# TABLE OF CONTENTS

|                                                                                                                                                  |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Impact of Measurement Noise and Fitting Window Placement on Single-Diode PV Parameter Extraction .....                                           | 1  |
| <i>Oumaima Mesbahi, Daruez Afonso, Fernando M. Janeiro, Frederico Grilo, Mouhaydine Tlemçani</i>                                                 |    |
| Multi-Objective Optimization for Thermally-Constrained Energy Management in EV Hybrid Systems .....                                              | 7  |
| <i>Fatimazahra Asnai, Hamid Ouadi, Amine Yazidi, Saida El Bakali</i>                                                                             |    |
| Automated Detection of Aircraft Surface Defects Using Deep Learning with Integrated Human Validation .....                                       | 13 |
| <i>Oumaima Mesbahi, Souhila Chabane, Nuno Pereira Santos, Adriano Del Pino Lino, Mouhaydine Tlemçani</i><br><i>José Manuel Lourenço Da Saúde</i> |    |
| Nearly Optimal Control of Unknown Input-constrained Systems via Integral Reinforcement Learning with Exploration and Experience Replay .....     | 19 |
| <i>Theodoros Tsemperis, Charalampos P. Bechlioulis</i>                                                                                           |    |
| Continuous-time Prescribed Performance Gradient Tracking Algorithm for Distributed Constrained Convex Optimization .....                         | 27 |
| <i>Spyridon Garmpis, Charalampos P. Bechlioulis</i>                                                                                              |    |
| Vehicle center of gravity estimation without prior knowledge of vehicle parameters using a recursive least squares approach* .....               | 35 |
| <i>Hamza Benadada, Michael Di Loreto, Damien Eberard, Paolo Massioni</i>                                                                         |    |
| Robust State-of-Charge Estimation for Lithium-Ion Batteries: From Model-Based to Data-Driven Approach .....                                      | 43 |
| <i>Ali Margal, Soukaina El Daoudi, Abderrazzak El Abdallaoui, Abdelmounaim Khallouq, Asma Karama</i>                                             |    |
| Generalized modulating functions based state estimation for a class of linear systems using biased noisy outputs .....                           | 49 |
| <i>Da-Yan Liu, Yan-Qiao Wei, Yassamine Zoubaa, Driss Boutat, Ismail Boumhidi</i>                                                                 |    |
| Nonlinear State Estimation using KKL Observer Based on PINN with Modulating Functions .....                                                      | 55 |
| <i>Jing Bai, Da-Yan Liu, Olivier Gibaru, Eric Nyiri</i>                                                                                          |    |
| Explainable Deep Learning for Voltage Disturbance Classification in Microgrid AC Bus Using LSTM and SHAP .....                                   | 61 |
| <i>Ismael Jrhilifa, Hamid Ouadi, Hassan Rafia, Abdelilah Jilbab, Nada Mounir, Youssra Lahrarti</i>                                               |    |
| Differential Flatness Analysis of Tethered Kite Dynamics Along Lemniscate Trajectories for Wind-Assisted Ship Propulsion .....                   | 67 |
| <i>Monika Pasquali, Christophe Farges, Tudor-Bogdan Airimitoae, Patrick Lanusse</i>                                                              |    |
| Compare Analysis of Q-learning Off-policy Control and Discrete-Continuous Control .....                                                          | 73 |
| <i>Daniil D. Devyatkin, Alexander V. Yurchenkov</i>                                                                                              |    |
| Mean Anisotropy Level of 2D Linear Discrete Filter* .....                                                                                        | 79 |
| <i>Alexander D. Titov, Alexander V. Yurchenkov, Arkadiy Yu. Kustov</i>                                                                           |    |
| Fault-Tolerant Static Output Feedback Control for Ship Diesel Engine Injection Systems .....                                                     | 84 |
| <i>Abderrahim El-Amrani, Mustapha Ouladsine, Bouchra Ananou</i>                                                                                  |    |

|                                                                                                                                              |     |
|----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Asymptotic Stability and Stabilization of Positive Fractional-order Takagi-Sugeno Fuzzy Systems with Delays .....                            | 90  |
| <i>Laila Dami, Khalid Badie, Abdellah Benzaouia</i>                                                                                          |     |
| Stabilization of Fuzzy Fractional-order Takagi-Sugeno Positive Systems with Delays and Bounded Control .....                                 | 96  |
| <i>Laila Dami, Khalid Badie, Abdellah Benzaouia</i>                                                                                          |     |
| The Asymptotic Representation of Linear Dynamical Anisotropy-based Controller in Case of Small Values of the Mean Anisotropy $\dagger$ ..... | 102 |
| <i>Ivan R. Belov, Arkadiy Y. Kustov</i>                                                                                                      |     |
| Design considerations based on stability for a class of TCP algorithms .....                                                                 | 108 |
| <i>Sreekanth Prabhakar, Gaurav Raina</i>                                                                                                     |     |
| A Robust Adaptive Nonlinear Controller for a MEMS Gyroscope with Position Dependent Error .....                                              | 114 |
| <i>Mehmet Emin Duran, Eyup Okumus, Fatih Adiguzel</i>                                                                                        |     |
| Implementation of a Genetic Algorithm Optimized Active Disturbance Rejection Control for an Isolated DFIG-Based Wind Energy System .....     | 120 |
| <i>Najoua Mrabet, Sami Labdai, Larbi Chrifi-Alaoui, Chirine Benzazah, El Akkary Ahmed, Chakib Mohssine</i>                                   |     |
| Linearization of Multi-band RF Transmitters Based on Direct Learning Architecture for LTE/5G Applications .....                              | 126 |
| <i>Zixiao Yang, Smail Bachir, Claude Duvanaud</i>                                                                                            |     |
| New study on existence, uniqueness and trajectory controllability of fractional neutral-type delayed system with nonlocal conditions .....   | 132 |
| <i>Om Prakash Kumar Sharma, Ramesh Kumar Vats, Parveen Kumar, Ankit Kumar Nain</i>                                                           |     |
| Study on Stabilization of a Bench-Quadcopter System Using a Covariance Controller .....                                                      | 138 |
| <i>Maxim A. Nikolaev, Rinat R. Ryakhimov, Alexander V. Yurchenkov</i>                                                                        |     |
| Detection and Classification of Aircraft Structural Defects for Database Creation and Findings Identification .....                          | 144 |
| <i>Souhila Chabane, Oumaima Mesbahi, Nuno Pereira Santos, Mouhydine Tlemcani, Jose Lourenco de Saude</i>                                     |     |
| Comparison of DOA Estimation Methods Based on Sparse and Noncircular Covariance in a Challenging Environment .....                           | 150 |
| <i>Ilham Mahiri, Miloud Frikel, Saïd Safi, Mathieu Pouliquen</i>                                                                             |     |
| Robust Discrete-Time Control of a Delta Parallel Robot: DLQR and Sliding Mode Approaches .....                                               | 158 |
| <i>Awatef Yahyaoui, Wafa Boukadida, Anouar Benamor, Chrifi-Alaoui Larbi</i>                                                                  |     |
| AI-Based Approaches for Predicting Electricity Demand at the Duques de Soria Campus .....                                                    | 164 |
| <i>Ghada Amami, Alberto Redondo-Plaza, Luis Hernández-Callejo, Moez Allouche, Mariem Ghamgui Mohamed Chaabane</i>                            |     |
| Does model fidelity benefit tracking performance? A case study on the Quanser 3DoF Hover .....                                               | 170 |
| <i>Azadeh Jirdehi, Damiano Rotondo, Kristian Thorsen</i>                                                                                     |     |
| Concept of wave-based control extension with force disturbance treatment .....                                                               | 176 |
| <i>Zdenek Neusser, Petr Benes, Michael Valasek</i>                                                                                           |     |

|                                                                                                                                                 |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| State Feedback Design using Standard Forms for Load Frequency Control .....                                                                     | 182 |
| <i>Mustafa Nalbantoglu, Ibrahim Kaya, Yavuz Güler</i>                                                                                           |     |
| Polynomial Generalized Predictive Control for a Two-Rotor Aerodynamic System .....                                                              | 188 |
| <i>Abdelmounaim Khallouq, Asma Karama, Kenza Telbissi, Ali Margal, Abderrazzak El Abdallaoui</i><br><i>Soukaina El Daoudi</i>                   |     |
| Towards Efficient Smart Grid Operation: A Networked Discrete Event System Perspective .....                                                     | 193 |
| <i>Meriam Ghajdani, Mohammed Msaaf, Rafik Channa</i>                                                                                            |     |
| Implicit Generalized Predictive Control of a Wastewater Treatment Plant: Application to a biofiltration<br>process simulator .....              | 198 |
| <i>Yasmine Siahmed, Régis Ouvrard, Driss Mehdi, Thierry Poinot, Ahlem Filali, Younes Ajeddig</i>                                                |     |
| Robust control design for uncertain cyber-physical systems under DoS attacks .....                                                              | 204 |
| <i>Naoual Armi, T. Zoulagh, M. Charqi, A. Aboulkassim, S. Kririm, B. Boukili</i>                                                                |     |
| Multi-objective Ant Lion Optimizer for Optimal Distribution Network Reconfiguration .....                                                       | 212 |
| <i>Haifa Souifi, Hsan Hadj Abdallah</i>                                                                                                         |     |
| Aircraft load estimation using a structured $H_\infty - H_2$ approach .....                                                                     | 219 |
| <i>Matheus Lopes Silva, Valérie Pommier-Budinger, Yves Briere, Robin Vernay, Haythem Bouzouita</i>                                              |     |
| Uncertainty tolerant fuzzy observer-based control for delayed nonlinear systems .....                                                           | 226 |
| <i>Azeddine Elmajidi, Elhousseine Elmazoudi, Jamila El Alami, Anas Hatim, Assia Saydtahiri</i>                                                  |     |
| Improving remote sensing and solar photovoltaic system diagnosis efficiency with AI and IoT: An<br>exploratory review .....                     | 233 |
| <i>Moussa Gouhail, Mohamed Gouhail, El Houssin El Mazoudi, Zouhair Elamrani Abou Ellassad</i>                                                   |     |
| Hybrid Software-Based Speed Sensors for Three-Phase Electrical Motor .....                                                                      | 241 |
| <i>El Daoudi Soukaina, Halimi Hicham, Lazrak Loubna, Badie Khalid, Margal Ali, El Abdallaoui Abderrazzak</i><br><i>Karama Asma</i>              |     |
| Renewable Energy-Assisted Alkaline Electrolyzer: Dynamic Simulation and Hydrogen Production<br>Analysis .....                                   | 247 |
| <i>Zakaria Ibrahimi, Fatima Mokhliss, El Ayachi Chater, Najma Laaroussi</i>                                                                     |     |
| PV Pumping System with Battery Storage for Sustainable Irrigation .....                                                                         | 254 |
| <i>Fatima Mokhliss, Zakaria Ibrahimi, El Ayachi Chater, Larbi Chrifi-Alaoui, Najma Laaroussi</i>                                                |     |
| Double-loop prescribed performance control in autonomous surface vessels* .....                                                                 | 261 |
| <i>Antara Sarkar, Basireddy Sandeep Reddy, Santosha Kumar Dwivedy</i>                                                                           |     |
| Torque Vectoring based on Wheel Slip Control using Reference Offset Accumulation for Electric<br>Vehicles: A Single Motor on Each Axle .....    | 267 |
| <i>Dong-Hyun Kim, Jaeheun Kim, Hyunwook Ryu, Sanghyuk Kim, Minsu Kim, Jeongmin Moon, Wonjae Lee</i>                                             |     |
| $H_\infty$ State Feedback Fuzzy Control of Rail Injection Systems in Ships .....                                                                | 273 |
| <i>Abderrahim El-Amrani, Mustapha Ouladsine, Bouchra Ananou, E. M. El Adel</i>                                                                  |     |
| MagnoStromNet: A Dual-Stream Attention-Based Deep Learning Framework for Predicting Power<br>Grid Disruption Risk from Solar Storm Events ..... | 278 |
| <i>Hasin Almas Sifat, KoushikBiswas Arko, Md. Mortuza Ahmmmed, Bishwajit Banik Pathik</i>                                                       |     |

|                                                                                                                                 |     |
