# TABLE OF CONTENTS

|                                                                                                                                                                                                                |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Sport DB 3.0: Use of Wearables for Cardiac Self-Monitoring During Sport .....                                                                                                                                  | 1  |
| <i>Agnese Sbröllini, Sofia Romagnoli, Antonio Nocera, Micaela Morettini, Ennio Gambi, Laura Burattini</i>                                                                                                      |    |
| Fractal Complexity of Brain Networks: Mapping Criticality by Detrended Fluctuation Analysis .....                                                                                                              | 6  |
| <i>Lorenzo Pini, Sadaf Moaveninejad, Simone Cauzzo, Maurizio Corbetta, Camillo Porcaro</i>                                                                                                                     |    |
| Real-Time Hand Gesture Recognition System with User Identification for Industrial Applications .....                                                                                                           | 12 |
| <i>Marco Esposito, Sara Raggiunto, Luisiana Sabbatini, Alberto Belli, Sara Bruschi, Lorenzo Palma</i><br><i>Emanuele Storti, Stefano Rossini, Paola Pierleoni</i>                                              |    |
| The Impact of Non-Task-Related Neural Activity in EEG-Based Motor Imagery Classification .....                                                                                                                 | 17 |
| <i>Simone Bove, Martino Giaquinto, Gennaro Percannella, Alessia Saggese, Mario Vento</i>                                                                                                                       |    |
| Stay Quiet: Investigating the Effect of Overt Speech on EEG Classification Performance .....                                                                                                                   | 23 |
| <i>Patrick Bings, Niklas Kueper, Elsa Andrea Kirchner</i>                                                                                                                                                      |    |
| Enhancing Decision-Making in Human-Machine Teams .....                                                                                                                                                         | 29 |
| <i>Akashdeep Nijjar, Ittipat Promnorakid, Riccardo Poli, Caterina Cinel, Thomas Reed, Christopher Baker</i><br><i>Stephen Hinton, Stephen Fairclough</i>                                                       |    |
| A Proposal for an Self-Rescue System Based on offline LLM for Minor Injuries after an Earthquake .....                                                                                                         | 35 |
| <i>Francesco Carotenuto, Giovanni Acampora, Aldo Zollo</i>                                                                                                                                                     |    |
| TinyML-Based Hazardous Gas Detection for Intelligent Personal Protective Equipment .....                                                                                                                       | 41 |
| <i>Celina Kudrin-Gusten, Michael Kuhl, Valentin Barth, Hang Yu</i>                                                                                                                                             |    |
| Keeping Balance at Sea and Ashore: Investigating Habituation-Adaptation Dynamics in Postural Control Among Seafarers and Healthy Adults .....                                                                  | 47 |
| <i>Federica Pescaglia, Lorena Guerrini, Carmine Gelormini, Ida Maruotto, Marco Recenti, Hannes Petersen</i><br><i>Halldór Jónsson, Paolo Gargiulo</i>                                                          |    |
| SMOTE and ADASYN to Augment Neuroradiomic Data: A Comparative Analysis .....                                                                                                                                   | 53 |
| <i>Bukhtawar Zamir, Noemi Pisani, Maria Agnese Pirozzi, Maria Teresa Pellecchia, Leandro Donisi</i><br><i>Fabrizio Esposito</i>                                                                                |    |
| Dynamic $\mathcal{T}_{2}^{\ast}$ Mapping of Resting State Functional Connectivity: A Multi-Echo fMRI Approach .....                                                                                            | 59 |
| <i>G. Ponetti, G. Bosello, F. Dono, G. Evangelista, P. Chiacchiaretta, S. Sensi, M. Caulo, M. G. Perrucci</i><br><i>A. Ferretti</i>                                                                            |    |
| Impact of Brain Parcellation on MRI-derived Neurovascular Coupling Estimates Across Large-Scale Functional Networks .....                                                                                      | 65 |
| <i>Federica Franza, Mario Cirillo, Marcello Silvestro, Francesca Trojsi, Antonio Russo, Fabrizio Esposito</i><br><i>Maria Agnese Pirozzi</i>                                                                   |    |
| Exploring Heart Rate Variability During a Postural Control Task using Virtual Reality and a Moving Platform .....                                                                                              | 71 |
| <i>Vittorio Santoriello, Sara Collodel, Lorena Guerrini, Federica Pescaglia, Halldór Jónsson</i><br><i>Hannes Petersen, Francesca Angelone, Carlo Ricciardi, Francesco Amato, Maria Romano, Paolo Gargiulo</i> |    |
| Deceptive Beauty: Evaluating the Impact of Beauty Filters on Deepfake and Morphing Attack Detection .....                                                                                                      | 77 |
| <i>Sara Concas, Simone Maurizio La Cava, Andrea Panzino, Ester Masala, Giulia Orrú, Gian Luca Marcialis</i>                                                                                                    |    |

|                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Adversarial Machine Learning in Cyber Social Security .....                                                                                       | 83  |
| <i>Vita Santa Barletta, Christian Catalano, Mattia Colucci, Samuele del Vescovo, Antonio Piccinno</i>                                             |     |
| AI-based Detection of Negative Digital Acts: The Case of Cyberaggression .....                                                                    | 89  |
| <i>Alessia Monaco, Fabrizia Devito, Luca Musti</i>                                                                                                |     |
| Touch Dynamics and Continuous Authentication: Towards Mobile Security with New Innovative Algorithms and Features .....                           | 95  |
| <i>Stefania Bello, Vincenzo Gattulli, Donato Impedovo</i>                                                                                         |     |
| Unintended Identification in HAR Systems: Evaluating Privacy Risks .....                                                                          | 101 |
| <i>Gianpaolo Perelli, Jefferson David Rodriguez Chivata, Sara Concas, Giulia Avvisati, Massimo Capozza</i>                                        |     |
| <i>Marco Micheletto, Giulia Orrù, Gian Luca Marcialis</i>                                                                                         |     |
| A Machine Learning Pipeline for Evaluating Pre-Stimulus EEG Features and Their Impact on Post-Stimulus TMS-EEG Responses .....                    | 107 |
| <i>Sadaf Moaveninejad, Antonio Luigi Bisogno, Simone Cauzzo, Maurizio Corbetta, Camillo Porcaro</i>                                               |     |
| Enhancing Brain-Computer Interfaces: Machine Learning Analysis of Alpha-Beta ERD and Fractal Dimension in Motor Imagery EEG .....                 | 113 |
| <i>Sadaf Moaveninejad, Franca Tecchio, Francesco Ferracuti, Sabrina Iarlori, Andrea Monteriù</i>                                                  |     |
| <i>Camillo Porcaro</i>                                                                                                                            |     |
| Power Spectra and Fractal Complexity in Neurocognitive Disorders: A QEEG Study Protocol .....                                                     | 119 |
| <i>Giulia Negro, Michele Rossi, Paola Cassini, Payam Tabae Damavandi, Tino Emanuele Poloni</i>                                                    |     |
| <i>Camillo Porcaro</i>                                                                                                                            |     |
| Exploring Subcortical and Cortical Neural Complexity in Migraine: A Fractal and Spectral Analysis Approach .....                                  | 125 |
| <i>Camillo Porcaro, Sadaf Moaveninejad, Romain Aubonnet, Simone Cauzzo, Karolina Armonaite, Sara Gilli</i>                                        |     |
| <i>Giorgio Di Lorenzo, Gianluca Coppola</i>                                                                                                       |     |
| Enhanced EEG Complexity and Spectral Alterations in Migraine: A PSD and Higuchi's Fractal Dimension Analysis by ICA and PCA Spatial Filters ..... | 130 |
| <i>Camillo Porcaro, Sadaf Moaveninejad, Romain Aubonnet, Sara Gilli, Gianluca Coppola</i>                                                         |     |
| <i>Giorgio Di Lorenzo</i>                                                                                                                         |     |
| A Novel Algorithm based on Ankle-Mounted IMU Configuration for Computing Spatiotemporal Parameters .....                                          | 135 |
| <i>Giuseppe Prisco, Alfonso Maria Ponsiglione, Fabrizio Esposito, Sergio Lerma Lara, Paolo Gargiulo</i>                                           |     |
| <i>Antonella Santone, Mario Cesarelli, Francesco Amato, Leandro Donisi</i>                                                                        |     |
| Validity of an Automatic Approach for Acceleration Signal Segmentation during Weight Lifting .....                                                | 141 |
| <i>Giuseppe Prisco, Maria Agnese Pirozzi, Fabrizio Esposito, Antonella Santone, Mario Cesarelli</i>                                               |     |
| <i>Paolo Gargiulo, Francesco Amato, Leandro Donisi</i>                                                                                            |     |
| Assessing the Consistency of EEG Connectome Topology Across Different Parcellation Approaches .....                                               | 147 |
| <i>Marianna Chianese, Federica Pescaglia, Lorena Guerrini, Carmine Gelormini, Ida Maruotto</i>                                                    |     |
| <i>Gylfi Örn Pormar, Fabrizio Esposito, Leandro Donisi, Paolo Gargiulo</i>                                                                        |     |
| Exploring Center of Pressure Dynamics Across Age and Gender During Complex Postural Challenges .....                                              | 153 |
| <i>Lorena Guerrini, Vittorio Santoriello, Federica Pescaglia, Alfonso Maria Ponsiglione, Vincenzo Minutolo</i>                                    |     |
| <i>Hannes Petersen, Halldór Jónsson, Paolo Gargiulo</i>                                                                                           |     |

|                                                                                                                                                                                |     |
