# TABLE OF CONTENTS

|                                                                                                                                                                                                    |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Decomposition and Coordination-Based Parallel Power Flow Calculation for Large-Scale Multi-Regional Interconnected Power System .....                                                              | 1  |
| <i>Xueshun Ye, Kaiyuan He, Ying Tang, Henglong He</i>                                                                                                                                              |    |
| Ultra-Short-Term Forecasting for Regional Distributed Photovoltaics Cluster Output Based on Localized Meteorological Interpolation and Enhanced Spatio-Temporal Graph Convolutional Networks ..... | 8  |
| <i>Tiancheng Qian, Zefan Chen, Yajie Tang, Jincheng Zhu, Yitao Hu, Diyang Gong</i>                                                                                                                 |    |
| Development of an Intelligent Agent for Optimizing Alarm Deviation in Equipment Health Models Based on Large Language Models .....                                                                 | 17 |
| <i>Wenchao Yang, Xiaohu Yang, Hebin Ren, Chen Qing, Tao Zhang, Na Yu</i>                                                                                                                           |    |
| Real-Time Detection and Adaptive Damping Control of Near-Fundamental-Frequency Oscillations in MMC-HVDC Integrated Renewable Energy Systems .....                                                  | 27 |
| <i>Jieyi Xu, Fangqun Liao, Meng Li, Hang Liu, Xilin Yan, Xiaorong Xie</i>                                                                                                                          |    |
| AC-DC Coupling Hierarchical Control of DC Microgrid Based on Converter Impedance Reshaping .....                                                                                                   | 33 |
| <i>Jinsong Li, Bo Yang, Qing Yang, Xiaoyu Li, Ze Song, Shuai Lu</i>                                                                                                                                |    |
| Identification of Small-Disturbance Stability Boundaries for Inverter Clusters in High-Proportion Photovoltaic Grids Using Probabilistic Graphical Models .....                                    | 38 |
| <i>Wei Ding, Chenglong Sun</i>                                                                                                                                                                     |    |
| Adaptive Second-Order Sliding Mode Control Strategy for Microgrids in Islanded Mode .....                                                                                                          | 42 |
| <i>Yulong Wang, Huaihao Xu, Junshuo Chen, Changhao Zhao, Sheng'an Cheng</i>                                                                                                                        |    |
| Mitigation Measures for Electromagnetic Interference in the Secondary Grounding Grid of Converter Station Synchronous Compensator Buildings .....                                                  | 46 |
| <i>Wenqiang Zhao, Jun Zhou, Fengrun Wang, Tianqi Song, Zhitong Tian, Hailiang Lu</i>                                                                                                               |    |
| Black Start Coordinated Control of a Power-Sustaining Microgrid Based on NSGA-III Multi-Objective Optimization .....                                                                               | 51 |
| <i>Chang Su, Jiayu Liu, Fei Sha, Yukai Liu, Wenshuai Zhang</i>                                                                                                                                     |    |
| Analysis of fgOTN Technology in the Application Prospect of Power System Services .....                                                                                                            | 55 |
| <i>Lishuai He, Liang Cao, Xin Ye, Hejun Jing, Yang Zhu, Lu Jin, Hanlan Wang, Yanting Huo, Chengbo Huang</i>                                                                                        |    |
| Research on Grid-Source Coordination Modeling and Simulation Methods Based on PSASP-ADPSS .....                                                                                                    | 62 |
| <i>Benhong Wang, Bin Zhu, Jiang Guo, Yifeng Gu, Fangqing Zhang</i>                                                                                                                                 |    |
| Multi-Time-Scale Tracking and Sustained Response Capability Assessment for Virtual Power Plants .....                                                                                              | 70 |
| <i>Song Wang, Xubing Xiao, Jialin Mao, Pengfei Gao, Yunqiang Si</i>                                                                                                                                |    |
| Probability Load Flow Calculation Considering Wind Speed Correlation Based on Improved Cumulant Method .....                                                                                       | 76 |
| <i>Zhengyu Wang, Fang Chen, Yanyi Fu</i>                                                                                                                                                           |    |
| Supply Capacity Enhancement Method for Distribution Networks Based on Mobile Energy Storage .....                                                                                                  | 82 |
| <i>Shanshan Wang, Jiazheng Sun, Hengyu Liu, Ziqi Wang, Gechen Bian, Zhi Zhang</i>                                                                                                                  |    |

|                                                                                                                                                  |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Research on Low Carbon Economic Dispatch Strategies of Virtual Power Plants Considering Carbon Balance .....                                     | 86  |
| <i>Zenghui Xi, Tangyun Xu, Zhijian Qu, Yi Wu, Yuanhao Gao</i>                                                                                    |     |
| Comprehensive Control Strategy for Enhancing LVRT Capability in VSG Systems .....                                                                | 92  |
| <i>Jianmao Ye, Shan Huang, Hongru Liu, Busong Zhang, Chuanliang Xiao</i>                                                                         |     |
| Optimized Scheduling of Integrated Energy Systems in Industrial Parks for Low-Carbon Economic Operation .....                                    | 101 |
| <i>Sike Duan, Yuanchun Wang, Gang Wang, Chengjin Zhang</i>                                                                                       |     |
| Inertia and Damping Cooperative Control Technology for DC Microgrids .....                                                                       | 108 |
| <i>Yuan Fu, Li Tao</i>                                                                                                                           |     |
| Thermodynamic Performance Analysis of Combined Heat and Power System with Multi-Mode Heating .....                                               | 112 |
| <i>Chao Wu, Mingliang Wang, Yongfeng Xue, Peng Xu, Mingyang Zou, Honggang Pan, Jingchao Sun</i>                                                  |     |
| Centralized-Local Voltage Control Strategy for Low-Voltage PV Substations Considering Energy Storage Integration .....                           | 119 |
| <i>Wenchao Ma, Qun Yu</i>                                                                                                                        |     |
| Grid Stability Analysis Based on the CNN-Transformer Hybrid Architecture .....                                                                   | 124 |
| <i>Yantang Wang</i>                                                                                                                              |     |
| Resonance Identification from Cross-Level Harmonic Data Correlation .....                                                                        | 128 |
| <i>Xiaoming Wang, Wenguang Zhao, Bin Xu, Hao Zheng, Min Gao, Menghan Liu</i>                                                                     |     |
| Efficient Uncertain State Assessment of Power Systems by Extended Basis-Adaptive Sparse Polynomial Chaos Expansion .....                         | 134 |
| <i>Qing Sun, Junzhou Wang, Sui Peng, Xingyu Lin, Junjie Tang, Wenyuan Li</i>                                                                     |     |
| Optimization Scheduling Scheme and Characteristic Analysis Considering Flexible Retrofits of Combined Heat and Power Units .....                 | 141 |
| <i>Yangyang Ge, Shubo Hu, Bing Xie, Xintong Ma, Pupu Chao, Weixing Li</i>                                                                        |     |
| Frequency-Optimal Control Strategy for Power Systems Considering the Frequency-Regulation Characteristics of Combined Heat and Power Units ..... | 145 |
| <i>Shubo Hu, Xiaotong Zhang, Quan Qi, Cijian Xie, Pupu Chao, Weixing Li, Hongbo Xue</i>                                                          |     |
| Optimization of Three-Stage Current Protection Relay Settings in 10 kV Distribution Networks .....                                               | 149 |
| <i>Md Imran Hossain, Longjie Li</i>                                                                                                              |     |
| Multi-Source Data Fusion-Based Synthesis and Correlation Analysis of Power Grid Equipment Events .....                                           | 153 |
| <i>Ruohan Li, Zhenhong Sun, Yicen Liu, Xiaojiang Liu</i>                                                                                         |     |
| Flexibility Retrofit Planning for Power-Heat Systems Considering Deep Peak Shaving and Heat-Electricity Decoupling .....                         | 158 |
| <i>Jinfang Zhang, Fuqiang Zhang, Meng Wang, Mingxin Zhao, Xiong Wu, Yinan Hao</i>                                                                |     |
| Research on Source-Load Interaction Regulation Strategy Based on Wind-Solar-Gas-Storage Hybrid System .....                                      | 165 |
| <i>Jinning Yong, Yang Li</i>                                                                                                                     |     |
| Economic—Emission-Voltage Multi—Objective Dispatch for Microgrids via Archive-Guided PSO .....                                                   | 170 |
| <i>Ziyang Zhang, Hairong Zou</i>                                                                                                                 |     |

|                                                                                                                                              |     |
|----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Research on Digital Twin-Driven Deep Reinforcement Learning for Automatic Voltage Control in Power Systems .....                             | 176 |
| <i>Maolin Han, Xudong Pang, Hao Xu, Wanzhou Cui</i>                                                                                          |     |
| Research on the Optimization Strategy of Daily Market Bidding for Cogeneration Units Based on Information Gap Decision Theory .....          | 182 |
