, Mingwei Tang, Liyang Liu</i>                                                                             |    |
| A LADRC-Based Control Strategy for Enhancing Grid-Forming Inverter Stability Under Strong Grid<br>Conditions .....                  | 49 |
| <i>Huixing Qu, Liang Guo, Yaran Li, Xinyu Wei, Xiangmei Kong, Xuan Liu</i>                                                          |    |
| Dual-Input Series Resonant Converter with Full-Range Regulation .....                                                               | 55 |
| <i>Jiayi Kong, Chen Zhao, Mingjin Xu, Zheng Xu, Liyao Wang, Yi Du, Rui Sun</i>                                                      |    |
| Research on Capacity Ratio of Grid-Forming and Grid-Following Converters in New Energy Stations .....                               | 60 |
| <i>Hanhua Zhang, Yabo Liang, Ningbo Zhang, Hengshan Xu</i>                                                                          |    |
| Study and Simulation of Grid-Connected PV Inverter Control System Based on Model Predictive<br>Control .....                        | 65 |
| <i>Zihong Song, Yang Wang, Zhukui Tan, Molin He, Chang Xu, Mingjun He, Xinyu You</i>                                                |    |
| Research on Islanding Operation and Grid Real-Time Resynchronization Control Strategy of<br>Grid-Forming PV Storage Converter ..... | 70 |
| <i>Xinke Yang, Yanjie Chen, Jun Wang, Haitao Gu, Lei Zhang, Jian Mao</i>                                                            |    |
| Hybrid Current Sharing Method for Multi-Module Quasi-Resonant Single-Stage Converter .....                                          | 76 |
| <i>Fei Li, Wenjie Ma, Ruoxuan Wang</i>                                                                                              |    |
| Boost Mode Optimization of CLLC Resonant Converter for Bidirectional Charger .....                                                  | 82 |
| <i>Jian Liu, Chen Hu, Qianwen Jian, Xiaoguang Jin</i>                                                                               |    |

|                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Energy-DC Voltage Decoupling Control of Modular Multilevel Converters to Enhance the Frequency Support Capability .....                    | 88  |
| <i>Jiale Liu, Weisi Deng, Haohuai Wang, Chonghao Li, Zheyu Li, Le Li, Bo Hu, Donghai Zhu</i>                                               |     |
| A Common Mode Voltage Suppression Strategy for Modular Multilevel Converter Based Multiport System .....                                   | 94  |
| <i>Yao Cai, Yao Pan, Shixing Ding</i>                                                                                                      |     |
| Low-Voltage DC Fault Isolation Method Based on Solid-State Transformer Current Limiting and Circuit Breaker Characteristics .....          | 100 |
| <i>Yuan Gao, Xiaoyong Cao, Chenghui Lin, Dong Liu, Dan Gan</i>                                                                             |     |
| Transformer Protection Method Based on Differential Current Reconstruction and One-Class Classification Technology .....                   | 104 |
| <i>Xu Nuo, Yang Hao, Cui Yijia</i>                                                                                                         |     |
| Research on Online Ice Melting of Phase-Shifting Transformer Transmission Lines Considering Wire Temperature Variations .....              | 110 |
| <i>Zhe Wang, Jiaxin Yuan, Xuzhe Li</i>                                                                                                     |     |
| Analysis of High-Impedance Faults in Distribution Network with Neutral Point Grounded via Low Resistance .....                             | 115 |
| <i>Gaoming Li, Yanting Zhu, Wenjun Zhang, Feijin Peng, Chunlan Yang, Wenhai Zhang</i>                                                      |     |
| Research on Cable Laying Method of Converter Station Based on Three-Dimensional Modeling and Intelligent Monitoring .....                  | 120 |
| <i>Xudong Liu, Sijiang Zhang, Zhiqi Xu, Huaiyu Cheng, Guojie Jiao, Lingjian Meng</i>                                                       |     |
| Mechanistic Investigation and Classification Modeling of Composite Insulator Aging Under UV-Thermal Cross-Aging .....                      | 125 |
| <i>Chengsong Yang, Ruize Tian, Haoran Xiao, Wentao Xue, Yujun Guo, Guangning Wu</i>                                                        |     |
| Reliability Enhancement Method for Directional Protection in Small-Resistance Grounding Systems Considering Phase Deviation Limits .....   | 132 |
| <i>Cong Li, Bing Hu, Dong Chen, Feng Kang, Yuwen Liang, Shuangfeng Chen, Hao Liu</i>                                                       |     |
| Optimization Method for Cable Layout in Substations Considering Temperature Coupling Under Nonlinear Mechanical Load .....                 | 138 |
| <i>Sijiang Zhang, Xudong Liu, Zhiqi Xu, Huaiyu Cheng, Lingjian Meng, Jintao Zhang</i>                                                      |     |
| Research on the State Assessment and Renovation Method for Large Power Grounding Grids .....                                               | 144 |
| <i>Wei Liu, Yong Li, Xinxi Yu, Minghui Bao</i>                                                                                             |     |
| Research on Energy Storage-Based Voltage Sag and Short Interruption Compensation Topology and Control Strategies .....                     | 149 |
| <i>Lixin Wu, Changli Shi, Jingyuan Yin, Qunhai Huo</i>                                                                                     |     |
| On Integrated Optimal Scheduling of Cascade Hydro-Wind-Photovoltaic Based on EGJO .....                                                    | 155 |
| <i>Hua Gao, Jianying Zhang, Xue Zhang, Na Rong, Song Han, Congmei Jiang</i>                                                                |     |
| Study on Aerodynamic Characteristics of Low-Wind-Pressure Positive Feeder of Lanzhou-Urumqi High-Speed Railway Catenary in Gale Zone ..... | 161 |
| <i>Zhaolu Cheng, Tianfu Lai, Zhihua Hao, Shanpeng Zhao, Lichun Yang, Youpeng Zhang</i>                                                     |     |

|                                                                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Research on Stability Control Strategy of Power Systems Based on Spatiotemporal Feature Analysis of Transient Processes .....                                   | 166 |
| <i>Yukun Zhu, Liang Tu, Shufei Li, Xiaoming Wang, Fukun Peng</i>                                                                                                |     |
| Building a Digital Integrated Intelligent Platform for Electric Power Design Based on Knowledge Graphs .....                                                    | 174 |
| <i>Yinshan Guo, Kejian Cao, Huipin Lin</i>                                                                                                                      |     |
| Steel Bar Diameter Detection Based on Voltage Response Model .....                                                                                              | 179 |
| <i>Xiaobin Li, Baojun Liu, Pan Yao</i>                                                                                                                          |     |
| A Generation Capacity-Based Harmonic Emission Allocation Method for Multi-WPP Grid Integration .....                                                            | 186 |
| <i>Jun-Xin Song, Chun-Lien Su, Sanjay Chaudhary, Yun Yu, Yajuan Guan</i>                                                                                        |     |
| Review of Research Status of Distribution Network Investment Optimization .....                                                                                 | 192 |
| <i>Zhilun Wang, Zeqi Wang, Xijun Li, Zhengqiu Liang, Quan Tang</i>                                                                                              |     |
| Optimal Energy Storage Allocation for Photovoltaic Distribution Networks with Electric Vehicles .....                                                           | 197 |
| <i>Kan Zhong, Sixiang Zhao, Zhenyu Jiang, Xin Zhang, Zhijie Wang, Xiaozhou Yang</i>                                                                             |     |
| Identification of Power Supply Areas in Distribution Networks Based on Influence Factors and Minimum Cut Algorithm .....                                        | 204 |
| <i>Zhang Haishun, Zhang Xin, Zhao Dan, Yang Lu, Deng Zhaoshun, Yang Xuetao</i>                                                                                  |     |
| Business Process and Characteristics of Precise Investment in Distribution Network .....                                                                        | 210 |
| <i>Feng Liu, Zeqi Wang, Xiaoqian Lin, Tianyu Jiang, Quan Tang</i>                                                                                               |     |
| Multi-Objective Dynamic Weight Scheduling Method for Power Distribution Network Considering Virtual Energy Storage in Data Center .....                         | 214 |
| <i>Fangfang Zheng, Yujia Huang, Honghai Gao, Siqi Cheng, Xuguang Hu, Qiuye Sun</i>                                                                              |     |
| Theoretical System, Implementation Framework and Key Technologies of Precise Investment in Distribution Networks .....                                          | 220 |
| <i>Xingkai Yong, Yue Huang, Bo Xu, Xiaoqian Lin, Quan Tang</i>                                                                                                  |     |
| Emergency Power Supply Capability Assessment of Microgrids Based on Aggregated Feasible Region .....                                                            | 225 |
| <i>Jiayi Ding, Yuan Li, Shuai Lu, Jingtao Zhao, Shu Zheng, Linli Zhang</i>                                                                                      |     |
| Data-Driven Adaptive Control for Islanded Microgrid with Time Delay .....                                                                                       | 231 |
| <i>Pengxiang Liu, Weitao Yao, Xu Xu</i>                                                                                                                         |     |
| A Novel Hybrid Framework of Optimization and Deep Neural Network for Optimal Networked Multi-microgrids Scheduling Considering Carbon Emmission Reduction ..... | 237 |
| <i>Yaxin Zhang, Qijian Mu, Haoming Li, Yuxin Wen, Nanxi Liu, Xuan Zhao, Guizhen Liu, Jinjia Cao</i>                                                             |     |
| Performance Evaluation of Hybrid Wind-PV-Hydrogen Energy Storage Microgrid Under the Low-Carbon Transformation of Power System .....                            | 244 |
