# TABLE OF CONTENTS

|                                                                                                                       |    |
|-----------------------------------------------------------------------------------------------------------------------|----|
| Complexity Evaluation of Certificate-Based Proxy Signatures .....                                                     | 1  |
| <i>Saddam Hussain, Ali Tufail, Muhammad Asghar Khan, Farhan Ullah</i>                                                 |    |
| New binary quantum codes from Hermitian dual-containing Quasi-cyclic codes .....                                      | 7  |
| <i>Liangdong Lu, Gaochi Zhang, Ganyu Feng, Wenzheng Ma</i>                                                            |    |
| Multi-institution Searchable Encryption Based on Lattice .....                                                        | 12 |
| <i>Zhihao Cao, Mingming Jiang, Yudi Li, Jun Ren</i>                                                                   |    |
| A Research on the Application Comparison of NTRU in Typical Fully Homomorphic Encryption Scheme .....                 | 19 |
| <i>Xu Zhao, Zheng Yuan</i>                                                                                            |    |
| Entropy to Ethics: A Unified Information-Theoretic Framework for Interpretable Healthcare Data Mining .....           | 23 |
| <i>Soumyodeep Mukherjee</i>                                                                                           |    |
| Research on Robotic Manipulator Systems Based on Improved Denavit-Hartenberg Parameters .....                         | 27 |
| <i>Chengmin Zhao, Hongjie Yu, Haojie Sun</i>                                                                          |    |
| Survey on Relay Transmission Strategies in Multi-Hop Networks: Security Enhancement via Artificial Intelligence ..... | 33 |
| <i>Yuyang Xie</i>                                                                                                     |    |
| Blockchain-Based Revocable Multi-Authority Weighted Attribute-Based Encryption Scheme for EHR Sharing .....           | 38 |
| <i>Taiyang Li, Yuyan Guo, Ziyao Peng, Mingming Jiang, Ming Xie</i>                                                    |    |
| Attribute-Based Encryption with Outsourced Decryption and Key Escrow-Free for Cloud .....                             | 47 |
| <i>Ziyao Peng, Yuyan Guo, Taiyang Li, Mingming Jiang</i>                                                              |    |
| Multimodal Sentiment Analysis Based on Incomplete Data .....                                                          | 52 |
| <i>Chuang Yang, Jingjing Liu, Yanna Sun, Yixuan Yang, Jianrui Zhang</i>                                               |    |
| A Study On The Multi-Objective Milling Parameter Optimization Using GADVSG And BPNN-Adam Network Model .....          | 57 |
| <i>Jialun Peng, Ming Chen, Shijin Zhang, Zirui Li, Hua Yang</i>                                                       |    |
| Image Inpainting via a Generative Adversarial Network Integrating Multi-Scale and Channel Attention .....             | 63 |
| <i>Yifan Ma, Honghui Fan, Wenhe Chen, Hongjin Zhu</i>                                                                 |    |
| Graph-based Multi-granularity Semantic Enhanced Chinese Medical Question Answering Matching Model .....               | 68 |
| <i>Qing Ren, Zhiwen Li</i>                                                                                            |    |
| A Road Image Segmentation Method Based on Deeplabv3+ Dynamic Information Mapping and Edge Enhancement .....           | 73 |
| <i>Chang Lu, Wei He, Qing Zhao, Wenhe Chen, Zhenhua Pan, LuZeng</i>                                                   |    |
| Gaussian Splatting in the AI Era: A Survey .....                                                                      | 79 |
| <i>Shuaitao Fan, Lu Zeng, Lunning Zhang, Wenhe Chen, Zhenhua Pan</i>                                                  |    |

|                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------|-----|
| Robust Verbal Reinforcement Learning for Language Agents .....                                                             | 88  |
| <i>Yi Wang, Peilin Cai</i>                                                                                                 |     |
| IKEv2-FV: A BIP-Based Formal Verification Framework for the IKEv2 Protocol .....                                           | 93  |
| <i>Chuan Li, Yang Zhang, Xia Yang, Rui Yao, Wensheng Guo, Haiyong Sun</i>                                                  |     |
| A Multi-Objective Optimization Method using DNN-NSGA-II for Recommending Milling Process<br>Parameters .....               | 101 |
| <i>Jiajie Cui, Xuao Hou, Ming Chen, Shijin Zhang, Jialun Peng</i>                                                          |     |
| HSI-MFF:Trajectory Prediction with Hierarchical Scene Interaction and Multi-Scale Feature Fusion .....                     | 107 |
| <i>Yuqin Xu, Ming Xu, Qin hao Wu, Haitao Zhou, Zhixuan Shen, Shiyao Li</i>                                                 |     |
| Big Data-Driven Social Network Analysis Methodology for Implicit Feedback in Online Platforms .....                        | 112 |
| <i>Changdi Li, Wenhan Ji, Chengge Duan, Minze Wang, Yanfeng Wu, Xinggao Liu</i>                                            |     |
| Critical observability of discrete event systems under dynamic event observation .....                                     | 117 |
| <i>Nan Wang, Liyun Tong, Hong-Xiang Hu</i>                                                                                 |     |
| Dynamic Prediction Framework Based on Retrieval-Augmented Generation .....                                                 | 122 |
| <i>Tao Liu, Yuyang Wang, Ping Zhang, Yunsheng Mao, Lixin Lu</i>                                                            |     |
| Research on Tobacco Ball-and-Stick Network Model Based on Bayesian Optimization .....                                      | 129 |
| <i>Haoyu Fang, Chen Xia, Hu Fan, Fanda Pan, Xuefeng Gao, Kaixuan Jiao, Tengfei Bian, Shihao Hu<br/>Kai Shen</i>            |     |
| Convergence Analysis and Extensions for the Weighted-Median Opinion Dynamics under Synchronous<br>Updates .....            | 134 |
| <i>Weipeng Wu, Shuping Wang, Hong-Xiang Hu</i>                                                                             |     |
| De-identification in Autonomous Driving: Methods and Trends .....                                                          | 139 |
| <i>Shiyu Chen, Munkhdelgerekh Batzorig, Kangbin Yim</i>                                                                    |     |
| Research on Anomaly Detection Methods for Imbalanced Network Traffic in Industrial Control<br>Systems .....                | 144 |
| <i>Yao Li, Rui Li, Bao Zhu, Jun He</i>                                                                                     |     |
| The Evolution Analysis of Opinion Dynamics under Asynchronous Update Strategy in Cooperation<br>Competition Networks ..... | 150 |
| <i>Haozhe Zhang, Xiao Zhong, Hong-Xiang Hu</i>                                                                             |     |
| Cotton color grading detection based on improved MobileNetV4 .....                                                         | 155 |
| <i>Lunning Zhang, Wei He, Siyi Tian</i>                                                                                    |     |
| An Efficient Distortion Cost Function Design for JPEG Image Steganography using Quaternion<br>Representation .....         | 162 |
| <i>Zixuan Zhang, Qingliang Liu, Shuguo Yang, Wenkang Su, Chenzi Yang</i>                                                   |     |
| Deep Learning-Based Channel Estimation for MIMO Systems .....                                                              | 167 |
| <i>Yan Yang, Jinjin Liu</i>                                                                                                |     |
| Video-Based Estimation of Respiratory Rate via Shoulder Movement Analysis .....                                            | 173 |
| <i>Shuxiang Zhang, Ruining Tao, Dandan Zhang, Benliang Zhu, Gaofei Zhu, Hao Yang</i>                                       |     |

|                                                                                                                                    |     |
|------------------------------------------------------------------------------------------------------------------------------------|-----|
| Fast and Labor-Efficient Visual Algorithm for Automated Reading of Water Treatment Instrumentation .....                           | 178 |
| <i>Lei Chen, Hao Yang, Tengfei Zhang, Ya Wu</i>                                                                                    |     |
| Closed-Loop Safety Inspection Application via Embodied Robots .....                                                                | 183 |
| <i>Hao Yang, Ruining Tao, Shuxiang Zhang, Lei Chen, Tengfei Zhang, Minyu Liu, Haowen Wang, Ya Wu</i>                               |     |
| Privacy-Preserving Intelligence-based Reinforcement Learning for Large Language Model via Homomorphic Encryption .....             | 188 |
| <i>Feiyang Wu, Xiaoqiang Sun, Zhiwei Sun, Wei Liu, Zoe L. Jiang</i>                                                                |     |
| Inverse Dynamics Control of a Robotic Arm on an Autonomous Aerial Platform with Coupling Compensation .....                        | 195 |
| <i>Kaihang Yang, Yibo Zhang, Bin Xu, Wei Fan, Tianfu Ai, Hua Zhu, Giuseppe Carbone</i>                                             |     |
| Secure Multi-party Computation-based Whale Optimization Method for Deep Learning Models .....                                      | 202 |
| <i>Shijin Peng, Linlin Zhang, Hui Gao, Bin Zhou, Yibo Zhu, Xinghua Zhou, Zehui Zhang</i>                                           |     |
| MambaGas: A Mamba-Based Model for Daily Natural Gas Consumption Forecasting .....                                                  | 207 |
| <i>Lei Sun, Yan Ji, Chengyuan Zhu</i>                                                                                              |     |
| An Efficient Training Strategy for Deep Learning-based Spatial Image Steganalysis Models Across Secure Payloads Stego Images ..... | 212 |
| <i>Wenxu Liu, Jiwei Tian, Qingliang Liu, Wenkang Su, Shuguo Yang, Jian Zhang, Chenzi Yang</i>                                      |     |
| MUSE-Risk: A Multimodal Fusion-Based Security Risk Assessment Model for Sensitive Data Flow .....                                  | 217 |
| <i>Qi Meng, Zhipeng Meng, Yun Dong, Qi Chen, Xuhua Ai</i>                                                                          |     |
| YOLOv12-RAG-Qwen Hybrid Framework for Classroom Behavior Analysis .....                                                            | 222 |
| <i>Cong Huang, Hairong Ji, Peifeng Liang, Hui Gao, Mengqiao Li, Marun Rong</i>                                                     |     |
| Research on Ancient Scripts Image Retrieval Based on Vector Database .....                                                         | 227 |
| <i>Zhaoran Dong, Boyong Wang, Jing Xiong, Bang Li, Xiaofan Wang</i>                                                                |     |
| Research on the Security of SRAM base FPGAs in the Era of Artificial Intelligence .....                                            | 232 |
| <i>Min Zheng, Chunpeng Wu, Ke Chang, Zhaogang Han, Weiwei Liu</i>                                                                  |     |
| Interactive Hair Segmentation: Combining SAM and U-Net for Robust Image Processing .....                                           | 237 |
| <i>Shanqi Gu, Zihan Zhang, Zefeng Wang, Hongda Chen</i>                                                                            |     |
| A Text Entailment-Based Approach for Cybersecurity Entity Relation Extraction .....                                                | 245 |
| <i>Kai Liu, Haoran Li, Kai Li, Sheng Zhang, Zhaoyun Ding, Weiming Zhang</i>                                                        |     |
| Application of Rainbow-based Reinforcement Learning into Transient Stability Emergency Control .....                               | 253 |
| <i>Pei Zhang, Chenyu Liu, Yuan Zeng, Wei Xu, Weilun Ni, Pengfei Song</i>                                                           |     |
| AI-Joint-IPS: Join AI-Driven and IPS for Real-Time Anomaly Detection and Prevention .....                                          | 258 |
| <i>Fen Zhao, Haifei Zhang, Lingling Zheng, Wenjie Xiao, Jie Zhu, Shiyue Zhang</i>                                                  |     |
| A Method for Constructing Traditional Chinese Medicine Knowledge Graphs via LoRa Fine-Tuning and Prompt Engineering .....          | 263 |
| <i>Kehao Qin, Zhaoran Dong, Jing Xiong, Jianguo Liang</i>                                                                          |     |
| Smoke Pack Appearance Defect Detection Based on Improved YOLOv8 Model .....                                                        | 269 |
| <i>Yaguang Yan, Shengzai Jia, Jie Wang, Yu Sun, Xiaoqing Yang, Chuntao Rao</i>                                                     |     |

| E2E-AKA: A Secure End-to-End Authentication and Key Agreement Scheme for BDS .....                                             | 534 |
| <i>Jiajie Jin, Weixiang Zhang, Hao Qin, Lin Qi, Guodong Wei</i>                                                                |     |
| Contrastive View-Consistent Graph-Mamba for POI Recommendation .....                                                           | 539 |
| <i>Keyan Cao, Xiangyu Xie, Zhongyang Wang, Xinlei Wang</i>                                                                     |     |
| Design and Deployment of An LLM Framework for Duplicate Request Early Warning .....                                            | 544 |
| <i>Yanan Zhang, Xiang Gao, Ting Ye, Junwei Wang, Yinqing Zhu, Minqian Pu</i>                                                   |     |
| A Semi-Quantum Protocol for Multi-Party Simultaneous Ascending Auctions .....                                                  | 549 |
| <i>Xiuqi Wu, Yu Yang, Baichang Wang, Yunguang Han</i>                                                                          |     |

|                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------|-----|
| A Measurement-Device-Independent Dynamic Quantum Secret Sharing Protocol Based on Hyperentanglement .....                 | 557 |
| <i>Yu Yang, Xiuqi Wu, Baichang Wang, Yunguang Han</i>                                                                     |     |
| An Efficient CNN Model for Reconstructing Sea Surface Temperature .....                                                   | 566 |
| <i>Na Wu, Xiyu Yu, Qingliang Liu, Shanliang Zhu</i>                                                                       |     |
| Encrypted Watermarking in Federated Learning for Ownership Verification in Edge Computing Scenarios .....                 | 572 |
| <i>Yujie Zhang, Deyu Lin, Yufei Zhao, Yongliang Guan</i>                                                                  |     |
| A Malicious Node-Resistant Task Offloading Strategy for Edge Computing .....                                              | 577 |
| <i>Zhe Liu, Yujie Zhang, Deyu Lin, Yufei Zhao, Yong Liang Guan</i>                                                        |     |
| A Consortium Blockchain and Homomorphic Encryption Based Privacy Preserving Model for Power Transaction Data .....        | 583 |
| <i>Xi Luo, Letian He, Songbo Qiao, Juntao Huang, Xiao Wei, Congcong Yao</i>                                               |     |
| A Conv-LSTM-SA Model Based on Hybrid Deep Learning for Daily Natural Gas Consumption Forecasting .....                    | 589 |
| <i>Ming Zhu, Chengping Cui, Yan Ji, Chengyuan Zhu</i>                                                                     |     |
| Searchable Homomorphic Encryption Scheme for Blockchain Data Sharing .....                                                | 594 |
| <i>Chunpeng Fang, Mengyao Liang</i>                                                                                       |     |
| Refined Crack Detection in Freeway Tunnels Using PSPNet and Enhanced Skeleton Extraction .....                            | 601 |
| <i>Fuyong Pan, Zizhen Xu, Tiangang Gao, Yue Han, Houzhen Sun, Xia Xue, Yanpeng Zhao</i>                                   |     |
| Multi-KGC Pairing-free Certificateless Dynamic Multi-Replica Auditing Scheme .....                                        | 608 |
| <i>Fen Chen, Lei Zhou, Chunfei Pan, Kang Zhang, Xiao Yang, Fenglian Yuan</i>                                              |     |
| Fault-Tolerant Multi-Protocol IoT Gateway with Resumable Transfer and Watchdog Orchestration .....                        | 616 |
| <i>Jianguo Yan, Yu Zhao, Wei Zhu, Yifan Ying</i>                                                                          |     |
| Multi-Source Heterogeneous Data Fusion Methods for Intelligent Decision-Making Systems in Construction Engineering .....  | 622 |
| <i>Qing Xu, Tieqiang Yin, Chao Pan, Jian Tian</i>                                                                         |     |
| A Game Theory-Based Proactive Defense Mechanism for Link Prediction Attacks .....                                         | 627 |
| <i>Zhihao Xu, Dawen Huang</i>                                                                                             |     |
| The Semantic Fusion Communication Method for Heterogeneous Security Events Based on Generative Adversarial Networks ..... | 634 |
| <i>Huixun Li, Shaodong Feng, Baozhu Zhao</i>                                                                              |     |
| Revocable CP-ABE with En-DKER from Lattices .....                                                                         | 639 |
| <i>Chengliang Wei, Yuyan Guo, Juanjuan Li, Yudi Li</i>                                                                    |     |
| An RGB-D Multi-modal Apple Recognition and Instance Segmentation Method for Orchard Harvesting .....                      | 647 |
| <i>Mingji Yang, Da Teng</i>                                                                                               |     |
| Zero-Knowledge Proof-Enabled LLM-Driven Fusion of Privacy-Sensitive Heterogeneous Sensor Data in Edge Environments .....  | 653 |
| <i>Honghao Wu, Juan Sun</i>                                                                                               |     |

|                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Weed Detection Method in Complex Scenarios Based on Improved YOLOv11 .....                                                                              | 658 |
| <i>Mingji Yang, Shijie Hu</i>                                                                                                                           |     |
| Evaluating LLM-based Role-playing Agent Authenticity via Event-driven Response Simulation: A<br>Benchmark on Real-World Events Responses .....          | 664 |
| <i>Jiaqing Zhou, Bohan Jiang, Ruoyuan Gong, Hao Jiang</i>                                                                                               |     |
| Two-layer Random Forest Regression with OPTICS Clustering for Typhoon Forecasting .....                                                                 | 670 |
| <i>Ming Zeng, Wenjie Zhou, Qiang Xu, Xiang Gong, Cong Zhou</i>                                                                                          |     |
| A Global Cognitive Contextualization Framework for Enhanced Multimodal Emotion Recognition .....                                                        | 676 |
| <i>Jiayi Chen, Jun Xie, Feng Chen, Zhepeng Wang, Xinming Wang, Sheng Jin</i>                                                                            |     |
| EEG2Intent: A Self-Supervised Masked Learning Framework Augmented by Large Language Models<br>for Driving Intent Prediction .....                       | 681 |
| <i>Junqi Si, Zhuoling Cheng, Qian Chen, Qiran Li, Jihui Tu</i>                                                                                          |     |
| A Hierarchical Multi-Agent Reinforcement Learning Approach for Intelligent Decision-Making in<br>Simulation Environment .....                           | 687 |
| <i>Chen Li, Wenhan Dong, Lei He, Pin Zhang, Yang Li</i>                                                                                                 |     |
| A Knowledge-Enhanced Trajectory Prediction Framework via Large Language Models and Vectorized<br>Feature Exchange .....                                 | 692 |
| <i>Qiran Li, Qian Chen, Chengli Jian, Jihui Tu</i>                                                                                                      |     |
| Non Proportional Integral Derivative Control Methods to Active Learning Directed Evolution for AGI:<br>Enabling Specific Pharmaceutical Synthesis ..... | 698 |
| <i>Weichen Hou, Jinyang Xie, Mingliang Dou</i>                                                                                                          |     |
| Time Series Forecasting Model for Vibration Cabinets based on BiLSTM Model .....                                                                        | 703 |
| <i>QingJing Zhang</i>                                                                                                                                   |     |
